(DEC. 3) UPI - Dozens of army officers rebelled in Argentina early this morning, seizing the main building of the army command headquarters and the capital's 1st Regiment barracks. Radio reports said other rebels apparently seized the Marine Prefecture of the port of Buenos Aires, as well as a tank factory in the Buenos Aires suburb of Bologne. Army spokesmen said three soldiers were killed in skirmishing. According to the spokesman, another six soldiers were wounded.

President Carlos Menem reportedly is holed up in his office at the downtown government palace only a half block from the captured army command headquarters. Menem declared a state of siege, which suspends some constitutional rights and allows police to make arrests without a warrant.

After a brief arrival ceremony in Brazil today, President Bush and Brazilian President Fernando Collor de Mello sat down for a working meeting. Bush arrived today in Brazil, kicking off a five-nation South American trip. Shortly after Bush arrived, news of the military mutiny in Argentina threatened to disrupt the trip. But a senior U-S official traveling with Bush said the situation in Argentina appeared to be ''an internal military squabble.'' Presidential assistant Andrew Card told reporters that there was ''NO contemplation of any change'' in Bush's plans to visit Argentina Wednesday.

The jury in the case of two youths charged in the rape of a Central Park jogger resume their deliberations today. Late yesterday, the jury asked to hear testimony from two police officers who arrested the teens. The testimony will be read back after the jury resumes deliberations this morning. Then they are expected to watch a videotaped confession from one of the defendants.

More than 35-hundred Lebanese soldiers took up positions in various parts of Beirut today, replacing thousands of Christian and Moslem militiamen who

engaged in bloody battles for the control of the city since 1975. Military sources said four army brigades started to expand control from their barracks around the city to fill the security vacuum left by the militiamen.

A winter storm is blasting the Midwest this morning. Snow, sleet and rain is reported in Iowa, Illinois and Michigan. Parts of Illinois could receive a foot of snow, and travel in the city of Chicago is hazardous for rush hour. At least 35-thousand electric customers in the Chicago area are without electric service. Winds downed power lines in the Detroit area, knocking out power to about 55-hundred customers.

Today is the day that New Mexico climatologist Iben Browning said was the most likely for an earthquake in the Midwest along the New Madrid fault. All over the Midwest, businesses and schools have held earthquake drills. People have stocked up on supplies, prepared their homes structurally and bought Millions of dollars worth of earthquake insurance.

BOSTON (DEC. 3) UPI - The author of a book on the 1969 Chappaquiddick

accident in which Mary Jo Kopechne died in Sen. Edward Kennedy's car is eager for a suit filed against him by an investigator in the case to go to trial, a published report said Monday.

Bernard Flynn, a retired state police detective who investigated Kopechne's death for the Barnstable County District Attorney's Office, filed the suit in Barnstable District Court in June against Leo Damore, the author of ''Senatorial Privilege.''

The book examines the July 18, 1969, accident in which the Massachusetts senator's car went off a wooden bridge linking Chappaquiddick island and Martha's Vineyard.

Kopechne, 28, a passenger in the car, was unable to get out and drowned as the car sank. Kennedy managed to get out but said he was unable to rescue Kopechne despite several attempts.

Kopechne, of Kingston, Pa., had been an aide to Kennedy's late brother, Robert.

The book quotes Flynn as saying he met secretly on at least two occasions with Kennedy's brother-in-law, Stephen Smith, and lawyer Herbert J. Miller to inform them of the district attorney's probe of the mishap.

Flynn, of Falmouth, claims that prior to the start of an inquest, he turned over to Smith and Miller police investigatory reports on Kopechne's drowning.

In his suit, Flynn seeks $50,000 he claims Damore verbally promised him for information used in the book. Damore denies he promised to pay Flynn for the information and said he only promised to pay him $1,000 for expenses.

Damore, of Old Saybrook, Conn., told the Boston Herald in a report published Monday that he is eager to have the dispute resolved in court.

''I want to see him get up in a court of law and say, 'Yeah, I stole the evidence out of the DA's office and turned the information over to Steven Smith, and ultimately to Ted Kennedy so he could walk into an inquest and know the questions, and more importantly, know the answers. ''' Damore said.

''He stacked the cards of the inquest for Ted Kennedy,'' Damore said. ''He conspired to obstruct justice. He decided to inflict himself on history and now he wants to be paid for it?''

Kennedy eventually was exonerated of any criminal responsibility in the mishap.

Damore said he previously told Flynn he would not be paid for his information because to do so would ''taint the information, taint the book, but more importantly, it will taint you (Flynn).''

Flynn's suit is scheduled for trial Jan. 11.

#90337u0795 12/03/1990 ~United Press International
WASHINGTON (DEC. 3) UPI - Defense Secretary Dick Cheney cautioned congressional critics of the Bush administration's Persian Gulf policy Monday that there is no guarantee that waiting for sanctions to work will get Saddam Hussein out of Kuwait.

''The evidence is not all on the side of, we can wait indefinitely for sanctions to work,'' Cheney told the Senate Armed Services Committee whose hearings have helped trigger calls by some congressional Democrats to give sanctions against Iraq an extensive period to work.

Cheney, who appeared before the committee with Colin Powell, chairman of the Joint Chiefs of Staff, said that if Saddam is allowed to retain Kuwait then ''we've got a hell of a problem'' because of his ability to dominate world oil reserves and influence the world economy.

Cheney said it would be ''far better for us to deal with him now'' when the international coalition is solidified against Saddam ''than it would be for us to deal with him five or 10 years down the road.''

The defense secretary said the approach of relying soley on sanctions ''would give Saddam a long breathing space in which he could concentrate his efforts. Because he could ignore the possibility of a military option, he could use the breathing space to work around the embargo, break up the alliance, enhance his military strength in Kuwait and move ahead on his nuclear weapons program.''

''Those who would have us rely indefinitely on economic sanctions alone need to face the possibility that they will fail to achieve our aims. Such a failure would have very serious consequences and those consequences must also be faced. ... We must not create a false dichotomy between sanctions and a military option. They are mutually reinforcing parts of a broad strategy to get Iraq out of Kuwait,'' said Cheney.

Cheney said that ''in excess of 70 percent of the world's proven oil reserves resides in the Persian Gulf, contrasted with some 3 percent in the United States, 6 percent in the Soviet Union.''

''There shouldn't be any doubt about the consequences of allowing a man like Saddam Hussein to control the world's supply of energy,'' Cheney said. ''Obviously, were he to do so, he'd have a choke hold on the world's economy; he would be able to control production levels and price; he'd be in a position to blackmail any nation, which chose not to do his bidding.''

Cheney also said of more concern than Saddam's ability to control price and

production, is ''what he does with his oil well,'' adding that Saddam would be able to ''use the revenues ... in ways that would be threateneing to the rest of the world.''

#90337u0804 12/03/1990 ~United Press International

(DEC. 3) UPI - The Argentine army command has released a statement saying that about 50 officers were involved in an uprising this morning. It said the rebels captured only ''part'' of the command headquarters and 1st Regiment barracks. But witnesses said it appeared that insurgents controlled both facilities entirely and blocked the grounds to reporters. Army spokesmen said three soldiers were killed and six wounded in the fighting that occurred just two days before President Bush is due to visit the nation.

Shortly after arriving in Brazil this morning, President Bush was asked about the situation in Argentina. He answered ''I have no thoughts of changing my plans. I have great confidence in the security there.'' Bush met with Brazil's president, and the two opened their meeting with a discussion of the Persian Gulf crisis and its economic implications. Bush plans to visit five South American nations.

Continental Airlines filed for Chapter 11 bankruptcy today, the second such filing for the carrier in seven years. Contiental cited dramatic jumps in fuel costs and highly leveraged debt as reasons for today's action. The Houston-based airline pledged NO disruption of service. However, the airline announced that it would sell its Seattle- Tacoma to Tokyo route to American Airlines for 150 Million dollars and said it has withdrawn other Pacific operations from the market.

A strong winter storm slammed the Midwest with rain, snow and ice today, knocking out power and tangling traffic as it moved east, where flood warnings are in effect. The storm was the first major taste of winter weather for northern Illinois, where 50 mile an hour gusts and up to 12 inches of snow were possible. The weather bureau said travel would be dangerous and could become impossible at times, especially near the Wisconsin border.

The astronauts aboard the space shuttle Columbia are doing some troubleshooting today. The crew is having problems activating one of the telescopes and there's trouble with the European-built Instrument Pointing System. The work delayed the start of routine science observations, but engineers are optimistic about resolving the problems.

Parties in Chancellor Helmut Kohl's center-right coalition sat down today to analyze the results from yesterday's all-German election before they start haggling over cabinet posts. The coalition parties received a comfortable majority of 54-point-eight percent of the vote, which will give them 398 seats in the 656-strong all-German parliament.

Amnesty International charged today that more than five-thousand people have been executed in Iran during the last three years. In a report released today, the organization accused the Iranian government of conducting what it called ''the most horrific wave of politcal executions since the early 1980's.'' The group said many people were sent to the gallows without trial and with only a cursory interrogation by a so-called ''Death Commission.''

#90337u0808 12/03/1990 ~United Press International

WASHINGTON (DEC. 3) UPI - The Supreme Court Monday agreed to decide if police are under more legal restrictions when they conduct a search with the full consent of a suspect than when they first obtain a search warrant.

The court agreed to hear an appeal by the state of Florida after that state's highest court said a consensual search of a car for drugs did not allow police to open a paper bag on the floor of the car.

Police found cocaine in the bag, but a trial court and the Florida Supreme Court threw out the evidence on the grounds that police had not received permission to extend the search from the car itself to the paper bag.

Courts have generally drawn a distinction between a search based on a warrant and a search based only on consent.

The Florida courts held that a consensual search is not legally considered to be based on probable cause - the key component in a court's issuing a warrant - and thus police do not have permission to conduct the same vast search as would be allowed by a warrant.

The state of Florida, in asking the high court to hear its appeal, argued that the ''proper interpretation of the scope of a consent search is that it is just as broad as a search based on warrant or probable cause.''

The Supreme Court in a 1982 case ruled that when a ''legitimate search is under way, and when its purpose and its limits have been precisely defined, nice distinctions between closets, drawers, and containers in the case of a home, or between glove compartments, upholstered seats, trunks, and wrapped packages, in the case of a vehicle, must give way to the interest in the prompt and efficient completion of the task at hand.''

Florida cited that case in arguing that a search based on the consent of a suspect should extend from a car to the packages inside. In that case the Supreme Court ruled that police who stop a car based on ''probable cause'' that drugs are being carried can conduct a warrantless search of the car, including compartments and containers, comparable to the search rights police would have obtained with a warrant.

That case, however, involved a tip from a reliable drug informant. In this case, Florida's courts held there was no ''probable cause'' and the entire search was based simply on consent.

The case involves the arrest of Enio Jimeno and his wife, Luz Piedad Jimeno, after a traffic stop in Dade County, Fla.

A police officer watched Enio Jimeno make a phone call and consult his beeper, overheard a conversation and became suspicious Jimeno might be involved in drug sales. Jimeno left the scene and the officer followed him, saw him enter and leave an apartment with a package, and then pulled Jimeno's car over for turning right at a red light without coming to a complete stop.

Jimeno and his wife, sitting in the front passenger side of the car, consented to a search of the car. The officer found a brown paper bag on the floor of the car. Although the Jimenos never specifically consented to search of the bag - and the officer never asked their permission - he opened the bag.

Florida courts later threw out the evidence.

A decision by the high court in the case is expected sometime next year.

#90337u0809 12/03/1990 ~United Press International

TOKYO (DEC. 3) UPI - The Finance Ministry has decided to allow foreign investors to purchase stock in Nippon Telegraph and Telephone Corp. and will release 500,000 to 1 million shares annually over a 5- to 10-year period starting in fiscal 1991, Kyodo News Service reported Monday.

The Finance Ministry has so far sold 5.4 million of a total of 15.6 million NTT shares over the last three years.

Existing law requires the government to hold one third - or 5.2 million shares - in NTT, the world's largest telecommunications company. Foreign investors currently are barred from acquiring NTT shares.

The government plans to revise the law, allowing foreign investors to purchase the NTT stock, Kyodo said.

TOKYO (DEC. 3) UPI - Reflecting strong demand for new products and unusually warm weather, Japan's domestic shipments of beer in November hit a record high

of 36.66 million cases, each containing 20 bottles, up 11.0 percent over a year ago, the association of beer brewers reported Monday.

The association said shipments for the January-November period also gained 9.0 percent over a year ago to 454.6 million cases.

In view of brisk sales expected in December, a major gift sending season, domestic beer shipments for the whole of 1990 are certain to top a record 500 million cases, association officials said.

#90337u0829 12/03/1990 ~United Press International

WASHINGTON (DEC. 3) UPI - The Supreme Court let stand Monday a decision that automobile dealers in one state can be sued by a neighboring state for false and misleading advertising.

The court refused to consider an appeal by four Omaha, Neb., dealerships sued for false advertising in Iowa. The suit was based largely on advertisements placed in a Nebraska newspaper with limited circulation in Council Bluffs, Iowa, which is across the Missouri River from Omaha.

The suit also contended advertisements placed in a telephone book and with television stations violated Iowa law.

The dealers contended they complied fully with Nebraska law where they conducted business - and thus should not be liable for suit in Iowa.

The Iowa Supreme Court, however, upheld a lower court ruling that the dealerships had enough contact with Iowa residents to justify a suit alleging false advertising under the Iowa Consumer Fraud Act, the Iowa Consumer Credit Code and the federal Truth-In-Lending Act.

The dealerships claimed they had no control over circulation of the Omaha World Herald, where the advertisements were placed.

They also contended that less than 2 percent of the newspaper's total circulation reaches Iowa residents, a figure too small to justify minimum contact needed to permit such a suit. They said the prosecution violated their rights to due process under the law.

But the state of Iowa claimed more than 11 percent of the newspaper's circulation is in Iowa, and that the dealers' advertisements appear on ''almost a daily basis'' in the ''Iowa edition'' of the newspaper delivered to Iowa residents.

''The Iowa contacts of these motor vehicle distributorships are sufficient to subject them to the personal jurisdiction of Iowa courts,'' the state argued.

''The dealers' efforts to serve the Iowa market through their advertisements in Iowa, and their location in a metropolitan area that is comprised, in part, of Iowa residents, are such that the dealers can reasonably anticipate being hauled into court in Iowa, particularly for actions concerning those very advertisements,'' the state wrote in its brief to the high court.

The dealers, however, disputed the state's contention of ''almost daily'' advertisements in the newspaper, noting that Iowa cited, for example, only 20 advertisements by one of the dealers over a nine-month period, along with advertisements on a Nebraska television station that reaches into Iowa.

''If the Iowa Supreme Court decision is allowed to stand, it will have a serious impact upon interstate commerce and the First Amendment rights of Nebraskans,'' the dealers wrote the high court.

''It would give the attorney general of the state of Iowa unprecedented power to regulate activities of other states by enforcing Iowa law beyond the borders of Iowa,'' the dealers continued. ''Such regulation would be an impermissible burden upon interstate commerce, in addition to the chilling effect upon the First Amendment rights through the regulation by Iowa of a Nebraska newspaper.

''Where, as here, the laws of two states conflict, the law of the state with the greater interest in the subject matter should be applied, '' the dealers wrote. ''It is clear that Nebraska interests are superior in this case.''

#90337u0904 12/03/1990 ~United Press International

WASHINGTON (DEC. 3) UPI - The Supreme Court Monday let stand the decision of Mississippi officials to suspend the medical license of a doctor on the grounds of mental instability, despite conflicting testimony from psychiatrists about whether the doctor was mentally ill.

The court refused to review a decision by the 5th U.S. Circuit Court of Appeals that the Mississippi Medical Licensure Board was within its rights in 1987 when it suspended the license of Dr. Majd Pour, a doctor at Tunica Hospital.

Pour, whose three-year license suspension ended last March, claims the loss of the right to practice medicine is such a drastic measure that medical

licensing boards should be required to meet a ''clear and convincing'' evidence standard before suspending a license.

He contends the licensing board violated his 14th Amendment assurance of due process under the law.

Pour also asked the court to rule that due process would preclude a state from suspending a doctor's license because of a finding of mental illness, unless there was also evidence that the illness affected his or her ability to safely practice medicine.

The 5th Circuit ruled, however, that the Supreme Court in the past had limited the ''clear and convincing'' evidence standard of proof to ''proceedings involving termination of parental rights, involuntary commitment of the mentally ill, deportation of aliens, and denaturalization.''

''Although Dr. Majd contends that he has a liberty interest in practicing medicine and a property interest in his medical license, he does not contend that the Board's action interfered with any 'fundamental' right. ... The Supreme Court has not chosen to extend the 'clear and convincing' standard of proof to state medical licensing board decisions, and we decline to do so in this case.''

In proceedings before the board, some psychiatrists said Pour suffered from mental illness, while others said he was perfectly sane and no hazard to patients.

The 5th Circuit ruled that as a matter of procedural due process, ''the Constitution requires only that the Board's decision to suspend Dr. Majd's license be supported by 'some evidence' in the record.''

In another case Monday, the court let stand the decision of the Supreme Court of Illinois that hospital and hospital employees in that state have ''absolute immunity'' from civil liability for the conduct of hospital review committees.

That case involved a civil suit filed by Dr. Michael S. Cardwell, after being forced by a review panel at the Rockford Memorial Hospital in 1985 to undergo a psychiatric evaluation.

The courts held that state law precluded collecting damages in such a suit.

#90337u0910 12/03/1990 ~United Press International

HOUSTON (DEC. 3) UPI - Domestic drilling rates remained unchanged last week,

but offshore activity increased in most areas of the world, industry monitors reported.

The number of U.S. rotary rigs stayed even at 1,175, compared with 1, 062 the same week a year ago, Baker Hughes Inc. reported Sunday.

One more offshore rig went to work in the Gulf of Mexico, but an oversupply of rigs left the utilization rate in that area at ''a relatively soft'' 71.2 percent, with 151 of 212 rigs working, Offshore Data Services reported.

Activity in European waters remained steady for the third consecutive week, with 128 rigs working out of a fleet of 137, for a 93.4 percent utilization rate, ODS said.

Four rigs went back to work last week, boosting the worldwide utilization rate to 83.7 percent - the highest level since December 1985 - with 559 rigs working out of a total fleet of 668, ODS reported.

Other rig counts included Louisiana, 158 last week, 167 the week before and 159 the same week a year ago; Oklahoma, 153, 140 and 147; New Mexico, 68, 68 and 51; Texas, 418, 426 and 339; and Canada, 189; 186 and 128.

#90337u0922 12/03/1990 ~United Press International

WASHINGTON (DEC. 3) UPI - The Supreme Court Monday let stand a decision that police, in some situations, have fewer rights to be issued Miranda warnings against self incrimination than do civilians.

The court refused to consider an appeal from Morgan County, Colo., Sheriff's Deputy Daniel Probasco, charged with criminally negligent homicide after a shooting while he was on duty. The charges were based in part on statements he made to police who came to his assistance.

Probasco contends he should have been told of his legal right to remain silent before being asked to explain the situation to colleagues at the scene, a warning that police would have been required to give to a civilian in the same situation.

A trial court agreed, ordering Probasco's statements thrown out of court.

But the Supreme Court of Colorado, in a divided opinion, allowed Probasco's statements to be included at trial, ruling that although the statements were made inside a police car, the sheriff's deputy was not legally in custody.

''The fact that Probasco was a police officer makes this situation unique,'' the court wrote.

Early on the morning of July 15, 1989, Probasco radioed that he was making a traffic stop. Minutes later he requested assistance, and officers from both the sheriff's department and the Fort Morgan Police Department arrived on the scene. They found Probasco kneeling over the body of Daniel E. Smith, who had been shot and later died.

According to police, Probasco twice said he would not discuss what happened. The officer in charge of the investigation said Probasco was ''overwhelmed'' by the situation, and he asked another officer to take him back to Probasco's patrol car and wait there.

Other officers eventually joined Probasco inside his car. One officer, who said he had seen Probasco's radio and baton on the porch of a nearby house, asked him ''how his stick and his radio wound up on the porch?''

Probasco then told police he stopped the driver, who shoved him and fled on foot. When Probasco found the man hiding under some bushes, he drew his service weapon and told Smith not to move. He said Smith then rose up and ''struck the end of his weapon and the weapon went off on him.''

The Miranda rule is based on a 1966 Supreme Court decision requiring police to inform a suspect of his or her right to remain silent before questioning and the right to the advice of a lawyer before any custodial interrogation.

The state of Colorado contended that Probasco was not technically in ''custody'' at the time of his statements. The Supreme Court of Colorado agreed.

''The trial court stated that a reasonable person sitting in a police car and surrounded by three other officers would feel that his freedom is curtailed,'' wrote the state's highest court. ''(But) in this case, the defendant was asked to sit in his police car, which is not a 'coercive environment.' A reasonable police officer, under these circumstances, would believe that he was simply following the orders of a superior in his place of employment.''

But in a dissenting opinion, two judges said the fact that Probasco was a law enforcement officer should not preclude him from the same legal protection of civilians.

''The trial court's ruling in this case is totally consistent with the principle that in highly stressful situations, such as a custodial interrogation, a suspect's abstract knowledge of his rights well might be less important than his ability to cope with the pressures of the situation,'' the dissenting opinion stated.

Probasco's lawyer asked the high court to take the appeal, noting that ''the issue of what constitutes 'custody' when the suspect is a peace officer has not been decided by this court.''

#90337u0929 12/03/1990 ~United Press International
NEW YORK (DEC. 3) UPI - Latest metal market prices as quoted Monday by the American Metal Market, authoritative metals publication:

Aluminum, New York Merchants, 99.7 percent pure ingots 70.00-72.00 c- lb.

Antimony, domestic, refined in alloy, $2.00 lb.

Copper, electrolytic wirebars, delivered U.S. (Warrenton Refining Co.) 116.63-120.00 c-lb.

Lead, common, U.S. primary producers 37.00-45.00 c-lb.; U.S. non- primary (secondary) producers 40.00-45.00 c-lb.

Magnesium, 99.8 percent, ingot 163.00 c-lb.

Manganese, 99.9 percent, boxed regular 91.00-95.00 c-lb.

Mercury, $192.00-$210.00 76-lb. flask.

Nickel, briquettes delivered to customers, merchant, N.Y., $4.50-4.75 per pound.

Palladium, N.Y. Am. Met. Mkt. dealer $94.00-$96.50 per troy ounce.

Platinum, soft, 99.5 fine, producer - $425.00-$431.00; dealer-approx. , $425.00-$450.00 per troy ounce.

Steel, No. 1 heavy melt scrap - Pittsburgh $105.00-$109.00 per gross ton (consumer buying price); Am. Met. Mkt. composite scrap price $105.67 per ton.

Tin, N.Y. Am. Met. Mkt. ex-dock - 284.75 c lb.

Titanium, aircraft quality, 8 1/8 inch round rotating billet, f.o.b. shipping point $7.80-9.59 lbs., domestic sponge 99.3 percent, domestic and imported duty-paid $5.00-5.50 lb.

Tungsten powder (H-Red), 99.9 percent minimum pure $10.00 per lb.

Zinc, prime western, U.S. 80.00 c-lb.

#90337u0933 12/03/1990 ~United Press International

WASHINGTON (DEC. 3) UPI - The Supreme Court Monday refused to interrupt ongoing efforts to resolve a dispute over regulations governing abortion clinics in Illinois.

The court denied a request to step into the case only one day before oral arguments were scheduled to be heard in the 7th U.S. Circuit Court of Appeals.

Anti-abortion forces petitioned the high court in an effort to stave off the hearing that could lead to final implementation of new regulations that resulted from an out-of-court settlement of an earlier dispute.

The regulations dramatically decrease proposed restrictions on abortion clinics. The stringent restrictions had been legally challenged and struck down by lower courts.

The high court was asked to hear an appeal-before-judgment by abortion opponents who claim the out-of-court settlement violates state rights by allowing legislatively enacted regulations to be amended without the legislature's approval.

The case grew out of another case that technically remains before the Supreme Court. Last term, the court deferred oral arguments in that case when Illinois officials agreed to consider a settlement proposal with pro-abortion factions, who had brought the suit.

The initially proposed regulations, which were never implemented, included the state's Ambulatory Surgical Treatment Center Act, the Health Facilities Planning Act and the Medical Practice Act.

Taken together, the acts presented a complex regulatory scheme that would have required extensive additions to abortion clinics such as elaborate heating, cooling and ventilation systems such as found in sophisticated operating rooms that were designed to accommodate major surgical procedures not minor procedures such as early abortions - one of the safest of outpatient procedures.

The 7th Circuit barred the state from implementing the regulations, bringing the initial case to the Supreme Court.

In a settlement finalized this summer, those regulations were loosened considerably.

But anti-abortion forces then stepped in and took legal action. They now claim that without the stricter guidelines there is no guarantee abortions in the state are being performed safely.

They asked the high court to outlaw the consent decree because it was enacted

without the approval of the Illinois General Assembly.

''Regardless of how you feel about this particular issue, pro-choice activists can no more rewrite medical regulations concerning women seeking abortion than polluters can rewrite environmental law,'' said Craig Greenwood, an attorney for the anti-abortion forces. ''Private citizens just cannot rewrite law.''

Greenwood said he asked the high court to step in before the 7th Circuit could rule because he would appeal a loss there to the Supreme Court anyway.

''Why should we go through this process, which could take another year?'' he said.

The 7th Circuit is scheduled to hold a hearing on the regulations Tuesday.

WASHINGTON (DEC. 3) UPI - The Supreme Court Monday let stand the cocaine conviction of a Missouri woman based on evidence police found after searching inside a purse that was recovered after she reported it stolen.

Ella Sumlin had asked the high court to throw out the eight-year prison term she received last year on drug and handgun charges stemming from evidence found in the search.

Sumlin contends the cocaine was not hers and could have been planted in the purse by the robber or police, and that regardless, police had no right to search the closed cigarette case where the drugs were found.

The Supreme Court, however, refused to review a decision by the 8th U.S. Circuit Court of Appeals that the search was reasonable based on the circumstances.

The appeals court also held that a jury could reasonably have found that the cigarette case - and some 60 grams of cocaine hidden inside - belonged to Sumlin, despite her denials and a police failure to find her fingerprints on the evidence.

On May 4, 1987, Sumlin was getting out of her car in a garage at her home in Sikeston, Mo., when she claims she was attacked by a masked man who snatched her purse. She grabbed a gun from inside the car and shot at the man, who fled toward an alley behind the home.

Neighbors reported gunshots to the police. Sumlin drove to the grocery and package store she operated nearby, where police took a statement in which she

described the purse and its contents, including a .38-caliber Colt revolver, complete with serial number.

A police officer found a blue purse behind Sumlin's home about 20 minutes after the assault. He testified he searched the purse to determine for sure if it was Sumlin's and found a bankbook and the revolver, along with a closed cigarette case.

The officer opened the cigarette case, he said, in hopes of finding a driver's license or credit cards to confirm ownership, but instead found nearly 60 grams of cocaine packaged in small amounts.

Testimony conflicted over whether the officer searched the cigarette case before or after identifying the other items. Sumlin claimed her purse was black, not blue like the one found.

On April 5, 1989, Sumlin was convicted of possession of cocaine with intent to distribute and carrying a firearm in commission of a felony.

She was sentenced to three years in prison on the cocaine charge and five years - without probation or parole - on the firearms charge.

Sumlin's attorneys contend the search of the recovered stolen purse went beyond identification purposes, and without a warrant violated her Fourth Amendment protection against unreasonable searches and seizures.

They also said the break in the chain-of-custody - Sumlin did not have the purse for some 20 minutes after it was stolen - preclude her conviction for possessing the cocaine.

(DEC. 3) UPI - Small-arms fire is being heard in parts of Buenos Aires, Argentina, this morning as loyalist army forces try to put down a rebellion by rival military forces. The army reports that three soldiers have died and another six were wounded in the action. Argentine President Carlos Menem has declared a state of siege in what has become a political embarrassment for him. The uprising... Argentina's fourth since democracy returned in 1983... comes just two days before President Bush is to arrive for a state visit.

President Bush is in Brazil for the start of a five-nation South American tour. And he is expected to deliver his most imporant speech of the trip while in South America's largest country. Bush is to outline what is being called an ''initiative to the Americas,'' detailing the growing role that Latin America has in U-S policy. Bush has spent the last two weeks in trips to Europe, the Middle East and Mexico.

Defense Secretary Cheney says there is NO guarantee that waiting for economic sanctions to work will get Saddam Hussein out of Kuwait. Cheney told the Senate Armed Services Committee this morning that it would be- quoting now- ''far better for use to deal with him now'' with a unified front than five or 10 years down the road.

The shuttle Columbia is high overhead today with the crew trying to get a telescope aiming system back on line. Ground controllers sent new computer instruction up to the shuttle but report only partial success. The 10-day mission is already six months late because of repeated fuel leaks aboard Columbia. It is centered around a 150-Million-dollar series of telescopes that are sensitive to X-rays and ultra-violet light emissions normally blocked by the Earth's atmosphere.

Thousands of Lebanese army troops deployed through the capital city of Beirut today, replacing the Christian and Moslem militiamen who had occupied the city and battled for control of it since 1975. More than 35-hundred Lebanese soldiers moved into positions in the city, where residents have endured lawlessness and periodic fighting in the civil war. A Lebanese Defense Ministry statement announced the withdrawal of the last militia units today.

Rival black factions armed with guns and axes battled overnight in a black township east of Johannesburg, and police reported today that at least 45 people have been killed. The latest violence in the township erupted yesterday. It is the latest outburst of trouble between backers of the African National Congress and the Inkatha movement.

The holding company for Houston-based Continental Airlines has flown itself back into Chapter 11 bankruptcy protection for the second time in seven years. The actual papers were filed in Wilmington, Delaware. Continental says there will be NO disruption of service while it works under court protection to come up with a new payment plan for creditors. Heavy debt is given as one reason for the bankruptcy filing... that, and a 125 percent increase in jet aviation fuel costs following Iraq's takeover of Kuwait.

#90337u0985 12/03/1990 ~United Press International

MOSCOW (DEC. 3) UPI - The Russian Federation's legislature, continuing to implement radical economic change in the largest Soviet republic, voted Monday to allow individuals to buy, sell and own private property.

The new law, part of a comprehensive agrarian reform package, gives local governments substantial control over all land transactions.

Limitations placed on the law do not permit the full freedom of property ownership enjoyed in the West, but it grants greater liberty than allowed in the giant Russian republic since the 1930s when Josef Stalin nationalized all land in his brutal collectivization drive.

The measure sanctions private ownership, says land must be held for at least 10 years before it can be sold and requires an owner to sell the land only to the local government that has jurisdiction where it is located.

The Russian Congress of People's Deputies, in its second week of session, approved the law by a 602-369 vote with 40 abstentions.

WASHINGTON (DEC. 3) UPI - The value of new construction increased in October to an annual rate of $434.4 billion from a revised $428.9 billion in September the Commerce Department said Monday.

For the first ten months of the year, the value of new construction put in place totaled $369.4 billion, up from $361.4 billion during the like 1989 period. Spending on new housing construction was at an annualized rate of $121.5 billion in October, down from an estimated $123.3 billion in September.

Nonresidential building was put in place at an annualized rate of $102 billion down from $102.8 billion the month before and the lowest level since last December.

Public construction was put in place at an annualized rate of $117.8 billion, up eight percent from a rate of $109.4 billion in September. October's spending topped the previous record of $115.8 billion set in August.

Overall residential construction spending, including that for single- and multi-family units, totalled an annualized rate of $179.5 billion in October, the lowest level since March 1986, when total residential construction was valued at $177.4 billion.

#90337u1009 12/03/1990 ~United Press International

WASHINGTON (DEC. 3) UPI - The Air Force announced Monday that Air Force Reserve and Air National Guard fighter and support units have been alerted for an upcoming call-up in support of Operation Desert Shield in the Persian Gulf.

''This is the first time Air Force Reserve and Guard tactical fighter units have been alerted for active duty call-up for the Middle East crisis,'' the Air Force announced, adding that the active duty units ''are being announced as they occur.''

One Reserve - the 926th Tactical Fighter Group, New Orleans, La. - and three Guard fighter units were alerted. From the Guard are: the 169th Tactical Fighter Group, McEntire Air National Guard Base, Eastover, S.C.; the 174th Tactical Fighter Wing, Hancock Field, Syracuse, N.Y.; and elements of the 152nd Tactical Reconnaissance Group, Reno, Nev.

The 926th Tactical Fighter Group flies the A-10, the 169th flies the F-16A, the 174th flies the only F-A-16s in the Air Force and the 152nd flies RF-4Cs.

In addition to the fighter units, the Air Force announced that the following Air National Guard security police flights have been alerted for call-up:

The 112th, Pennsylvania Air National Guard; the 121st, Ohio Air National Guard; the 122nd, Indiana Air National Guard; the 127th, Michigan Air National

Guard; the 150th, New Mexico Air National Guard; the 131st, Missouri Air National Guard; and the 186th, Mississippi Air National Guard.

The Air Force announced that the following units have already been called up for active duty:

The 140th Security Police Flight, Buckley Air National Guard Base, Colorado; the 174th Services Flight, Hancock Field, Syracuse, N.Y.; the 169th Services Flight, McEntire Air National Guard Base, South Carolina; and the 240th Combat Communications Squadron, a tenant unit of the 169th Tactical Fighter Group.

The Air Force recently announced the folloiwing active duty unit deployments to the Middle East:

The 23rd Tactical Air Support Squadron from Davis-Monthan Air Force Base, Arizona, deployed OA-10s to the Arabian Peninsula Nov. 24. The 820th Red Horse Civil Engineering Squadron, a combat construction unit from Nellis Air Force Base, Nev., deployed Nov. 28. The 48th Tactical Fighter Wing, RAF Lakenheath, England, sent additional F-111 fighters Nov. 29. Elements of the 728th Tactical Control Squadrom, Eglin Air Force Base, Fla., were scheduled to begin deploying Monday. A second contingent of F-117 stealth fighters left their desert home in Tonopah, Nev., Sunday, and were scheduled to depart for the Middle East Monday.

#90337u1040 12/03/1990 ~United Press International

CHICAGO (DEC. 3) UPI - Pitcher Dennis Martinez decided to bypass the lucrative free agent market, signing a three-year guaranteed contract Monday reportedly worth $9.25 million with the Montreal Expos.

Martinez, 35, was expected to be granted second-look free agency and Expos general manager Dave Dombrowski said he had received a lot of interest by teams in the right-handed pitcher.

''Trying to compete, win the division crown ... we did not feel we could lose our No. 1 pitcher,'' Dombrowski said.

Terms of the contract were not disclosed, but Dombrowski said speculation on $3 million a year ''is an accurate guess for anyone in the free agent market.''

Dombrowski said it was important to sign Martinez to start the winter meetings in a positive way.

''We felt Dennis was the horse of our staff and that it was very important to sign him,'' Montreal Manager Buck Rodgers said. ''He was our ace. He was the guy who put the innings and the wins on the board.''

Martinez was 10-11 with a 2.95 ERA last season, ninth best in the National League, and appeared in the first All-Star Game in his 15-year major league career. The new contract will replace the final year of a two-year extension signed prior to the 1990 season.

Martinez has a 55-41 record in five seasons with Montreal, and is 163-134 lifetime in the majors.

Last season, he pitched 226 innings, striking out 156 and holding opponents to a .228 average.

Earlier Monday, the Expos announced they had released outfielder Roland Roomes and pitcher Dale Mohorcic. Roomes hit .227 in 46 games for Cincinnati and Montreal last year, while Mohorcic was 1-2 with a 3.23 ERA and two saves in 34 relief appearances.

#90337u1058 12/03/1990 ~United Press International

WASHINGTON (DEC. 3) UPI - The Supreme Court Monday strengthened the so-called Miranda rights of criminal suspects, ruling that once an accused has invoked his right to counsel he cannot later be questioned again without an attorney present.

The court, by a 6-2 vote, extended the boundaries of the 1966 Miranda decision that entitles a criminal suspect to the right to remain silent and have an attorney present during questioning.

The court ruled that once the right to a lawyer is invoked once, police cannot later come to the suspect and try to get him to confess without a lawyer present.

''Whatever the ambiguities of our earlier cases on this point, we now hold that when counsel is requested, interrogation must cease, and officials may not reinitiate interrogation without counsel present, whether or not the accused has consulted with his attorney,'' wrote Justice Anthony Kennedy for the court majority.

''A single consultation with an attorney does not remove the suspect from persistent attempts by officials to persuade him to waive his rights, or from the coercive pressures that accompany custody and that may increase as custody is prolonged,'' Kennedy wrote.

Justice David Souter was not yet a member of the court when the case was argued Oct. 3, and so took no part in the decision.

The case involves Robert Minnick, who had been on death row in Mississippi since a 1987 double-murder conviction based in large part on a jailhouse

''confession.''

Minnick claimed his rights were violated after his August 1986 arrest in California on a fugitive warrant from Mississippi.

While an inmate at a San Diego jail, he invoked his Miranda rights and refused to talk extensively with police about a double murder in Mississippi that occurred some four months earlier.

But after having met with a lawyer, Minnick claims he was told he would ''have to talk'' to a deputy sheriff who visited him in his cell. Without his lawyer present he allegedly confessed to a role in the killings.

Minnick was extradited to Mississippi and convicted of two counts of capital murder.

On appeal, he claimed that because he had invoked his right to speak with an attorney before questioning, he could not be questioned later without a lawyer present.

The Supreme Court of Mississippi upheld the conviction, relying on the Supreme Court's 1981 Edwards vs. Arizona decision that once an accused requests a lawyer, police may not reinitiate questioning ''until counsel has been made available'' to him.

Mississippi's highest court held that since Minnick had talked to an attorney, counsel had been ''made available to him,'' and further questioning could proceed later on, even without a lawyer present.

The Supreme Court Monday ruled that the Mississippi courts misinterpreted its earlier decisions.

''We decline to remove protection from police-initiated questioning based on isolated consultations with counsel who is absent when the interrogation resumes,'' wrote Kennedy.

But in a dissenting opinion, Justice Antonin Scalia, joined by Chief Justice William Rehnquist, wrote that the court was handcuffing legitimate police work.

''The existence and the importance of the Miranda-created right 'to have counsel present' are unquestioned here,'' wrote Scalia. ''What is questioned is why a state should not be given the opportunity to prove . .. that the right was voluntarily waived by a suspect who, after having been read his Miranda rights twice and having consulted with counsel at least twice, chose to speak to a police officer ... without counsel present.''

Scalia wrote that the court's decision ''provides 100 percent assurance against confessions that are 'the result of coercive pressures,''' in such

cases. ''But so would a rule that simply excludes all confessions by all persons in police custody.''

Minnick was awaiting execution for the April 26, 1986, murder of Donald Ellis Thomas and Lamar Lafferty. They were killed while Minnick and another man - who had broken out of jail - allegedly were stealing guns from a trailer home in rural Clarke County, Miss.

The court's decision Monday vacates Minnick's murder conviction and death sentence. He can be tried again, but prosecutors will not be permitted to use the jailhouse confession as evidence.

89-6332 Robert S. Minnick vs. State of Mississippi

#90337u1063 12/03/1990 ~United Press International

(DEC. 3) UPI - Foreign ministers of three major Arab states directly involved in the Persian Gulf crisis prepared to meet in Cairo Monday evening to coordinate policy after Baghdad's decision to hold talks with the United States.

The meeting of the anti-Iraqi alliance approached as an Iraqi official remained defiant and boasted Monday that any attack on his country to liberate Kuwait would result in the destruction of the aggressing force and the states that invited the attack.

The Iraqi threat was made two days after Baghdad accepted a U.S. proposal for last-minute talks on the gulf crisis before the Jan. 15 U.N. deadline for Iraq to get out of Kuwait or face military sanctions, and a day after it tested a Soviet-designed Scud missile.

In Washington, U.S. Defense Secretary Dick Cheney told Senate hearings on U.S. policy in the gulf that a man like Saddam Hussein could not be allowed to control the world'd supply of energy.

Cheney's remarks came after his Cabinet colleague, U.S. Secretary of State James Baker, was quoted as saying he was optimistic about a peaceful outcome to the gulf crisis provided Saddam understands that the world community was against him.

In Kuala Lumpur, Prime Minister Mahathir Mohamad said Monday Malaysia and other Islamic countries were prepared to mediate to help resolve the crisis in the gulf if the United Nations was not able to do so.

The Cairo meeting of the anti-Iraqi Arab alliance came as Baghdad remained defiant over calls for it to withdraw from Kuwait.

Iraq's official INA news agency quoted Information Minister Latif Nsayef Jassim as saying any allied attack on Iraq to liberate Kuwait, ''would be a catastrophe to the aggressing forces and the parties that invited them,'' a reference to gulf Arab states such as Saudi Arabia and the United Arab Emirates.

Cairo Radio said the talks between the foreign ministers of Egypt, Syria and Saudi Arabia will be the third in less than two months. The other two meetings took place in the Syrian capital Damascus and the Saudi Arabian Red Sea port of Jeddah.

Both Egypt and Syria have sent troops to the gulf to serve with the U.S.-led multinational force deployed in the region after Iraq's Aug. 2 invasion of Kuwait.

''The coming weeks will be crucial and the decisions to be taken during these weeks will be decisive to the three states and the Arab nation,'' Syria's Foreign Minister Farouk Sharaa told reporters in Cairo in an arrival statement.

Syria has sent some 4,000 troops to Saudi Arabia and the United Arab Emirates to counter any further Iraqi aggression, but Syrian Defense Minister Mustafa Tlass was quoted over the weekend as saying his country was ready to send an additional 500,000 troops to the gulf if necessary to deter Iraqi aggression.

Egypt has dispatched up to 20,000 troops to the gulf and is the third largest contributor after the United States and Britain London is boosting the size of its force to 30,000.

Sharaa said U.S. President George Bush's recent initiative to open a dialogue with Iraq would be among the topics of discussion at the Cairo meeting.

''We hope the (Bush) initiative will lead to the complete implementation of the Arab and United Nations resolutions,'' Sharaa said.

Syria and Iraq are ruled by rival wings of the Baath Arab Socialist party and Syrian President Hafez Assad considers Saddam his enemy No. 1 in the Arab world.

Iraq's official INA news agency quoted Information Minister Latif Nsayef Jassim as boasting that allied forces and moderate Arab states such as Saudi Arabia and the United Arab Emirates would suffer a catastrophe if they attacked his country.

''It would be a catastrophe to the aggressing forces and the parties that had invited them," INA quoted Jassim as saying. "The United States and its allies are trying to desecrate the Arab and Moslem sanctities and dominate Arab wealth.''

As Jassim uttered his threat against gulf Arab states and their allies, Cheney used charts to demonstrate during the Senate hearings on U.S. policy in the gulf why Saddam had to be stopped.

Cheney showed that, ''in excess of 70 percent of the world's proven oil reserves reside in the Persian Gulf, contrasted with some 3 percent in the United States, 6 percent in the Soviet Union.''

Cheney warned, ''There shouldn't be any doubt about the consequences of allowing a man like Saddam Hussein to control the world's supply of energy. Obviously, where he to do so, he'd have a choke on the world's economy. He would be able to control production levels and price. He'd be in a position to blackmail any nation, which chose not to do his bidding.''

PARIS (DEC. 3) UPI - Simone Cousteau, the wife of French sea explorer Jacques-Yves Cousteau, died at her home in the Principality of Monaco, the Cousteau Foundation announced Monday. She was 72.

The cause of her death Sunday was not given.

Mrs. Cousteau avoided the spotlight but shared her husband's love of the sea.

She was reportedly the first woman to dive using an autonomous underwater helmet and the first to live in an underwater house.

Born in Algeria, Mrs. Cousteau was raised in Japan and spent 40 years accompanying her husband on more than 1,000 missions aboard his research vessel ''The Calypso.''

Mrs. Cousteau had two sons, one of whom, Phillipe, died during an expedition with his father.

NEW YORK (DEC. 3) UPI - A steel importers' and exporters' group Monday urged the application of a 10-year ''moving average'' to exchange rates to calculate the values of international transactions.

A moving average would fix the exchange rate for a transaction at the average for the 10 years preceding the date of the deal.

The American Institute for Imported Steel Inc. said the 10-year average should become an amendment to world anti-dumping laws that otherwise could become ''weapons of protectionism'' by the time the steel Voluntary Restraint Agreements expire in March 1992.

If exchange rate fluctuation is ignored, the Institute said, it ''could lead to turmoil in international steel markets and trade wars that will seriously damage the global economy.''

John Griffin, president of the Institute, told its annual meeting, ''We fear present laws, both here and abroad, will obstruct trade expansion by imposing unreasonable risks for exporters and importers and may lead to turmoil in international steel markets after March 1992 when current VRAs expire.

If the exchange rate between two countries' currencies changes from the historical 4:1 to 2:1, for example, the country with the stronger currency could be construed to be dumping as its home market price doubles when converted to the other's currency.

''Under present anti-dumping rules throughout the world, international traders can become targets of expensive litigation for reasons entirely beyond their control,'' Griffin added.

He said the most obvious solution to the problem would be for governments to stabilize exchange rates by means of sound fiscal policies such as balanced budgets and reduced foreign borrowing.

''Since that is too much to hope for in the foreseeable future,'' Griffin said

the Institute is proposing the 10-year moving average.

He said such a move would strengthen anti-dumping laws by ''sharpening the focus on truly predatory acts of international price discrimination unrelated to shifting exchange rates.''

(DEC. 3) UPI - A state of siege has been declared in Argentina as rebel soldiers occupy the headquarters of the army chief of staff and a regimental barracks in Buenos Aires. The revolt comes just two days before a scheduled visit by President Bush and the sound of small-arms fire can be heard in the streets.

President Bush has gone before Brazil's Congress with a call for more free enterprise and free trade. The speech comes in the first stop of what will be a five-nation journey through South America. Bush told Brazilians that Iraq's takeover of Kuwait will cost them five-BILLION dollars in higher oil prices.

Defense Secretary Cheney cautioned critics of Bush administration policy in the Persian Gulf that there is NO guarantee that sanctions will work in forcing Iraq to withdraw from Kuwait. Cheney told the Senate Armed Services Committee hearings on the Gulf crisis that it would be better to deal with Iraq now, with a unified, world- wide front.

The official Soviet news agency Tass reports that a man with a home- made bomb attempted to hijack a domestic Soviet airliner to Stockholm, but the pilot landed in Leningrad and the sky pirate was safely disarmed. NO injuries are reported.

Four years of troubled world trade talks are boiling down to the final week with a lot of work still to be done. Trade ministers from 107 countries have started final proceedings in Belgium with considerable disagreement still reported for agriculture, services and other key areas of discussion.

The Food and Drug Administration today approved the first over-the- counter drug for treatment of vaginal yeast infections, which strike nearly three-quarters of all women during their lifetimes. The drug has been available for treatment of yeast infections for more than a decade.

Much of the southern half of Wisconsin is paralyzed as a blizzard plows its way East. State government offices have been closed in snow- bound areas, and Madison is already buried under nine inches of snow, enough to force city buses off the streets at rush hour. This is already the heaviest snowfall in Madison since 1902, and another foot is predicted. That could easily pass the current single-day record of 13- point-two inches of snow set on December 15th 1987.

The founder and long-time director of the high-kicking Radio City Music Hall Rockettes is dead. Russell Markert died at a Waterbury, Connecticut, hospital over the weekend at the age of 91. A native of Jersey City, New Jersey, Markert was chief choreographer of the Rockettes from the day Radio City Music Hall opened in 1932 until his retirement in 1971.

#90337u1136 12/03/1990 ~United Press International

WASHINGTON (DEC. 3) UPI - Housing affordability was at a two-year high in October, giving those with the financial wherewithal or flexibility a prime time to enter the market, the National Association of Realtors said Monday.

The association's housing affordability index stood at 113.4 in October, up from 110.8 the month before.

The index meant a family earning the national median income of $35, 353 had 113.3 percent of the income needed to qualify for a conventional mortgage covering 80 percent of the value of a median-priced house.

The improved affordability stemmed from a drop in the median housing price to $92,800 from $94,400 in September, a $114 rise in median family income and a decline in the amount of income needed to qualify for conventional financing.

The association's index has not been higher since December 1977 when it stood at 116. It reached 113.5 in September 1988.

But if housing affordabilty is so good, why are housing sales down in much of the nation? It comes down to confidence, said Harley Rouda, the association's president and a realtor from Columbus, Ohio.

''Objectively, market conditions are excellent, and are at odds with home sales activity,'' Rouda said. ''The missing link is consumer confidence - the housing affordability index indicates that conditions are better than they've been in over two years.''

Rouda said the real estate market is ''ripe'' for buyers who have been waiting for the best time to enter.

Based on conditions in October, a family earning $20,000 would have enough income to qualify for a $59,500 home using a $47,600 loan while a family earning $30,000 would qualify for an $89,300 home with a $71,400 loan.

A family earning $40,000 would have sufficient income to qualify for a $119,000 home with a $95,200 loan and a family with a $50,000 income would qualify for a $148,800 home using a $119,000 loan.

Regionally, prospective buyers in the Northeast and West are still having trouble qualifying for home loans. Both of these regions carry the nation's highest median housing prices, and the Northeast has been hit by a wave of recession.

''Housing activity generally is stronger in areas of the country where there is an ample supply of lower-cost homes, like the Midwest and South, and activity is softer in those higher-cost regions of the country, like the Northeast and West,'' said John Tuccillo, the association's chief economist.

In the Northeast, a family earning the median income of $41,376 fell short by almost 10 percent of having enough income to qualify for a median-priced home of $136,200. Still, the region's 90.1 on the affordability index is an improvement from the 88.4 posted in September.

In the West, a family with the median income of $37,631 had only 80.8 percent of the income needed to buy a home priced at $140,600, the region's median. The index was down from 84.6 in September.

But prospective buyers could find better conditions in the Midwest and South, both of which boast a large stock of lower-priced housing.

In the Midwest, a family earning the region's median income of $36, 127 had 147.9 percent of the income needed to qualify for a loan to purchase a home priced at $72,100, the median for the region. In September, the index stood at 141.5.

In the South, a family with median earnings of $31,795 had 112.7 percent of the income needed to buy a median-priced homes of $83,400. The region's index for September reached 109.

LONDON (DEC. 3) UPI - Stock prices closed higher Monday in sparse trading on the London International Stock Exchange amid optimism talks between the United States and Iraq could lead to a diplomatic breakthrough in the Middle East.

Stocks also gained in Frankfurt. Trading was active.

London's blue-chip Financial Times 100-stock index, which gained 13.8 points Friday, closed up another 13.3 points to 2,162.7. The narrower top 30 industrial average gained 12.5 points to 1,695.3.

Volume amounted to around 326 million shares vs. 331 million changing hands Friday.

Analysts said one of Britain's largest brokerages magnified the overall

volumewith an estimated $171 million of trades in a ''basket of program trades.''

Analysts said stocks opened sharply higher in response to expectations of a peaceful solution to the Mideast crisis.

However, stocks slipped from their highs, reflecting a hesitant start to trading on Wall Street and with worries over interest rates. This sent professional investors to the sidelines.

The approach of the Christmas holidays, previously considered the limit date for an interest rate cut, also contributed to some late profit taking, analysts said.

On the economic front, the Central Statistical Office reported Britain's retail sales volume fell 1.1 percent in October from September and was down a revised 0.5 percent from October 1989.

The report was in line with market expectations, analysts said.

The government also reported new consumer credit extended by finance houses, building societies, other specialist credit grantors and retailers totaled a record seasonally adjusted $8.04 billion in October, fueled by record credit-card and finance-house activity.

Among widely traded stocks, health and household products giant Glaxo Holdings climbed 46 cents to $15.94 on favorable prospects for potential profits from its new anti-asthma drug, Severent.

Oil companies performed well on prospects for cheaper prices for cheap oil, with Burmah Castrol gaining 24 cents to $8.95. Similarly, British Airways added 12 cents to $2.93.

Westland Group, the aerospace and defense company, added 6 cents to $1.99 after reporting a 9.6 percent rise in its latest earnings. In tandem, Westland's major stakeholder, the motor company GKN gained 16 cents to $6.23.

On the Frankfurt Stock Exchange, the closely watched German Stock Index, which gained 22.31 points Friday, tacked onm another 21.35 points to 1,441.23.

Analysts said investors' enthusiasm was boosted by Chancellor Helmut Kohl's victory and by lower oil prices.

#90337u1151 12/03/1990 ~United Press International

WILMINGTON, DE (DEC. 3) UPI - Continental Airlines Holdings Inc. said a 125 percent jump in the cost of jet fuel forced the carrier to file for ''business

as usual'' bankruptcy protection Monday so it could restructure its $2.2 billion debt.

It was the second Chapter 11 filing for Continental in seven years.

Houston-based Continental Airlines, which filed for protection from creditors in Wilmington, pledged no disruption of service but also announced it would sell its Seattle-Tacoma to Tokyo route to American Airlines for $150 million.

Continental Chairman Hollis Harris told a news conference the Chapter 11 filing marked ''a business-as-usual bankruptcy'' that would not disrupt operations, lower employee compensation or have any impact on airfares.

Harris said the sharp rise in jet fuel since Iraq's Aug. 2 invasion of Kuwait gave the airline no alternative but to seek Chapter 11 to restructure its $2.2 billion debt, about $1.7 billion of which is secured.

He said Continental's jet fuel costs had gone up by $70 million as of Oct. 15 compared with levels prior to the Iraqi invasion.

The company paid $1.28 a gallon for jet fuel systemwide Oct. 15 compared with 57.5 cents a gallon before the invasion, he said.

Continental is the second member of the airline empire once controlled by Frank Lorenzo to seek Chapter 11 bankruptcy protection. Eastern Airlines of Miami filed for Chapter 11 protection in March 1989 after its unions launched a crippling strike against the carrier.

In April, the federal bankrupcty court overseeing the case wrested control of Eastern away from Lorenzo and appointed Martin R. Shugrue, former president of Continental Airlines, as trustee to oversee the troubled airline.

In August, Lorenzo sold most of his investment in the holding company, formerly known as Texas Air Corp., and stepped down as chairman.

Continental filed for bankruptcy a little more than a month after strongly denying that skyrocketing fuel costs would prompt a second Chapter 11 filing.

Rising fuel costs and a slowing economy, which together have hurt even the industry's strongest carriers, are expected to result in dramatic industry losses in the fourth quarter.

For the nine months ended Sept. 30, the Continental Airlines Holdings lost $97 million, or $2.83 a share, on revenues of $4.9 billion. In the third quarter alone, Continental Airlines lost $55.1 million on revenues of $1.4 billion.

''We enter Chapter 11 by necessity,'' said Harris. ''It has temporarily alleviated our debt problem and will help us cope with high fuel costs.''

Continental spokesman Ned Walker described the 125 percent increase in jet fuel costs as an ''unprecedented crisis'' for the airline industry. The fuel hike primarily has been blamed on the situation in the Persian Gulf.

Continental said it expects to pay $1.1 billion for fuel this year, about $231 million more than it would have paid had the Persian Gulf crisis not occurred, Harris said.

The Chapter 11 filing will give Continental, the fifth-largest U.S. air carrier, protection from creditors while the company restructures its debt and implements a plan to pay creditors.

Continental has carried about $2.2 billion in debt plus nearly $4 billion in aircraft operating leases not included in its balance sheet.

The airline has been unable to meet its debt repayment schedule. The debt primarily accumulated from the mergers of New York Air, Frontier Airlines and People Express with Continental, the company said.

''Continental will continue full flight schedules. We are confident that there will be no need for layoffs, pay cuts or reductions in benefits,'' Harris said.

Continental has 37,000 employees.

''For our customers, it will be a regular business day for them,'' Walker said. ''They'll go out to the airport and it will be a full- service operation.''

Continental's agreement to sell the Seattle-Tacoma to Tokyo to American must be approved by the Transportation Department and the bankruptcy court. Continental called the pending sale a ''significant step'' in its restructuring plans.

Under the agreement, Continental would continue to operate daily service on the route until American assumes ownership, which should occur on or before Dec. 31, 1991.

Continental said it will continue serving Tokyo and five other Japanese cities through Honolulu and Guam. The airline said it is no longer trying to sell its other Pacific operations.

''The long-term viability of our airline requires that we maintain our status as a global carrier, and we currently have no plans to sell other international routes,'' Harris said.

Continental filed for Chapter 11 in September 1983, after losing more than $218 million in that year alone. Almost two years later, Continental adopted a

reorganization plan to fully repay more than $900 million in debt over 10 years.

#90337u1161 12/03/1990 ~United Press International

PONTIAC, MI (DEC. 3) UPI - Dr. Jack Kevorkian has been charged with first-degree murder for helping a woman with Alzheimer's disease commit suicide with his ''suicide machine,'' a prosecutor announced Monday.

Janet Adkins, 54, of Portland, Ore., died in Kevorkian's van in a rural Oakland County park on June 4 after pressing a button on his device that released a lethal drug into her system.

''Dr. Kevorkian was the primary and legal cause of Janet Adkins' death. He cannot avoid his criminal culpability by the clever use of a switch,'' Oakland County Prosecutor Richard Thompson said at a news conference.

Kevorkian, anticipating Monday's announcement, said late last week he does not fear criminal prosecution.

''Send me to jail,'' he said. ''Put me in solitary if you want. At least I'll be with honest people when I'm by myself.''

Thompson said he would base his case against Kevorkian on a 1920 Michigan Supreme Court opinion that held that a husband who mixed and placed poison near his wife at her request so that she could drink it was guilty of first-degree murder when she died as a result of drinking the poison.

To date, the case has not been reversed by the Michigan Supreme Court, nor has it been revised by the Michigan Legislature, Thompson said.

''I have a constitutional duty to faithfully enforce the laws of this state as enacted by the legislature and interpreted by the court, regardless of the tragic and emotional aspects of this case,'' he said. ''Under our constitution the legislature is empowered to declare what is a crime. And as a prosecutor, I have no legitimate authority to ignore or stipulate away duly enacted laws.''

Thompson said his investigation into the Adkins case led him to conclude that there was no reason for her to take her own life and no reason for Kevorkian to assist with the device he invented.

''Janet Adkins was not terminally ill or suffering pain,'' he said. ''For me not to charge Dr. Kevorkian under these circumstances would be a courruption of the law and turn Oakland County into the suicide mecca of our nation.

''Dr. Jack Kevorkian is not above the law and if he wants to change the law, he should address the legislative branch of government. If physicians are to

have a license to kill in addition to their license to heal, that license must come from the legislature, not the prosecutor.''

Thompson's announcement came one day before trial was to begin in a civil case brought by his office in response to Adkins's death nearly six months earlier.

Oakland County Circuit Judge Alice Gilbert is deciding whether to make permanent her temporary order barring Kevorkian from using the his so-called suicide machine.

Kevorkian has insisted he has broken no laws and is convinced authorities are acting imporoperly in proceeding against him.

''They're making up their own laws as the court goes on,'' he said last week. ''Even the Nazis went through the motions of legislating officially through a duly constitued government before they took court action. We're not even up to the Nazis' standards. How do you like those apples?''

#90337u1173 12/03/1990 ~United Press International

MOSCOW (DEC. 3) UPI - The international relief effort to feed the Soviet Union this winter comes in a year when the country should be able to feed itself.

But much of this fall's record Soviet harvest has been wasted or spoiled. Distribution failures, bureaucracy and political tugs-of-war have led to economic chaos.

Diplomats in Moscow and officials from the countries involved in the relief effort are unanimous in their concern that emergency aid not get bogged down in the problematic Soviet system that led to the problem in the first place.

And even as the relief effort moves forward, many Soviet and Western observers argue that pictures of bare store shelves and television reports showing long lines for food give donors a false picture of the situation in the country.

Hoarding has always been common among Soviets fearful of the future. Much food is distributed at workplaces and schools or sold at higher market prices outside the official state stores, and few people seem to be starving.

Still, the international aid is welcomed and it will be particularly helpful for the young, the old and others least able to fend for themselves in the chaotic system by which food gets from farms to Soviet tables.

''In general terms it seems there is enough food in the country for it to feed itself,'' said a diplomat from a country considering sending aid. ''The problem is the normal channels are not working.

''When we send help we have to consider very carefully how to assure it will get to those who need it. There will need to be some very concrete measures to ensure distribution.''

While the European Community and many countries are not expected to complete their aid programs until mid-December, the relief effort will likely involve hundreds of millions in direct aid and billions more in credits to help Moscow buy needed goods.

Many of the donor countires will try to bypass Soviet distribution systems by delivering food directly with trucks from outside the country, and all will have their own people monitor the process. President Mikhail Gorbachev has ordered the KGB to help guard shipments.

''It's evident they have a problem with distribution; that is why they lost 25 percent of their harvest,'' another West European diplomat in Moscow said. ''If we give aid we have to make sure it gets there.''

Germany, which has been leading the effort with plans for public and private aid, got a cool reception in Moscow to its offer to have German troops help ship and distribute food in the Soviet Union.

Horst Teltschik, a senior aide to Chancellor Helmut Kohl sent to Moscow to plan logistics for the relief effort, said Soviet-German coordination groups would do everything they can to make sure supplies get to those who need them, but he said it is impossible to guarantee that none of the material ends up on the black market.

Teltschik announced after the trip that the first direct German government aid - the $338 million worth of food reserves that before German unification was stored in West Berlin in case of a repeat of a Soviet blockade - would probably be shipped the first week of December.

The stockpile is reportedly enough to feed 10 million people for a month. Additional aid plans were being drawn in Bonn.

Private relief efforts from Germany began with a shipment of food from Hamburg to Leningrad in mid-November. A Nov. 28 telethon featuring pleas from Gorbachev and Kohl raised $4.25 million to buy food.

A spokesman for the relief group Care-Germany said the money will allow the organization to send Soviet families 80,000 food parcels of canned meat and sausages, margarine, powdered milk, chocolate and flour.

Small and medium-scale private efforts were under way in many other Western countries and an informal survey of embassies by United press International in Moscow found at least 12 countries considering some form of assistance.

The European Community is expected to approve about $20 billion in aid at the group's Dec. 13 summit in Rome. Many of the individual Western countries appear to be watching the Rome summit for cues before completing their own programs.

Much of the assistance from the West will be in trade credits allowing the Soviets favorable terms to buy specific products. Soviet officials estimate they will have about $20 billion in new credits available by January.

But using credits to ride out the crisis could lead to even more trouble because the Soviet Union already has a heavy foreign debt of $50-billion to $60 billion.

In 1989 the Soviet Union spent 7 percent of its hard currency just to service its debt and the weekly business newspaper Commersant estimated the figure could rise to 14 percent for this year. Even more ominous was the probability that a significant amount of new aid would be used to service old debts.

#90337u1191 12/03/1990 ~United Press International

DUBLIN, IRELAND (DEC. 3) UPI - Church bells and a 21-gun salute marked the inauguration Monday of Ireland's first woman president, Mary Robinson, who promised to represent ''an open Ireland.''

A Socialist-backed attorney was sworn in in Irish as the seventh president in the history of the republic in a largely military ceremony.

''The Ireland I shall be serving will be an open Ireland - open, tolerant and inclusive,'' Robinson said in a brief address in both English and in Irish.

She replaced Patrick Hillery, who has served for the past 17 years uncontested.

Robinson, 46, is Ireland's first president who did not come out of the conservative Fianna Fail party machinery. She served 20 years as a senator, formerly for the Labor Party, which she left in 1985 when it was part of a coalition government. She lost two elections for the lower house of the Irish Parliament.

Drawing on Celtic mythology, Robinson spoke at her inauguration of a spiritual fifth province that she hoped would be symbolic of her presidency. Old Ireland is divided into four political provinces, including Ulster, now part of the United Kingdom.

She promised to represent Irish emigrants abroad and suggested that the presidential home be the site of an annual ''get together'' for the 70 million people worldwide who claim Irish ancestry.

Robinson also said her tenure would be marked by ''local community empowerment. It is time for the small to start believing again that it is beautiful.''

Ireland has an important role to play in setting an international human-rights agenda, she said. ''One of our greatest resources is our ability to serve as a moral and political conscience in world affairs.''

The new president also pledged to forge new relations with the divided sectarian communities in Northern Ireland.

As a senator and attorney, Robinson had responsibility for changes in civil rights legislation, allowing women to sit on juries, guaranteeing equal social welfare rights and opening free legal assistance to low- income earners. Fianna Fail attacked her as pro-abortion but she said she is only in favor of liberalizing access to abortion information.

The president's role is largely ceremonial and Robinson will need the support of the incumbent Fianna Fail government if she is to follow through on campaign promises to broaden the president's responsibilities.

Her victory over the Fianna Fail and opposition Fine Gael candidates shook both parties.

Fine Gael leader Alan Dukes was ousted and replaced by his deputy, and the party has made a decided shift to the left.

There have been several calls for the removal of Prime Minister Charles Haughey by influential Fianna Fail members.

Additionally, the Labor Party leadership has been realigned and announced a move to the center of the Irish political mainstream.

Both Fianna Fail and Fine Gael are discussing the introduction of a referendum to lift the constitutional ban on divorce. A referendum that had Robinson's support failed by a 2-to-1 margin when the Fine Gael- Labor coalition controlled the government.

Robinson is married and a mother of three.

-30- 3359

#90337u1200 12/03/1990 ~United Press International

DETROIT (DEC. 3) UPI - Deeper production cuts, high marketing costs and a shift toward less profitable vehicles may cause the nation's Big Three automakers to post a combined $1 billion loss during the 1990 fourth quarter, analysts said Monday.

That compares with a meager $350 million in combined profits earned by General Motors Corp., Ford Motor Co. and Chrysler Corp. during the final three months of 1989 - and a hefty $3 billion in collective profits earned during the fourth quarter of 1988.

Industry leader GM prepared Wall Street late last week by saying its fourth quarter earnings would ''decline significantly'' from the scant $109 million earned during the previous period, mostly because of further fourth quarter production cuts due to low consumer confidence and the lingering Persian Gulf crisis.

GM said it would pare fourth quarter production by another 111,000 units, putting output below levels for both the previous and year-ago quarter. On Monday, it began implementing those cuts by extending the usual holiday closings at 18 of its U.S. plants and idling nearly 60,000 workers for up to three weeks.

GM also said it will reduce production at several U.S. light truck plants this month.

Analysts polled now expect GM to lose between 75 cents and 95 cents a share during the fourth quarter, or between $350 million and $570 million in net income. GM earned $700 million, or $1.01 a share of its $1-2/3 par value common stock in the year-ago quarter.

Industry observers said even deeper production cuts planned by Ford could cause the No. 2 automaker to report its first quarterly loss in eight years, when it posted $236 million worth of red ink during the final quarter of 1982.

Several analysts who had been predicting a break-even or marginally profitable quarter for Ford have now lowered their estimates, with the consensus now ranging between a loss of 50 cents to 70 cents a share, or between $225 million and $330 million in net income.

That compares with a profit of $314 million, or 68 cents a share, earned by Ford in the year-ago fourth quarter.

Ford's fourth quarter U.S. production levels are now expected to be about 15 percent lower than what was anticipated just one month ago, with most of the reductions to come from its U.S. plants through widespread idlings and holiday extensions into January.

''I think they are reacting to lower dealer orders than dealer inventories, which are not out of hand now,'' said David Healy, of Barclays Bank BZW in New York.

Third-ranked Chrysler Corp. is expected to post a fourth quarter loss of about

25 cents a share, or about $55 million, as it too pares fourth quarter production through selective plant idlings.

Each carmaker is scaling back production to avoid what happened one year ago, when bloated inventories forced heavy advertising, costly customer rebates and massive plant closings and layoffs during January.

So far ''transplant'' carmakers, or the North American plants fully or jointly operated by Asian carmakers, have no plans to trim production further this month beyond the usual one-week holiday closings.

But analysts said several of those firms can scale back on their imports if necessary.

''I'm sure they would rather be producing here because their plants are newer and it's more politically correct,'' said Jay Leopold, of Legg Mason Wood Walker Inc. in Baltimore.

Analysts are also bearish about U.S. car and truck sales during the first quarter of 1991.

''I don't think sales are going to go into oblivion, but it is not a pretty sight,'' said Leopold. ''A lot is tied to consumer confidence and whether we might avert disaster in the Mideast.''

Healy said he expects U.S. car sales to pick up slightly to a seasonally adjusted annual rate of 6.5 million units, from about 6.25 million during the fourth quarter of 1989.

''There will be a recovery coinciding with the ending of the recession that we are just now entering,'' Healy said. ''But that may not be until late 1991 or early 1992.''

#90337u1214 12/03/1990 ~United Press International

JERUSALEM (DEC. 3) UPI - Defense Minister Moshe Arens hinted Monday that Israel may close the occupied territories for the second time in less than two months but acknowledged the measure is not ''a magical recipe'' for stability in the area.

On Sunday, three Palestinian teenagers from the Israeli-occupied West Bank attacked Israeli bus passengers traveling to the coastal town of Tel Aviv, killing one and wounding three.

Police killed one assailant, arrested the other two and by Monday had sealed the houses of all three Palestinians.

In late October, after a spate of stabbings by Arabs of Israelis, the military closed the West Bank and Gaza Strip for four days, forbidding Palestinians from entering Israel and placing the territories off limits to journalists.

Throughout the nearly 3-year-old Palestinian uprising, the military has periodically closed the territories after intercommunal violence or during anniversaries related to the Israeli-Palestinian conflict.

''The closure that we imposed a few weeks ago, maybe under certain circumstances we will impose it again,'' Arens said after meeting with the Israeli Parliament's Foreign Affairs and Defense Committee.

''One should not see this closure as a magical recipe and we are aware of the fact that there is an Arab population in Judea, Samaria (the West Bank) and the Gaza Strip, that a large part of it earns its living in the Israeli economy, and we need to take care of their livelihood as well,'' Arens said. ''But, of course, in parallel (we must take care of) our security as well.''

More than 100,000 Palestinians from the occupied territories work inside Israel.

Also Monday, 12 guerrillas who tried to infiltrate Israel by sea in May were sentenced to 30 years in prison each. Army Radio reported the prosecution sought life sentences but the judge decided on the lighter punishments because the guerrillas had surrendered.

Military sources said Monday that security forces recently uncovered a cell in the West Bank's Ramallah district belonging to the outlawed Islamic Resistance Movement, known by its Arabic acronym Hamas.

The organization is suspected of a large number of attacks, including planting an explosive charge on a Tel Aviv beach in July that killed a Canadian tourist and wounded 14 other people.

#90337u1220 12/03/1990 ~United Press International

(DEC. 3) UPI - ''The Day of the Big One'' arrived Monday with some residents along the New Madrid Fault fearfully awaiting a major tremor in a seven-state Midwest area, but skeptics made light of the predicted catastrophe and whooped it up at earthquake parties.

Schools were closed in some areas and many people had scrambled to lay in emergency supplies just in case a climatologist was correct in forecasting Monday as the optimum day for the quake.

''In this part of the country, we have to live with this fear the rest of our lives," said Virginia Fulton of Jackson, Mo. "The fault is not going to go

away.''

Seven first aid stations were staffed by volunteers in New Madrid, Mo., near the predicted epicenter of the quake, and the fire department's two old pumpers were parked in a reinforced building near the Mississippi River levee. The town's schools were closed.

Regular patrons of Hap's Bar in New Madrid held an ''earthquake watch'' party beginning at dawn.

''This is the most famous little bar in the nation right now,'' said tavern owner Jack Hailey.

Many of the skeptical partied to music like ''Shake, Rattle and Roll'' over the weekend and ordered Jello for dessert so they could watch it ''wiggle,'' but on the serious side, people bought millions of dollars worth of earthquake insurance.

Shelters were set up and emergency supplies stocked at the New Madrid County's civil defense unit.

New Mexican climatologist Iben Browning had predicted a 50 percent chance of a quake on the New Madrid Fault, which stretches from Illinois to Mississippi, including portions of Tennessee, Arkansas, Kentucky, Indiana and Missouri. His projection said the quake was most likely Monday but was possible anytime within 48 hours of the day.

''There was nothing unusual at all (on the seismograph) over the weekend, just the usual stuff,'' said Laurie Hausmann, a spokeswoman for the Department of Earth and Atmospheric Sciences at St. Louis University. ''There was nothing that would have been unusual or different at all, nothing that would have been felt, nothing exciting.''

Top earthquake experts insist there is no scientific basis to Browning's projection, which was based on lunar and tidal forces. However, residents of the area have been reminded of the nation's worst earthquakes - tremors that hit the area in 1811 and 1812, with a force so strong it changed the course of Mississippi River. Prominent seismologists also have predicted a good chance of another quake in the area in the next 10 years.

Even though the only noticeable force of Mother Nature in some areas of the Midwest was cold weather, rain and snow, residents talked about the prediction of ''the Big One'' and some went uneasily through the day.

Earthquake watchers - especially television reporters - were focused Monday on New Madrid, a southeastern Missouri town of 3,300. Vendors there hawked homemade T-shirts with the words: ''It's my fault: New Madrid 1990.''

Radio and television trucks from cities as far away as Fort Worth, Texas, Kansas City and Louisville, Ky., filled the parking lot across from the New Madrid Chamber of Commerce.

''It's a madhouse,'' said Barbara Tanner, a checker at the IGA Foodliner. ''You can't get down the street because there's so many media, tourists and the public out just watching, waiting for it to happen.''

Police said the biggest problem was finding enough parking for the roughly 100 electronic trucks and other vehicles from news media outlets.

Dozens of school districts in Southern Illinois closed down, many because of pressure from parents who wanted to be with their children - just in case.

''I'm not sure the majority believe it but the remote possibility led to the closings. The national press made it worse,'' said John Wilson, regional school superintendent of a four-county area of Illinois near the Indiana border.

Sentiments were much the same in Cape Girardeau, Mo.

''We didn't just cancel them because we thought there would be a quake but because of the anxiety and apprehension that a lot of folks were feeling, and that was a genuine feeling,'' said Arthur Turner, superintendent of public schools in Cape Girardeau.

''We think we'll probably have a few people taking the whole week off but most people will be back in school Wednesday.''

JOHANNESBURG, SOUTH AFRICA (DEC. 3) UPI - Rival black factions armed with guns, axes and other homemade weapons clashed in the black township of Thokoza east of Johannesburg, leaving 52 dead and prompting authorities to impose emergency regulations, police said Monday.

Law and Order Minister Adriaan Vlok implemented a 9 p.m.-to-4 a.m. curfew on Thokoza and three other townships Monday in an effort to quell one of the worst outbreaks of violence this year, which exploded late Sunday afternoon and raged through the night.

The discovery of 52 bodies, hacked, stabbed or shot to death raised to 83 the number of people killed in politically inspired violence since Friday. Among the dead was one white victim, an employee of the Springbok Patrols private security guard who was shot and killed in the nearby township of Kathelong, then set on fire.

The fighting prompted black leader Nelson Mandela and Vlok to rush to the township late Sunday night as hundreds of residents were reported fleeing. On Sunday, Mandela had reiterated his charge of security force involvement in stirring the conflict.

The South African Broadcasting Corp. described Thokoza late in the afternoon as ''quiet but tense, and the police are patrolling the area. Earlier, it said police arrested six people and seized four AK-47 rifles and two pistols in the township.

The fighting marked a dramatic escalation of the faction clashes between supporters of the African National Congress and the rival Zulu movement Inkatha that engulfed townships surrounding Johannesburg in August and left 800 dead in six weeks.

The overnight death toll rivaled any night of bloodshed in August and September - the worst urban fighting in the country's history.

Invoking the Public Security Act, Vlok declared the townships of Thokoza, Kathlehong and Vosloorus and Bekkersdal - all in a cluster east of Johannesburg - as ''unrest areas,'' enabling him to place them under a curfew.

Emergency regulations had been imposed in September on these and other townships to quell the violence but they were subsequently lifted when relative calm was restored.

Residents of Thokoza told reporters Zulus in the adjacent squatter park of Phola Park launched raids into Thokoza, prompting retaliatory attacks and igniting the fighting Sunday. Gunfire was heard throughout the night.

In the nearby township of Kathlehong, state-run radio reported four deaths, including the 24-year-old white man. At least eight bodies were recovered over the weekend in Bekkersdal, which has been hit by faction fighting for a week.

The violence prompted the South African Communist Party Monday to call for the resignation of Vlok and Defense Minister Magnus Malan and accused them of failing to crack down on warlords and death squad violence.

In a statement, the SACP urged township residents to form self- defense units to protect themselves.

MOSCOW (DEC. 3) UPI - An argument between off-duty soldiers and civilian youths on a bus in the central Asian republic of Uzbekistan escalated into a major clash that left five soldiers and three civilians dead, reports said Monday.

The incident began with a quarrel between six Interior Ministry soldiers and some local youths Sunday night on a bus in the Uzbek city of Namangan, and before the fighting ended more than 3,000 civilians and over 700 police and soldiers were reportedly involved.

The independent Interfax news agency said Monday a crowd gathered as the fight spilled off the bus, and the violence escalated when police reinforcements and more soldiers arrived and were pelted with rocks and other objects.

But the official Soviet news agency Tass gave a different account, saying after the argument on the bus escalated into a fistfight the driver drove the vehicle up to a crowd of people and they surrounded the bus and began to beat the soldiers, killing four of them.

Tass said the commander of the six soldiers went to the site with unarmed troops when he heard of the fight and the reinforcements were also attacked by the crowd, which numbered about 3,000.

At that point in the battle the bus and a police car had been set ablaze and armed soldiers and about 700 policemen were sent to the area, Tass said.

''To put an end to the disorder, law enforcement bodies had to use weapons,'' Tass said. ''The disorder lasted several hours and abated only by midnight.''

Tass said a total of five military men and three civilians were killed, with 29 soldiers and 22 policemen injured.

No reason was given for the clash, but tension between local residents and soldiers often runs high in Soviet republics because of a policy that bases only troops from other ethnic groups in most areas like Uzbekistan. The names of the dead soldiers indicated they were Russians and Ukrainians.

#90337u1242 12/03/1990 ~United Press International

WASHINGTON (DEC. 3) UPI - Most Americans believe they eat a healthful mixture of foods and see no reason to change, although the facts suggest they can not all be right, two nutritionists said.

''Our preliminary data suggest that perceptions and reality do not always match,'' government nutritionists Linda Cleveland and Katherine Tippet reported, based on preliminary results from the government's Diet and Health Knowledge Survey.

The survey is one of the first aimed at determining how attitudes and knowledge about healthy diets influence a person's decisions on which foods to eat. In a report presented at an Agriculture Department conference last week,

Cleveland said the survey's link with another food survey would allow the Human Nutrition Information Service to compare a respondent's diet with how that person rated it.

''For example, more than 40 percent said their diets were 'about right' in fat '' Cleveland said, although a 1985 survey showed only 12 percent of women from ages 19-50 limited fat to supplying 30 percent or less of their calories.

The government's newly updated Dietary Guidelines recommend fat should provide no more than 30 percent of the calories in a person's diet and saturated fat should provide less than 10 percent.

A number of studies have agreed most Americans' diets are 37 percent fat.

In their report, Cleveland and Tippet said almost two-thirds of the people taking part in the health knowledge survey agreed with the statement, ''The things I eat and drink now are healthy so there is no reason for me to make changes.''

Although studies suggest Americans eat too much fat, responses in the health knowledge survey showed many were aware of the need to cut back on fat and cholesterol. Two-thirds of the respondents said it was important to avoid too much fat and only one-sixth thought cholesterol consumption did not matter.

The survey also showed respondents agreed it was important to eat a variety of foods. However, few attached importance to eating the amount of fruits, vegetables and grains, scuh as bread or rice, recommended by the government.

''People appear motivated to 'eat a variety of foods' but they may need more information about what that means,'' Cleveland said.

ATLANTA (DEC. 3) UPI - BellSouth Mobility said Monday it has teamed up with American Airlines, ITT Sheraton and the Hertz Corp. to offer customers a frequent caller program that awards prizes based on the number of points accumulated.

Odie Donald, BellSouth Mobility's vice president for marketing and administration, said the program is intended to reward loyal customers.

''After extensive research and focus group sessions, we found our customers want travel and cellular awards from a frequent caller program,'' said Donald.

BellSouth will begin the program in the middle of next year in Athens and Atlanta, Ga.; Baton Rouge and New Orleans, La.; Louisville, Ky., and South Florida.

Customers will receive a point for every minute of local use of their cellular phones. The points may be redeemed for prizes ranging from airline gift certificates to free hotel accommodations and car rentals.

BellSouth said the average customer can expect to reach the minimum award of 5,000 points in about 18 months.

For 5,000 points, customers can earn 120 minutes of BellSouth Mobility cellular service, a $50 American Airlines gift certificate, a $35 Hertz ''Award Check'' or a year's free emergency road service.

Accumulating 40,000 points, which a high airtime user can reach in about two years, can earn a customer a free installed cellular mobile phone, a round-trip American Airlines ticket, a four-night stay at an ITT Sheraton Hotel or a week's rental of a Hertz luxury car.

BellSouth Mobility serves more than 300,000 customers in Alabama, Florida, Georgia, Kentucky, Louisiana, South Carolina and Tennessee.

#90337u1273 12/03/1990 ~United Press International

SOFIA, BULGARIA (DEC. 3) UPI - Petar Beron, the leader of the Union of Democratic Forces, Bulgaria's opposition coalition that brought about the fall of the socialist government last week, has resigned his post, UDF officials announced Monday.

They said Beron left to devote more time to his career as an entymologist but will keep his seat as a UDF member of Parliament.

Beron's resignation came as the UDF is locked in negotiations with the nation's other leading political groups to name a new government to replace Prime Minister Andrei Lukanov and his government of former communists, who resigned last Friday.

The socialists, as the communists now call themsleves, won a 52 percent majority in last June's free parliamentary elections, but they were brought down last Thursday by a nationwide general strike led by the UDF-allied independent union Podkrepa.

With the socialists unable to gather popular support and the UDF without a parliamentary majority, it appears the new government will be composed of technocrats who will have to implement long-ngelected economic reforms and will probably bring the country to new legislative elections in the spring.

President Zhelyu Zhelev, a former UDF chairman, has been suggesting that new elections for local government be held in March and legislative elections

could be paired with them. Another possible date for elections is May.

UDF leaders and political commentators said Beron's resignation is unlikely to harm the organization.

''I don't think the replacement of any one person can be a serious blow to the UDF,'' said Gercho Gerchev, a commentator for Demokratsiye, the UDF newspaper. ''Zhelev resigned (the UDF leadership) three months ago (to become state president) and the UDF did not fall apart.''

The government fell following four days of nationwide strikes to protest growing lines and rationing for basic necessities such as cooking oil and meat as well as energy. Car owners are waiting up to three days in line for their montly 9 gallon ration of gasoline.

''Beron said several weeks ago he would remain leader if we needed him to be the next UDF prime minister,'' said a senior UDF official. ''But now it looks like we won't form the government, so that may have contributed to his decision to leave politics.''

UDF is a coalition of 16 political parties and leaders were not certain they could find a single candidate agreeable to all factions.

''It's no problem to find a new leader by Thursday or Friday but if we are unable to find a good replacement, we could go for a triumvirate, '' said Lubomir Pavlov, a top official of the Democratic Center, a UDF component.

''The opposition doesnt need a symbolic leader because the opposition itself is a symbol of democracy, freedom and jsutice.''

Beron announced his resignation in a speech Sunday on the state of Bulgaria to a meeting of UDF parliamentarians and regional officials. He was unavailable for comment Monday as he was in Italy attending a scientific conference.

UDF leaders will meet Thursday with Beron to consider whether to accept his resignation. A new leader is expected to emerge either after the meeting or after a hastily convened UDF congress to be held Dec. 8-9 in Plovdiv.

Konstantin Trenchev, president of Podkrepa, warned that unless UDF and the new government attack the country's grave economic problems in earnest, there could be further social unrest.

''People will take to the streets,'' he said. ''The people are the highest legislative body in the country.''

Trenchev also announced that beginning Tuesday, the union would give away free fish in front of the St. Nedelja Church in the center of Sofia.

#90337u1278 12/03/1990 ~United Press International

WASHINGTON (DEC. 3) UPI - The United States and Iraq have agreed that their face-to-face talks, if they do take place, will involve only the two countries the State Department said Monday.

Spokeswoman Margaret Tutwiler said the ranking U.S. envoy in Baghdad, Joseph Wilson, met on Saturday and again on Sunday with Nizar Hamdoun, the Iraqi undersecretary in the Ministry of Foreign Affairs.

The main topic was establishing the ground rules and timing for the talks proposed by President Bush on Friday, who suggested that Iraqi Foreign Minister Tariq Aziz come to Washington and, following that, Secretary of State James Baker would be sent to Baghdad for talks with President Saddam Hussein before Jan. 15.

The Iraqis accepted the idea in principle but insisted that such discussions also include the matter of the Israeli rule over Palestinian Arabs in the West Bank and Gaza.

The United States has insisted the talks should only involve the acceptance by Iraq of the U.N. call for a total withdrawal of Iraqi forces from Kuwait.

Tutwiler said that Wilson and Hamdoun agreed that any talks should include only representatives of the two countries. Under that rule, no other parties - including Kuwait or Saudi Arabia or any of the 27 other countries contributing forces to Operation Desert Shield - would be allowed to sit in on the meetings.

Tutwiler emphasized that there has been no agreement yet that the talks will take place and, if they do, what the dates would be. ''The ball's in their court,'' she said.

Apparently as a gesture of good will, the Iraqis showed up at the U. S. Embassy in Kuwait Saturday with 10 cases of soft drinks. Last week, Iraqi soldiers delivered some fruit and other food to the embassy, which has been under siege since mid-August, existing on a diet of rice and canned tuna.

In another apparent gesture, Saddam authorized the release of 15 Americans, 10 of whom had been held as human shields at strategic installations. They flew to Amman, Jordan, in the company of former boxing champion Muhammad Ali, who had interceded with Saddam.

The release means that about 88 Americans are detained as prisoners around strategic installations.

An estimated 900 others remain in Iraq and Kuwait, unable to leave. Many of them are still in hiding from Iraqi forces.

#90337u1288 12/03/1990 ~United Press International
MOSCOW (DEC. 3) UPI - Hard-liners in the Soviet Parliament welcomed Monday the replacement of moderate Interior Minister Vadim Bakatin with a more conservative official as a sign the government is going to get tough and reassert central control.

Liberals agreed the appointment of former Latvian KGB chief Boris Pugo to head the ministry responsible for domestic security was a move toward a more hard-line stance and they vowed to fight the appointment as dangerous for the country.

Mikhail Gorbachev fired Bakatin on Sunday, apparently as part of the Soviet president's plan to deal with the country's myriad crisises by asserting stronger control under his leadership.

''The crime situation in the country is steadily deteriorating and this calls for strengthening the (Interior) Ministry and appointing new people,'' Marshal Sergei Akhromeyev, Gorbachev's top military adviser, told the official Tass news agency.

Members of the ultra-conservative Soyuz parliamentary bloc, which maintains that perestroika is threatening to break up the Soviet Union and favors a return to strong central control, were blunter in their criticism of Bakatin and almost gleeful at what they saw as the beginning of a ''strong hand'' policy.

Army Col. Viktor Alksnis, one of the leaders of the group that claims to represent about a quarter of the Soviet legislature, said the change at the top of the Interior Ministry meant ''steps are being taken to carry out Gorbachev's program for stabilizing the situation in the country.''

''Bakatin was not only passive, but he rendered concrete support to separatists in the republics,'' Alksnis said.

Bakatin, a former Communist Party official in Siberia, was well liked by moderates and liberals because of his apparent reluctance to use troops to resolve nationalist problems.

The interior minister made a surprisingly strong showing in March when he was nominated as token opposition to Gorbachev in a parliamentary election to the new post of Soviet president.

Galina Starovoitova, a Parliament deputy from the radical inter- regional bloc said moderates in the legislature are frightened by Pugo's appointment to replace Bakatin.

''The minister (Bakatin) had fully coped with his difficult duties and had reached understanding,'' Starovoitova said. ''The appointment of Boris Pugo, a professional (Communist) party functionary, is a classical example of a nomenclature reshuffle that may not receive Parliament's approval.''

She said the appointment was likely to receive an ''extremely negative'' reaction in the Soviet republics, which have nearly all declared sovereignty since the beginning of the year.

The appointment of Pugo, a Latvian who formerly headed the KGB in Riga, was seen as having special significance at a time when Gorbachev is taking a harder line against independence for the three Baltic republics.

Gorbachev replaced Bakatin two weeks after he announced a major reorganization of the government that would put all Soviet ministries under his direct control and create a ''national security council'' in his office to include the KGB and the Interior Ministry.

The Interior Ministry is responsible for all local police forces and also controls special troops used in the past to put down ethnic unrest and other disturbances.

Gorbachev, blaming a breakdown of law and order and a lack of ''discipline'' for food shortages and ethnic unrest, has made several moves in recent weeks to consolidate power and use a stronger hand in governing the country.

On Friday Gorbachev ordered the formation of ''workers' committees'' with authority to monitor the food industry and ensure that producers, transportation workers and local authorities fill state orders.

Failure to fulfill state plans and a breakdown in the Soviet distribution system have led to food shortages in some areas that prompted an international relief effort to feed the country despite a record Soviet harvest.

#90337u1294 12/03/1990 ~United Press International

WASHINGTON (DEC. 3) UPI - Yields rose on 13-week and were unchanged on 26-week T-bills Monday at the government's weekly auction.

The Treasury Department auctioned $10.04 billion of 13-week bills at an average discount of 7.06 percent, up from 7.02 percent last week and the highest since November 19, when the auction yielded 7.08 percent.

The Treasury also sold $10 billion of 26-week bills at an average of 6.96 percent, unchanged from 6.96 percent last week.

The investment rate was 7.29 percent on the 13-week bills at an average price of $9,821.50 per $10,000 face value. The rate on the 26- week bill was 7.31 percent at $9,648.10.

#90337u1300 12/03/1990 ~United Press International

(DEC. 3) UPI - A squadron of radar-evading FA ''stealth'' fighters is leaving Langley Air Force Base today for the Middle East. The squadron becomes the second to be deployed since Iraq invaded Kuwait on August 2nd. 22 of the bat-winged fighters swooped down to the airbase yesterday for final inspections before leaving for Operation Desert Shield.

Defense Secretary Cheney warned congressional critics of U-S policy in the Persian Gulf that there is NO guarantee that economic sanctions will help drive Iraq out of Kuwait. Cheney testified today at the Senate Armed Services Committee hearings on Gulf policy. He says it may be better to move against Iraq now... with the world united against the Kuwaiti occupation... than to wait a long time, during which Iraq could tighten its grip on a substantial part of the world's oil supply.

Issues of free enterprise and free trade were brought up by President Bush today in an address to Brazil's Congress. The speech is said to be the most important that Bush will deliver as part of a five-nation swing through South America. Argentina is on the schedule in two days, and administration officials say they are still going, despite fighting that broke out today between rival army factions in Argentina.

Rebellious troops in Argentina today seized the headquarters of the army chief of staff and a regimental barracks in Buenos Aires. They also exchanged gunfire with loyalist forces in downtown Buenos Aires, and President Carlos Menem declared a state of siege from his command post at the government palace which also was hit with gunfire today.

The uprising is the fourth since Argentina returned to democracy in 1983. The army chief of staff went on Argentine television in the early afternoon to say that the vast majority of the armed forces remained loyal to the constitution. He demanded that the rebels surrended without conditions.

The shuttle Columbia astronauts and NASA ground controllers are struggling with a problem with a balky telescope aiming system, though spokesmen say they expect to have the glitch solved later today. But the problems with the aiming system has pushed work about 12 hours behind schedule aboard the spacecraft, which is on a 10-day astronomy mission. The aiming system is needed to align three of the four telescopes being used on the mission.

The U-S Supreme Court will take up the question of whether police have the same powers of search when they have full permission from a suspect as they

have with a search warrant. A Florida court ruled that approval to search a car did NOT extend to searching a paper bag loaded with cocaine.

The nation's highest court decided NOT to get involved in deciding if police officers have fewer rights that ordinary civilians to be warned about self incrimination. The case involves a sheriff's deputy in Colorado who made statements to other officers about a shooting in which he was later charged.

-30- 3133

#90337u1302 12/03/1990 ~United Press International

WASHINGTON (DEC. 3) UPI - The Supreme Court Monday bolstered the protection of criminal suspects against self-incrimination, ruling that once an accused asks to have a lawyer present during questioning that right remains in effect indefinitely.

The court ruled that if a suspect invokes his so-called Miranda rights once, police and prosecutors cannot later come to the suspect and try to get him to confess without a lawyer present.

The court, by a 6-2 vote, extended the boundaries of the 1966 Miranda decision that entitles a criminal suspect to the right to remain silent and have an attorney present during questioning.

''We decline to remove protection from police-initiated questioning based on isolated consultations with counsel who is absent when the interrogation resumes,'' Justice Anthony Kennedy wrote for the majority.

Chief Justice William Rehnquist and Justice Antonin Scalia dissented, claiming the court's decision ''constricts law enforcement.''

The court overturned the double-murder conviction of Mississippi death-row prisoner Robert Minnick. If he is tried again for the 1986 killings, his jailhouse confession cannot be admitted as evidence.

''Today's ruling ... makes it largely impossible for the police to urge a prisoner who has initially declined to confess to change his mind - or indeed, even to ask whether he has changed his mind,'' wrote Scalia.

Justice David Souter was not yet a member of the court when the case was argued Oct. 3, and took no part in the decision.

Ironically, in another case Monday the court let stand a decision that law enforcement officers - in certain situations - have fewer rights to be issued Miranda warnings than do civilians.

The court refused to consider an appeal from Morgan County, Colo., Sheriff's Deputy Daniel Probasco, charged with criminally negligent homicide.

Probasco was on duty on July 15, 1989, when he killed a man, and moments later discussed the circumstances of the shooting with colleagues on the scene.

Probasco claimed he should have been told of his legal right to remain silent before being asked to explain the situation, but Colorado courts held that Probasco was not suspected of wrongdoing or legally in custody when he began talking.

Police would have been required to issue the Miranda warning to a civilian suspect in a similar incident before questioning.

In another significant case, the court agreed to decide if a police search at the consent of a suspect can be as extensive as a search backed up by a court-issued warrant.

The court agreed to review a ruling by the Florida courts that a consensual search of a car for drugs did not allow police to open a paper bag on the floor of the car, even though a warrant-based search would have permitted it.

Police found cocaine in the bag, but a trial court and the Florida Supreme Court threw out the evidence on the grounds that police had not received permission to extend the search from the car itself to the paper bag.

The Florida courts held that a consensual search is not legally considered to be based on probable cause - the key component in obtaining a warrant - and thus police do not have permission to conduct as extensive a search as would be allowed by a warrant.

In other action Monday, the court:

-Let stand a decision that automobile dealers in one state can be sued by a neighboring state for false and misleading advertising.

The court refused to consider an appeal by four Omaha, Neb., dealerships sued for false advertising in Iowa. The suit was based largely on advertisements placed in a Nebraska newspaper with limited circulation across the state border in Iowa.

-30- 3919

#90337u1311 12/03/1990 ~United Press International

WASHINGTON (DEC. 3) UPI - House Republicans, preparing for the next session of Congress, re-elected their leadership team Monday, including two who had to fight off determined efforts by challengers to oust them.

Rep. Guy Vander Jagt, R-Mich., was re-elected chairman of the National Republican Congressional Committee in a 98-66 victory over Rep. Don Sundquist,

R-Tenn., and Rep. Jerry Lewis, R-Calif., turned back a challenge by Rep. Carl Pursell, R-Mich., 98-64, to retain his No. 3 leadership post of Republican Conference chairman.

Others, including House Republican leader Robert Michel, of Illinois, were re-elected without opposition.

Democrats met later in the day to also organize for the 102nd Congress, which convenes Jan. 3. There were no contests for the leadership posts, however, and Speaker Thomas Foley, D-Was., and all other incumbent leaders were retained by the Democrats.

As a result of the Nov. 6 election, the Democrats strengthened their hold on the House and will enjoy a 267-167 majority. One member, Rep. Bernard Sanders, of Vermont, was elected as an independent and was not expected to be a member of either party caucus.

The challenge to Lewis was seen as a fallout from the recent battle over the budget deficit, in which Lewis supported the package of tax increases and spending cuts urged by President Bush. Pursell opposed that plan and his bid for the conference chairmanship was backed by conservative Newt Gingrich, R-Ga., the assistant GOP leader who publicly split with Bush over the budget.

Lewis was clearly angered that Gingrich would work against another member of the GOP leadership. After the vote he said the election ''was somewhat of a disaster'' for Gingrich and his allies ''who have chosen from within the leadership to actively work against my candidacy.''

However, Lewis and Michel asserted the party had not been harmed by the election fights. ''Our conference is together and will continue to work together,'' Lewis said.

Sundquist's unsuccessful campaign against Vander Jagt focused new attention on the fund-raising and contracting practices of the GOP's Congressional Campaign Committee, which has been run by Vander Jagt for 15 years. Sundquist charged that too little money is provided to Republican House candidates, while committee staffers and contractors are generously paid.

Vander Jagt, in his bid for re-election, pledged a review of contracting and other procedures at the committee and said he would seriously consider the criticisms and suggestions raised by Sundquist and others.

-30- 2759

#90337u1316 12/03/1990 ~United Press International

MIAMI (DEC. 3) UPI - A jury acquitted six Miami policemen Monday of charges they conspired to beat a drug dealer to death, but could not reach a decision on whether the officers actually assaulted the man.

The officers were found innocent on 17 of the 24 counts against them. No verdict was reached on the remaining seven charges, including the actual beating, and a mistrial was declared on those counts. None of the officers was convicted on any charge.

The officers hailed the verdict as a vindication.

''We said from the beginning that we were innocent and I guess we proved it,'' said Pablo Camacho, one of the six oficers.

''They decided we were correct in what happened out there. I'm very thankful they reached a fair verdict,'' said Andy Watson, another of the officers.

After 3 1/2 days of deliberations, the 10-man, two-woman jury sent U.S. District Judge Stanley Marcus a note Monday afternoon saying they had reached ''an insurmountable impasse'' on seven charges.

They had sent a similar note Friday and Marcus urged them to keep trying.

After consulting prosecutors and defense attorneys, Marcus accepted the partial verdict Monday.

The officers - Camacho, Watson, Tom Trujillo, Charlie Haynes, Ron Sinclair and Nathaniel Veal Jr. - are members of the Miami Police Department's undercover Street Narcotics Unit.

They were each charged with one count of conspiracy and three counts of civil rights violations, on Leonardo Mercado's death and one each for injuries suffered by Mercado's stepsons, Jose and Pedro Soto.

If convicted, the officers would have faced life in prison.

Mercado, 35, a small-time drug dealer with a lengthy criminal record, was beaten to death at his apartment in northwest Miami Dec. 16, 1988. The autopsy showed he had fractured ribs, internal bleeding, a quart of blood in his stomach and 44 areas of cuts and bruises.

Prosecutors contend the officers stopped by to see Mercado because they suspected he was reponsible for a death threat against Comacho. Assistant U.S. Attorney Dan Gelber said the officers confronted Mercado outside his apartment and ordered him inside, where he was ''beaten into soup.''

Defense lawyers said Mercado attacked Camacho in a frenzy and that the others came to Camacho's aid.

They said the officers did not intend to kill Mercado, and had not conspired against him but were making a legitimate drug arrest. They pointed out that

Sinclair had seized a bag of rock cocaine from Mercado.

''This is a war on drugs. If it weren't a war on drugs we wouldn't have been fighting Mercado,'' Trujillo said after the verdict.

Mercado's ex-wife, Maritza Soto, denounced the verdict saying the officers had gotten away with killing her ex-husband and beating her children.

''They treated him like an animal, they killed him worse than an animal,'' she said. ''The jury sold out. They didn't do no justice.''

She said she still would pursue the $10 million lawsuit she and the two stepsons filed against the city.

''They beat up my kids,'' she said.

The breakdown for the verdict was:

-Count 1, conspiracy - all six were acquitted.

-Count 2, violating Mercado's civil rights - no verdict was reached for any of the six.

-Count 3, violating Jose Soto's civil rights - no verdict was reached for Veal and the other five were acquitted.

-Count 4, violating Pedro Soto's civil rights - all six were acquitted.

BEIRUT (DEC. 3) UPI - Thousands of Lebanese army troops deployed Monday in the war-torn capital in a move long awaited by beleaguered Lebanese who suffered through 15 years of civil war and lawlessness under militia reign.

More than 3,500 Lebanese soldiers took up positions in various parts of Beirut replacing thousands of Christian and Moslem militiamen who engaged in bloody battles for the control of the city since 1975.

A Defense Ministry statement said, ''Army troops began to deploy in Greater Beirut at 2 p.m. local time after militias completed the pullout of their troops and weapons.''

The Christian hardline Lebanese Forces militia said it withdrew its arms from strongholds in the neighborhoods of Ashrafiyeh, Dora and Sin El Fil in east Beirut.

Three hundred military vehicles including tanks and 2,000 gunmen, a number of

whom were hooded, left the seaside militia headquarters in Karantina in three convoys heading to the Christian heartland in Kesrouwan and Jbeil, north of Beirut.

The army command warned the residents of east Beirut to stay indoors so as not to hinder the army deployment in their areas.

Military sources said four army brigades started to expand control from their barracks around the city to fill the security vacuum left by the militiamen.

They said 2,000 regulars from the army's Sixth Brigade fanned on the streets of west Beirut while hundreds from the 11th took control of the southern suburbs, the traditional stronghold of the Moslem fundamentalists.

Law and order in the Christian neighborhoods was entrusted to the 5th and 2nd Brigades. A battalion of cadets deployed in the devastated downtown area of Beirut, which was for 15 years a front line separating Christian fighters from their Moslem foes.

Military sources warned that army troops will storm suspicious arms caches in greater Beirut and will be entitled to confiscate all illegal weapons since all militias were given enough time to retreat.

The army deployment came after the government of President Elias Hrawi resolved a last-minute dispute to establish a militia-free unified Beirut.

The Lebanese Forces militia had said it wanted to occupy a magazine office and a research center in east Beirut in exchange for its withdrawal from all other parts of the city, but political sources said officials persuaded the militia to pull out completely.

CHICAGO (DEC. 3) UPI - Soybeans closed sharply higher Monday at the Chicago Board of Trade while the grains also made gains.

Fast market conditions helped the first five bean contracts race to double-digit gains. A soyoil rally prompted a flood of professional and commission house buying of beans, which traders said mainly was short covering.

Speculative buying and bull spreading helped corn close somewhat higher. December corn got an added boost from a second straight day of light deliveries.

The last-minute surge in beans plus local buying helped wheat prices overcome commercial selling to close higher. Light delivery notices also supported wheat prices along with fairly active professional and commission house buying.

At the close, corn was off 1/4 to up 2 1/2, wheat was up 3/4 to up 2 1/2, soybeans were up 4 1/4 to 11 3/4 and oats were off 1/4 to up 1 3/4.

#90337u1396 12/03/1990 ~United Press International

ATLANTA (DEC. 3) UPI - AIDS activists chained themselves to the front door of the national Centers for Disease Control Monday, protesting the treatment of women with AIDS and demanding a broader definition of the deadly disease.

Police reported about two dozen arrests among about 200 demonstrators who gathered in a cold rain outside the federal health agency, forcing authorities to close a section of the street to traffic.

Most of those arrested were charged with criminal trespass.

The AIDS Coalition to Unleash Power, or ACT UP, wants the CDC to revise its defintion of AIDS to include symptoms specific to women, as well as focus on how the fatal ailment affects intravenous drug users and minorities.

Police used bolt cutters to remove about a dozen protesters who chained themselves to the CDC's doors.

''Shame, shame, shame,'' a chorus of demonstrators cried at police who led

away those who were arrested.

''Arrest the real criminals,'' the crowd shouted, referring to officials overseeing the nation's policies on AIDS.

The crowd broke up shortly after the arrests, with several shouting, ''We'll be back'' as they trooped away.

In addition, a spokesman for ACT UP said about 50 activists forced their way inside the offices of Dr. Gary Noble, head of the AIDS effort at the federal agency.

Authorities could not immediately confirm the number of protesters in Noble's offices, which are about 5 miles away from the main CDC building. The demonstrators demanded a meeting with Noble to discuss their concerns.

Without the broader definition, ACT UP contends many women with the AIDS-causing human immunodeficiency virus, or HIV, go undiagnosed, keeping the numbers artificially low.

ACT UP contends the current definition of the deadly acquired immune deficiency syndrome, adopted in 1987, ignores the differences between AIDS in men and women. Unlike men, HIV-infected women often suffer recurrent gynelogical infections and other complications.

Women represent about 10 percent of the 154,917 AIDS cases reported in the United States since the disease was first identified in the early 1980s. The CDC acknowledges the actual number of AIDS cases in both men and women is likely is as much as 20 percent above official statistics.

The CDC's refusal to change the AIDS definition in the last three years is ''an act of life-threatening negligence,'' ACT UP said in a prepared statement.

''Since the 1987 revision, physicians and other health care workers have continued to report serious and fatal illnesses in women resulting from HIV/AIDS,'' ACT UP said. ''Furthermore, without an official AIDS diagnosis women are excluded from treatments, services, benefits and clinical trials.

''Women frequently die without ever receiving these services,'' the statement said. ''Such treatments and services are crucial given the fact that women with AIDS die four times faster than men. Many women die without ever receiving an AIDS diagnosis.

CDC officials, however, maintain there is no scientific evidence to conclusively link the HIV infection to life-threatening illness specific to women.

The CDC contends that ''inappropriate changes'' in the AIDS definition could

obscure trends in the disease and hamper their forecast of its progression.

Since AIDS was first identified in the early 1980s, 95,774 Americans have died from the disease.

#90337u1443 12/03/1990 ~United Press International
TAMPA, FL (DEC. 3) UPI - Ray Perkins, hailed as a Vince Lombardi by the team's owner when he was hired four years ago, Monday was fired as coach of the foundering Tampa Bay Buccaneers.

Owner Hugh Culverhouse made the announcement the day after Tampa Bay broke a six-game losing streak with a 23-17 victory over Atlanta. Richard Williamson, Tampa Bay's receivers coach since 1987, was named interim coach for the final three games.

''In any company, if you don't meet your goals, the head man is out,'' Culverhouse said. ''This is not my second-guessing. I'm emotionally sick over this day. Ray Perkins and I met shortly before one o'clock and I decided it would be best if I replace him as coach. He took it pretty hard.''

The Buccaneers are 5-8 this season and need to win their last three games to avoid an eighth straight losing season. Since coming to Tampa Bay from the University of Alabama, Perkins has a 19-41 record.

He is the second NFL coach to be dismissed this year, following Bud Carson at Cleveland. After his brief meeting with Culverhouse, Perkins spoke with his players and left the team's headquarters.

Culverhouse labeled Perkins ''my Vince Lombardi'' when he named Perkins to succeed Leeman Bennett on Dec. 31, 1986.

Perkins posted a 23-34 record as coach of the New York Giants from 1979-82 before replacing Bear Bryant at Alabama. He overhauled the roster he inherited from Bennett, often terming the beginning talent base an ''expansion team.''

Williamson, who has an idle week to regroup, said he planned no major changes.

''This is a tough day for me, the coach and all of us,'' Williamson said. ''Mr. Culverhouse said he would consider me for the position next year. It was extremely tough on Ray. I've known him for a long time, coaching with him at Alabama. He's a real competitor and this was very tough on him.''

Fan disenchantment with Perkins reached a crescendo in recent weeks. Before Sunday's game, a longtime season-ticket holder gathered more than a hundred people outside to stage a protest. Hundreds of fans remained in the parking lot until the start of the second quarter, hoping to send an angry message to Culverhouse.

''We've had four seasons without a winning year and that's the sole reason for today's decision,'' Culverhouse said. ''The pressure continued to build. The more I thought about it last night, I knew there would be this constant

distraction to the team - would Ray Perkins be here? I'm responsible to the community to produce a competitive team, a winning team.

''I'm attuned to the fans. They care, they want to win and so do I. They have a right to express their views. Both Ray and I were sad. Ray Perkins wants a winning program here and this is the first time something like this has happened to him in his 49 years. I told Ray I'd like to have him with the organization.''

After Perkins selected Vinny Testaverde with the first pick of the draft, Tampa Bay went 4-11 in the strike-shortened 1987 season. Two consecutive 5-11 seasons followed and Culverhouse predicted this year's squad would win at least 11 games.

Tampa Bay opened at 4-2 before a last-minute home loss to Dallas triggered a six-week slide. The Buccaneers have not been eliminated from playoff consideration heading into home games against Minnesota and the New York Jets, sandwiched around a game at Chicago.

''The sun will come up tomorrow,'' Testaverde said. ''Ray Perkins is a good coach and he'll be back on top of it again.''

#90337u1466 12/03/1990 ~United Press International

JERUSALEM (DEC. 3) UPI - The Labor Party-affiliated Histadrut union late Monday reached an agreement with the Finance Ministry and called off its indefinitely proclaimed strike that virtually shut down Israel's public sector.

Negotiating teams of the Histadrut and the Finance Ministry signed an agreement enabling about 500,000 Israelis to return to work immediately.

''We have signed an agreement and when two sides sign an agreement they have arrived at the conclusion that this is the best settlement that they can reach '' said Chaim Haberfeld, chairman of the Histadrut's Trade Union Division.

''It was not only a matter of the formualtion (of the agreement),'' Haberfeld said. ''It was also a matter of the essence.''

Ya'akov Lipshitz, the Finance Ministry's general director, said the agreement signed by the Histadrut Secretary General Yisrael Keisar and Finance Minister Yitzhak Modai stipulated the strike would end immediately, Army Radio reported.

Israeli workers Sunday closed down the country's banks, airports, government offices and other services including television, radio and most of the health and educational system to protest proposed cuts in the minimum wage and higher taxes on savings to help finance an estimated $30 billion needed for the absorption of thousands of new immigrants.

Approximately 160,000 immigrants have arrived in Israel in the first 11 months of 1990 and the numbers may reach 300,000 by April 1991, government officials reported.

The Histadrut and the Finance Ministry agreed late Monday in which the issue of the minimum wage would be shifted to the end of the debate agenda of the parliamentary Monetary Committee, Israel Radio reported.

Only in six weeks, when the committee concludes its discussions, will the Histadrut and the Finance Ministry attempt to reach a compromise on the issue, the radio reported. The two sides also agreed there would be no changes with regards taxes on savings.

It was Israel's second general strike this year. The Histadrut called a one-day strike earlier in the year opposing proposed tax reforms by Moda'i.

DALLAS (DEC. 3) UPI - Former Vernon Savings and Loan owner Don Dixon told testified Monday in his thrift fraud trial that he had no part in the arrangement to have female companions accompany a Texas thrift regulator on a trip to California.

Dixon said the escorts were arranged by Vernon President Patrick King at the request of Texas Savings and Loan Commissioner Linton Bowman for a 1986 trip to California where Vernon was making investments in real estate. ''I played no role,'' he said.

He testified that when he was asked by King if he would have a problem if women accompanied them on the trip, he said no and that King was on his own.

Dixon is on trial on a 38-count indictment charging him with using thrift funds to make illegal political contributions, pay for female entertainment and to support a lavish lifestyle.

Vernon collapsed in 1987 with a $1.3 billion loss to taxpayers, federal officials say.

Under questioning by his lawyer, Dixon said he was trying to save Vernon at a time when the thrift industry was coming under pressure as a result of a declining economy and the 1986 tax reform act that took away many of the incentives for real estate investment.

The defendant said he did not consider the trips arranged for Bowman as inappropriate nor the reimbursement of their expenses from Vernon. They were considered public relations costs to win the favor of regulators and

politicians, he said.

Asked if in hindshight he would change his opinion, Dixon said he would have handled them ''differently.''

A hunting junket to Kansas also was arranged for Bowman, he said, but there were no women present. ''It was 95 percent pheasant hunting and 5 percent television,'' he said.

Dixon said there were an average of 600 meetings year he would discribe as both business and social. He said out of about 3,000 such meetings over five years, there were no more than 15 or 20 meetings where women were present.

He also testified at length about political contributions, maintaining that he was not conversant with campaign laws. ''I was very naive about the political system ...,'' he said. ''I had no knowledge about the campaign laws.''

Dixon denied he asked his executives to submit false company expense accounts for reimbursement of campaign contributions. He said he told his officers that they could do so only after lawyers had cleared them.

Former Vernon officials have testified that that Dixon asked them to make the contributions and reimburse themselves through false expense accounts.

''I didn't authorize anybody to cheat on the expense accounts,'' Dixon testified.

HOUSTON (DEC. 3) UPI - Conoco Inc. said Monday it will support formation of a citizen advisory council to provide environmental advice on the company's operations in the Gulf of Mexico.

The council will be part of a concept already in place at other company sites in the United States, said Conoco President Constantine S. Nicandros.

''Representatives from environmental groups, the fishing industry, government, universities and the public will be invited to join this 12- member group,'' Nicandros told the America's Sea conference sponsored by the Environmental Protection Agency in New Orleans.

Under an environmental program announced last April, Conoco formed citizen councils to work with the company at U.S. refinery sites and at other locations around the world.

The program's initiatives also include such measures as constructing double-hull tankers, providing double-wall storage tanks at gasoline outlets

and accelerating emission reduction programs at its manufacturing sites.

Du Pont, Conoco's parent company, has $10 billion worth of assets in states bordering the Gulf of Mexico, Nicandros said.

''We believe that the scope of our presence mandates that we spell out what we are doing to influence the environmental well-being of the Gulf Coast,'' he said.

Nicandros also discussed a $75 million project that will allow Conoco to separate oil and water aboard offshore platforms, rather than bringing large volumes ashore for separation and subsequent water discharge into other bodies of water.

Nicandros encouraged a broadened perspective on the Gulf of Mexico beyond being ''America's Sea.''

''The corporate responsibilities of the Du Pont Company demand that we think of the Gulf of Mexico as a larger entity - more of a global commons, if you will, held in trust for all nations and all people,'' he said.

COLLEGE STATION, TX (DEC. 3) UPI - Physicists have worked out a testable new theory that may be a key step towards linking the fundamental forces of the universe in a single, unified model.

Preliminary data from recent experiments at the CERN particle collider in Switzerland appear to support the new theory's predictions, the scientists said in a news release issued Monday.

''It (the theory) seems to encompass all the beautiful things of the past,'' said Dimitri Nanopoulos of Texas A&M University. ''It is a supersymmetric theory. It is also a grand unified theory, and it is a string theory.''

Nanopoulos said the new model also suggests that a new form of invisible matter may exist. Dubbed cryptons, from the Greek word for ''hidden,'' they could make up the ''dark matter'' of the universe. Physicists use the idea of invisible dark matter to explain the gap between measurements of the total mass of the universe and what theory predicts should be there.

A team headed by Nanopoulos and John Ellis of CERN described the ideas behind their theory in a series of articles published over the past two months in the journal Physics Letters B.

The physicists said the theory explains for the first time in a single ''grand unification'' model how gravity interacts with the strong, weak and electromagnetic forces that bind matter together. Furthermore, the researchers said they have derived a set of rules that should allow the theory to be tested directly.

''We really worked hard, and we finally have a set of rules that I can use to tell you how to calculate this thing from beginning to end,'' Nanopoulos said.

A number of earlier ''grand unified theories'' have been proposed, but none have been able to satisfactorily combine all the forces at once.

In an interview with the magazine Science News, Ellis said: ''Even if our particular model turns out not be right, I still feel that the sort of things that we're learning in our model could be very useful in unraveling the details of (any better) model.''

The new theory incorporates ideas from the theories of ''superstrings'' and

''supersymmetry'' to go beyond the so-called standard model of fundamental forces generally accepted by particle physicists.

String theory suggests that matter is made up of vibrating line-like particles instead of point-like particles as originally thought. Cryptons seem to be found in a ''hidden segment'' of the strings, Nanopoulos said.The idea of supersymmetry allows physicists to treat particles and radiation the same way in their calculations.

The standard model of particle physics describes the relationship between ''weak'' force, ''strong'' force and electromagnetism. However, it does not take into account the effect of gravity.

The 1989 particle collider experiments confirmed the standard model, Nanopoulos said. But they also pointed the way toward more far-sweeping models like that proposed by the Texas-CERN team.

#90337u1489 12/03/1990 ~United Press International

(DEC. 3) UPI - A military rebellion erupted in Argentina today, just two days before President Bush is scheduled to visit there. Argentine President Carlos Menem declared a state of siege from his command post at the government palace which came under gunfire this morning. Rebel troops captured the headquarters of the army chief of staff and a regimental barracks in early fighting. The uprising is being held by a military unit known as the ''painted faces.''

President Bush says he has NO plans to alter his schedule, despite the uprising within the army in Argentina. Bush is in Brazil today. He spoke to a joint session of the Brazilian Congress, calling for free enterprise and free trade and praising the rebirth of democracy in the region. Bush also used the opportunity to seek more support for the American position in the Persian Gulf crisis.

The foreign ministers of Egypt, Syria and Saudi Arabia are meeting in Cairo this evening to co-ordinate their policies now that Iraq has agreed to face-to-face talks with the United States. Back in Washington, D-C, Defense Secretary Cheney answered congressional critics of Bush administration policies. He told the Senate Armed Services Committee that there is NO guarantee that economic sanctions will force Iraq to withdraw from Kuwait.

Iowa courts can still go after auto dealers in neighboring Nebraska if they feel that false and misleading advertisements are being placed in publications distributed in Iowa. That follows a decision by the U-S Supreme Court upholding earlier action by Iowa's Supreme Court. The ruling involves advertisements from Omaha, Nebraska, car dealerships placed in a Nebraska newspaper with limited circulation across the Missouri River in Council Bluffs Iowa.

The nation's highest court also upheld the conviction of a Missouri woman after poice found cocaine in a purse she had reported stolen. Ella Sumlin had appealed the eight-year prison sentence on grounds that the cocaine could have been planted in the purse. She also contended that police had NO right to search the closed cigarette case in which the cocaine was found.

A limited form of private ownershp of land has returned to parts of the Soviet Union for the first time since the 1930's. The Russian Federation has approved a controlled form of property ownership that still gives local governments substantial control over land transactions. But the move by the largest Soviet republic still represents the most liberal form of ownership since Stalin nationalized all Soviet land.

#90337u1524 12/03/1990 ~United Press International

BRASILIA, BRAZIL (DEC. 3) UPI - President Bush's first in-person outline of his ''initiative for the Americas'' Monday promised South Americans the chance of a rosy trade future with the United States but was less than what many on the continent had hoped to hear.

Bush arrived in Brasilia Monday morning for the first stop of a five- nation tour to promote free trade and celebrate the rebirth of democracy in the region.

His speech to the Brazilian Congress, outlining the main points of his six-day trip, differed little from the initiative he proposed in June to form a hemispheric free-trade partnership from the Arctic Circle to Cape Horn.

''It is within our power to make this hemisphere the largest free- trading partnership of sovereign nations in the world,'' Bush said in the speech.

''We see a future where growing opportunity, the power of technology and the benefits of prosperity are developed and shared by all.''

The main things Brazilians had hoped Bush's visit would lead to were help in negotiating their foreign debt with commercial banks, more access to high technology and expanded markets for exports. Brazil is in the midst of a

recession and as in many Latin American countries, President Fernando Collor de Mello is struggling to implement unpopular austerity measures with the idea that short-term hardship will lead to long-term growth.

Brazilian government sources said Collor asked Bush to pressure commercial banks to strike a bargain on debt but Bush made it clear he would only seek a restructuring of public debt, leaving Brazil to fight its own battles with the banks.

Brazil's $116 billion in public and private foreign debt is the largest in the Third World.

''Our new approach to official debt will compliment commercial debt restructuring,'' Bush said. ''I understand the importance to Brazil and, indeed, to the international financial community, of reaching a new and effective agreement on commercial debt. I believe, through your program of economic reform, you have taken the first crucial step toward that goal.''

Regarding transfer of technology, government sources said Bush approved the controversial sale of an IBM supercomputer, model 3090-200, to Brazil. The U.S. had balked on the sale for about two years because of Brazil's military ties to countries such as Iraq and because of fears Brazil would use the computer to help build an atomic bomb.

No new commerce agreements were signed in Brazil and half-way around the world in Brussels, Belgium, in the Uruguay Round of trade negotiations between 107 countries, no new concessions were made by the United States.

A letter by two top government ministers was published Sunday in the Folha de Sao Paulo newspaper, accusing the Bush administration of not heeding its own word in contributing to free trade.

The letter by Foreign Minister Francisco Rezek and Economy Minister Zelia Cardoso de Mello, addressed to President Collor, accused the United States of pressuring the Third World to follow its position in the trade talks without conceding anything in return to help boost the export potential of struggling countries like Brazil.

After Bush's speech, Nelson Carneiro, president of Brazil's Congress, praised Bush's efforts to place more importance on Latin America as a trading partner. ''Together we can produce more,'' he said.

But he warned, ''We must not forget ... that most of the world exists in poverty and is still subject to the domination of economic powers.''

To Brazil's powerful business community, Bush encouraged support for free enterprise and privatization.

''To promote new investment in the Americas, the dead hand of state con- trol must be lifted,'' he said. ''We must allow entrepreneurs the flexibility to adapt, create and produce.''

#90337u1532 12/03/1990 ~United Press International

NEW YORK (DEC. 3) UPI - Seven young men accused of beating a homeless man to death while wearing monster masks and wielding a meat cleaver during a Halloween night of violence were indicted for the murder, prosecutors said Monday.

''The actions of these defendants demonstrate a complete and total disregard for human life,'' Manhattan District Attorney Robert Morgenthau said of the

attack on homeless men living in a shelter on Ward's Island.

''These seven young men perpetrated shocking, indiscriminate and heinous acts of violence toward our city's most vulnerable citizens. Their behavior warrants prosecution to the fullest extent of the law,'' Morgenthau said.

The seven young men indicted on murder, assault and riot charges ranged in age from 13 to 23.

They were slated to be arraigned Tuesday in state Supreme Court in Manhattan.

The violence began at 9:30 p.m. on Oct. 31, when two of the suspects demanded money from several homeless men on a footbridge leading to the island from Manhattan. Hiding nearby were other members of the gang, wearing masks of horror-movie characters such as ''Freddie Kruger'' and ''Jason'' and cartoon characters such as ''Pluto'' and ''Goofy.''

When one of the homeless men, Carlos Melendez, 35, failed to comply with their demands for money, the entire group attacked him.

He was chased into bushes and attacked by the group, which wielded a meat cleaver, vacuum cleaner hoses and a lead pipe. He died of injuries sustained in the attack.

''Our investigation leads us to believe that it was the defendants' intention, from the start, to attack and brutalize homeless people living on the island '' Morgenthau said.

Melendez died as a result of blunt force trauma to the chest, according to the Office of the Chief Medical Examiner.

He also sustained severe lacerations to the head and neck that contributed to his death, as well as a fractured sternum and ribs, a ruptured lung and contusions to the surface of the heart, the medical examiner said.

Six other homeless men injured in the attack were treated at a hospital for their injuries.

(DEC. 3) UPI - Foreign ministers of three major Arab states directly involved in the Persian Gulf crisis ended their first round of talks in Cairo Monday and agreed to step up diplomatic efforts to dislodge Saddam Hussein's army from Kuwait before a U.N. deadline, an Egyptian official said.

The Arab initiative came the same day Yemeni Vice President Ali Salem al Baid, whose country supports Iraq in the crisis, flew to the Jordanian capital Amman for talks on the 4-month-old standoff, Amman Radio reported.

Persian Gulf states have labeled Jordan's King Hussein, who on Monday met in Amman with a delegation from the exiled Kuwaiti government, an aopologist for Saddam because of the Hashemite monarch's refusal to condemn Iraq's Aug. 2 invasion and annexation of Kuwait.

Cairo newspapers said Saudi Arabia, Egypt and Syria hope they can cause a rift between Saddam and his handful of Arab allies, thus persuading him of the futility of remaining in the oil-rich emirate after Jan. 15, a date set by the United Nations to let diplomatic efforts work before resorting to force.

''The foreign ministers ... have agreed to step up diplomatic efforts to persuade Iraqi President Saddam Hussein that peace can best be achieved by his withdrawal from Kuwait,'' the official said.

He said the efforts are crucial to avert force in the area.

Egypt's Middle East News Agency quoted a government official as saying the talks, which were to resume Tuesday in the presence of Egyptian President Hosni Mubarak, are intended to contain the crisis before it explodes.

''The vital interests of the Arab nation require the employment of its strategic, economic, military and human potential to adopt a unified action to deal with the crisis, and pull the Arab nation out of its current plight,'' MENA quoted the unnamed government official as saying.

''The three Arab capitals do not want a war against Iraq, but the restoration of an Arab land to its legitimate owners,'' the official said.

''They will step up contacts with (pro-Iraqi) states such as Yemen, Tunisia, Jordan, Sudan and the Palestine Liberation Organization to persuade Saddam that honorable withdrawal is better than dishonorable defeat in a war,'' the official said.

The meeting came as an Iraqi official boasted that any military attempt to free Kuwait would be a catastrophe for the attackers and their friends.

That threat came two days after Saddam accepted a U.S. proposal for last-minute talks on the crisis before the Jan. 15 U.N. deadline and a day after it tested a Soviet-designed Scud missile.

In Washington, Defense Secretary Dick Cheney told a Senate hearing on U.S. policy in the gulf that U.N.-imposed economic sanctions against Iraq will not force him to withdraw from Kuwait.

In Kuala Lumpur, Prime Minister Mahathir Mohamad said Monday Malaysia and other Islamic countries are prepared to mediate to help resolve the crisis.

Iraq's official INA news agency quoted Information Minister Latif Nsayef Jassim as saying any allied attack on Iraq to liberate Kuwait ''would be a catastrophe to the aggressing forces and the parties that invited them,'' a reference to such Arab states as Saudi Arabia and the United Arab Emirates.

Egypt and Syria have sent troops to the gulf to serve with the U.S.- led

multinational force deployed there since the invasion of Kuwait.

Syria has sent some 4,000 troops to Saudi Arabia and the United Arab Emirates to counter any further Iraqi aggression, and Syrian Defense Minister Mustafa Tlass was quoted over the weekend as saying his country is ready to send an another 500,000 troops if necessary.

Syria and Iraq are ruled by rival wings of the Baath Arab Socialist party and Syrian President Hafez Assad considers Saddam his main enemy in the Arab world.

Egypt has dispatched up to 20,000 troops to the gulf and is the third largest contributor after the United States and Britain, which is boosting the size of its force to 30,000.

Cheney told a Senate committee he does not think economic sanctions alone will work against Saddam and told congressional critics who want delays that stalling could be dangerous.

Cheney told the Senate Armed Services Committee that time can weaken the international coalition arrayed against Iraq and that further damage could occur to politically and economically fragile nations, permitting Iraq to bolster its military strength.

As for sanctions, he said: ''My personal view is that given the nature of that regime, given Saddam Hussein's brutality to his own people, given his very tight control over that society, his ability to allocate resources for the military, their ability to produce their own food, basically, inside, that he can ride them out.

ROMULUS, MI (DEC. 3) UPI - Two Northwest Airlines jets collided on a foggy runway at Detroit Metropolitan Aiprort Monday. At least 19 people were reported killed and at least 25 others injured.

Northwest Flight 1482 bound for Pittsburgh, a DC-9 carrying 39 passengers and five crew, and Nortwest Flight 299, a Boeing 727 carrying 146 and 10 crew, collided on a takeoff runway about 1:45 p.m. EST, an airline spokesman said.

The DC-9 burst into flames, quickly leaving it a charred hulk with most of the top of its passenger cabin burned away.

A Romulus deputy fire chief said some of the dead were still strapped in their seats aboard the DC-9. ''It is a disaster,'' said the deputy, who requested anonymity. He said ''about half the beople on board'' the DC-9 were killed.

Northwest spokesman Bob Gibbons said in St. Paul, Minn., where the airline has its headquarters, that at least 19 people were reported killed in the collision, and hospitals reported as many as 25 injured, one critically.

Another Northwest spokesman, Doug Miller, said the aircraft were taxiing for takeoff in the fog at Detroit when the accident occurred. ''Initial reports suggest the right wing of the 727 contacted the aft section of the DC-9, resulting in a fire aboard the DC-9 on a taxiway near Concourse A,'' he said.

Wayne County Executive Ed McNamara said a wintry storm had slammed the Detroit area earlier, but precipitation had cleared by midday, leaving the airport shrouded in fog. He said the weather was ''a very serious factor'' in the collision.

''Visibility was down very low,'' McNamara said. ''I happened to be passing by the airport and commented on it. No question, weather was a factor.''

Rod Nacker of Sterling Heights, who was aboard the 727 which was headed for Memphis at Flight 299, clipped the DC-9. ''We were taxiing just before takeoff '' he said. ''It seems the captain didn't even see the other plane. The other plane was in a lot worse condition than ours. We were losing a lot of aviation fuel. They foamed both planes. We couldn't see out the windows.''

Barbara Nicholson, a spokeswoman at Oakwood Hospital in Dearborn, said 13 were taken to Annapolis Hospital in Wayne and two of them later were transferred to the burn center at the University of Michigan Hospital in Ann Arbor, and three others were discharged. Four others were in stable condition at Heritage Hospital in Taylor, and Annapolis was expecting eight more patients, she said.

Detroit Metropolitan Airport was closed for about two hours after the accident.

Northwest said Flight 1482 was to have originated in Chicago, but bad weather there canceled the Chicago-Detroit leg of the flight, and it originated in Detroit. Flight 299 originated in Detroit.

The airport was the scene of the nation's second-worst aviation disaster. On Aug. 16, 1987, when a Northwest MD-80 bound for Phoenix crashed on takeoff, killing 156 people, including two on the ground. The only survivor aboard the plane was a 4-year-old girl aboard the plane, a version of the DC-9.

DETROIT (DEC. 3) UPI - General Motors Corp. will meet with dealers of its Saturn Corp. subsidiary this Wednesday to consider compensating them for a severe shortage of new Saturn cars, Automotive News said Monday.

GM may also delay the opening of some Saturn dealerships because quality problems have slowed the production line at the company's Spring Hill, Tenn., manufacturing complex.

Donald Hudler, Saturn vice president of sales, said Saturn's ''franchise operation team'' will discuss some form of compensation to dealers who have been in short supply of the cars since they went on sale at 25 locations Oct. 25.

Saturn now has 53 dealers in operation.

The weekly trade publication estimates about 8,000 Saturn cars have been shipped since production began in late July, all of them four-door sedan models. Saturn has said the coupe version, which is already being advertised, is not yet ready for sale.

One dealer, Al Serra of Saturn North in Clarkston, Mich., said compensation would be fair.

''I didn't think it would be quite this severe,'' he said, adding that his dealership has had only six cars to sell in the last 30 days.

''Not only do they not have any product, they don't have any income base,'' Serra said of himself and other Saturn dealers.

Serra said he has to continue paying his sales people and other staff even though no income is coming in.

Hudler, however, said that the company is dedicated to focusing on vehicle quality, not sales numbers. He said the company should be shipping coupes before the year is out.

The Saturn cars, intended to fight import brands like Honda's Civic, start at $7,995 for the base version, but can range to over $16,000 for a fully equipped SC coupe.

But few of the base-priced models are expected to be sold, with typically equipped models to sell in the $10,000 to $12,000 range.

BRASILIA, Brazil (DEC. 3) UPI - President Bush heralded a new hemispheric order driven by free enterprise, open markets and democracy Monday, only to be reminded just how Latin America in the throes of transition remains haunted by ghosts from its past.

Amid the sleek towers and white marble buildings of a capital carved from wilderness three decades ago, Bush called for a new ''declaration of interdependence among the American nations of the New World'' at the start of a 12,000-mile goodwill tour.

''I truly believe we are approaching a new dawn in the New World,'' he said in a speech to the Brazilian Congress. ''Our thinking must be bold, our will resolute. Our challenge now is to hew out of a wilderness of competing interests a new kind of opportunity in the Americas.''

Calling for a common course not blurred by ''the false distinctions between the First World and the Third World that have too long limited political and economic relations,'' Bush hailed a tide of reform ''transforming the face of this hemisphere.''

As he spoke, however, pleadings by his hosts for trade and debt concessions and an outbreak of military unrest in Argentina, the third stop on his swing through South America this week, served as reminders that the historic change that has swept Latin America in recent years has yet to be fully consolidated.

U.S. officials were quick to discount the significance of the rebellion in Argentina and its threat to President Carlos Menem. However, White House press secretary Marlin Fitzwater acknowledged it appeared intended to embarrass Menem and other U.S. officials admitted it bared a degree of restiveness within the Argentine military.

''It is not a large-scale uprising,'' said Deputy Secretary of State Lawrence Eagleburger. ''And again, my argument would be that fundamentally, democracy in Argentina is working and when this is over, it'll demonstrate the roots of democracy in Argentina are fairly deep.''

To avoid any appearance of alarm, Bush ruled out any immediate change in plans to arrive in Buenos Aires on Wednesday, reinforcing what Fitzwater described as ''his confidence in President Menem and his support for democracy in Argentina.''

In Brasilia, Bush had high praise for a country that ended 21 years of military rule in 1985 and the struggle by youthful President Fernando Collor de Mello to revamp an economy burdened by recession, inflation, market manipulation, protectionism and a $116 billion foreign debt, largest in the Third World.

Just as Menem has faced problems from the Argentine military, Collor has seen the progress of his economic recovery program stalled not just without but within by business and bureaucratic sectors that have profited from the inefficiencies and inequities of the past and would lose from modernization.

Bush offered Brazil, like the other four nations on his itinerary, a future of opportunity governed by ''mutual respect, candor and collective will.''

His pledge that the United States would support that transition ''every step of the way'' was backed by no new promises beyond the still-evolving trade, investment and debt relief plan he announced in Washington on June 27. But one of his objectives on this trip is to help leaders like Collor buy the time that will be needed to escape the legacy of dictatorship and state control, which is why he emphasized the need for patience and even sacrifice if reform is to succeed.

''In the short run, economic change will be difficult and painful for many,'' he said at a luncheon for Brazilian business leaders. ''But the long-term results - a growing economy, sound currency - will lead to new opportunities and a better quality of life for all the people of Brazil and indeed for the rest of the hemisphere.''

(DEC. 3) UPI - Rebel troops launched rebellion in Argentina today, seizing the headquarters of the army chief of staff and a regimental barracks. Loyalist forces reportedly blew up bridges on two highways to block an advance by rebel armored columns. Gunfire erupted in Buenos Aires, and some bullets hit the government palace. Argentine President Carlos Menem declared a state of siege from his command post at the palace. The army said most of its soldiers remained loyal, and it urged the rebels to surrender unconditionally.

The army rebellion erupted just two days before President Bush is scheduled to arrive in Buenos Aires on his week-long visit to South America. The president says he has NO plans to change his schedule.

President Bush called for free enterprise, free trade and open markets today in a speech to a joint session of the Brazilian Congress. The president opened a week-long South American trip in Brasilia, issuing what he called a ''declaration of interdependence among the American nations of the New World.''

The foreign ministers of Egypt, Syria and Saudi Arabia are meeting in Cairo to co-ordinate their Persian Gulf policies in light of the Iraqi agreement to face-to-face talks with the United States. Defense Secretary Cheney, meanwhile told Congress that giving more time for sanctions to work does NOT guarantee that they will succeed in forcing Iraq from Kuwait.

The chief of the Turkish general straff resigned today in apparent disagreement with his president's backing for the U-S policy in the Persian Gulf. The general is the second high-ranking Turkish official to resign because of the pro-U-S policy in Turkey.

South African police say emergency restrictions are being imposed on a black township east of Johannesburg, where black-on-black violence raged, leaving 52 people dead. The discovery of 52 bodies in the township pushed to 83 the number of people killed in politically inspired violence in South Africa since Friday.

A strong storm brought icy winter weather and blizzard conditions to the Midwest today, leaving thousands of people without power and giving thousands of school children a day off. Wisconsin, Michigan, Illinois, Iowa and Nebraska got the worst of the storm, which packed winds of up 50 miles an hour and snows up to 15 inches deep.

Simone Cousteau died at her home in Monaco. The wife of French sea explorer Jacques-Yves Cousteau was 72. Though Mrs. Cousteau avoided the spotlight, she had accompanied her husband on more than one-thousand excursions on the research vessel ''The Calypso.''

WASHINGTON (DEC. 3) UPI - The number of delinquent consumer loans at commercial banks remained stable during the third quarter and consumers appeared to be more cautious about using credit, the American Bankers Association said Monday.

The consumer credit delinquency rate was 2.56 percent at the end of September, almost unchanged from the 2.55 percent rate at the end of the second quarter and lower than the 2.88 percent rate in the year-earlier quarter.

The association noted a ''steady retrenchment'' in the growth of consumer credit during the quarter, a move reflecting a more cautious attitude among consumers toward borrowing.

''Consumers are well aware of the slowing economy and are making efforts to consolidate and repay debts, rather than take on new ones,'' said Robert Dugger, the association's chief economist.

Dugger said financially strong households are making more of an attempt to scale back debt than financially weaker ones.

Delinquencies among home equity lines of credit remained unchanged during the quarter at 0.80 percent and direct auto loan delinquencies decreased to 2 percent from 2.12 percent in the previous quarter.

Bank credit card delinquencies increased in the third quarter to 2.56 percent from 2.36 percent in the second quarter.

Arizona, Nebraska and South Dakota reported the lowest delinquency rates, the association said.

#90337u1721 12/03/1990 ~United Press International

NEW YORK (DEC. 3) UPI - Stocks closed broadly higher Monday in active trading, with the gains said to be tied to hopes for lower interest rates after remarks by a member of the Federal Reserve Board.

The Dow Jones industrial average, which surged 40.84 Friday, rose 5. 94 to close at 2565.59.

Among broader market gauges, the New York Stock Exchange composite index rose 1.01 to 177.07 and Standard & Poor's 500-stock index gained 1.88 to 324.10. The price of an average share added 18 cents.

Advances led declines 957-609 among the 2,010 issues crossing the NYSE tape. Volume amounted to 177,010,000 shares, compared with the 192, 348,870 traded Friday.

Stocks opened higher, and while the broad market retained its gains throughout the day, the rise in the blue-chip Dow industrials was largely lost by mid-morning to profit taking. Analysts said investors were moved to take profits by Defense Secretary Dick Cheney's comments in testimony before Congress early Monday.

Cheney cautioned congressional critics of the Bush administration's Persian Gulf policy there is no guarantee that waiting for sanctions to work will get Iraqi President Saddam Hussein's forces out of Kuwait.

Cheney said it would be ''far better for us to deal with him now'' when the international coalition is solidified against Saddam ''than it would be for us to deal with him five or 10 years down the road.''

Also weighing on the Dow, analysts said, was a sharp drop in AT&T, a key component of the average, after news of its unsolicited $90-a-share bid for NCR Corp.

''But the typical stock had a good day today,'' said Don Hays, director of investment strategy at Wheat, First Securities Inc. in Richmond, Va.

Hays attributed the strength to remarks by Federal Reserve Governor Wayne Angell in an interview with The Wall Street Journal. Angell said the Fed needs to bring down long-term rates in order to revive the economy, not just the short-term rates it controls.

''That fueled the perception that rates are coming down, inflation is bsiding, and that the Fed will be easing more in the weeks ahead,'' he said.

Also feeding hopes that rates are on the way down, Hays said, was news that the U.S. economy weakened for the second consecutive month in November, the National Association of Purchasing Management said Monday.

The Purchasing Managers' Index, which covers the manufacturing economy, fell to 41.3 percent from 43.4 percent in October, its lowest point since the trough of the previous recession in Nov. 1982.

On the trading floor, AT&T was the most active issue, plunging 2 to 30 1/8 on volume of more than 8 million shares after news of the bid.

NCR followed, catapulting 24 3/4 to 81 1/2 on news of the offer. First Bank System was third, up 5/8 to 12 7/8.

Among the other blue chips, IBM lost 5/8 to 113, Eastman Kodak rose 3/8 to 42 3/4, Woolworth gained 5/8 to 29 7/8, General Motors lost 1/2 to 36 1/8 and McDonald's jumped 1 3/8 to 29 1/2.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 211,462,410 shares, compared with 233,494,540 shares traded in the previous session.

Prices rose in moderate trading on the American Stock Exchange.

The Amex Market Value index added 0.81 to 302.68. Advances led declines 294-273 among the 810 issues traded. The price of an average share rose 2 cents. Composite volume totaled 18,103,550 shares vs. 14, 967,740 traded Friday.

Imperial Oil Class A led the Amex issues, up 1/4 to 51 3/4.

Continental Air was next, plunging 1 3/8 to 2, losing about a third of its value after filing for Chapter 11 bankruptcy protection for the second time in seven years.

The carrier cited a 125 percent jump in the cost of jet fuel as the reason for the move, which it said would allow it to restructure its $2. 2 billion debt.

The National Association of Securities Dealers composite index rose 2.25 to 361.31.

(DEC 3) - A powerful wintry storm pounded the Midwest with blizzard conditions Monday, knocking out power, tangling traffic and closing schools as it moved east, where flood warnings were in effect.

The weather may have been a factor in the collision of two Northwest Airlines jetliners on a foggy runway at Detroit Metropolitan Airport, killing at least 19 people and injuring 25 others. Officials said there were serious visibility problems at the time because of the fog.

Winds to 50 mph and heavy snow prompted the National Weather Service to post blizzard warnings for parts of Wisconsin and Michigan. Winter storm warnings were issued for most of the rest of the region.

By late afternoon, Madison, Wis., was covered with 16-inches of blowing and drifting snow. It was a record at that depth and the National Weather Service said up to five more inches of snow could fall before the storm stopped.

Dubuque in eastern Iowa had 14 inches of snow on the ground by midday and Carroll County across the Mississippi River in Illinois got 10 inches.

In Wisconsin, Gov. Tommy Thompson authorized closing state government offices in snow-bound areas, requiring only essential employes to report for work and officials considered closing campuses in the University of Wisconsin System. Madison was blanketed by nine inches of snow, forcing city and county offices to close.

City buses also were forced off the streets at rush hour and nearly all school districts in the southern half of the state closed for the day.

At a time when Christmas shopping was expected to make or break many small merchants, shopping malls around the city delayed opening.

Dane County Regional Airport closed while Milwaukee's Mitchell International Airport remained open despite delays.

A donated liver arrived at Froedtert Memorial Lutheran Hospital in Wauwatosa, Wis., Monday despite blizzard-like conditions. A 42-year-old critically ill Milwaukee-area woman underwent emergency transplant surgery.

The National Weather Service office felt the force of the storm when it knocked out power to an NWS office in the Chicago area for three hours.

''We went stone cold dead,'' NWS spokesman John Jameison said. ''Even the backup generator went out. Things have been pretty strange around here.''

Jameison said the weather reporting station an Meigs Airport on Chicago's lakefront reported winds gusting to 70 mph.

''Gusty winds do things to power lines,'' he said.

ComEd spokesman Jose Andrade said as many as 45,000 ComEd customers were without power from McHenry, Lake and northern Cook County to West Chicago, where six 12,000-volt lines were downed.

''That took out a good number of persons,'' Andrade said.

Power had been restored to all but 14,000 customers by 9 a.m.

Waves were reported at 14 to 18 feet on Lake Michigan and more than 80 flights had to be canceled at O'Hare International Airport between 5 a.m. and 7 a.m. so the runways could be plowed. Delays of 30 minutes to an hour were common.

Most roads in Jo Daviess County in northern Illinois were closed because of blowing and drifting snow.

Sheri King, dispatcher with the Nebraska State Patrol in Lincoln, where 5 inches fell, said the patrol is recommending no travel on Interstate 80 in southeast Nebraska because of ice and drifting snow.

''They ain't joking. It's slow, really icy,'' she said. ''Some people are sliding off the highway and they're just leaving their cars there. Some wrecker services won't go out in weather like this.''

#90337u1853 12/03/1990 ~United Press International

JUNEAU, Alaska (DEC. 3) UPI - Walter Hickel was sworn in Monday as Alaska's first Independent governor, but he invited Democrats and the Republicans he spurned to help him renew the frontier spirit in what he calls the ''north country.''

Hickel, who was elected on the anti-federal government Alaskan Independence Party ticket, warned in his inaugural address that Alaska will stand up for its rights against federal intervention.

''We're going to insist they play by our rules,'' said Hickel, who has noted he decided to run for governor after White House Chief of Staff John Sununu urged him not to enter the race against a Republican favored by the Bush administration.

''Alaskans are truly independent,'' Hickel told a crowd of 1,500 at his swearing-in ceremony. ''We like to stand our ground.''

''We are not awed by outside interests no matter how big they are or how big they think they are - whether those interests are large foreign fishing fleets resource industries, extreme outside lobbying groups or U.S. congressmen with guilty consciences because of the pollution in their city skies or environmental desecration in their own backyards,'' he said.

Hickel, 71, becomes the eighth governor of Alaska - 24 years after he was sworn in as second governor of Alaska in 1966, then as a Republican.

In January 1969, half-way through his term, Hickel resigned to join President Nixon's cabinet as Interior secretary, but was fired in November 1970 after criticizing Nixon for failing to listen to American youth protesting the Vietnam War.

A substantial conservative minority - 39 percent - elected Hickel over Democrat Tony Knowles, the former mayor of Anchorage, moderate Republican state Sen. Arliss Sturgulewski and environmentalist Jim Sykes of the Green Party.

Hickel concluded his brief inaugural speech by inviting ''all Alaskans to join us - Independents, Republicans, Democrats or whoever.''

Conservatives took center stage to see their candidate assume office.

The Rev. Jerry Prevo, president of the state Moral Majority, which represents the GOP religious right-wing that supported Hickel, gave a prayer of thanks for Hickel's election before the new governor spoke.

Hickel's first speech as governor combined a can-do, pro-development ''frontier spirit'' cheerleading with warnings that outside interests - especially the federal government - better not get in the way.

''Together we'll show the world how an owner state can be developed, and the environment not just protected, but enhanced,'' Hickel declared, calling Alaska ''an owner state'' because it owns most of its resources, including the oil that accounts for one-fourth of domestic production.

''Every one of us is part owner of this great country,'' Hickel told the crowd following his habit of referring to Alaska as ''a country,'' even though he does not subscribe to the views of the Alaskan Independence Party that the state become independent of the United States. He also refers to the state as ''the north country.''

Hickel, born in Claflin, Kan., grew up working on the family tenant farm and became a boxer, winning the Golden Gloves welterweight champion in Kansas in 1938. In 1940, when plans to go to Australia fell through, he went to Alaska, arriving with 37 cents in his pocket and began working odd jobs.

Hickel has since become one of Alaska's richest businessmen, building a real estate empire that includes shopping centers and a large Anchorage hotel. He was chairman of the Yukon Pacific Corp., which he founded to build a proposed $11 billion trans-Alaska natural gas pipeline, but resigned to run for governor.

At the urging of conservatives unhappy with the prospect of moderates and liberals on the ballot, Hickel declared his candidacy just seven weeks before the election, using his own wealth to pay for most of the $1-million-plus campaign.

#90337u1891 12/03/1990 ~United Press International

WASHINGTON (DEC. 3) UPI - Saying Congress is on trial in the Keating Five hearings, Sen. Daniel Inouye delivered an impassioned defense of the accused senators Monday and suggested their home-state voters should ultimately decide on the propriety of the lawmakers' actions.

Testifying during the 10th day of hearings before the Senate ethics committee, Inouye, D-Hawaii, hailed the ''honesty'' and ''integrity'' of Sens. Alan Cranston, D-Calif., Dennis DeConcini, D-Ariz., John Glenn, D- Ohio, John McCain, R-Ariz., and Donald Riegle, D-Mich.

The senators are accused of improperly pressuring federal bank regulators to benefit savings and loan kingpin Charles Keating Jr., who gave the lawmakers $1.3 million in political contributions.

Meanwhile, the FBI refused comment on a published report that the agency has begun a criminal investigation of DeConcini and Cranston concerning alleged bribery and vote-trading. Both senators Monday strongly denied the report.

Inouye, a 28-year Senate veteran who served on committees investigating scandals such as Watergate and the Iran-contra affair, said he rejected the advice of his family and staff in interjecting himself in a matter in which he has no personal involvement.

''But I believe that what is on trial here is not the five colleagues of mine, but the United States Senate and for that matter the Congress of the United States,'' Inoye said.

He condemned as ''ridiculous'' the notion, presented by the committee's special counsel, that there is something improper about providing vigorous assistance to a constituent even if that person is an important financial backer. The only limits of constituent service, Inouye said, is that it be ''within the law.''

The committee is to decide whether the senators' actions broke any Senate rules of conduct.

Inouye strongly defended the senators, particularly DeConcini, the one on whom the influence-peddling accusations increasingly have focused.

''I have never found them to be wanting in honesty or integrity,'' Inouye said. ''They are men of unimpeachable character.''

Inouye suggested that the voters in the senators' home states should serve as the jury in the matter, with judgment day coming on election day.

Asked by special investigator Robert Bennett whether the hearings raised ''issues the voters should be deciding upon rather than this kind of a proceeding,'' Inouye said, ''It is not a question of whether the voters should (decide) because the voters will (decide).''

Inouye reacted to testimony by two federal bank regulators that DeConcini acted improperly during meetings on April 2 and April 9, 1987, by offering a deal on behalf of Keating's now-defunct Lincoln Savings and Loan of Irvine, Calif., involving withdrawing a regulation limiting risky S&L investments in exchange for Lincoln making more home loans. Inouye called DeConcini's conduct ''proper'' and said ''all of us'' in the Senate have made such proposals ''at one time or another.''

''If contributions are that evil, then I believe the whole (campaign finance) system should be changed,'' he said. ''For a long time I have advocated public financing, but very few in the Senate would support public financing.

''I am fortunate ... that I don't have to raise too much money ... a relatively small amount, so I don't have to go on these huge fund- raising safaris,'' Inouye added. ''But I feel sorry for many of my colleagues who have to do that.''

DeConcini was choked with emotion after Inouye's testimony, calling Inouye ''an American hero because he tells the truth and he doesn't mind taking the risks that are involved in telling colleagues that the Senate is on trial, not the five senators, and if there are problems, it's not these five senators, it's the Senate and the process.''

#90337u1908 12/03/1990 ~United Press International

MIAMI (DEC. 3) UPI - Eastern Airlines said Monday it received bankruptcy court approval to enter a joint real estate venture in Puerto Rico with an affiliate of Hyatt Hotels.

The agreement between Eastern's subsidiary Dorado Beach Development Inc. and

Cerromar Beach Corp., the Hyatt affiliate, calls for a large- scale development to be built in phases on the Puerto Rican coast west of San Juan.

The development is expected to include 540 homes and villas, an 18- hole golf course and country club resort complex on a 400-acre property bordering the Hyatt Dorado Beach and Cerromar Beach Hotels.

Eastern said it has owned a portion of the property since the early 1970s when it acquired the Dorado Beach and Cerromar Beach Hotels. The hotel properties were sold in 1975, but the airline retained 280 acres of land.

#90337u1976 12/03/1990 ~United Press International

LOS ANGELES (DEC. 3) UPI - Lockheed Corp.'s board of directors Monday rejected a $1.6 billion plan by Texas investor Harold Simmons to take the aerospace giant private, saying it doubts Simmons can raise the money.

Simmons, who holds nearly 20 percent of the company's stock and has been trying to gain control of Lockheed for nearly two years, had offered to buy the rest of the company's shares for $40 each by putting up $400 million in cash and $400 million in assets.

Lockheed would then use $800 million of its assets to finance the rest of the deal.

Since early last year, Simmons has suffered a paper loss of about $600 million on his acquisition of Lockheed stock, most of which was bought at more than $40 a share and has since plunged. The stock closed Monday at $30.25, down 37.5 cents on the New York Stock Exchange.

Simmons offered his plan because he cannot buy more than 20 percent of the stock without triggering the company's anti-takeover provisions.

Part of the idea behind Simmons' offer is that by privatizing Lockheed, the company would not have to pay more than $100 million in dividends to shareholders each year.

But the board, in rejecting the offer, said that such a deal would be disruptive to the company, which builds military aircraft, missile and space systems and has annual revenues of more than $5 billion.

''The major disruptions associated with pursuing this highly leveraged transaction, without a high probability of success, would be detrimental to all Lockheed shareholders,'' the board said.

#90337u1982 12/03/1990 ~United Press International

WASHINGTON (DEC. 3) UPI - Defense Secretary Dick Cheney said Monday he does not think sanctions alone will work against Iraq's Saddam Hussein, and told congressional critics who want delays that stalling could be dangerous.

Cheney, delivering a blunt administration message meant both for Congress and for Saddam, told the Senate Armed Services Committee that time can weaken the international coalition arrayed against Iraq, and that further damage could occur to politically and economically fragile nations, permitting Iraq to bolster its military strength.

Asked by Sen. Carl Levin, D-Mich., if it were more likely than not that sanctions could work in a year or two, Cheney replied:

''My personal view is that given the nature of that regime, given Saddam Hussein's brutality to his own people, given his very tight control over that society, his ability to allocate resources for the military, their ability to produce their own food, basically, inside, that he can ride them out.''

''Those who would have us rely indefinitely on economic sanctions alone need to face the possibility that they will fail to achieve our aims. Such a failure will have very serious consequence and those consequences must also be faced,'' said Cheney.

President Bush, in Brazil Monday, noted the economic impact the crisis is having on the economies of nations like Brazil and Czeckoslovakia, making the point that many nations are suffering because of the crisis.

''That's why when people say to me that this can go on and on, I say no,'' Bush said in prepared remarks, ones designed like Cheney's to increase the pressure on Iraq and make clear to a restive Congress seeking delays why the admninistration is pushing forward.

The administration message did not sway a key senator, Robert Byrd, D-W.Va., chairman of the Senate Appropriations Committee.

He told Cheney, ''It is my feeling that we should be patient in applying military force, that we should give the sanctions an opportunity to weaken Saddam Hussein, so that if it becomes necessary to use the option of military force we will perhaps have saved some lives of American boys. ... I'm concerned that we don't have a consensus here in this country that would support a war.''

Cheney also said that he believes that it is within Bush's power to commit U.S. forces to battle without first asking Congress.

''I do not believe the president requires any additional authority from Congress before comitting U.S. forces to achieve our objectives in the Gulf.

The president made it very clear that he wants to consult extensively with the Congress on the subject,'' said Cheney.

In a related matter, the Pentagon said late Monday that Cheney signed an order on Dec. 1 authorizing the call-up of an additional 63,000 military reserve and National Guard troops. Cheney has now authorized the call-up of an estimated 188,000 reserve and guard forces, but only about half that number has been activated.

During the committee hearing, Cheney and Gen. Colin Powell, chairman of the Joint Chiefs of Staff, made clear their belief there is no guarantee sanctions will bring Saddam to realize he must get out of Kuwait.

''The evidence is not all on the side of, we can wait indefinitely for sanctions to work,'' Cheney said. ''... We must not create a false dichotomy between sanctions and a military option. They are mutually reinforcing parts of a broad strategy to get Iraq out of Kuwait.

''It's important that we keep in mind the consequences if we fail,'' said Cheney. ''If Saddam wins, keeps Kuwait, the coalition falls apart, the economic sanctions don't work, we don't use military force ... then we've got a hell of a problem.

#90337u1984 12/03/1990 ~United Press International

CAPE CANAVERAL, Fla. (DEC. 3) UPI - Making up lost time, the Columbia astronauts took manual control of a balky $50 million shuttle telescope mount Monday, gathering priceless data about the cosmos amid work to fix the computerized pointing system.

Mission manager Jack Jones said late Monday engineers were ''right on the threshold'' of solving a variety of problems with the European-built Instrument Pointing System, or IPS, allowing the crew to begin around-the-clock observations of the most violent stars and galaxies in the universe.

''People are working to solve the problem and we have confidence that we will solve it in a very short period of time,'' said NASA flight director Robert Castle. ''We've got a 10-day flight and we've still got a lot of time ahead of us.''

Chalking up the mission's first science observation, the Hopkins Ultraviolet Telescope, one of four instruments making up Columbia's ''Astro-1'' space observatory, recorded the spectrum of a galaxy in the constellation Canes Venatici that may harbor a voracious black hole at its hidden core.

''We're elated, everybody here is very happy,'' said principle investigator Arthur Davidsen. ''Everything is starting to go very well.''

Later in the day, X-rays from an ancient supernova were recorded along with the invisible untraviolet light from an especially hot star as the telescopes were manually guided from target to target by Columbia's crew.

The goal of the flight is to study high-energy X-rays and ultraviolet light from violent stars, exploding suns, energetic galaxies, quasars and other objects to learn more about the structure and evolution of the universe and the titanic forces that shape its destiny.

Unlike harmful UV radiation from the sun, ultraviolet light and X- rays from deep space cannot penetrate Earth's atmosphere.

The only way to study such radiation is from space and to gather as much data as possible, Columbia's three ultraviolet telescopes required the computer-controlled IPS to efficiently track down and lock onto the desired targets.

Mission scientist Ted Gull said the unexpected work to get the balky IPS up and running would force scientists to sacrifice some of the more than 200 astronomical observations that had been scheduled for the 38th shuttle mission.

''We will not get all the science we want to get,'' he said, ''but we're certainly going to get some very nice science whenever the pointing starts to work.''

The four astronomers in Columbia's seven-man crew - Jeffrey Hoffman, 46, Robert Parker, 53, and civilians Samuel Durrance, 47, and Ronald Parise, 39 - successfully operated the Instrument Pointing System in a manual mode late in the day Monday amid work to calibrate the sensitive aiming device.

Working in the background, shuttle skipper Vance Brand, 59, co-pilot Guy Gardner, 42, and flight engineer John ''Mike'' Lounge, 44, kept the shuttle shipshape and pointed in the right direction.

Columbia's $150 million payload is made up of four telescopes mounted in the shuttle's 60-foot payload bay. Three instruments sensitive to ultraviolet light are mounted on the IPS while the fourth, the Broad- Band X-ray Telescope is mounted on its own pallet at the rear of the cargo hold.

The $50 million Instrument Pointing System, built in West Germany and first used during a 1985 shuttle mission, uses sensitive star trackers, gyroscopes and other complex electrical and mechanical systems to keep the telescopes it carries locked onto their targets as the shuttle races through space.

The problem for the Astro mission was twofold. One of three IPS star trackers was too sensitive and ''saw'' more faint stars in its field of view than had been planned for, preventing it from locking onto the proper guide stars.

#90337u1997 12/03/1990 ~United Press International
WASHINGTON (DEC. 3) UPI - The farm price index, dragged down by low corn, milk, hog and soybean prices, dropped to its lowest level of the year during November despite all-time high prices for steers and heifers, the government said.

The index is the government's measurement of price paid to farmers for their crops and livestock. The November reading of 145 was down 1 point from October and marked the fourth month in a row the index fell.

''The November soybean price was at the lowest level since July of 1989 while the all-wheat price was the lowest since August of 1987,'' the Agriculture Department said in a report released Friday. ''The corn price continued a downward trend which began in July.''

In addition, the wholesale price for milk, $12.80 per 100 pounds, down 40 cents since October, was the lowest since July 1989. Wool sold for the lowest price, 58 cents a pound, since January 1986.

''Steer and heifer prices were at an all-time record high, up 1 percent from the previous record of $80.20 (per 100 pounds) a month earlier,'' the department said, reporting an average price of $81 per hundredweight.

Hog prices averaged $49.70 per hundredweight in November, down $7.10 from October but still $4.70 higher than one year earlier.

Soybeans sold for an average of $5.51 a bushel in November, down 36 cents from October. However, peanuts were up 4.5 cents a pound to average 38.5 cents, their highest price since January 1981. Drought has slashed the size of the peanut crop.

Corn prices averaged $2.10 a bushel, down 9 cents from October and 14 cents below the November 1989 price.

Wheat sold for an average of $2.36 a bushel during November, 6 cents less than during October and $1.36 below the price in November 1989.

#90337u2003 12/03/1990 ~United Press International
WASHINGTON (DEC. 3) UPI - The government should conduct a new round of research intowhether it is safe to drink milk from cows treated with a synthetic hormone, a consumer group said Tuesday, arguing an earlier conclusion was premature.

The Food and Drug Administration, which has yet to decide whether to approve bovine somatatropin for commercial use, ruled a few years ago there was no health risk from BST. It has allowed the sale of milk produced by cows that are subjects of field tests of the genetically engineered hormone.

But a branch of Consumers Union said there had been insufficient study on one of the intermediaries involved in use of BST. A researcher with Eli Lilly andCo., a developer of BST, called the argument old hat and already disproven.

''It appears that the opponents of biotechnology are raising the human health issue once again,'' the researcher, Dr. John Holcombe, said in a prepared statement. ''You can be assured that milk from BST- supplemented cows is safe for humans, young and old.''

Earlier this year the FDA said insulin-like growth factor, the intermediary cited by the consumer group, ''will have no adverse effect on consumers.''

The controversy, the latest in a long dispute over BST, came one day before the National Institutes of Health were scheduled to open a two- day hearing to gather consensus about BST.

A top FDA official has said the agency is unlikely to make a decision on BST during 1991.

Four U.S. companies are seeking government approval to sell the synthetic hormone, which could be the first major biotechnology product used by farmers.

''FDA should re-open its investigation of the human food safety of (BST) use '' the Consumer Policy Institute, a branch of Consumers Union, said. ''While conducting this investigation, FDA should rescind its decision to permit the sale of experimental milk from (BST)-treated herds.''

The Foundation on Economic Trends, led by Jeremy Rifkin, a longtime skeptic of biotechnology, petitioned the FDA to recall all BST-treated milk, to block further sale of it and to fund independent research on BST.

Consumers Union said it believed FDA did not have sufficient information about insulin-like growth factor to judge its potential impact.

In a research paper, the organization contended BST was unlikely to result in lower grocery-store prices for milk but could drive small dairy farmers out of business by triggering a flood of price-depressing surplus milk.

''Some mechanism should be established to research the potential economic and social impacts of new technology and assess the overall costs and benefits to society before a new technology is introduced,'' the paper said.

Monsanto, another developer of BST, said it was misplaced to mix scientific

and economic concerns. Although the company disputed the conclusion BST would hurt small farmers, it said the government has ''never kept safe, effective products from the marketplace ... on the basis of uneven economic effects.''

The FDA, in a rare step, published an article in a scientific magazine last summer to support its decision that BST is safe. It said BST and insulin-like growth factor were broken down in the digestive tract and that BST-treated milk contained only trace amounts of them.

MONTREAL (DEC. 3) UPI - Canadian Pacific Forest Products Ltd. said Monday it will close its Quebec paperboard and packaging mills for separate two week periods over the Christmas holidays.

CP Forest spokesman Roger Hebert said the shutdowns were in response to weak demand for the products made at the mills.

The La Turque mill, which produces bleached pulp and bleached and unbleached paperboard, will suspend operations from Dec. 22 to Jan. 6. The pulp mill has an annual capacity of 165,000 tons while the paperboard operations have a capacity of 330,000 tons a year.

CP Forest's Matane mill, which produces corrugated medium, will be closed from Dec. 23 to Jan. 5. The mill has an annual capacity of 103, 400 tons.

CP Forest said the shutdowns were in line with the company's policy to ''tailor production to customer requirements''.

Hebert said CP Forest's newsprint mills at Gatineau, Quebec, Dalhousie, New Brunswick and Thunder Bay, Ontario remain closed due to strikes by members of the Canadian Paperworkers Union. He said there were no new developments.

The Gatineau and Dalhousie mills were struck in early September. The Thunder Bay mill was closed a month later. Some 3,600 workers have been affected.

#90337u2016 12/03/1990 ~United Press International

PANAMA CITY, Panama (DEC. 3) UPI - State and private sector unions announced Monday they will launch a 24-hour strike this week to protest mass layoffs of federal workers and the government's refusal to reimplement year-end bonuses.

Isaac Rodriguez, secretary general of the National Institute of Water Resources and Electicity Workers Union, told reporters workers from 68 unions were planning to walk off the job Wednesday. He said 25 of the unions were from the public sector.

The Panamanian government has declared the strike illegal and said it will deduct a day of wages for those who do not show up for work Wednesday.

The unions accuse the government of having layed off 20,000 public employees in its campaign to privatize national industries. The government said the number of workers let go was far fewer, but would not provide further details.

''The government ... has created a climate of terror in all of our organizations,'' the unions said in a joint statement. ''Month after month public employees are terrorized waiting for their pink slips that leave us out in the street without any rights, throwing all our years of work into the garbage can.''

Private sector unions attacked the government for refusing to reimplement year-end bonuses, which were suspended by former military ruler Manuel Noriega becuase of the country's drowning economy.

The unions also said the government has fired more than 390 union leaders, including all labor chiefs in Chiriqui, Veraguas, Cocle, Herrera and Los Santos provinces, and has dismantled 21 of 47 organizations of a public sector union federation.

They also charged the government has stolen union funds and not respected constitutional worker benefits.

Rodriguez said workers were planning a march Tuesday afternoon, which he said would indicate the amount of support for the strike.

#90337u2047 12/03/1990 ~United Press International

CHICAGO (DEC. 3) UPI - The Los Angeles Dodgers added another right-hander to its rotation Monday, signing free agent Kevin Gross to a three-year contract.

Gross, 29, joins starters Ramon Martinez, Tim Belcher and Orel Hershiser, who is coming back from surgery, and leaves the Dodgers still unsettled over left-handed free agent Fernando Valenzuela.

''We have a decision to make there,'' said Fred Claire, the Dodgers executive vice president and player personnel chief.

Gross is the second free agent signed by the Dodgers, joining outfielder Darryl Strawberry. The two lucrative deals leaves Claire without much to offer someone like Valenzuela.

''We haven't said we've closed the door, but we've taken two big steps,'' Claire said.

Gross finished the 1990 season with a 9-12 record and 4.57 ERA in 31 games, 26 starts, for the Montreal Expos. He was 1-0 with a 0.69 ERA in five relief appearances.

Overall, Gross struck out 111 batters and walked 65 in 163 1-3 innings pitched. Claude Osteen, a coach in the Dodgers' minor league organization, recommended Gross, Claire said.

''One thing you can't say is that he doesn't have talent,'' Los Angeles Manager Tommy Lasorda said.

A southern California native, Gross is 80-90 with a 4.02 ERA in eight major league seasons. He has pitched 29 complete games and thrown 11 shutouts in 221 career starts. Gross spent six seasons with the Philadelphia Phillies and the last two years in Montreal.

The Dodgers also announced catcher Luis Lopez, who led the Pacific Coast League in hitting with a .353 average, has been designated for assignment.

#90337u2189 12/03/1990 ~United Press International

(DEC. 3) UPI - A Northwest Airlines spokesman says at least 19 people were killed today when two of the carrier's jetliners collided at Detroit Metropolitan Airport in heavy fog. The crash involved a Boeing 727 and a D-C-9 which caught fire.

A Northwest spokesman says the 727 carried 146 passengers and 10 crew members and the D-C-9 had 39 passengers and four crew members. He says the 727 was a flight to Pittsburgh, while the D-C-9 was headed to Memphis, Tennessee.

Loyalist army troops in Argentina surrounded an infantry barracks seized by rebel forces and pounded it with artillery, forcing dozens of the rebels to surrender. The rebellion within the army erupted early today in Buenos Aires, when the rebels seized the army headquarters and the barracks.

Defense Secretary Cheney told Congress- and, indirectly Iraqi leader Saddam Hussein- that the world canNOT wait indefinitely for economic sanctions to force Iraq out of Kuwait.

The State Department says U-S and Iraqi officials have agreed that if face-to-face talks are held, they will involve only the two nations.

The Columbia shuttle crew is still having trouble with a telescope aiming system, putting them behind schedule on the observations scheduled for the 10-day astronomy mission. Officials, however, say they are confident the problem will be solved by tomorrow at the latest.

Oakland County Prosecutor Richard Thompson announced in Pontiac, Michigan, that the man called the ''suicide doctor'' has been charged with first-degree murder for helping a woman take her own life with his ''suicide machine.'' Thompson conceded, however, that it may be difficult to get a conviction against Dr. Jack Kevorkian.

The ''Day of the Big One'' arrived today along the New Madrid Fault line from Illinois to Mississippi, and some residents took cover. Others gathered for earthquake parties. The regular patrons of Hap's Bar in New Madrid, Missouri, gathered before dawn to begin a quake bash.

-30- 2145
#90337u2363 12/03/1990 ~United Press International
(DEC. 3) UPI - At least 19 people were killed and 25 others injured today when two Northwest Airlines jetliners collided at Detroit Metropolitan Airport. A Boeing 727 and a D-Coff runway when they collided, and the D-C out hulk with most of the top of the passenger compartment gone. Northwest says the 727 carried 146 passengers and 10 crew members and the D-C-9 was carrying 39 passengers and five crew. The collision occurred in heavy fog this afternoon.

The Argentine army says officers who launched a rebellion in Buenos Aires early today have surrendered. But T-V reports in the capital city indicate that loyalist troops are still coming under sniper fire. President Carlos Menem declared a state of siege after the rebellion began. The outbreak comes just two days before President Bush is to arrive in Buenos Aires on his week-long trip to South America.

President Bush and his aides said they have NO intention of changing the scheduled visit to Argentina. Bush is in Brazil... the first stop on his trip, where addressed a meeting of the Brazilian Congress today. The president called for bold thinking and strong wills to ensure what he called a ''new dawn in the New World.'' Bush hailed a tide of reform, which he said is changing the face of the hemisphere.

Secretary of Defense Cheney was on Capitol Hill today, delivering a message to congressional critics of Bush administration policy in the Persian Gulf... AND to Iraqi leader Saddam Hussein. Cheney says he does NOT think the economic sanctions alone will be able to force Iraq out of Kuwait. He says the longer the delay to wait for sanctions to do the job, the more dangerous the consequences.

The foreign ministers of Egypt, Syrian and Saudi Arabia met in Cairo today and agreed to step up their diplomatic efforts to get Iraq out of Kuwait before the January 15th deadline set in a U-N Security Council resolution. The new Arab initiative came as the Yemeni vice president flew to Amman for talks with

Jordanian officials. Yemen supports Iraq in the crisis.

The Russian Federation legislature voted today to legalize private land ownership in the huge republic... the biggest in the Soviet Union. Republic leader Boris Yeltsin hailed the action as historic and said it will enable the Russia to feed itself again. The vote allows individuals to own, buy and sell real estate for the first time since the 1930's, when Josef Stalin nationalized all land in the Soviet Union.

-30- 2640
#90337u2523 12/03/1990 ~United Press International
(DEC. 3) UPI - Two Northwest Airlines planes collided at Detroit Metropolitan Airport, killing at least 19 people and injuring 25 others. A Boeing 727 and D-Coff runway, and the D-C-9 burst into flames, leaving the aircraft a charred hulk with most of the top of the passenger compartment burned away. One official says the weather had to have played a part in the collision. The airport was shrouded in fog at the time.

Rebel army officers staged a lightning, pre-dawn strike at key Argentine military installations today, but loyalist forces had re-taken two of them in day-long skirmishes. At least six people died. Loyalist forces surrounded an army barracks and pounded it with artillery, forcing the rebels inside to surrender. Less than an hour later, the army said it had re-taken another rebel stronghold... a tank factory run by the Defense Ministry.

The foreign ministers of Egypt, Syria and Saudi Arabia announced a new diplomatic initiative today to try to end the Persian Gulf crisis before the January 15th deadline set in a U-N Security Council resolution. The three announced the action after a first round of talks in Cairo. Reports say the three nations will try to convince Saddam Hussein to withdraw from Kuwait before military force begins.

Defense Secretary Cheney told Congress today that dangerous consequences could come from a long delay to await results from economic sanctions against Iraq. Cheney told the Senate Armed Services Committee that he does NOT think sanctions alone will get Iraq to withdraw from Kuwait. And he said waiting on the sanctions too long could wreck the multi-national unity now confronting Iraq.

Continental Airlines became a casualty of the Persian Gulf crisis today. The airline's parent company filed a Chapter 11 bankruptcy petition, saying it had to act because of skyrocketing jet fuel prices. Continental says its fuel costs have soared 125 percent since Iraq invaded Kuwait on August 2nd. It is the second Chapter 11 filing for Continental in seven years.

A Socialist-backed lawyer is the new president of Ireland... and the country's first woman chief executive. The inauguration of Mary Robinson was a mostly

military ceremony with church bells and a 21-gun salute. She replaces Patrick Hillery, who served in the largely ceremonial role for the past 17 years. Robinson promises to work for what she calls ''an open Ireland,'' a country that is tolerant and inclusive.

-30- 2625

#90337u2689 12/03/1990 ~United Press International

(DEC. 3) UPI - Authorities in Wayne County, Michigan, say weather was ''a very serious factor'' in today's collision between two Northwest Airlines jets at Detroit Metropolitan Airport. At least 19 people were reported killed and at least another 25 injured when a D-C-9 and a Boeing 727 collided on a foggy takeoff runway. All the dead were aboard the D-C-9, which burst into flames... leaving it a charred hulk with most of the top of its passenger cabin burned away.

Defense Secretary Cheney told lawmakers today he believes the U-N-imposed economic sanctions against Iraq WON'T force Saddam Hussein out of Kuwait. At a Senate Armed Services Committee hearing into U-S policy in the Persian Gulf, Cheney testified stalling is dangerous. He says time can only weaken the international coalition now amassed against Saddam.

President Bush today called for a new ''declaration of interdependence among American nations of the New World'' at the start of his South American goodwill tour. In a speech before the Brazilian Congress, Bush declared- ''Our thinking must be bold, our will resolute. '' Bush called for a common course in the Americas and he hailed a tide of reform- quote- ''transforming the face of this hemisphere.''

In Argentina, loyalist government troops have crushed a one-day military rebellion after a day of combat at three insurgent strongholds. President Carlos Menem declared a state of siege in the predawn hours shortly after rebels took over government military installations. Diehard rebels reportedly surrendered the army command headquarters late today just one hour before a deadline set by President Menem.

In Washington, the so-called Keating Five senators got a boost today from a colleague. Hawaii Democratic Senator Daniel Inouye vouched for his fellow senators in an impassioned defense of their character. Saying Congress is on trial in the Senate ethics committee hearing, Inouye hailed the ''honesty'' and ''integrity'' of Senators Alan Cranston of California, Dennis DeConcini of Arizona, John Glenn of Ohio, John McCain of Arizona and Donald Riegel of Michigan.

The four democrats and one republican are accused of improperly pressuring federal bank regulators on behalf of savings and loan kingpin Charles Keating Junior, who contributed to their political campaigns.

71-year-old Walter Hickel was sworn in today as Alaska's first Independent governor. Hickel was elected on the anti-federal government Alaskan Independence Party ticket... and warned in his inaugural address that Alaska will stand up for its rights against federal intervention. Hickel invited Democrats and the Republicans he spurned to help him renew the frontier spirit in what he calls the ''north country.''

#90337u3042 12/03/1990 ~United Press International

(DEC. 3) UPI - Authorities revised the death toll in the near head-on collision today of two Northwest Airlines jets on the ground at Detroit's airport. Officials now say at least eight people were killed and eight others are still missing hours after the accident. Northwest earlier put the death count at 19.

A Northwest spokesman says a D-C-9 and a Boeing 727 collided on a takeoff runway. The 727 lifted away from the tarmac and its right wing struck the stationary D-C-9, ripping open the roof and hitting a rear engine, causing the plane to burst into flames. The 727 landed safely.

The Pentagon said late today Defense Secretary Cheney has signed an order authorizing the call-up of an additional 63-thousand military reserve and National Guard troops. That brings the total call- up of reservists to an estimated 188-thousand, but only about half has been activated.

Earlier today, Cheney told Congress that stalling to give economic sanctions more time to work against Iraq could be dangerous. He said it would give Iraq time to bolster its military strength and cause further political and economic damage to fragile nations.

President Bush today had high praise for Brazil, a country that ended 21 years of military rule five years ago. During a stop in Brasilia, Bush pledge the United States would support the country's transition to Democracy ''every step of the way.''

But Bush was quickly reminded that Latin America is still haunted by ghosts from its past by an outbreak of military unrest in Argentina, the third stop on his swing through South America this week. But Bush ruled out any immediate change in plans to go to Buenos Aires on Wednesday.

In Buenos Aires, the government said it crushed a coup attempt by rebellious soldiers. Troops loyal to President Carlos Menem blasted rebels into surrendering with artillery, fighter bombers and small arms fire. Reports say at least 12 people died and dozens were wounded.

Blizzard conditions swept the nation's midsection today as a powerful wintry storm pounded the area. It plastered Madison, Wisconsin, with 16 inches of

snow. The storm knocked out power, snarled traffic and closed schools as it moved east, where flood warnings are in effect.

#90337x0649 12/03/1990 ~Comtex

NEW YORK (DEC. 3) UPI - Russell Markert, founder and director of the high-kicking Radio City Rockettes until his retirement in 1971, has died at the age of 91.

Markert died at Waterbury Hospital in Connecticut on Saturday. He had been a resident of Heritage Village in Southbury, Conn., and left no survivors.

Markert, a native of Jersey City, N.J., was chief choreographer of the Rockettes from the day Radio City Music Hall opened until his retirement in 1971.

He estimated that during his career he trained and rehearsed about 2, 500 statueque women who were required to be 5 feet 5 inches to 5 feet 8 inches tall and who could kick at least 6 inches over their heads.

Last year, Markert's 90th birthday was honored by more than 400 people, Rockettes, former Rockettes and friends for the benefit of the Russell Markert Dance Scholarship at the Julliard School.

Markert was born on Aug. 8, 1899, in Jersey City. He began his professional career as a dancer on Broadway after World War I, and graduated from the chorus to dance director of the annual revue ''Earl Carroll's Vanities.

In 1925, Markert founded the precision dance company in St. Louis and named it the the Missouri Rockets. While touring in New York City, the group was spotted by S.L. ''Roxy'' Rothafel, who headlined them at the Roxy Theater as the ''Roxyettes.''

In 1932, they moved to the Radio City Music Hall and became the Rockettes.

#90337x1658 12/03/1990 ~Comtex

TORONTO (NOV. 4) UPI - Police seized $17 million of cocaine and arrested 23 people connected to a Miami-based drug ring known as ''The Company.'' police said Monday.

The group supplied about one-third of the cocaine flowing into the province of Ontario in the past three years, police said.

The seizure and arrests were made over the weekend. During seizures and arrests in April, Toronto police acquired a gang ledger that detailed the

group's operations.

Undercover Toronto officers, working in conjunction with Montreal police and U.S. Drug Enforcement Agency officers, learned a truck with a hidden cargo space was headed for Canada on the weekend with 250 pounds of pure cocaine.

Police moved in as the truck was unloaded in Montreal.

Police say the group, operating as seven cells, sold about $3 million worth of cocaine in one six-week period.

Project Sombra II, begun last January, also alerted police to a South American group that was importing cocaine to Toronto's Pearson International Airport in false bottom suitcases.

An undercover police officer placed an order for cocaine with a ring leader, who was arrested in Toronto after police sent him a plane ticket so he could come and collect his money.

The ring leader and three couriers were arrested and several kilograms of cocaine were seized.

#90337x1789 12/03/1990 ~Comtex

HOLLYWOOD (NOV. 4) UPI - ''Home Alone'' cleaned up at the nation's box office for the third consecutive week, humbling its competition with nearly $70 million in ticket sales since its release.

Written and produced by John Hughes, ''Home Alone'' grossed $14.4 million at 1,342 screens over the weekend and is moving toward crossing the $100-million benchmark by the end of the year, with a gross of $66.8 million in its first 17 days for Twentieth Century Fox.

Only 25 other movies in Hollywood's history have led the box-office for three straight weeks.

The film, starring Macaulay Culkin as a 9-year-old boy forgotten at home while his family jets off for vacation, fended off a strong challenge from the debut weekend of ''Misery, the latest Stephen King book to come to the screen.

''Misery,'' starring James Caan as a writer beset by a deranged fan, had plenty of company with a $10.1 million gross at 1,244 screens.

''Home Alone'' and ''Misery'' may face strong competition this weekend from Warner Bros.' debut of ''The Rookie,'' starring Clint Eastwood and Charlie Sheen.

Meanwhile, ''Three Men and a Little Lady,'' Disney's sequel to its hit ''Three Men and a Baby,'' fell from No. 2 to No. 3 with an $8 million weekend at 1,282 screens. The film, which boasts stars Tom Selleck, Steve Guttenberg and Ted Danson, has grossed $29.8 million in 12 days.

The critically acclaimed American Indian epic ''Dances With Wolves'' caught $7 million at 1,053 screens over the weekend, as it stayed in fourth place in its second week in wide release for Orion. The three- hour film, starring and directed by Kevin Costner, has grossed $24.4 million in its 24 days of release.

Fox's ''Predator 2'' dropped off sharply, scaring up just $4.1 million at 1,978 screens in its second weekend after a solid opening weekend. The sci-fi flick, starring Danny Glover and Gary Busey fighting an unstoppable alien, has grossed $19.7 million in 12 days.

Sylvester Stallone's ''Rocky V'' stumbled from fifth to sixth with a less-than-punchy $3.3 million weekend at 2,053 screens, off sharply from its first two weeks. The film, supposedly the last of the ''Rocky'' series, has grossed $32.1 million in 17 days.

Still another sequel, Disney's animated ''The Rescuers Down Under,'' came in seventh with $2 million in its third weekend at 1,237 screens.

Romance-mystery ''Ghost,'' the year's biggest hit, floated from No. 7 to No. 8 grossing $1.9 million at 1,528 screens. ''Ghost,'' one of only 10 films to post four No. 1 weekends, has grossed $198 million in 21 weeks for Paramount and should top the $200 million mark later this week.

Universal's ''Child's Play 2,'' the No. 1 flick just three weeks ago, came in ninth with a $1.3 million gross at 1,439 screens over the weekend.

Columbia's thriller ''Jacob's Ladder'' rounded out the top 10 with a $825,970 take at 1,094 screens for a 31-day gross of $23.7 million.

The top 10, weekend gross, total gross and weeks in release:

1. ''Home Alone,'' $14.4 million, $66.8 million, 3 weeks.

2. ''Misery,'' $10.1 million, 1 week.

3. ''Three Men and a Little Lady,'' $8 million, $29.8 million, 2 weeks.

4. ''Dances With Wolves,'' $7 million, $24.4 million, 4 weeks.

5. ''Predator 2,'' $4.1 million, $19.7 million, 2 weeks.

6. ''Rocky V,'' $3.3 million, $32.1 million, 3 weeks.

7. ''The Rescuers Down Under,'' $2 million, $11.8 million, 3 weeks.

8. ''Ghost,'' $1.9 million, $198 million, 21 weeks.

9. ''Child's Play 2,'' $1.3 million, $24.5 million, 4 weeks.

10. ''Jacob's Ladder,'' $825,970, $23.7 million, 5 weeks.

#90338b0016 12/04/1990 ~Business Wire

KANSAS CITY, MO (DEC. 4) BUSINESS WIRE - US Sprint announced Tuesday a three- to five-year agreement with Rockwell International for voice, data and video services, tandem systems and a network management control center.

The agreement is valued at more than $35 million.

Rockwell International, based in El Segundo, Calif., is a $12 billion company. US Sprint will act as its prime contractor and integrator to combine Northern Telecom DMS-250 switches, an Ameritech network management control center and US Sprint's own network services.

The agreement, which covers all of Rockwell's divisions and subsidiaries nationwide, includes US Sprint Private Line(sm), the digital, dedicated-line service designed for large organizations with long distance usage between multiple locations; VPN(sm), US Sprint's software-based Virtual Private Network service for voice and data; 800 services, including inbound WATS service; and FONCARD(sm), US Sprint's travel card.

Dave Dorman, president of US Sprint's Business Market Group, said, ''The total network package is as user-friendly as any system in the marketplace, which is vital to telecom managers charged with decision making and purchasing. Our whole state-of-the-art network system relies on customized and integrated network solutions.''

''The technological synergy of the US Sprint network, which is based 100 percent on our DMS-250 systems, and a private network based on the same switching systems will provide Rockwell with a number of enhanced service capabilities in its hybrid public and private network,'' said Lou Lafferty, account vice president for US Sprint, Northern Telecom Inc.

Ameritech Information Systems Inc., is a subsidiary of Ameritech, formed in January 1989 to provide comprehensive, integrated systems solutions to meet the communications and information needs of large business customers. The 2,000-employee company is comprised of the Chicago headquarters and sales operations divisions in the five Ameritech states.

Ameritech is the Chicago-based parent of the Bell companies serving Illinois,

Indiana, Michigan, Ohio and Wisconsin, and several other information-related subsidiaries.

Northern Telecom is the leading global supplier of fully digital telecommunications switching systems providing products and services to telephone operating companies, corporations, governments, universities and other institutions worldwide. Northern Telecom, with 1989 revenues of $6.1 billion, employs more than 49,000 people around the world.

US Sprint is a unit of United Telecommunications Inc., a diversified international telecommunications company with $7.5 billion in revenues. US Sprint provides a comprehensive array of voice, data and video communications products and services on the nation's only all-digital, fiber-optic network.

LONG BEACH, CA (DEC. 4) BUSINESS WIRE - Strong distribution channels, solid name recognition and an industry trend toward mainstream consumer sales are the reasons for Pioneer Electronics (USA) Inc.'s entry into the cellular phone market, announced Tuesday by company executives.

''The profile of the cellular customer is evolving from business purchaser to individual consumer, making this an ideal time for Pioneer to make an aggressive entry,'' said Michael Townsen, vice president of car electronics marketing. ''The demographics of the cellular phone purchaser closely resemble those of the audio and video market, a segment Pioneer has been serving for 25 years.''

Pioneer will offer both mobile and hand-held phone models as well as a full line of accessories. The launch will be supported by trade and consumer advertising in the first quarter of 1991 and the products will be available to consumers by April.

The cellular phones will be sold exclusively through Pioneer's established channels of distribution. In addition to strong distribution channels, Pioneer also offers consumers excellent technical and service support already in existence.

''Pioneer is a name consumers trust,'' said Townsen. ''Our name brand equity and tradition of offering quality products at a reasonable price will give us a competitive advantage.''

Manufactured in the United States, Pioneer cellular phone models PCM-500,

PCM-300 and PCH-600 feature the latest cellular technology and a cosmetic design that complements modern vehicle interiors.

With headquarters in Long Beach, Pioneer Electronics is the leader in car audio electronics.

SAN FRANCISCO (DEC. 4) BUSINESS WIRE - Ronald C. Pohls has been elected vice president-personnel of McKesson Corp.

Pohls, 55, joined the company in 1972 as director of personnel for McKesson Drug Co. Prior to that he was personnel director of the Coty Division, Pfizer Inc. Earlier he served as an industrial relations supervisor with Union Carbide Corp. Earlier this year he was named staff vice president on the corporate staff.

Pohls is a 1957 graduate of Colgate University and pursued graduate studies at Marshall University.

Pohls succeeds James Johnston, 63, who has retired from McKesson Corp. after 18 years of service. Prior to joining McKesson, Johnston, a 1949 graduate of U.C. Berkeley, spent 15 years with the Monsanto Co.

In addition to his corporate responsibilities, Johnston has served as chairman of the National Conference Board's Organization and Management Council and the Executive Committee of the Federated Employers of San Francisco.

He is also the co-author of ''Organization Planning,'' a personnel handbook. Johnston and his wife Marjorie reside in San Rafael, Calif.

#90338b0042 12/04/1990 ~Business Wire

BOULDER, COLO (DEC. 4) BUSINESS WIRE - Vac-Tec Systems Inc. announced Tuesday that it has been advised by its majority shareholder, Amdura Corp., that Amdura is evaluating, as part of its plan of reorganization under Chapter 11 of the Bankruptcy Code, a number of options relating to its investment in and loans to Vac-Tec, including exercising its existing conversion and warrant rights to increase its equity ownership in Vac-Tec up to approximately 77 percent and exchanging all or a part of its loans for additional Vac-Tec equity.

Amdura currently owns 57 percent of Vac-Tec's outstanding common stock and, in addition, holds Vac-Tec's Series I and Series II convertible preferred stock and three warrants, which if converted and exercised would increase Amdura's ownership of Vac-Tec's outstanding common stock to approximately 77 percent. Dividends have not been paid on the preferred stock and could be converted to additional shares of common stock.

As of Oct. 31, 1990, $11,239,780 was due and owing under a promissory note issued by Vac-Tec and secured by all of Vac-Tec's assets. Amdura is currently not collecting interest or principal on the indebtedness owed to it by Vac-Tec.

Amdura has advised Vac-Tec that it has not reached a decision with respect to conversion of preferred stock or exercise of warrants held by Amdura. In addition Vac-Tec added that no agreement has been reached with Amdura with respect to exchange of all or any portion of Amdura's loans for additional Vac-Tec equity.

On April 2, 1990, Amdura Corp. and its hardlines distribution subsidiaries, including Amdura National Distribution Co. and Coast to Coast Stores Inc. filed for protection under Chapter 11 of the federal bankruptcy code in the United States Bankruptcy Court, Denver. Vac-Tec was not included in the filing and is not in bankruptcy.

Vac-Tec Systems Inc. manufactures vacuum coating equipment, used to apply thin films of metal, metal compounds, ceramics and other materials on a wide range of consumer, industrial and micro-electronic products.

MENLO PARK, CA (DEC. 4) BUSINESS WIRE - SangStat Medical Corp. of Menlo Park, and the Centre de Transplantation d'Organes in Nantes, France, have formed a joint venture focused on the research and development of therapeutic products to increase the success of organ transplantations.

As part of the joint venture agreement, SangStat has established a French subsidiary company, Lynatech.

The Centre de Transplantation d'Organes is world renowned for its expertise in performing organ transplantations and conducting research leading to valuable transplant therapies. SangStat is a young biomedical company that has developed proprietary technology demonstrating potential as a targeted therapy for suppressing certain immune system functions in transplant patients.

Under the terms of their joint venture relationship, the two organizations will pool their resources to produce novel immunosuppressive products.

SangStat's new French subsidiary, Lynatech, will be housed at the Centre de Transplantation d'Organes. This location will enable Lynatech to interact directly with the transplant center's large clinical operation, which performs several hundred organ transplantations each year, and with the center's sizable scientific staff, which is renowned for its research on immunosuppression and the protection of transplanted tissue.

The company president will be Maryvonne Hiance, a partner of Atlanpole, a French venture capital firm controlled by the city of Nantes.

SangStat Medical Corp. is a privately held biomedical company founded in late 1988 to develop and commercialize novel monitoring and therapeutic products for the cell typing and organ transplant markets. The following is a brief overview. Immune Cell Typing and Transplant Monitoring Products

In the field of organ transplantation, the procedures for determining donor tissue compatibility and for monitoring patients post-surgery are very complex requiring sophisticated laboratory personnel and hours of time.

SangStat's goal is to replace these procedures with easy-to-use screening systems that are instrument-free and highly sensitive. Company products are based on proprietary TRANSTAT technology. They typically use whole blood (Sang) and are designed to provide results rapidly (Stat).

SangStat already is marketing four immunoassay test systems using monoclonal antibodies and proprietary membrane technology for immune cell typing. Future products will employ membrane and synthetic peptide technologies to analyze donor-to-patient tissue compatibility, monitor immune system responses to transplanted organs, and guide post-surgery immunotherapy.

SangStat was founded by Philippe Pouletty, M.D., and David Rammler, Ph.D. Laboratory, manufacturing and administrative offices are located in the San Francisco Bay Area city of Menlo Park. Venture capital funding has been provided by Athena Ventures, EuroAmerica, IAI Venture Capital Group and Sequoia Capital.

REDWOOD CITY, CA (DEC. 4) BUSINESS WIRE - ReMACS, the leader in automated restaurant back office management systems, announces a 30-day satisfaction guarantee, effective Monday (Dec. 3), for all ReMACS software systems.

ReMACS will be the only major developer in the industry to provide this offer.

This guarantee is applicable to all ReMACS software that is purchased along with ReMACS Training and Support Services. It covers all software products and non-rendered services for 30 days from the date of initial installation.

''Consumers want to be assured of the products they are purchasing. This guarantee is a statement of our system reliability and our commitment to customer satisfaction,'' said David Douglas, president of ReMACS. ''Software systems are difficult to test drive prior to purchase, so we want to ensure a potential customer can be confident about our commitment to their future.''

ReMACS software systems address the areas of cost control, Point of Sale communications, financial control and labor management with specific applications for full service, quick service and hotel/resort operations.

ReMACS, which is an acronym for Restaurant Management and Control Systems Inc. was founded in 1983 and has over 4,000 installations. ReMACS is headquartered in Redwood City with 10 regional offices located in the continental United States and Canada.

SEATTLE (DEC. 4) BUSINESS WIRE - Alaska Airlines, a subsidiary of Alaska Air Group Inc. (NYSE, PSE), reported Tuesday that its November traffic increased 3 percent to 347.2 million revenue passenger miles (RPMs) from the 337.0 million flown a year earlier.

The passenger load factor (the percentage of available seats occupied by fare paying passengers) for the month was 51.5 percent, down from 54.5 percent in November 1989.

Capacity during November was 673.5 million available seat miles (ASMs), 9 percent above the 618.6 million in November 1989. The airline carried 431,300 passengers in November, compared to 412,400 in November 1989.

For the 11 months ended November 1990, revenue passenger miles totaled 4.093 billion, an 11 percent increase from the 3.686 billion recorded a year earlier. The passenger load factor for the 11 months ended November 1990 was 53.5 percent, down from 55.3 percent for the prior year.

Capacity for the 11 months ended November 1990 increased 15 percent to 7.656 billion, up from 6.665 billion in 1989. The airline carried 4,978,000 passengers, compared to 4,568,000 in 1989.

Horizon serves 34 cities in five states and Canada.

LOS ANGELES (DEC. 4) BUSINESS WIRE - Metrobank (ASE:MBN) Tuesday announced that the board of directors has declared an increase in its stated cash dividend policy to 36 cents per share of common stock, payable at 9 cents per share per quarter.

This increased dividend will be effective with the next regularly scheduled payment date of Jan. 20, 1991, for shareholders of record as of Jan. 1, 1991. The bank's previous policy was 32 cents annual cash dividend, payable at 8 cents per quarter.

Founded in 1979, Metrobank has its headquarters in Westwood, and, as one of Southern California's major mid-sized business banks, operates regional head offices in Newport Beach, San Diego, San Fernando Valley and Torrance. The bank specializes in banking services for small- to medium-size companies and professional entities.

SALT LAKE CITY (DEC. 4) BUSINESS WIRE - Broadcast International Inc. (NASDAQ/NMS:BRIN) and CheckRite International Inc. jointly announced Tuesday the successful completion of the merger of a Broadcast acquisition subsidiary with CheckRite, whereby CheckRite has become a wholly owned subsidiary of Broadcast.

At separate shareholder meetings held on Dec. 3, the shareholders of Broadcast and CheckRite approved the merger and related transactions.
In connection with the merger, the shareholders of CheckRite will receive up to an aggregate of 672,004 newly issued shares of Broadcast common stock in exchange for all of the issued and outstanding common stock of CheckRite.

The merger also contemplates that Broadcast will obtain additional equity funding of not less than $5.3 million pursuant to its recently announced underwritten offering, a private placement with its majority shareholder or an alternative source of financing.

Broadcast installs, operates and provides in-store point-of-purchase advertising, background music and other point-to-multipoint communications services via private satellite communications systems.

CheckRite provides check recovery, check verification data and related services to retail merchants. CheckRite's company-owned and franchised offices serve merchants in twenty-four states located primarily in the western two thirds of the United States.

Broadcast common stock is traded on the NASDAQ National Market System under the symbol BRIN.

#90338b0074 12/04/1990 ~Business Wire
PALO ALTO, CA (DEC. 4) BUSINESS WIRE - Hewlett-Packard Co. Tuesday told securities analysts that it anticipates moderate growth in 1991, given the current worldwide economic and political outlook, and that it will continue focusing on increasing profits this fiscal year.

The company noted encouraging trends in the fourth quarter on which it hoped to build: increasing orders for workstations, good acceptance of the company's new high-end minicomputers, continued growth in the laser-printer market, and strong order growth for analytical and service-and-support businesses.

Orders in November, the first month of the 1991 fiscal year, continued the fourth quarter trend, HP noted. (The company did not quantify order growth.)

John A. Young, HP president and chief executive officer, said improving profit is one of the top priorities for the company in 1991.

Market-driven forces -- such as the growing portion of HP computer sales though dealers and other volume purchasers who receive higher discounts -- have driven up cost of goods sold as a percent of sales and put pressure on HP's profit margins, Young said.

Consequently, the company will continue to emphasize slowing the growth of operating expenses and increasing revenue. Young said the company's new organizational structure, announced two months ago, will help speed decision-making and focus resources.

Lewis E. Platt, HP executive vice president with responsibility for the Computer Systems Organization, described the company's HP 9000 and HP 3000 businesses as ''strong'' and the outlook for 1991 as ''positive.''

Platt noted that orders for HP 9000 multiuser computers based on a UNIX system grew by more than 60 percent from fiscal 1989, and orders for HP 3000 multiuser computers were up 10 percent year-to-year.

Richard C. Watts, worldwide sales and distribution manager for the Computer Products Organization, said that HP continues to strengthen its position in the laser-printer market, despite slowing in the growth of the market. In addition, he said HP is exploring new directions for its laser-printer technology.

Hewlett-Packard Co. is an international manufacturer of measurement and computation products and systems recognized for excellence in quality and support. The company's products and services are used in industry, business, engineering, science, medicine and education in approximately 100 countries. HP has 92,000 employees and had revenue of $13.2 billion in its 1990 fiscal year.

UNIX is a registered trademark of UNIX Systems Laboratories Inc. in the U.S.A. and other countries.

#90338b0077 12/04/1990 ~Business Wire

NEW YORK (DEC. 4) BUSINESS WIRE - With the successful acquisition of Ingres Corp., ASK Computer Systems Inc. is positioned to ''lead the development of a new generation of business software required for 'client-server computing' -- the computer industry's biggest market opportunity of the 1990s,'' the chief executive officer of ASK told financial analysts in New York today.

''Every piece of software needs to be rewritten for the nineties,'' Sandra Kurtzig, chief executive officer of the Mountain View, Calif. company told the New York Society of Securities Analysts. ''The Ingres acquisition completely repositions ASK, giving us access to the industry's best database technology and development tools.

Kurtzig said that details regarding the merger were complete, and ASK had already made cost reductions totaling $15 million per year to support continued profitability.

Kurtzig said that development was already underway for future products from the combined company which will reflect advanced client-server technology. She concluded with an outline of the plan ASK is implementing to successfully integrate the two software leaders. Elements for Leadership in ''Client-Server Computing''

Industry analysts forecast that the market for client-server business computing solutions will grow at a double-digit rate. Client-server computing is the framework which allows software developed in accordance with agreed standards to operate across different hardware platforms.

The $60 million equity investments from HP and EDS that facilitated the $112 million Ingres acquisition also strengthened ASK's relationships and lead to major new revenue opportunities through sales and marketing agreements.

In addition, ASK is currently one of the largest marketers of application software for HP, IBM and Digital Equipment Corp. platforms. EDS has chosen ASK as the primary manufacturing application system it recommends for major systems integration jobs.

INGRES is the leading relational database for the UNIX market, through its availability on 40 platforms including Sun, HP, DEC and IBM workstations.

Since September, 30,000 units of INGRES have shipped as DEC Ultrix. Since March, 10,000 units of INGRES have shipped with SCO Open Desktop from Santa Cruz Operation -- the leading UNIX solution for industry-standard 386 and 486 personal computers.

ASK Computer Systems is a leading provider of management information systems, relational databases and application development tools. On Oct. 19, it completed its tender offer for Ingres Corp., of Alameda. With nearly $400 million in annual revenue, the new corporation is poised to become a leading

provider of client-server computing solutions.

#90338b0080 12/04/1990 ~Business Wire

IRVINE, CA (DEC. 4) BUSINESS WIRE - AST Research Inc. (NASDAQ:ASTA), a leading worldwide manufacturer of high-performance personal computers, Tuesday announced its expansion in the Pacific Rim with the establishment of sales offices in Singapore and Taiwan.

''The opening of AST's Singapore and Taiwan offices reflects the company's commitment to the Pacific Rim's personal computer marketplace and its continued global strategy to gain worldwide market share,'' said Tom Yuen, AST's chief operating officer.

The offices will provide distributors and dealers with educational, technical, marketing and sales support. They will work closely with local dealers and distributors to develop pricing and distribution strategies specifically for the region.

In a related Pacific Rim activity, the company announced in October the appointment of the first three Japanese firms to distribute a high-performance dual-compatible personal computer designed specifically for the Japanese marketplace.

The firm's DualStation 386SX/16 personal computer is the first dual system to function in both the MS-DOS and NEC 9801 personal computing standards.

At the fall 1990 Comdex computer show, AST introduced new entries to the portable computing marketplace with its line of notebook computers. The portable systems weigh 6.5 pounds, including battery, and combine the functionality of a desktop computer with an advanced technological package at an extremely competitive price.

The AST Premium Exec 386SX/20 and Premium Exec 286/12 are the industry's first upgradable notebooks and range in price from $2,495 to $3,395.

AST also recently brought affordable 486 microprocessing power to the general user with the introduction of its Bravo 486/25. Priced at $3,995, Bravo 486/25 is a unique, highly integrated system design packaged in a small-footprint chassis.

AST manufactures personal and notebook computers, enhancement and data communication products. Its dual-brand product line, which features the Premium and Bravo families, allows users to choose from a full range of price and performance options. AST is represented in 89 countries and operates 28 subsidiaries and sales offices worldwide.

According to InfoCorp, an industry research firm, AST ranked third in U.S. dealer channel sales of 386-based systems from January through October. InfoCorp also placed AST third in worldwide sales of 486-based systems.

The company reported record fiscal 1990 annual sales of $534 million. Its first-quarter sales for fiscal year 1991 were a record $136.3 million compared with sales of $114.5 million for the first quarter of fiscal year 1990. AST Research's stock closed at $27 on Nov. 29 for a 52-week high.

AST Research corporate headquarter are located at 16215 Alton Parkway, P.O. Box 19658, Irvine, Calif. 92713-9658; telephone: 714/727-4141 and FAX: 714/727-9355.

SAN JOSE, CA (DEC. 4) BUSINESS WIRE - Franson & Associates Inc., one of the largest independent public relations agencies serving technology-based firms and related organizations, has acquired Public Affairs Service Inc. (PAS), of Washington D.C.

PAS is an agency specializing in public policy communication and lobbying for similar corporations and organizations. It is run by Ken Hagerty, the electronics industry's best-known lobbyist.

The merged company is now called Franson, Hagerty & Associates Inc. Hagerty is senior vice president and director of public affairs, and also serves as manager of the Washington D.C. office.

Paul Franson continues as president. Both Franson and Hagerty were chosen among the 100 most influential people in Silicon Valley by the San Jose Mercury News article in 1987.

Hagerty has more than 20 years of legislative and regulatory experience in both government and the private sector. Before forming his firm three years ago, he served as the Washington D.C.-based government affairs vice president of the American Electronics Association (AEA), where he became the AEA's chief lobbyist in Washington.

Hagerty introduced grass roots lobbying to the electronics industry and put the industry on the legislative offensive. He managed the development and enactment of the industry's most significant legislative initiatives, including the Steiger capital gains tax reduction of 1978, the original R&D tax credit and the incentive stock option.

Hagerty also spent four years as the deputy for congressional relations at the White House Office of Management and Budget, and was a legislative assistant in the U.S. House of Representatives and a contract negotiator for NASA. He is an attorney and a registered lobbyist.

Public Affairs Services offers its clients lobbying, political support programs, policy-oriented public relations and development of in-house government affairs capabilities.

In addition to public affairs programs, the acquisition enhances the agency's ability to help clients market commercial products to federal government agencies. The merger also adds an East Coast office to complement Franson's offices in Silicon Valley and Southern California, and the agency's European association with Pierre Braude Associates.

Franson & Associates was founded in 1980 by Paul Franson, a former electronics industry and business journalist and corporate public relations professional.

Franson, Hagerty & Associates Inc. provides corporate, marketing, financial and policy communications for technology-based corporations, financial services firms and industry associations. The firm has headquarters at 181 Metro Drive, Suite 300, San Jose, CA 95110, 408/453-5220.

BEVERLY HILLS, CA (DEC. 4) BUSINESS WIRE - A $17 million contract has been awarded to Litton by Vauxhall Motors of England, one of General Motors' European subsidiaries.

Under the contract, Litton will provide an automated material handling and control system for Vauxhall's recently expanded 1.3 million-square-foot parts distribution warehouse in Luton, England.

Litton's Material Handling division, Hebron, Ky., will design, install and integrate the system to automate the movement, storage, management and control of Vauxhall spare parts received by truck in bulk quantities.

The Litton project is scheduled for completion early in 1992.

The computer-controlled storage and retrieval system will include a 10-aisle, 65-foot-high, rack-supported operation designed to handle parts loads from three to eight feet long and weighing up to 1,650 pounds.

Litton is a technology-based company providing advanced electronic and defense systems, resource exploration services and industrial automation systems for U.S. and world markets.

VANCOUVER, B.C. (DEC. 4) BUSINESS WIRE - The management of Academy Resources Ltd. is pleased to announce to their shareholders that the preliminary review of core obtained to-date from the exploration program currently underway at the company's Gold Hill (MR) claims, Yukon Terr., (as reported by the company's consulting geologist) indicated that a significant epithermal gold environment has been discovered on the property.

The initial drill holes, designed to test the cause of a geochemical anomaly earlier located in a major structural setting, intersected geological units

characteristic of other established epithermal gold camps. Sections of green chalcedonic quartz breccia up to 12 feet wide were returned from hyrothermally altered and brecciated andesite volcanic host rock. The volcanic units have been subject to multiple staged silification and hydro-thermal brecciation and include chlorite, hematite and clay alteration phases.

Fine-grained sulphides, including pyrite, pyrohoties and galena are present interstitialy in chalcedonic breccia zones.

The drill program is progressing favorably and sections of core will be selected for analysis shortly.

No securities commission or stock exchange has either approved or disapproved the contents of this news release.

#90338b0103 12/04/1990 ~Business Wire

SAN JOSE, CA (DEC. 4) BUSINESS WIRE - Xilinx Inc. (NASDAQ:XLNX), the inventor and leading supplier of field programmable gate arrays (FPGAs), Tuesday introduced the first members of its third generation XC4000 Family.

The XC4005, XC4006, XC4008 and XC4010 incorporate several system-level functions on-chip to provide the industry's highest performance FPGAs.

Xilinx Tuesday also began shipping The XACT 4000, a completely redefined computer-aided engineering development system that delivers 100 percent placement and routing of designs.

''Combined with the performance breakthroughs of our new FPGAs, the new development software furthers the company's position as the industry standard for logic development,'' said Wes Patterson, chief operating officer of Xilinx.

''The advent of the XC4000 Family extends our technology leadership and delivers performance to system designers that no other supplier can match,'' Patterson said at a media conference at the company's worldwide headquarters in San Jose.

''We're not merely adding gates, but are providing what the engineer of the 90s wants -- price/performance solutions to their system design needs.''

According to industry analyst Raj Rajaratnam of Needham & Co., there are more than 200,000 system designers who are now candidates for Xilinx products. ''The XC4000 Family has the potential to deliver programmable solutions for many gate array applications well into the 1990s.'' 100 PERCENT PERFORMANCE

IMPROVEMENT

The first XC4000 devices address the heart of the gate array market with system speeds up to 60 MHz and a density range of 5,000 to 10,000 usable gates. Working closely with its customers during the design of the new generation of FPGAs, Xilinx focused the XC4000 Family on faster system speed and increased logic integration -- the top two requirements from system designers.

A 100 percent performance increase was accomplished by integrating seven unique system features onto the chip for the first time, including on-chip memory, high-speed counters and decoders as well as JTAG boundary scan logic. Additionally, moving to a sub-micron CMOS manufacturing process at AT&T and Seiko Epson provided a significant overall performance boost.

Designers with an existing Xilinx development system can upgrade to The XACT software for $1,750 on PCs and $3,300 on workstations. For new users, The XACT 4000, which includes XC2000, XC3000 AND XC4000 support, lists for $7,990 for PCs with the VIEWlogic or DASH schematic editors. The package on workstations lists for $14,450 to $15,950, depending on schematic editor and simulator interfaces.

#90338b0144 12/04/1990 ~Business Wire

SAN JOSE, CA (DEC. 4) BUSINESS WIRE - Atmel Corp. and Texas Instruments have announced the development of functionally compatible electrical specifications for 256K-bit single-voltage flash memories.

These specifications will offer system designers two manufacturing sources for single 5-V flash memories.

Flash memories are being used in a growing number of applications such as automotive systems, instrumentation, embedded controllers, military equipment and remote installations requiring in-system program update.

The functionally compatible electrical specfications cover the 28-pin TM29F256 and 32-pin TMS29F259 Flash E2PROMs by Texas Instruments and the 28-pin AT29C256 and the 32-pin AT29C257 Flash E2PROMs by Atmel.

The TI and Atmel flash memories use a single 5-V power supply for program, erasure and read operations. This is in contrast to 12-V flash memories which require dual power supplies for these operations. The 5-V devices do not require an external high-voltage, high-current power supply.

System designers have found 5-V flash memories easier to use because of an internally timed programming algorithm that performs a full chip erase and write operation. Some 12-V flash memories can require up to four minutes for a full chip erase and write operation.

Additionally, 5-V flash memory devices require about one-fifth as much software code as 12-V flash memories. When designed into a system, the single 5-V power supplies reduce the cost, size and weight of the system.

Atmel was the first manufacturer to ship a 5-V flash when it introduced its AT29C256 in late 1988. The AT29C256 has been designed in at many companies in such areas as medical instrumentation, industrial controls and computer peripherals. The 1 Megabit AT29C010 will be sampled in early 1991 and will be in full production in the first half of 1991. A module version of the 1 Megabit device, the AT29MC010, is available now in a dual in-line package.

TI first predicted that 5-V Flash E2PROM would be a major non-volatile product technology for the 90s in early 1989. Since the development of the first generation 256K 5-V Flash E2PROM, a 1 Megabit 5-V device has been announced which will be in volume production in the first half of 1991.

Texas Instruments Inc., with headquarters in Dallas, is a high-technology company with sales and operations in more than 30 countries. TI develops, manufactures and markets semiconductors, defense electronic systems, software productivity tools, computer systems, industrial automation and control systems, electronic controls, metallurgical materials and consumer electronics products.

MONTREAL (DEC. 5) BUSINESS WIRE - The board of directors of BCE Mobile Communications Inc. (TSE,ME:BCX.) has elected W. Brian Hewat, 54, of Ottawa, Ontario as chairman of the board, effective Tuesday.

Hewat succeeds Charles Sirois, a founder and a major shareholder of the corporation, in the capacity of chairman. Sirois remains on the board of directors.

''I am extremely proud of the progress that BCE Mobile has made over the past three years and I am confident that the company will continue to lead the industry,'' said Sirois. In explaining the move, he said, ''This change will permit me to spend more time with my other increasing business interests. However, I will continue to play a key role in BCE Mobile's future as a member

of the executive committee, as a director and through my shareholdings.''

Hewat has been executive vice-president, marketing of Bell Canada for the past seven years. He is a director of several companies including Bell-Northern Research Inc., Bell Canada International Inc., Telecom Canada and Memotec Data Inc. He brings to BCE Mobile some 30 years of experience in telecommunications.

Also effective Tuesday, Henri A. Roy, senior vice-president, corporate of BCE Inc. joined the BCE Mobile board of directors. Hewat and Roy succeed Claude Duhamel and Franois Paradis, who have served on the board since the corporation's inception.

BCE Mobile is the Canadian leader in mobile communications. Its diversified activities include cellular telephone, paging, telephone answering and private radio services integrating communications and information systems technology. The principal subsidiaries of BCE Mobile are Bell Cellular Inc., National Pagette Ltd. and Bell Radiocommunications Inc. BCE Mobile is a subsidiary of BCE Inc.

EUGENE, OR (DEC. 4) BUSINESS WIRE - The board of directors of Bohemia Inc. (OTC: BOHM) has approved in principle a restructuring of the company, including, as a first step, the sale of the company's California operations.

Richard D. Tinney, president and chief executive officer, said that management will begin immediately exploring the sale of the company's businesses in northern California, which include a medium density fiberboard plant in Rocklin; a sawmill and co-generation plant in Lincoln; a sawmill in Grass Valley; and related timberlands. The California operations accounted for $85 million, or 24 percent, of total corporate sales for the fiscal year ended April 30, 1990.

Tinney said that the proposed sale or sales would be subject to further approval of the board of directors and other conditions.

Tinney said that the board's action resulted from the work of a strategic planning committee of the board appointed last May to consider alternatives for maximizing value for the company's shareholders. He said that the board's action also contemplates the possible sale or other disposition of some or all of the company's Oregon operations, but that no specific plans have been formulated.

''We believe that the financial interests of our shareholders will be best served by realization of the fair value of our assets if that can be accomplished under current conditions, and distribution of the proceeds to shareholders,'' he stated.

Bohemia, established in 1916, operates wood products manufacturing plants in Oregon and northern California.

SAN FRANCISCO (DEC. 4) BUSINESS WIRE - TIS Mortgage Investment Co. (NYSE: TIS) Tuesday declared a dividend of 32 cents per share for the quarter ending Dec. 31, 1990, payable on Jan. 14, 1991, to stockholders of record as of Dec. 31, 1990.

This is the company's fifth consecutive quarterly dividend of 32 cents per share. In the first three quarters of 1989, the company declared and paid dividends of 30 cents per share.

As a real estate investment trust ("REIT"), TIS Mortgage Investment Co.'s dividends are based on taxable income calculated under the internal revenue code and not on book income which is computed in accordance with generally accepted accounting principles. Taxable income in each quarter of 1989 and 1990 exceeded the amount of dividends declared and paid.

TIS Mortgage Investment Co. is a San Francisco-based REIT which invests in various mortgage assets, including Residual Interests in Collateralized Mortgage Obligation (CMO) Bonds. The company commenced operations on Aug. 26, 1988.

CONTACT: TIS Mortgage Investment Co., San Francisco, John E. Castello, (415) 393-8000 or Healy & Co., San Francisco, Maury Healy, (415) 546-6166.

CALGARY, ALBERTA (DEC. 4) BUSINESS WIRE - Norcen Explorer Inc., the wholly owned U.S. operating subsidiary of Norcen Energy Resources Limited, announced Tuesday the results of the third consecutive successful well drilled on Eugene Island Block 142 (OCS-G-10726) in the Gulf of Mexico, and the awarding of the construction contract for platform and production facilities.

Well No. 3 flowed 3.1 million cubic feet of gas and 730 barrels of 38.1 degree API gravity crude oil per day from the 15,954 - 16,018 feet interval through a

13/64 inch choke, with flowing tubing pressure of 6,436 psig.

The platform and facilities being constructed will be capable of processing 5,000 barrels of oil and 25 million cubic feet of gas per day. Initial production is anticipated in June 1991 at rates of approximately 4,000 barrels of oil and 10 million cubic feet of gas per day.

Eugene Island Block 142 is a 5,000 acre federal tract located in 50 feet of water, approximately 30 miles offshore from Louisiana. Norcen Explorer holds a 60 percent working interest and is operator of the block. Petrobras America Inc. holds the remaining 40 percent working interest.

Norcen Explorer also announced that it has acquired a 45 percent working interest in Eugene Island Block 147, which is the adjacent federal tract to the south of Block 142. Norcen Explorer's partners in Block 147 are Petrobras America Inc. (30 percent) and First Energy Corporation (25 percent).

PHOENIX (DEC. 4) BUSINESS WIRE - Active Noise and Vibration Technologies Inc. (ANTV) of Phoenix Tuesday announced that it has signed a worldwide agreement with Topexpress Ltd. of Cambridge, England to jointly develop and exploit market opportunities in the electronic noise and vibration control market.

Under the collaboration agreement, ANVT and Topexpress plan to jointly develop electronic control applications for the global market. Initial application plans call for development of in-vehicle noise control systems for the automotive and aerospace industries. Intermediate-range plans include provisions for vibration control applications, particularly in the development of elecronic mounts.

The agreement between ANVT and Topexpress constitutes a powerful technology partnership with global implications. By establishing a number of joint venture partnerships with collaborators in the United States, Europe and Japan ANVT is developing a well-structured worldwide product development and distribution network. Topexpress will become an integral member of this network with non-exclusive rights to supply ANVT products.

Situated at the forefront of electronic control technology for the past 10 years, Topexpress Ltd. has earned a worldwide reputation for innovation in the field of electronic noise and vibration control.

Topexpress' know-how, gained through nearly 100 man-years of consulting experience with the United Kingdom Ministry of Defense and industrial partners such as British Gas, British Aerospace, and a consortium of European car

manufacturers, will strongly complement ANVT's current capabilities and its extensive patent and technology base in the electronic control field.

Active Noise and Vibration Technologies, based in Phoenix with a wholly owned subsidiary in Colchester, England, is a privately held company. Heavily involved in research and development of electronic noise and vibration control applications since its formation in 1987, ANVT maintains an extensive cache of electronic noise and vibration control patents and technology.

ANVT's technologies are utilized in aerospace, industry and ground-based transportation vehicles such as cars, trucks, tractors, motorcycles and defense ground vehicles.

MARKHAM, ONTARIO (DEC. 4) BUSINESS WIRE - SSMC Inc. (NASDAQ:SSMCP.) Tuesday announced that its board of directors has deferred declaration of the December dividend on its 15 percent Series B cumulative preferred stock.

Declaration of dividend on the company's 13.5 percent Series A non-voting preferred stock has also been deferred.

SSMC Inc. stated that with the current uncertain climate around the world, created by the tense situation in the Middle East, it would be prudent to conserve resources and allow the dividend to accumulate as per the terms of the Series B preferred.

SSMC Inc. is the leading manufacturer of consumer sewing machines worldwide and also distributes industrial sewing machines and consumer durable goods. Its principle executive offices are located in Hong Kong.

The common stock of SSMC Inc. is owned by Semi-Tech (Global) Ltd., a Hong Kong-based company listed on the Hong Kong Stock Exchange, symbol 448. Semi-Tech (Global) is an affiliate of International Semi-Tech Microelectronics Inc. whose shares are listed on the Toronto Stock Exchange, trading under the symbol ISE.

SAN FRANCISCO (DEC. 4) BUSINESS WIRE - Hadley R. Roff, former San Francisco

deputy mayor and chief-of-staff for Dianne Feinstein's gubernatorial campaign, will join The PBN Co. as vice president, Peter B. Necarsulmer, president of the San Francisco and Sacramento public affairs firm, announced Tuesday.

''It's time to broaden my horizons with new challenges,'' Roff, 58, said. ''The PBN Company offers me this opportunity. I will be able to maximize my political, public policy and communications skills on behalf of The PBN Company's many business, nonprofit and governmental clients.''

Roff said he chose this time for a career change, ''to take a break from the bedlam of candidate politics'' and because it is a transitional period for Feinstein.

''The next few months is the time for Dianne to pull together a campaign team if she decides to run for the Senate in 1992,'' Roff said. ''She clearly is the frontrunner, and I will continue to be her friend and supporter.''

Roff will remain with the Feinstein office through December and join the 27-member professional staff of The PBN Co. after the first of the year.

Established in 1983, The PBN Co. is the third largest public relations/public affairs firm in Northern California.

The firm specializes in public policy communications, crisis management, news media relations and strategic planning for clients ranging from the University of San Francisco, Chevron and the Port of Oakland to the California Chamber of Commerce and Western States Petroleum Association.

The PBN Co.'s San Francisco partners are Peter Necarsulmer, 35; Susan Thurman, 34; and Sam Sacco, 37. John Jervis, 57, is the partner in charge of the firm's capital office.

PORTLAND, OR (DEC. 4) BUSINESS WIRE - Directors of Portland General Corp. (NYSE:PGN) have approved payment of a regular quarterly dividend of 30 cents per share on the company's common stock.

The dividend is payable on Jan. 15, 1991, to shareholders of record as of Dec. 26, 1990.

At the same time, directors approved the regular quarterly dividends on Portland General Electric Co.'s (PGE) six series of preferred stocks. PGE is

Portland General's principal subsidiary.

PGE's preferred dividends include 65 cents on the $2.60 series $25 par value preferred issue. Preferred dividends are also payable Jan. 15, 1991, to holders of record as of Dec. 26, 1990.

Portland General is an energy holding company with businesses offering regulated and commercial energy products and services. PGE serves more than 579,000 retail electricity customers in northwest Oregon, as well as wholesale electricity customers through its ownership of the largest non-government share of the Pacific Northwest Intertie transmission line to California.

LOS ANGELES (DEC. 4) BUSINESS WIRE - Parishioners of the Church of Scientology Celebrity Centre in Hollywood donated a reference library on the applied religious philosophy of Scientology to California State University, Fullerton, on Dec. 3.

The books were donated to the Department of Linguistics and Religious Studies and accepted by Dr. James A. Santucci, a professor in that department. The donation was valued at more than $1,000.

The library was obtained for the university through the donations by parishioners when they learned there was a lack of reference books to adequately cover the religious philosophy of Scientology at CSU Fullerton.

''Dr. Santucci's program presents a balanced overview of modern religions,'' said Church of Scientology spokesman Doug Williams. ''Scientology works on the exact principles as discovered by world-renowned author L. Ron Hubbard and welcomes the careful scrutiny traditional of university students.''

Santucci said that viewing a religion from the inside is crucial in gaining an accurate and fair assessment of an organization.

The library puts the university one step closer to achieving Santucci's objective of placing religions and their teachings in context, Williams said. ''We're very happy to have been able to give this gift of knowledge.''

CARLSBAD, CA (DEC. 5) BUSINESS WIRE - GASCARD Inc. (GASCARD) of Carlsbad, the leading fleet fuel management company, and National Business Control Systems Inc. (NBCS) of Austin, Texas, a major supplier of automated fueling equipment, Tuesday announced completion of an interface between the GASCARD network and NBCS's island card-reader.

NBCS's GASCARD-series ''Fuel Manager'' island control unit operates at automated fueling locations in conjunction with GASCARD's patented Distributed Authorization System (DAS).

GASCARD franchisees can more economically add automated sites to the GASCARD network with this NBCS equipment. GASCARD's volume discount and growth incentive bonus programs can quickly help amortize the investment in an NBCS island card-reader. Additionally, the Fuel Manager is easy to use, expand, and service -- the franchisee or a local service station supply company can handle most maintenance.

GASCARD provides fuel management services to tens of thousands of commercial fleets that transact over 12 million gallons of fuel per month through more than 2,000 locations in 40 states. GASCARD has developed and markets nationally a comprehensive card-activated fuel management system designed to reduce commercial and governmental fleet fueling costs.

The GASCARD system can prevent unauthorized purchases, lower accounting, adminstrative, and other costs of fleet fueling, and eliminate or lessen the environmental risks of underground fuel storage tank ownership or operation.

Each billing cycle, the GASCARD system reports complete fleet fueling transaction data -- date, time, site, vehicle, driver, odometer, miles per gallon, cents per mile, product, volume, price, extension, and excise tax details -- which fleet managers can use to maximize fleet efficiency.

Through GASCARD's franchisees, which are typically independent petroleum marketers, the GASCARD system is marketed primarily for use by local and regional delivery, sales, and service fleets, such as fuel and beverage distributors, overnight package delivery services, taxis, public utilities, and governmental agencies.

GASCARD was originally organized in May 1981 and went public through an offering of its common stock in March 1987. In January 1990, the U.S. Patent Office issued Patent No. 4,891,503 to GASCARD for its Distributed Authorization System.

NBCS specializes in the OEM market and has delivered custom-designed and developed systems to such companies as Dow Chemical, Texas Instruments, FUELNET Corp., Hartford Steam Boiler, and Diagonal Data Corp.

NBCS also manufactures and markets its own proprietary card system to fleet owners and governmental agencies. NBCS is a closely held corporation and maintains its corporate headquarters and manufacturing divisions in Austin, Texas.

NEWBURY PARK, CALIF. (DEC. 4) BUSINESS WIRE - HOH Water Technology Corp. (NASDAQ:HOHI/HOHU/HOHW) said that its Puerto Rico-based subsidiary, HOH International Inc., has signed an agreement with Health Distillers International Inc. (HDI), to become sole distributor of HOH brand products in Puerto Rico.

The agreement, which provides for minimum purchases over the next six months, should result in gross sales exceeding $600,000 and will establish the basis for a long-term relationship between the companies.

HOH President James Cruver, who holds a doctorate degree, commented: ''This agreement represents an important milestone for HOH, because we believe Puerto Rico will be a fast-growing market that is dominated by HDI -- the largest distributor of water purification equipment on the island with a sales force of over 300 there and the world's top distributor of most of their own product lines.

''We are also pleased with the sales performance of our Harrisburg, Pa.-based distributor, CleanStream Technologies. In my opinion, between these newest distributors (HDI and CleanStream), HOH can reasonably expect more than $2 million in sales during 1991.''

Cruver also reported that the company's products were enthusiastically received at the November Pacific Water Quality Association (PWQA) Trade Show in Anaheim and through recent trade journal advertisements.

The HOH exhibit included the SupROpure, ExtROpure and ElectROpure product lines, along with prototypes of advanced monitoring instrumentation soon to be made available by the company. As a result of the positive response, the marketing department is currently following up on over 300 dealer inquiries.

Cruver commented: ''We are gratified at the keen interest represented by the dealer response and believe it will translate into considerable sales potential adding to the company's bottom line in 1991.

ExtROpure home drinking water systems utilize high-capacity seawater desalination reverse osmosis (RO) membranes and durable, reliable components.

Both SupROpure and ExtROpure waste 50 percent to 80 percent less water than the best of the comparable reverse osmosis drinking water units, according to Cruver.

The ElectROpure model is in the final stages of field testing and is currently slated for market introduction during the first quarter of 1991.

Arthur D. Little Inc., the highly regarded Cambridge, Mass., consulting firm, rated HOH ElectROpure as the No. 1 high purity water process in its June 1989 comparative study.

HOH Water Technology is engaged in the development and supply of a breakthrough line of water filtrations and treatment systems for residential, commercial and industrial water treatment.

HERCULES, CALIF. (DEC. 4) BUSINESS WIRE - Bio-Rad Laboratories Inc. (ASE:BIO.A/BIO.B) Tuesday announced it has started construction on a new building in Hercules that will serve as headquarters for its Research Products Group.

The new facility will be approximately 95,000 square feet in size, and occupancy is anticipated in the latter part of 1991.

Bio-Rad's Research Products Group develops and manufactures materials and equipment used by life science researchers to separate, purify and analyze complex chemical compounds. Over the past five years, sales in this segment of the company's business have more than doubled and 1990 revenues will be approximately $100 million.

David Schwartz, president, said: ''This represents a further expansion of Bio-Rad's 80-acre Hercules location and will be the third in a series of buildings on the site which already houses the company's corporate offices and several of its clinical diagnostic operations.''

Bio-Rad Laboratories Inc. is a multinational manufacturer and distributor of research products, clinical diagnostics and analytical instruments.

DENVER (DEC. 4) BUSINESS WIRE - Schield Management Co. (NASDAQ:SMCC) is pleased to announce that it has named Glenn Cutler to the newly created position of chief operating officer.

Cutler, 36, joins Schield Management as a result of its recent acquisition of Progressive Ventures Inc., an investment advisory firm he founded and developed and served as chairman and president.

Cutler has been an investment advisor since 1983. He is widely known for his investment publications Market Mania and the DMC-Market Fax. He has been visible in the financial community through his interviews on Financial News Network and his guest appearances on Nightly Business Report.

Cutler earned a B.S. in business from the State University of New York at Old Westbury.

President and chief executive officer Marshall Schield stated: ''We are fortunate to add the talents and experience of Glenn Cutler to our management team. His experience and insights are a tremendous asset for us.

''He has been very effective in directing the activities and visibility of his advisory business. The creation and early success of the Schield Progressive Environmental Fund was primarily a result of his vision, energy and focus. He currently manages that portfolio of environmental stocks.''

Schield Management Co. has been in business as an investment advisor since 1972. Its principle lines of business include providing market timing services, providing investment advice to both individually managed accounts and the Schield Portfolios Series of mutual funds, publishing and marketing an institutional investment advisory publication and providing bridge loans and equity financing.

Schield Management Co. has approximately 1,612,000 shares outstanding, including its shares issued to PVI shareholders as part of the PVI acquisition.

Schield Management Co. is currently in registration for an offering of $1,800,000 in new securities. The offering is being underwritten by Cohig and Associates Inc. on a firm commitment basis.

This announcement shall not constitute an offer to sell or solicit an offer to buy in any state in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such state.

BASKING RIDGE, NJ (DEC. 4) BUSINESS WIRE - Science Management Corp. (AMEX:''SMG'') announced that the sale of the company's executive search and compensation division is part of the company's strategic repositioning to more closely focus the company's operations.

Included in the company's results previously reported for the nine months ended Sept. 30, 1990 is an operating after-tax loss of $1,247,000 or 44 cents per share from this discontinued unit as well as an estimated after-tax loss of $750,000 or 27 cents per share from the disposition of this business.

SMC reported a net loss of $3,608,000 or $1.28 per share for the first nine months of 1990 in comparsion to $1,184,000 or 42 cents per share in the first nine months of 1989.

Commenting on this development, James A. Skidmore Jr., chairman, president and chief executive officer of SMC said, ''With the sale of our executive search and compensation business, SMC had taken another step in our strategic refocusing of the company on our core businesses in management, environmental

and engineering services.

''The executive search division had been a major cause of the losses SMC incurred in the year 1989 and the first nine months of the current year. As we reported last week we have engaged the investment banking firm of Legg Mason Wood Walker Inc. to assist us in our efforts to seek opportunities for the further development and repositioning of the company,'' he concluded.

SCOTTSDALE, ARIZ. (DEC. 4) BUSINESS WIRE - Xsirius Superconductivity (NASDAQ:XSCIA) Tuesday announced test results showing that its high temperature superconducting thin films have microwave properties that are superior to any other thin films yet published worldwide.

These thin films are essentially superconducting microchips and form the basis for the emerging commercialization of superconductive microwave components and systems, with applications in advanced radar and telecommunications systems.

The tests announced today will lead to production and sales of the thin films by Xsirius Superconductivity's Israeli subsidiary and by the parent company in the United States. The overall market for thin films is estimated to be multimillion dollar by 1995.

''Many groups produce good films. Xsirius, however, is unique both in the quality of its thin films and in its ability to produce custom-made substrates that can be produced in larger sizes and are appropriate for microwave applications,'' explained Prof. Guy Deutscher of Tel Aviv University in Israel a consultant to the company and one of the leading scientists in the superconductivity field.

''These films are certainly equivalent to the quality of any other reported superconducting thin films anywhere in the world,'' Dr. Deutscher added.

Development of the microchips was achieved by Xsirius Superconductivity's laser methods at its Israeli subsidiary, Xsirius Superconductivity Materials Ltd. (XSM) under the direction of Dr. Michael Scheiber, Director of Research for the company. XSM will also manufacture the microchips. Worldwide marketing will be coordinated by Xsirius Superconductivity through joint ventures, which the company intends to pursue immediately.

Xsirius Superconductivity is one of the few publicly traded companies dedicated exclusively to the commercial development of superconductive technology. Xsirius Superconductivity is headquartered in Scottsdale, and has

a majority-owned subsidiary in Jerusalem, Israel.

RANCHO MIRAGE, CALIF. (DEC. 4) BUSINESS WIRE - StratAmerica Corp.'s ''Field of Dreams,'' baseball card and sports memorabilia retail business, has opened its second retail store in the Fashion Mall in Indio, Calif.

Richard M. Ramirez was named manager of the new 800-square-foot facility by Joie Casey, ''Field of Dreams'' operational vice president. Casey said that the second store is very important to the companies developmental plans and that Ramirez brings a strong sports interest to the retail management.

A third retail location is scheduled to open later this month in Glendale Galleria, Glendale, Calif.

Ramirez has been active in coaching high school sports since 1965 and is presently the director of athletics & activities for Coachella Valley High School in Thermal, Calif. He has been head football and baseball coach at Coachella Valley High School and presently he is a member of the California State Athletics Directors Association and the California State Coaches Association.

In October, StratAmerica Corp. announced it had selected Francorp Inc., Olympia Fields, Ill., to develop its franchise plan for the ''Field of Dreams'' baseball card and sports memorabilia business. The organizational and documentation process of the franchising program is expected to be

completed toward the end of the first calendar quarter of 1991.

Sam D. Battistone, StratAmerica's president, said the ''Field of Dreams'' retail store concept is designed for high-traffic regional shopping malls. StratAmerica's subsidiary, Sports Archives Inc., is licensed from MCA, Los Angeles, to use the name ''Field of Dreams.''

In addition to building a retail network the company has already established a wholesale distribution facility with the associated sports cards and memorabilia inventories. The wholesale facility will serve company owned stores, franchised units and non-affiliated retail stores.

StratAmerica's stock is traded on the NASDAQ system in the over-the-counter market with the symbol STCO.

RICHMOND, VA (DEC. 4) BUSINESS WIRE - James River Corp. (NYSE: JR) announced Tuesday that it has completed the previously announced sale of its West Linn, Ore. mill to Simpson Paper Co. of San Francisco for an undisclosed amount.

The West Linn Mill, which employs approximately 540 people, has a current annual sales rate of approximately $170 million. This divestiture is a portion of the restructuring program which James River announced in August of this year. As a result of this sale, James River no longer participates in the coated freesheet market.

James River Corp., with headquarters in Richmond, is a marketer and manufacturer of consumer products, consumer packaging, and consumer-related communication papers which include such brands as as Northern tissue and Brawny towels, Dixie paper plates and cups, Monterey magazine paper, and the new Quilt-Rap sandwich wrap. The company had sales of approximately $6 billion for its fiscal year which ended April 29, 1990.

CHESTNUT HILL, MA (DEC. 4) BUSINESS WIRE - The Neiman Marcus Group Inc. (NYSE:NMG) announced Tuesday that Burton Tansky has been appointed vice chairman of Bergdorf Goodman and that Stephen C. Elkin, current vice chairman,

has been named president.

Both appointments are effective Dec. 10, 1990.

Tansky, 52 years old, joins Bergdorf Goodman after resigning as president of Saks Fifth Avenue. He had served in that post since 1980 and was responsible for merchandising, stores and the fashion office. Tansky joined Saks in 1977 as senior vice president and general merchandise manager, and from 1978 to 1980 served as executive vice president, merchandising.

Elkin, who has been vice chairman and chief operating officer of Bergdorf Goodman, has been appointed president and will retain his chief operating officer responsibilities. Elkin, 47 years old, joined Bergdorf Goodman in 1978 as senior vice president and chief financial officer. In 1981, he was named executive vice president, finance and operations, and in 1986 was appointed vice chairman.

Robert J. Tarr Jr., president of The Neiman Marcus Group, indicated that Tansky's appointment would ensure an orderly management transition at Bergdorf Goodman. ''Ira Neimark, 68 years old and current chairman and chief executive officer of Bergdorf Goodman, plans to resign those posts upon the conclusion of his current contract on January 31, 1992. Between now and that time, Mr. Neimark, Mr. Tansky and Mr. Elkin will work together preparing for the change '' Tarr said.

''Beginning February 1, 1992, Mr. Tansky will assume the duties of chairman and chief executive officer, with Mr. Elkin continuing as president and chief operating officer,'' according to Tarr.

''Although Mr. Neimark plans to step down as head of Bergdorf Goodman,'' Tarr reported, ''he will continue to serve as senior vice president of merchandise development for The Neiman Marcus Group. In that capacity, he is responsible for the coordination of important resources who serve both Bergdorf Goodman and Neiman Marcus, another unit of The Neiman Marcus Group. He will also be available for other special assignments throughout the company, as requested '' Tarr stated.

Neimark has been chairman and chief executive officer of Bergdorf Goodman since 1983. He joined the organization in 1975 as president. Under his leadership, Bergdorf Goodman has become a leading specialty retailer of women's and men's apparel, with revenues growing from about $30 million to $187 million. Last August, the company opened Bergdorf Goodman Men, directly across Fifth Avenue from its women's store. That expansion will push Bergdorf Goodman's revenues in its current fiscal year to well over $200 million.

In addition to Bergdorf Goodman and Neiman Marcus, The Neiman Marcus Group includes Contempo Casuals.

SAN RAMON, CA (DEC. 4) BUSINESS WIRE - AT&T, Rockwell International, and Pirelli Cable have joined in a unique consortium to provide millions of dollars of advanced telecommunications products and fiber optic cable to Pacific Bell over the next 18 months.

AT&T and Rockwell are two of the largest fiber optics electronics and equipment suppliers in the world today. Pirelli Cable, a leading fiber optic cable producer, has international expertise in custom-manufacturing fiber optic cable.

''We're bringing to Pacific Bell the collective strengths of AT&T, Rockwell, and Pirelli,'' said Jerry Hanley, regional vice president-sales, AT&T Network Systems. ''The consortium offers Pacific Bell one-stop shopping for the most advanced technology available in the world today.'' The consortium's leading edge products will provide Pacific Bell with technology to support California's burgeoning telecommunications needs today, while helping to build the advanced infrastructure necessary for network applications of the 21st century.

In addition to being an unusual coalition of competing vendors, the AT&T-Rockwell-Pirelli consortium is unique in that its agreement with Pacific Bell calls for the provisioning, assembly, and distribution of a significant amount of product by several California minority and woman-owned business enterprises (MWBEs).

FREEHOLD, NJ (DEC. 4) BUSINESS WIRE - Calton Inc. (NYSE:CN) announced Tuesday that it has entered into a non-binding letter of intent to acquire approximately $18 million principal amount of its 16-5/8 percent senior subordinated notes in exchange for the transfer of certain real property and

joint venture interests.

Calton also reported that it has paid $10 million of the $20 million payment that was due on Nov. 30 under its secured credit agreeement. The company is continuing discussions with its lending group to defer the additional $10 million payment and to revise certain other terms of the credit agreement, including an extension of the term of the credit agreement from April 30, 1991 to Dec. 1, 1991. The company expects that the discussions with its lending group will lead to an amendment to the credit agreement. $85 million is currently outstanding under the credit agreement.

In connection with the proposed acquisition of approximately $18 million principal amount of its 16-5/8 percent senior subordinated notes, Calton will transfer certain real property and joint venture interests to the holder of the notes and will pay approximately $1.1 million of accrued interest on the notes through the issuance of redeemable preferred stock with a limited right to convert into common stock.

The properties or joint ventures in which Calton will transfer its interest are located in Florida, Maryland, Virginia and California. Certain properties and joint venture interests to be transferred by Calton will be acquired from Talcon, L.P., a publicly traded limited partnership, in exchange for a reduction of Calton's Class A limited partnership in Talcon. Calton Capital Inc., a wholly owned subsidiary of Calton, is the general partner of Talcon, L.P.

The transaction to acquire the 16-5/8 percent senior subordinated notes is subject to the consent of Calton's lending group and the execution of a formal binding agreement.

ENFIELD, CT (DEC. 4) BUSINESS WIRE - Dairy Mart Convenience Stores Inc. (NASDAQ - DMCVA & DMCVB) reports results for the third quarter and the nine months ended Nov. 3, 1990.

Sales for the third quarter were $216,319,000 as compared with $186,844,000 for the third quarter of the previous year, a 16 percent increase, which was partly due to our Stop-N-Go acquisition. Pre-tax income was $2,705,000 as compared with $59,000 for the previous year (after a $2.5 million pre-tax nonrecurring charge in the previous year).

Net income for the quarter was $1,506,000 as compared with $31,000 for the third quarter of the previous year. On a per share basis earnings were 35

cents per share as compared with 1 cent per share for the third quarter last year.

For the nine months ended Nov. 3, 1990, sales were $614,632,000 as compared with $554,717,000 for the prior year nine months, an 11 percent increase, which again was partly due to our Stop-N-Go acquisition. Pre-tax income was $6,341,000 as compared with $591,000 (after $3.3 million in nonrecurring pre-tax charges in the previous year).

Net income for the nine months was $3,614,000 as compared with a net income for the previous year's nine months of $339,000. On a per share basis net income was 85 cents as compared with a net income of 8 cents for the previous year's nine months.

DAYTON, OH (DEC. 4) BUSINESS WIRE - NCR Corp. Tuesday announced a joint marketing success with CPS Systems Inc., who will provide a specialized tax management information system to the Osceola County, Fla., tax collection office.

This marks the 13th marketing venture between NCR and CPS, under the Target Account Program.

The Osceola County Tax Collection office in Kissimmee, Fla., selected CPS' ''Tax Manager'' software specially developed to accommodate Florida tax laws, and the NCR Tower 32/825 as the processing hardware platform, to upgrade tax collection for the county.

CPS' Tax Manager is a comprehensive library of programs designed specifically to automate all facets of the county tax collector including occupational license, hunting and fishing, and financial accounting. To keep track of licenses purchased at the tax collector's office, the county also bought six NCR 7052 point of sale workstations.

''Osceola County is a good example of how a vertical-application reseller (VAR) working with NCR's direct sales force can create a dynamic package for the customer -- and everyone benefits,'' said Joe Williams, NCR's VAR account manager for CPS Systems.

''By calling in NCR's direct sales force, CPS can create a dynamic UNIX-based solution for tax, county government, or collection coupled with NCR hardware in one turnkey package for the client,'' stated Ken Hoofard Jr., CPS national sales manager.

NCR and CPS joint customers include 10 in Florida, one in New Mexico and two in Texas.

A $7 million plus revenue company, CPS Systems Inc. provides comprehensive solutions to cities, counties, appraisal districts, law enforcement agencies and commercial markets. The systems operate as multi-user, multi-tasking systems for UNIX-based minicomputers. CPS also has offices throughout the South.

NCR and CPS plan to continue their strategic software partnership with software upgrades and NCR's System 3000.

Service and maintenance support for NCR products is provided by 5,000 customer service professionals at 400 locations in the United States through the NCR ProTech Program.

NCR Corp., based in Dayton, develops, manufactures, markets and supports business information processing systems for worldwide markets.

RICHMOND, BC (DEC. 4) BUSINESS WIRE - MTC Electronic Technologies Co. Ltd. (NASDAQ:MTCEF) announced Tuesday that it has entered into an exclusive joint venture agreement with the Peoples' Republic of China through its government agencies to provide a turn-key cellular telephone system to service one of the largest, and fastest growing, urban areas in China.

Commenting on the joint venture, Miko Leung, president of MTC said, ''When in place, MTC will own a 28 percent interest in the cellular system comprised of over 20 million potential POPS.

''The system is forecast to be fully operational by September 30, 1991. We believe that this agreement will provide MTC with significant revenue and profits, once the system is in place.

''Virtually none of the People's Republic of China currently has cellular capabilities, but we believe that in the Peoples' Republic of Chnia there is an insatiable demand for this product, as the amount of pay phones in the country is quite limited and standard wire-line service is quite inadequate.

''Further details of this milestone agreement will be made public as the company moves forward on this project,'' Leung continued.

''MTC will have complete management control of the operations of the cellular systems for which subcontracts to a major Japanese cellular equipment manufacturer have already been let. MTC will be the exclusive supplier of all hardware until the joint venture has implemented its own manufacturing facilities, which are targeted to be completed within the next three years.

''Under the agreement, the joint venture has to buy more than 20,000 telephone units each year for 3 years from MTC. In addition, MTC enjoys the exclusive right to export all products manufactured in the joint venture manufacturing facility.''

''This is an exclusive agreement for 50 years and there will be no cost charged for the territory, for the frequency band, for the facilities, for the license fee, for the placement of the transmitters or for the operating equipment. The local government has arranged for the placement of the transmitter atop the city's tallest skyscraper. The 50-story tall transmitter vastly reduces the number of repeaters needed.

''We have also negotiated favorable tax considerations for both the joint venture and MTC. For the first five years of operation, we have been granted tax exempt status. After the initial five year period, from 1995 to 2002, we will be taxed at 50 percent of the then prevailing rates.

''The terms of the agreement call for MTC to provide $3 million (U.S.) in cash technology, and services, out of a projected total capital requirement of $12.5 million required for the project with the PRC providing the remainder of the capital. The terms of the contract call for the capital to be made available for this project no later than May 31, 1991,'' Leung concluded.

MTC Electronic Technologies Co. Ltd., founded in 1972, manufactures, distributes, and imports over 160 products from the Far-East, including

televisions, VCRs, and telephones from three factories in mainland China. The company is also the sole importer of FAX machines into mainland China, through a multi-year agreement with the government-controlled Yin Jiang Telephone Co.

Year-to-date, the company has imported components for 15,000 FAX machines which MTC then assembled and sold in China. MTC trades on NASDAQ under the symbol MTCEF, and on the Vancouver Stock Exchange under the symbol MT.

NEW YORK (DEC. 4) BUSINESS WIRE - World silver fabrication demand has increased nearly 28 percent over the past five years pushing global consumption to an estimated 505 million ounces in 1990, according to the first edition of The Silver Institute's World Silver Survey released Tuesday.

Throughout the 1990s fabrication demand is expected to increase 3.3 percent annually - outpacing silver supply which is expected to increase 2 percent each year over the next decade. ''Overall, the facts outlined in the World Silver Survey indicate the market is tightening,'' Art Brown, chairman of Hecla Mining Co. and president of The Silver Insitute, said during a briefing on the report.

''The 1980s were challenging years for precious metals. We look forward to the 1990s and hope this annual publication will assist all those involved in the silver market.''

Supply and demand forecasts for the '90s comprise only a portion of the World Silver Survey's comprehensive analysis of the international silver industry. The survey also includes:

-- supply trends

-- fabrication demand

-- 40-year history of the market

-- investment demand

-- analysis of market inventories

The report gives a solid basis for understanding present silver market

conditions by providing reliable, fundamental information on all facets of the industry. Following its initial release, the World Silver Survey will be updated annually.

Copies of the report may be purchased for a $10 postage and handling fee from The Silver Institute, 1112 Sixteenth St., N.W. Suite 240, Washington, D.C. 20036.

The Silver Institute, based in Washington, D.C., is an international association of silver miners, refiners, factricators and manufacturers. The report is authored by CPM Group, a precious metal and commodities research company based in New York.

#90338b0680 12/04/1990 ~Business Wire
BURLINGTON, MASS. (DEC. 4) BUSINESS WIRE - Cognos Inc. (TSE:CSN; NASDAQ:COGNF) Tuesday announced its PowerHouse software is now available on Data General AViiON computer systems.

PowerHouse is a fourth-generation application development language in use at over 16,000 installations in 68 countries. AViiON is a RISC-based UNIX system that began volume shipments in September, 1989. To date, more than 400 software vendors have agreed to port software to the AViiON family of open systems.

This is the third UNIX announcement made by Cognos, a $112 million-(a) company that markets application development software.
In June, 1990, Cognos entered the UNIX market when it announced PowerHouse availability on the HP 9000 Series 800 Computers from Hewlett-Packard Co. under the HP-UX operating system. Last month, Cognos announced its intent to support Digital's ULTRIX. The PowerHouse ULTRIX product is expected to be available in the spring of 1991.

PowerHouse for AViiON systems runs under release 4.3 of the DG/UX operating system. It is available across the entire range of AViiON processors, including workstations, servers and multi-user systems.

''PowerHouse is one of the leading 4GL toolsets available on the Eclipse and MV families. Data General is pleased to have this product now available for its RISC-based AViiON systems. What sells commercial hardware like AViiON are proven commercial software tools like PowerHouse. We expect the addition of this popular software development environment will spur the continued rapid acceptance of the AViiON line of open systems,'' said Stephen P. Baxter, vice president, corporate marketing, Data General Corp.

Cognos and Data General have recently expanded their joint marketing efforts to include a new Distribution Agreement which allows DG to sell PowerHouse products for both the Eclipse/MV and AViiON systems. PowerHouse is also used worldwide by DG's own MIS organization.

Data General is a leading manufacturer of computer systems for business, industry, education and government. The company reported revenues for fiscal year 1990 of $1.22 billion.

Cognos markets application development software used on mid- range computers. The publicly held company is headquartered in Ottawa, Canada, with worldwide sales, service and marketing operations in Burlington, Massachusetts. Its PowerHouse product is used at over 16,000 installations in 68 countries.

NEW YORK (DEC. 4) BUSINESS WIRE - Alpha Industries Inc. announced Tuesday that it is on target to meet its forecasted earnings of 25 cents per share for the fiscal year ending March 31, 1991.

The company reported eanings of 11 cents per share for the first half, ending Sept. 30, 1990.

The projection was made this morning by Martin J. Reid, president and chief operating officer in a presentation before a group of security analysts in New York City. He said that the higher earnings are the result of increased profitability in the company's commercial product lines which now account for 60 percent of Alpha's sales, up from 20 percent just four years ago.

Commercial sales of microwave semiconductors and components to four markets, DBS, telecommunications, automotive, and sensors, are expected to account for an increased amount of Alpha's business growing from a projected $19 million in fiscal 1991 to $40 million in fiscal 1993.

ATLANTA (DEC. 4) BUSINESS WIRE - Trivest Inc. has purchased The Shannon Group Inc. through acquisition financing provided by GE Capital Corporate Finance Group.

Shannon Group management, led by Chief Executive Officer Gary Hainley, is also participating in the acquisition.

Trivest Inc., an investor group headquartered in Miami, has acquired approximately 30 companies since its formation in 1981. With the acquisition of The Shannon Group Inc. of Parsons, Tenn., Trivest becomes a major force in the manufacture of commercial refrigeration products for the foodservice equipment industry.

Acquisition financing for the project was arranged by GE Capital through its Southeast region office in Atlanta, according to Corporate Finance Group Vice President Andy Mason. ''GE Capital chose to be a part of this project because of Trivest's strong track record, the company's proven record of accomplishment and the potential for growth through industry consolidation,'' Mason said.

Shannon accounts for a significant portion of all ''walk-in'' refrigeration and freezer sales to major restaurant chains. The company commands a 20 percent market share of the walk-in freezer market in the United States and a significant share of ''reach-in'' freezer sales.

Shannon produces refrigerators under the well-known brand names Kolpak and McCall. The company manufactures products through six operations in three states including Tennessee, Wisconsin and California.

Trivest Inc. has a substantial presence in the foodservice industry and also has significant holdings in furniture, plastics, retail, consumer products and apparel industries.

GE Capital Corporate Finance Group provides debt and equity for acquisitions, recapitalizations, joint-ventures and turnarounds.

GE Capital, one of the nation's largest diversified financial services companies, has more than $63.6 billion in assets.

#90338b0699 12/04/1990 ~Business Wire

GREENVILLE, SC (DEC. 4) BUSINESS WIRE - Donald C. Spann, chairman and chief executive officer of Span-America Medical Systems Inc., Tuesday reported

increased sales and net income for the fourth quarter and fiscal year ended Sept. 28, 1990.

''Net income for the fourth quarter rose 36 percent to $311,300 while sales increased 11 percent to $6.9 million,'' stated Spann. ''The improvement in our fourth quarter income was due to a more profitable product mix, including higher sales of our health care foam products.

''We also benefited in the fourth quarter from improved manufacturing costs and lower product costs in our foam manufacturing operations.''

Fourth quarter sales rose to $6.9 million in 1990 compared with $6.2 million in the same quarter last year. Net income for the fourth quarter of 1990 was $311,300, or 9 cents per share, a 36 percent increase over 1989 fourth quarter net income $229,000, or 7 percent per share.

Net sales for fiscal 1990 advanced 16.6 percent to $25.2 million compared with sales of $21.6 million in fiscal 1989. Net income for 1990 increased to $1,312,000, or 40 cents per share, a 13.6 percent increase over fiscal 1989 net income of $1,155,100, or 35 cents per share.

''During fiscal 1990, we launched an aggressive marketing program,'' continued Spann. ''This included the hiring of additional sales and marketing staff and increased advertising and promotional expense for our entire product line.

Part of our sales success this year was due to these efforts. We also introduced a new consumer product, Leisure Mat, which will be distributed directly by Span-America.''

As previously announced, a contract for the company's flexible packaging services, accounting for approximately 12 percent of fiscal 1990 gross sales, will expire on Dec. 31, 1990.

Span-America Medical Systems Inc. is a manufacturer and marketer of foam products for the health care, industrial and consumer markets. The company also provides flexible packaging services. Span-America's stock is traded on the National Market System under the NASDAQ symbol SPAN.

LANDING, NJ (DEC. 4) BUSINESS WIRE - Murray United Development Corp. (OTC) announced Tuesday that it has extended the expiration date of all outstanding 'A' and 'B' warrants.

The 'A' warrants allow warrant holders to purchase shares of Murray United's common stock at a price of 10 cents per share. The 'B' warrants allow warrant holders to purchase shares of Murray United's common stock at a price of 15 cents per share. The 'A' warants which were to expire Dec. 7, 1990 have been extended through Friday, April 26, 1991. The 'B' warrants which were scheduled to expire Feb. 26, 1991 have been extended through Friday, Sept. 6, 1991.

Murray United Development Corp. is a development stage enterprise utilizing the Rotorcam Engine Technology to develop the Rotorcam engine. The Rotorcam engine has significantly fewer parts than a conventional four cylinder engine, multi-fuel capability, automatic variable compression ratio, high torque at low speed, low idle speeds and low total cost. The engine can be utilized in all areas where conventional engines are used.

Jerome L. Murray, president of the company, holds over 50 patents and has developed the high speed dental drill, peristaltic heart pump, magnetic lab stirrer, electric carving knife, jet engine power thrust indicator, airport jetway, sodium filled exhaust and power automotive seat. Murray received a B.S. in Aeronautical Engineering from M.I.T. in 1935.

BALTIMORE (DEC. 4) BUSINESS WIRE - Allied Research Corp. (NASDAQ:ARAI) Tuesday reported to its shareholders that it had reached a record $90 million backlog on November 26.

The information was part of a Report to Shareholders by Reinald W. Carter, president and chief executive officer of Allied Research.

''We reported to you in our 1990 second quarter report a backlog of $27 million. Our backlog for the quarter ending September 30, 1990 was $60.1 million and, since that time, we have made significant strides in our

marketing efforts.

''Subsequent orders have increased the backlog to approximately $90 million at November 26, 1990. This is the largest backlog in the history of the company '' reported Carter.

''We are particularly gratified that a part of the most recent order received by Mecar is to be produced in 1992. This is the first step in our plan to build production beyond a normal twelve month production period,'' he added.

Carter said that ''sales for the nine months ended September 30, 1990 were $27.9 million, down from $32.3 million for the same 1989 period. The loss was $4.9 million, compared with a loss of $4.2 million for the same 1989 period.

He said that receipt of orders has not been restricted to Mecar, with Barnes & Reinecke receiving a contract from the U.S. Army for bullet trap rifle grenades developed by Mecar. While small (just a little over $200,000) this is the first contract received from the U.S. Army for bullet trap rifle grenades and is indicative of the potential synergism between Mecar and Barnes & Reinecke.

Recently, Barnes & Reinecke also logged contract awards for Systems Technical Management support for several U.S. Army vehicles, production of driver control panel assemblies for the M1 Abrams tank and control assemblies for the Vulcan 20mm cannon.

Allied Research is a leading developer and producer of ammunition systems, supplier of engineering services to defense departments worldwide and designer of advanced products and systems for industry.

CHATTANOOGA, TENN (DEC. 4) BUSINESS WIRE - Chattem Inc. (NASDAQ: CHTT) announced Tuesday that based on preliminary unaudited sales data, corporate objectives of earnings per share growth of 20 to 25 percent over the $1.86 reported in its latest full fiscal year which ended May 31, 1989, will be met or exceeded for the year ended November 30.

Audited results are expected to be available in mid-January.

Early this year, the health and beauty/specialty chemicals company changed its fiscal year-end to November 30th from May 31st.

Chattem also announced that it has accepted an initial order for a chemical specialty product it will provide to a major U.S. pharmaceutical manufacturer under circumstances where a continuing vendor relationship may be established.

While it is not yet possible to quantify the effect of this possible relationship on sales and earnings, the Company expects that the establishment of a continuing vendor relationship would make a positive contribution to profitability in the fiscal year which began December 1. Chattem declined to identify either the chemical product or the purchaser citing a confidentiality agreement between the parties.

Separately, the trustees of the trust for the Company's defined benefit pension plan have indicated an intention to utilize up to $500,000 to purchase shares of the Company's common stock for the defined plan either in open market purchased at prevailing prices or in privately negotiated transactions.

GOLDEN, CO (DEC. 4) BUSINESS WIRE - Peter H. Coors, president, Coors Brewing

Co., Tuesday announced the company's decision to enter the Indiana marketplace in early 1991. It will be the 50th and final U.S. state for market expansion by the nation's third largest brewer.

Citing that the brewery "saved the best for last," Coors made public the list of seven Indiana wholesaler operations that will serve as master distributors for the Colorado-based company.

They include: Brentlinger Distributing in Terre Haute; City Beverage in Huntington; Jasper Beverage in Jasper; Metro Beverage Inc. in South Bend; Monarch Beverage Co. in Indianapolis; Valpo Beverage Co. Inc. in Valpariso; and Working Distributors Inc. in Evansville.

Regarding the delay in entering the Hoosier State's market, Terry Nauslar, Coors' director of field marketing said, "It's always been our policy to expand Coors' marketing territory only as rapidly as our brewing and packaging capabilities allowed.

"With substantial capital investments in our Golden, Shenandoah, and Memphis operations during 1990, we believe we're now much better equipped to meet the demand for our products by Indiana consumers."

Coors began expansion efforts east of the Mississippi in 1978 and most recently added Pennsylvania and Delaware in 1988. The company's growth rate has topped all other national major brewers over the last year.

Coors produces Coors Light - the nation's number three beer - as well as Coors Coors Extra Gold, Keystone, Keystone Light, George Killian's Irish Red and Winterfest, a holiday brew.

NEW YORK (DEC. 4) BUSINESS WIRE - J.P. Morgan Tuesday introduced two new global indices for international investors - the J.P. Morgan Currency-Hedged Government Bond Index and the J.P. Morgan Cash Index.

These additions round out the family of indices that J.P. Morgan began offering to investors a year ago today, when it introduced the Government Bond Index, a daily measure of global bond market performance.

With these new indices, bond investors may now tailor their benchmarks to include their desired currency exposure and their specific allocation to money market instruments. A brief description of each follows:

J.P. Morgan Currency-Hedged Government Bond Index: The generally prevailing view is that an unhedged international benchmark is appropriate for measuring the performance of a foreign currency bond portfolio.

However, it has become increasingly popular in the United States to consider using a fully or partially hedged international benchmark.

For investors who prefer a hedged benchmark, J.P. Morgan has developed its Currency-Hedged Government Bond Index.

These monthly hedged indices use rolling-one and three-month currency forward contracts to measure currency-hedged performance of the eleven government bond markets covered by the Index.

The returns are fully hedged into 15 currencies. Until now, no other index has used three-month forwards in measuring hedged performance, even though investors commonly hedge this way.

J.P. Morgan Cash Index: Cash is often a permanent - though fluctuating - component of a portfolio. With the new indices, investors may now measure the performance of cash against a more representative benchmark. The cash indices maintain constant maturities and are based on Euro-currency deposit rates rather than domestic money-market instruments.

Euro-currency deposits are the only liquid short-term securities consistent across all markets in terms of liquidity, maturity and credit quality. The indices are calculated daily for deposits in five constant maturities (one-, two-, three-, six-, and 12-month) for 11 countries and are reported in 15 currencies.

With institutional and individual investors showing strong interest in international securities during the past year and international government bonds offering attractive returns compared to other assets, the J.P. Morgan Government Bond Index has become increasingly monitored by investors.

Victor Filatov, head of J.P. Morgan's Bond Index Group, said, ''With a growing

number of investors worldwide using the J.P. Morgan Government Bond Index as their performance benchmark, and many others using it to monitor the impact of intra-month market movements, we feel that the Index has been a tremendous success and are expanding it to include these new hedged and cash indices.''

Filatov noted that Bankers Trust Investment Management group has already selected the new J.P. Morgan Currency-hedged Non-U.S. Traded Index as the benchmark for a $100 million index fund that it is managing for GenCorp, a $1.5 billion corporate pension fund.

For more information on the Government Bond Index or any of the indices mentioned above, please contact J.P. Morgan.

HOUSTON (DEC. 4) BUSINESS WIRE - The board of directors of Browning-Ferris Industries Inc. (NYSE:BFI) Tuesday declared an increase in the corporation's regular quarterly cash dividend on common stock and established the date for the company's annual meeting of stockholders.

The cash dividend of 17 cents per common share, payable Jan. 4, 1991 to shareholders of record on Dec. 21 was declared at the board's quarterly meeting. It represents an indicated annual rate of 68 cents per common share, up from the prior indicated annual rate of 64 cents per common share.

The board of directors also established that the company's 1991 annual meeting of stockholders will be March 6, 1991, 2 p.m., at The Westchase Hilton, Houston, Texas. Stockholders of record at the close of business on Jan. 4, 1991 will be entitled to notice of and to vote at the meeting.

Browning-Ferris Industries Inc. is one of the largest publicly held companies engaged in providing waste services. Subsidiaries and affiliates collect, transport, treat and dispose of commercial, residential and municipal solid waste and industrial wastes. BFI subsidiaries are also involved in recycling, resource recovery facilities, medical waste services, portable restroom services, and municipal and commercial sweeping operations.

STAMFORD, CT (DEC. 4) BUSINESS WIRE - Citizens Utilities Tuesday acquired Louisiana General Services Inc., by merger.

In the merger each share of Louisiana General Common Stock was converted into .8 shares of Citizen's Series B Common Stock. Approximately 4.2 million shares of Citizens' Series B Common Stock were issued in the merger, having an approximate market value as of the close of business on Monday, Dec. 3, of $93.6 million.

Leonard Tow, chairman and chief executive officer of Citizens, said, ''We welcome Louisiana General into the Citizens family and are confident that this new relationship will benefit all of our employees, shareholders and the communities we serve.'' Louisiana General's president, James Swenson, commented, ''I could not be happier for both our employees and share holders. Louisiana General Services welcomes the new challenge and opportunity.''

Citizens Utilities is a diversified operating public utility providing telecommunications, electic, gas, water and wastewater services to more than 735,000 consumer connections in 13 states: Arizona, California, Colorado, Hawaii, Idaho, Illinois, Indiana, Nevada, Ohio, Pennsylvania, Utah, Vermont and, now, Louisiana. Louisiana General Services is principally engaged in residential, commercial and industrial gas operations in Louisiana.

#90338b0771 12/04/1990 ~Business Wire
MEMPHIS, TN (DEC. 4) BUSINESS WIRE - Seven Oaks International Inc. (NASDAQ/NMS:QPON) Tuesday reported a net loss of $2,515,000, or 39 cents per share, for the second quarter of its 1991 fiscal year.

The loss included a charge of $1,486,000, or 23 cents per share, relating to the restructuring of certain of the company's operations. Revenues for the three months ended Oct. 31, 1990, totaled $3,263,000 compared with $5,947,000 a year ago.

For the first half, Seven Oaks reported a loss of $3,500,000, or 54 cents per share, including the restructuring charge. That compares with income in the year-earlier period of $360,000, or 6 cents per share.

Revenues for the first six months totaled $7,655,000 vs. $12,050,000 in the year-earlier period.

The results for the year-earlier periods reflect continuing operations and exclude the losses related to the operation and sale of the company's

redemption agency subsidiary in fiscal 1990.

Frank J. Donato, chief executive officer, said that the restructuring charge was due principally to changes being implemented to match the company's operations with the continuing reduction in coupon volume.

Donato said that the company is starting to benefit from the steps being taken to improve the return on the clearinghouse operations. He commented: ''We had expected to attain more momentum during the second quarter but are encouraged about some of the trends which are now clearly evident.

Donato said that Seven Oaks processed 213 million coupons during the second quarter, down from 293 million in the first period. He remarked: ''The decline in our volume relates directly to additional changes in our customer base. The underlying interest in couponing by manufacturers remains high, and we are moving now to market our clearinghouse services through new, innovative payment plans.''

Donato concluded by noting that the company's bank borrowings were reduced further during the quarter to $12.3 million. He said: ''The debt outstanding at the end of October represented $20.1 million less than the level at the start of this fiscal year. Reducing interest costs remains a key element in our turnaround strategy. Realizing this goal will likely mean a further decline in coupon volume during the second half.

Seven Oaks International operates as a clearinghouse between retailers and product manufacturers in processing cents-off coupons. The company's common shares are traded over-the-counter under the National Market System symbol QPON.

PALO ALTO, CALIF. (DEC. 4) BUSINESS WIRE - Hewlett-Packard Co. (NYSE:HWP) Tuesday introduced five business systems and servers that deliver mainframe-level performance at minicomputer size and price.

Four of the new computers provide triple the performance that was previously available in the midrange of the HP 9000 and HP 3000 families. The fifth computer broadens the performance of the high-end of the HP 9000 family.

The computers are designed for client-server and multiuser applications. They are the midrange HP 9000 Models 842S and 852S servers, the midrange HP 3000 Series 948 and 958 systems and servers and the high-end HP 9000 Model 865S server.

The computers combine two leading-edge technologies -- submicron CMOS (complementary metal-oxide semiconductor) and Precision Architecture-RISC (reduced-instruction-set computing) -- to achieve breakthroughs in price/performance(a).

Submicron CMOS technology allows HP to design extremely dense chips that greatly increase processor performance. PA-RISC allows HP to build systems that are less expensive than comparable systems using traditional architectures.

Tuesday's announcement represents the first implementation of these breakthrough technologies for HP's midrange business systems and servers. In October, HP began volume shipments of high-end computers based on submicron CMOS and PA-RISC.

''Developing cost-effective, enterprisewide computing environments is one of the key priorities for commercial users today,'' said Willem P. Roelandts, an HP vice president and general manager of the company's Computer Systems Group. ''HP's advanced RISC-technology computers let customers implement applications that put processing power at users' fingertips.''

The new business systems and servers combine advances in processor performance with a broad set of capabilities. As a result, customers can run mission-critical applications without the high cost and cumbersome operation of mainframes.

Hewlett-Packard Co. is an international manufacturer of measurement and computation products and systems recognized for excellence in quality and support. The company's products and services are used in industry, business, engineering, science, medicine and education in approximately 100 countries.

HP has 92,000 employees and had revenue of $13.2 billion in its 1990 fiscal year.

NEW YORK (DEC, 4) BUSINESS WIRE - Bear, Stearns & Co. Inc. announced that Carol Bellamy has joined the firm Tuesday as a managing director in its public finance department.

Alan C. Greenberg, chairman and chief executive officer of Bear Stearns, welcomed the former New York City Council President to Bear Stearns and stated ''We look forward to Carol's return to the investment banking business. We believe she will make a major contribution to our public finance effort.''

Bellamy stated that she is pleased to join Bear Stearns. ''As Bear Stearns is one of the top securities firms committed to the public finance sector, there is enormous diversity in their business and therefore, many opportunities to apply my experience to new situations.''

William H. Hayden, the senior managing director who heads Bear Stearns Public Finance Department, stated that Bellamy will concentrate her efforts on advising municipal and state governments and will pursue new business in several regions of the country.

Before her recent bid for Comptroller, Bellamy, 48, was a principal with Morgan Stanley & Co.'s Tax Exempt Department from January 1986 through mid 1990. She served as an elected official for over 13 years.

From 1978 to 1986, she was president of the City Council of New York after having served as a State Senator from Brooklyn from 1973 to 1977. Bellamy began her career as an associate of Cravath, Swaine & Moore. A native of New York City, she is a 1968 graduate of New York University Law School.

Bear, Stearns & Co. Inc. is a subsidiary of The Bear Stearns Cos. Inc. (NYSE:BSC), a leading investment banking and brokerage firm headquartered in New York City. The securities firm is engaged in corporate and public finance and mergers and acquisitions, institutional equities, fixed income sales and trading, individual investor sales, asset management and correspondent clearing.

CAMBRIDGE, MASS. (DEC. 4) BUSINESS WIRE - Xerox Imaging Systems (XIS) and Avalanche Development Co. Tuesday announced a standard interface between XIS' intelligent character recognition (ICR) products and Avalanche's intelligent visual recognition and document markup technology.

The interface, known as KDOC, was developed by XIS and Avalanche to allow users to bring text files into Avalanche's advanced markup system, FasTAG. FasTAG automatically marks up text for applications such as electronic publishing, composition, hypertext and full text databases.

Access to the text file was previously available only through XIS in the Kurzweil CALS System. The interface is now available through Avalanche as part of its standard product line.

The KDOC option produces an enriched text file during the ICR process. This file contains page coordinate information for each word, accurately identifies zones and provides detailed font and format information. This information is then passed to Avalanche's Visual Recognition Engine and is used to recognize the logical structure of the document and to automatically markup the document according to user-defined specifications.

''Xerox Imaging Systems was the only vendor capable of providing intelligent character recognition and successfully identifying, capturing and maintaining the structure of each document during document manipulation,'' said Haviland Wright, president, Avalanche Development Co.

Avalanche Development Co. of Boulder, Colo., is the leading producer of intelligent markup software serving a wide range of publishing applications. In addition to FastTAG and IMSYS.CALS, Avalanche also produces customized versions of its technology providing a critical link to electronic publishing, composition, full text database and hypertext systems.

Xerox Imaging Systems is an industry leader in desktop scanning, image processing and text recognition for IBM PC, PS/2 and Apple Macintosh Systems. XIS was formed by the merger of Datacopy Corp. and Kurzweil Computer Products.

WASHINGTON (DEC. 4) COMTEX - The 8-K report filed at the SEC shows on Nov. 21 1990, Infotechnology Inc.(TICKER: ITCH) and Financial News Network Inc. (TICKER: FNNI) released a joint press release stating the NASD had granted the companies temporary exceptions to one of the listing requirements of the NASDAQ system.

The exception was granted with respect to Infotech's and FNN's lateness, previously announced, in filing their annual reports for their fiscal years ended June 30, 1990 with the SEC.

The NASD has given Infotech and FNN until Dec. 7 to file their annual reports and their Sept. 30 quarterly reports.

Until the two firms are in full compliance with the NASD listing rules, the letter "E" will appear at the end of their NASDAQ trading symbols.

#90338c0084 12/04/1990 ~Comtex
WASHINGTON (DEC. 4) COMTEX - The 8-K report filed at the SEC shows on Nov. 10 1990, MJC Enterprises Inc., a wholly-owned subsidiary of CopyMat Inc., sold the stock of CopyMat Corp. to Golden West Development Bancorp in exchange for an eight-year note in the amount of $1.65 million.

Golden West is a newly formed Nevada corporation formed to acquire the stock of CopyMat.

The sale is part of a plan of reorganization presented to CopyMat's creditors.

The company reports its amended plan of reorganization had not been implemented as of Nov. 23, 1990.

The company's address is 6111 Johnson Court, Suite 209, Pleasanton, California 94588, and its telephone number is (415) 734-0950.

-30- 873
#90338c0086 12/04/1990 ~Comtex
WASHINGTON (DEC. 4) COMTEX - The 8-K report filed at the SEC shows pursuant to the terms of an exchange agreement dated as of Nov. 14, 1990, between Cash America Investments Inc.(TICKER: PWN) and Eppler, Guerin & Turner Inc., Cash America has acquired an outstanding warrant to purchase 96,570 shares of Eppler's common stock formerly owned by Eppler.

This transaction was in exchange for 41,875 shares of commmon stock.

The warrant was issued to Eppler in connection with the company's initial public offering.

Eppler acted as managing underwriter for the offering.

WASHINGTON (DEC. 4) COMTEX - The 8-K report filed at the SEC shows that H.F. Lenfest, the largest shareholder of TelVue Corp., and Science Dynamics Corp., (TICKER: SIDY) another significant shareholder and creditor of the company, have agreed to provide the firm with further financial support.

Lenfest has agreed, TelVue reports, to lend the company up to an additional $2.0 million on an as-needed basis, provided such funding may cease if Lenfest determines that TelVue will not be able to achieve net income on a consistent basis.

Science has agreed to reduce TelVue's indebtedness under an outstanding note to Science by approximately $436,000 and to extend without interest the due date of the remaining $541,000 to Dec. 31, 1991.

The company's executive offices are located at Building No. 37, Cherry Hill Industrial Park, Springdale Road, Cherry Hill, New Jersey 08003.

Its telephone number is (609) 424-5020.

#90338c0088 12/04/1990 ~Comtex

WASHINGTON (DEC. 4) COMTEX - The 8-K report filed at the SEC shows on Nov. 29 1990, O'Deli Corp. (the "company") merged with and into Culinary Capital Corp., (CCC) pursuant to which CCC issued one share of its common stock for each share of O'Deli's outstanding common stock.

CCC also issued one share of its Class A, Class B and Class C preferred stock for each share of the company's outstanding Class A, Class B and Class C preferred stock. CCC is the surviving corporation.

CCC was organized in October, 1990, for the sole purpose of completing a merger between the company and CCC, to allow the company to reincorporate its operations in Nevada and change its corporate name to Culinary Capital Corp.

The company's executive address is 65 Battery Street, Third Floor, San Francisco, California 94110.

Its telephone number is (415) 765-1500.

SCHEDULE 13D

SEC - AMENDMENT NUMBER: 7

GROUP LED BY WILLIAMS COS. INC. OF TULSA, OKLAHOMA OWNS 4,592,583 SHARES (62.44%) OF APCO ARGENTINA INC.(TICKER: APAG) OF HOUSTON, TEXAS.

ANNOUNCEMENT:

As a part of the transaction to purchase additional ordinary shares, Mr. William I. Lee resigned as a member of the board of directors of Apco. Acquisition of the additional 1,519,560 shares gives Williams control of over 62.44 percent of Apco's outstanding ordinary shares which has the effect of giving Williams control over any matter requiring a vote of Apco stockholders, including the election of members of the board of directors.

LATEST TRANSACTION:

On Nov. 19, 1990, Williams Cos. Inc. acquired from Pacific 1,519,560 ordinary shares of Apco's ordinary shares for a purchase price of $16,715,165.

PURPOSE:

Acquisition of additional shares.

TOKYO (DEC. 4) - Japanese businessmen are increasingly worried that high interest rates, increased oil prices and an acute labour shortage will lead to an economic slowdown next year, according to a survey published Tuesday.

The survey, conducted by the powerful Japan Federation of Economic Organisations (Keidanren), found that almost three quarters of the respondents expect a slowdown in the first half of the financial year beginning in April.

Only 28 percent of those polled in October and November expect the current phase of expansion, now in its 49th consecutive month of growth, to surpass the record 57-month boom which began in late 1965. That compares with 78 percent in the last survey carried out in July, the federation said.

Growth forecasts for next year averaged 3.7 percent, down from the average estimate of 4.6 percent for this year, with the financial, energy and chemical sectors expecting to be the most affected.

Interest rates were widely expected to peak in the first six months of the financial year while oil prices were forecast to range from 25 dollars a barrel to 30 dollars. Almost half the 167 respondents, out of 242 polled, predicted inflationary pressures arising from the labour shortage.

The ratio of repondents expecting a slowdown in capital investment rose from 13 percent in the last survey to almost 40 percent while those expecting to boost investment in plant and equipment fell from 73 percent to 34 percent.

Japanese stock prices were expected to remain "unstable" although almost 90 percent of the repondents said this would not affect their activities. Almost 49 percent said a stronger yen at between 120 and 130 to the dollar was "reasonable" while 47 percent said this level was "excessive."

Repondents also indicated they planned to shift investments from the United States to the European Community and Asia although more than 80 percent had no plans to invest in Eastern Europe or the Soviet Union.

A separate survey released by the Japan Chamber of Commerce and Industry Monday showed that small and medium-sized companies in the manufacturing, construction and service sectors were also pessimistic in their outlook.

MANILA (DEC. 4) - The Philippines' economic growth will decline to 2.5 per cent while inflation will soar to 15 per cent in 1991 following adjustments

needed to forestall a bigger crisis, a top business leader said here Tuesday.

Aurelio Periquet, president of the Philippine Chamber of Commerce and Industry (PCCI), said in a prepared statement that 1991 "will be a time to make the economy ready and viable for long-term growth."

He said President Corazon Aquino's government can no longer "pump-prime" the economy with investments because of its massive deficit and must control the growth of imports because of scarce foreign exchange.

"Putting the house in order by controlling the deficits should guarantee a condition for sustained economic recovery," Mr. Periquest said.

Unless current levels of budgetary and current-account deficits are checked,

the Philippines would face higher inflation and interest rates and a forced moratorium on foreign-debt service similar to the 1983 crisis, he warned.

"The government realizes that the country cannot continue living off deficits -- if it does, something will have to give," Mr. Periquet said.

The Philippine economy grew by an average of six per cent from 1987-89 but the deficit ballooned alongside as the government poured in money into the countryside to stimulate production and consumption.

Mr. Periquet said agriculture would recover from drought and production would grow by three per cent in 1991, but industry would expand by only 2.5 per cent and services by only 2.1 per cent.

Inflation would average 15.5 per cent next year across the Philippines but would exceed 20 per cent in Manila, he said.

#90338d2080 12/04/1990 ~French/German News Agency

BEIJING (DEC. 4) - China is to publish a new list of priority foreign investment projects for the next three years and amend existing legislation governing the setting up of joint-ventures, the China Daily said Tuesday.

As China prepares to embark on its eighth five-year plan (1991-1996), priority will be given to projects in raw materials, energy, telecommunications and agriculture, the China Daily quoted Yu Xiaosong, director of the foreign

investment administration under the ministry of foreign economic relations and trade (MOFERT) as saying.

High-tech and export-oriented projects would also be given priority, Mr. Yu said.

However, overseas investment in hotels, processing plants and services projects is expected to be discouraged, the newspaper said.

Mr. Yu also said the Chinese government would announce amendments early next year to existing legislation covering joint-ventures, especially on how to terminate joint-venture contracts and how investors may withdraw their capital.

By the end of October, China had approved 27,300 foreign-funded projects for which actual investment had reached 17.68 billion dollars, the English-language daily said.

Chinese authorities have been at pains recently to repeat their commitment to economic reforms, and to reassure foreign businessmen that investing in China was in their interests as well as China's.

Cairo (DEC. 4) - Egyptians vote on Thursday to fill 261 of the 444 National Assembly seats left undecided in the first round of balloting on November 29.

The National Democratic Party of President Hosny Mubarak won 144 of the 183 seats decided in last Thursday's election and independent candidates picked up 38 seats.

Less than half the eligible 16 million voters turned out last week. Opposition parties had called for a boycott, arguing that voting would be rigged.

NDJAMENA (DEC. 4) - A Libyan diplomatic mission arrived in Ndjamena late Monday to meet with Chad's new strongman Idriss Deby, who forced the flight of former president Hissein Habre this weekend, reliable sources said Tuesday.

The delegation flew in on board a Boeing 737, after three Soviet-made Ilyushin 76 craft flew home 450 Libyan prisoners of war freed after Mr. Habre fled the capital Saturday.

Unconfirmed reports have said some 2,000 Libyan prisoners of war are held in Chad.

Military sources said Ndjamena airport is under the control of army troops from France, the former colonial power. The French soldiers were ensuring that the flight control tower and other airport installations were working, the sources said.

In Paris, French Defense Minister Jean-Pierre Chevenement said the arms used by Mr. Deby's forces were 40 per cent Libyan while the other 60 per cent was equipment captured from government forces.

Mr. Chevenement, interviewed late Monday by French television, reaffirmed that France had remained "neutral" in the events in Chad, and said the Habre regime with its 13,000-member force "fell much faster than we imagined".

"We did not dump Hissein Habre. We simply ordered our Jaguars (fighter planes) not to bomb or machine-gun" Mr. Deby's forces, he said.

He said the 1,200 to 1,300 French force based in Chad, which have been backed up by 800 reinforcements in recent days, will be kept there "because if Chad is hit by any foreign aggression, France would react".

NAIROBI (DEC. 4) - All 10 people aboard a Boeing 707 cargo plane on a relief mission were killed when it collided with telephone cables and crashed one kilometre from Nairobi's Jomo Kenyatta airport on Tuesday morning, airport officials said.

The plane was bound for the nearby Embakasi airport to pick up emergency supplies for the southern Sudanese town of Juba, besieged by rebels.

The bodies were burned beyond recognition, and wreckage was strewn over a wide area near the main road from Nairobi to Mombasa. The victims' nationalities were unknown, the officials said.

According to a witness, part of the wreckage hit a bus coming from Mombasa, injuring two people.

The plane, owned by the Sudania company and leased to Trans-Arabian Air Transport, had been chartered by the Lutheran World Federation, a church-sponsored relief agency. It was collecting food and medical supplies here.

TOKYO (DEC. 4) - Japan's gross national product (GNP) grew by just 1.0 per cent in the July-September period over the preceding three-month quarter,

putting the annual growth rate at 4.1 percent, Tokyo said Tuesday.

The Economic Planning Agency noted that the figures pointed to a slowdown for the Japanese economy. In the preceding April-June period, the GNP had risen by 1.4 percent, while the annual growth rate was 5.5 percent.

#90338d2960 12/04/1990 ~French/German News Agency

Hamburg (DEC. 4) - Bookings in the advertising field in Germany are expected to total nearly 24 billion marks (16 billion dollars) in 1990, and the industry is on the eve of strong growth due to the advertising in eastern Germany, according to a study here Tuesday.

The market research group GfK-Marktforschung said its survey of companies and advertising agencies indicated that in 1991, spending on advertising will rise by a further six to nine per cent.

The main factor in the growth will be the effort made by German companies to advertise their products in eastern Germany, the GfK said.

The electronic media will benefit most from the growth, with private Tv expected to see a 12 percent rise in advertising revenues and private radio, 6 percent.

The print media, on the other hand, will see a decline in advertising revenues next year, the GfK survey predicted.

#90338d3000 12/04/1990 ~French/German News Agency

LONDON (DEC. 4) - British Airways has begun recruiting pilots under a plan to set up a new airline based in Berlin to provide services linking east and west Europe with destinations around the world, a BA spokeswoman said here Tuesday.

"We want to stay in Germany and we want to expand," the spokeswoman said. She confirmed a report in The Times daily Tuesday which stated that ads for pilots and crew appearing in Wednesday's edition of Flight International were placed by BA.

The Times reported that BA would hold a 49 percent stake and would be in charge of operating the new airline with German investors controlling the remaining interest.

BA currently maintains a fleet of nine Boeing 737s and British Aerospace ATP passenger aircraft permanently based in Berlin which provide 86 daily flights to nine German cities.

The unification of Germany produced agreements that would drastically cut back service to Berlin by foreign carriers by 1993, but BA has been working on ways to maintain a strong base in Berlin, The Times stated.

Until earlier this year, West Berlin was served only by national carriers of the three main western World War II allies -- Air France, British Airways and Pan Am. East Berlin was served by Aeroflot.

Under the new rules, BA would have to reduce the number of seats it provides for its Berlin service by 20 percent in April followed by cuts of 10 percent every six months after that.

The newspaper also reported that BA was finalising plans for a new airline, to be set up in conjunction with Aeroflot, operating from Moscow and to be called Air Russia.

MOSCOW (DEC. 4) - A soviet Soyuz spacecraft docked with the manned orbital complex Mir onTuesday, two days after blasting off from the Baikonur Cosmodrome with a Soviet-Japanese crew.

The news agency Tass said Japanese television reporter Toyohiro Akiyama would spend six days aboard the space complex, which has been manned for five months by cosmonauts Gennady Manakov and Gennady Strekalov.

Manakov and Strekalov are due to leave the complex with Akiyama on December 10 and return to earth. Cosmonauts Viktor Afanasyev and Musa Manarov, who piloted the Japanese newsman to Mir, will remain aboard the space station.

Akiyama's Tokyo Broadcasting System reportedly paid the Soviets between 10-12 million dollars for the privilege of having one of its employees become the first journalist in space.

DAR ES SALAAM (DEC. 4) - Tanzanian President Ali Hassan Mwinyi has lifted a

ban on expelled Dar es Salaam university students from seeking employment in the public service, but banned 13 others from returning to the university for one year.

A state house statement said Tuesday that Mr. Mwinyi, as chancellor of the university, had decided to lift the employment ban he imposed on the expelled students when he ordered the university closed last May after riots. He also withdrew the order requiring them to report to their respective district commissioners.

At the same time, Mr. Mwinyi slapped a one-year ban on 13 of the students and reprimanded eight others for their involvement in the riots that led to the closure.

University Council chairman Al-Noor Kassum, said the sacked students would be allowed to apply for readmission one year after the main campus had re-opened in January, while the eight would be free to report back in January, but would have their scholarships reinstated only after the behaviour of each student had been carefully scrutinized.

The closure, the first since President Mwinyi came to power five years ago, was triggered by campus unrest, followed by class boycotts and slanderous literature against national leaders.

The students' action infuriated Mr. Mwinyi who said he viewed it as a "departure from the African norms" which demand that youngsters respect their elders.

Some 3,000 students, except those in the medical and law faculties took part in the riots.

The closure is to affect next year's intake. On Saturday, university vice chancellor Geoffrey Mmari announced that there would be no new intake for the 1990-91 academic year to allow those who had been expelled to complete their studies and to avert an accommodation crisis.

#90338d3050 12/04/1990 ~French/German News Agency
NEW DELHI (DEC. 4) - Hundreds of paramilitary troopers were deployed around the northern Indian temple town of Ayodhya Tuesday as thousands of Hindus wanting to build a temple on the site of a mosque poured into the area for a mass action program.

Hindu revivalist groups have pledged that the program, to be launched Thursday will be peaceful.

But press reports here quoted Ayodhya District Magistrate K. Chandramauli as

saying 60 companies of paramilitary troops had been deployed in the district as a precautionary measure.

The revivalist groups have turned a deaf ear to frantic central government attempts to dissuade them from massing in Ayodhya, some 700 kilometers (420 miles) east of Delhi, where security forces shot dead 24 Hindus just over a month ago when they tried to attack the 16th century mosque.

The groups, spearheaded by the militant Vishwa Hindu Parishad (World Hindu Council) and the revivalist Bharatiya Janata Party (BJP or Indian People's Party), claim the mosque was built on the birthplace of the Hindu god Rama.

The Press Trust of India (PTI) quoted Mr. Chandramauli as saying that in addition to the paramilitary troopers nine companies of provincial armed constabulary had been posted in the district in preparation for Thursday's agitation.

However by late Tuesday it was unclear whether the dilapidated mosque would be declared off limits to the thousands gathering in Ayodhya, and PTI quoted the magistrate as saying he was awaiting instructions from New Delhi on deployment of the security forces.

AMMAN (DEC. 4) - Jordan, which recalled its ambassador from Saudi Arabia in September, has decided to send him back to Riyadh as a gesture of goodwill, official souces said Tuesday.

A foreign ministry source said it was not yet decided on when the ambassador would return.

The Jordanian move to recall its ambassador came following Riyadh's closure of the military, labor and cultural offices at the embassy in Riyadh and the reduction of the embassy's diplomatic staff to 10 diplomats.

The move followed Saudi complaints that Jordan had shown sympathy to Iraq after its invasion of Kuwait. Saudi Arabia recalled its ambassador in Amman early October.

#90338d3280 12/04/1990 ~French/German News Agency

TOKYO (DEC. 4) - Japan's biggest bank, Dai-Ichi Kangyo Bank Ltd., is to raise its prime short-term lending rate by 0.25 percentage points to 8.25 percent next week, banking sources said Tuesday.

The move, expected to take effect December 11, reflects higher deposit rates and is likely to prompt similar action by other banks, the sources said, adding that Dai-Ichi Kangyo was likely to make an official announcement Wednesday.

The increase would make the short-term prime rate, applied to loans of less than one year to banks' most credit-worthy clients, higher than the long-term prime rate which now stands at 8.1 percent

Japanese banks last raised their short-term rates in mid-September, from 7.375 percent to 8.0 percent.

The hike followed a move by the Bank of Japan to raise its official discount rate, charged on central bank loans to financial institutions, from 5.25 per cent to 6.0 percent on August 30.

Bank of Japan Governor Yasushi Mieno recently said that the central bank would maintain its tight credit policy to forestall inflationary pressures.

BEIJING (DEC. 4) - The American author of "The Last Emperor" has apologized to the widow of the late Pu Yi for "inaccuracies" in his book and has offered to correct them, said an official report received here Tuesday.

Edward Behr, who wrote the book on the life of China's last emperor, extended to Li Shuxian his "sincere apologies," if his book had offended her, the New People's Evening News reported.

In a letter dated October 20 addressed to the widow of the late Manchu emperor Mr. Behr said he was sorry he had been unable to interview Ms. Li during the writing of the work and promised to correct "inaccuracies" in the next edition.

Ms. Li, who was married to Pu Yi from 1962 until his death in 1967, also criticised the Oscar winning film "The Last Emperor", directed by Italian Bernardo Bertolucci, which came out in 1986. She said it violated the truth in order to pander to the viewing tastes of Western audiences.

Ms. Li had appeared in February before a Beijing tribunal to testify in a case she had filed against a historian to protect the copyright she had inherited from her late husband for his autobiography "From Emperor to Citizen."

Ms. Li said at the time that the book, which appeared in 1964 and inspired the film, had been written by Pu Yi alone. Historian Li Wenda claims he helped write the book and is demanding a share of the copyright.

DHAKA (DEC. 4) - Top opposition leader Begum Khaleda Zia appeared in public Tuesday after remaining in hiding since a state of emergency was proclaimed in Bangladesh last week.

Begum Zia, who heads the Bangladesh Nationalist Party, addressed a public rally in downtown Gulistan district against the government of President Hussain Mohammad Ershad.

Mr. Ershad proclaimed the state of emergency November 27 in the face of growing anti-government agitation, which started October 10 and has so far left more than 100 people dead, according to opposition sources.

Mr. Ershad announced Monday he would step down 15 days before calling general elections in 1991, but gave no specific date for the polls.

His offer was rejected by the opposition which demanded that he step down immediately and vowed to continue its eight-year campaign to oust him.

OSLO (DEC. 4) - Soviet President Mikhail Gorbachev has named deputy foreign minister Anatoly Kovalyov to receive the Nobel Peace Prize on his behalf in Oslo on December 10, the Nobel Institute announced here Tuesday.

There had been reports that Mr. Gorbachev's diplomatic adviser Evgeny Primakov would receive the prize.

But Institute director Geir Lundestad told AFP that both the Soviet embassy in Oslo and the Norwegian embassy in Moscow confirmed it would be Mr. Kovalyov.

"We have not been informed about any last minute change of plans. Quite the contrary, the arrival of Kovalyov has been confirmed several times," said Mr. Lundestad.

Mr. Gorbachev announced last week that he would postpone his visit to Norway because of problems at home which prevented him from being absent from the Soviet Union, even for one day.

The award ceremony takes place in Oslo city hall on December 10, anniversary of the birth in 1833 of Alfred Nobel, the inventor of dynamite, who founded the prize. On Gorbachev's behalf Mr. Kovalyov will receive a bronze plaque, a diploma and a cheque for four million Swedish crowns (720.000 dollars).

Mr. Kovalyov will arrive in Oslo on December 8 and stay for four days. His program includes meetings with Prime Minister Gro Harlem Brundtland and Foreign Minister Thorvald Stoltenberg.

The Nobel Committee hopes that Mr. Gorbachev will visit Norway in May next year to deliver the traditional Nobel lecture.

Since the first award in 1901, wives, ambassadors and friends have on several occasions stood in for prize winners. Yelena Bonner, wife of Soviet physicist Andrei Sakharov accepted his peace prize in 1975.

WARSAW (DEC. 4) - U.S. Defense Secretary Dick Cheney arrived Tuesday for a 24 hour visit to Poland for talks with his counterpart Rear-Admiral Piotr Kolodziejczyk on military exchanges and European disarmament, PAP news agency said.

Deputy Defence Minister Janusz Onyszkiewicz, quoted by PAP, said military exchanges did "not mean basing U.S. troops in Poland but training possibilities for Polish officers in the United States or arms purchases from that country".

-30- 659

#90338d3590 12/04/1990 ~French/German News Agency

BAGHDAD (DEC. 4) - King Hussein of Jordan arrived here Tuesday to hold talks with President Hussein on securing a peaceful resolution in the Gulf, official sources reported.

The two leaders are also to discuss efforts "to avoid any military confrontation in the region in light of the recent U.S. proposal" to open a dialogue with Iraq, according to an Arab diplomatic source.

He said Palestine Liberation Organization Chairman Yasser Arafat, currently visiting Baghdad, could also take part in the meeting.

King Hussein was accompanied by his prime minister and foreign minister, Moudar Badran and Marwan al-Qassem, along with Yemeni Vice President Ali Salem al-Baid and Foreign Minister Abdel Karim al-Aryani, according to sources in Amman.

Both Yemen and Jordan have criticized Iraq's August 2 invasion of Kuwait but have shown some sympathy for Baghdad and have condemned the U.S.-led multinational military buildup in the Gulf.

The only Arab country currently a member of the United Nations Security Council, Yemen holds the rotating presidency of the 15-member body for

December.

#90338d3600 12/04/1990 ~French/German News Agency
CANNES, FRANCE (DEC. 4) - Japanese and U.S. financiers are leading an investment boom in amusement theme parks in France despite several flops, an international conference here has heard.

A park in northern Lorraine based on the Smurfs cartoon characters is in trouble, a Mirapolis centre west of Paris is struggling, and the Planete Magique (magic planet) in Paris and the Zygo Parks in Nice in the south of France have also fallen short of financial expectations.

But still the money pours into wonderland schemes to amuse and entertain the family, the fifth International Forum of Leisure Equipment heard.

The Walt Disney company, which is the leading company in the sector, has chosen France as its investment centre in Europe and now plans to create three linked parks east of Paris.

The first of these, Euro Disneyland, which will open in the spring of 1992, will require an investment of 22 billion francs (about 4.4 billion dollars) and is expected to attract 11 million visitors in the first year.

Euro Disneyland managing director Patrick Fitzpatrick, who is sure that the venture will be successful, recently announced that the launch of a second park based on cinematic themes, would be brought forward to 1994 or 1995.

Walt Disney is now working on ideas for the creation of a third park in about 2000 called Epcot Europe on the themes of science and the future.

Meanwhile the U.S. MCA group plans to invest up to eight billion francs (1.6 billion dollars) by 2000 in the new town of Melun Senart south east of Paris in a cinematic theme park which would create 10,000 jobs.

Japanese experts at the conference here held that the expected takeover of MCA by the Japanese Matsushita firm would increase the likelihood of this investment. They noted that the Japanese were increasingly attracted by tourism in France as demonstrated by recent investments in the French golfing sector.

The French are also exporting leisure-park know-how. Tourism Minister Jean-Michel Baylet late on Monday announced big contracts in Japan and in Mexico.

The SFERG company, which designed and built the Parc Asterix near Paris Roissy airport, has won a contract to design a theme park in Japan which will be the second biggest after the Disney park.

The first stage of this project to cater for one million visitors per year, will involve investment of one billion dollars. Its theme will be France.

In Mexico the SFERG has won a contract to study the creation of two tourist complexes, each of which will have a theme and hotels.

Financed by the government, they will be situated in the north of the country on the frontier with the United States, at Tijuana near San Diego and at Ciudda Tijuan near El Paso.

#90338d3630 12/04/1990 ~French/German News Agency

ANKARA (DEC. 4) - Turkish army commander General Dogan Gunes was named Tuesday as the new chief of staff of the Turkish armed forces, following the resignation of his predecessor, the news agency Anatolia reported.

Mr. Gunes replaces General Necip Torumtay, who said that he stepped down because he could no longer reconcile his job with "his conception of the state and the principles it defends."

The Turkish press on Tuesday interpreted the resignation as a protest against President Turgut Ozal's Gulf crisis policy.

"The resignation warning to Ozal," headlined the dailies Gunes and Milliyet.

The daily Hurriyet said that Gen. Torumtay demonstrated the divergence on Gulf crisis policy between the army and Mr. Ozal who, it said, had criticized the "very cautious" attitude of the former chief of staff.

MANILA (DEC. 4) - The Philippines has demanded that U.S. civilian personnel stationed in the country pay local income taxes, an official said here Tuesday as talks on the future of the U.S. facilities resumed.

Philippine panel spokesman Rafael Alunan said the U.S. side strongly objected to the idea and other non-security Philippine proposals presented at technical-level talks over the past week in prepartion for formal negotiations.

U.S. chief negotiator Richard Armitage arrived here Tuesday and went into a one-on-one meeting with his Philippine counterpart, foreign secretary Raul Manglapus. Their full panels were set to meet Wednesday.

U.S. spokesman Stanley Schrager said this week's negotiations would be "brief but intense" but "we continue to be optimistic" about reaching an agreement by

January, the mutually-imposed deadline.

Mr. Alunan told a news conference the tax issue was one of the items the two discussed, "and we'll probably have something for you tomorrow."

The Philippines had insisted that U.S. bases can stay in the country after 1991 only on the strength of a full-blown treaty covering political, economic and military aspects of its relationship with its former colonial ruler.

The current U.S. lease on Clark Air Base, Subic Naval Base and four support facilities runs out on September 16, 1991.

#90338d3730 12/04/1990 ~French/German News Agency

MEXICO CITY (DEC. 4) - Anti-narcotics agents killed two adults and four children and seriously wounded two others, in a case of mistaken identity during a drug operation in the north of the country, government authorities said.

Federal agents in the northern town of La Angostura, 1,140 kilometers (710 miles) northwest of Mexico City, opened fire Monday with AK-47 machineguns on two trucks carrying eight people, whom "they confused with drug traffickers," a federal prosecutor's statement said.

The agents were conducting an operation to intercept drug-bearing airplanes coming in for landings on a nearby highway, according to the statement.

A relative of the victims said the eight people were returning from a dance when the agents shot them.

A police officer in the nearby city of Guasave said the victims were a father and two of his sons, two young sisters and another adult. Two injured children were in hospital in serious condition in Guasave, he said.

#90338d4010 12/04/1990 ~French/German News Agency
LONDON (DEC. 4) - The British Trafalgar House conglomerate on Tuesday reported a fall of 42 percent in its annual pre-tax profit to 155.7 million pounds (300 million dollars) from 270.4 million pounds in 1989.

Sales rose by seven per cent to 3.5 billion pounds (6.7 billion dollars).

The result was in line with forecasts by analysts who had expected profits of between 143 million and 160 million pounds.

But the group, which has interests in construction, property and ocean cruise liners, maintained a final dividend of 9.6 pence per share which gave a total dividend up five per cent at 18.4 pence from 17.6 pence.

The shares rose 15 pence to 189 pence on the news.

The sale last week of 8.8 percent of the Costain building group for 31.43 million pounds will help to provide cash for the dividend payment, analysts said.

Profits per share were 22 pence compared with 42.8 pence last year.

The group made an exceptional provision of 95 million pounds in respect of property asset devaluations.

Company chairman Sir Nigel Broackes said the fall in profits was attributable to recession in the construction industry in Britain and in the United States. He did not expect to see a significant improvement before the end of 1991.

#90338d4650 12/04/1990 ~French/German News Agency
Ruesselsheim (DEC. 4) - Adam Opel, the German carmaking subsidiary of General Motors, said here Tuesday it has been given the green light by the parent company in Detroit to go ahead with plans to build an assembly plant in the former East Germany.

Opel said Gm had given its ''complete support'' to the project, which envisages a 150,000-cars-per-year plant at Eisenach, in the state of Thueringen.

Eisenach is currently the site where the East German medium-sized ''Wartburg'' car is produced.

Opel chairman Louis R. Hughes told the German Press Agency that new talks were necessary to finalise details of the project. Opel estimates that its investment costs in Eisenach may run as high as one billion marks (667 million dollars).

''We are very optimistic that we can clear up the remaining questions in the next few days,'' Hughes said.

It had not yet been finally decided which Opel cars are to be produced at Eisenach, he said.

ANKARA (DEC. 4) - Turkish Premier Yildirim Akbulut Tuesday announced the appointment of General Dogan Gures, commander of the Turkish ground forces, as chief of the general staff to replace General Necip Torumtay who resigned Monday.

Political observers noted that it was not Akbulut with whom Torumtay clashed but President Turgut Ozal who three years ago defied army traditions to install him as the top commander.

Three main grievances irritated Torumtay and his subordinates who reportedly offered to resign with him in protest, according to the observers.

First, there is the conduct of policy in the Gulf crisis. Ozal was known to be eager to send troops to Saudi Arabia to reap post-crisis benefits. Torumtay, backed by the foreign ministry bureaucracy, opposed any involvement.

As a second point of friction, the military is growing increasingly angry at the steady erosion of the country's secular system under attacks by Islamic fundamentalists who are allegedly tolerated by Ozal and openly encouraged by

patrons in the government.

Another military resentment, shared by the opposition parties, concerns the concentration of all power in the hands of a supposedly neutral Ozal, who has demoted the parliament and the government to secondary roles in disregard of the constitution, the observers noted.

The lavish life-style of Ozal's family, in sharp contrast to the lot of the masses impoverished by inflation, was also causing frowns, they said.

The resignation of Torumtay, less than two months after Foreign Minister Ali Bozer and Defence Minister Safa Giray quit for similar reasons, is seen by them as a sign which should alarm Ozal.

TEHERAN (DEC. 4) - Twenty-seven people convicted of drug trafficking were hanged at dawn Tuesday in the western Iranian city of Bakhtaran on the border with Iraq, press reports said here.

They had been accused of importing and distributing large quantities of heroin and opium.

A total of 1,329 people have now been hanged in Iran since the application of a tough new anti-drug law last January.

COPENHAGEN (DEC. 4) - The SAS Scandinavian airline will not invest any more money in troubled U.S. Continental Airlines in which it has a 16.8 per- cent stake, SAS chairman Jan Carlzon said here on Tuesday.

SAS has paid 600 million krone (about 100 million dollars) for its stake. This sum, representing five per cent of SAS funds, is considered by several Danish stock analysts to be virtually a write-off.

Mr. Carlzon said most of the debts which drove Continental to file for protection from bankruptcy had been contracted before SAS bought its stake.

Continental was in a "serious" situation but had a "good chance" of emerging strengthened from the crisis, he said.

The arrangement with Continental had been good for SAS since it had given access to North America and had earned SAS 100 million krone (17.5 million dollars) net per year.

SAS shares fell by 14 percent here on Tuesday after Monday's announcement by Continental that it was seeking bankruptcy protection.

MONTEVIDEO (DEC. 4) - President George Bush will meet with Lithuanian President Vytautas Landsbergis in Washington Monday, White House spokesman Roman Popadiuk announced Tuesday in Montevideo.

The White House meeting will be the first ever between the two leaders.

Mr. Bush will welcome Mr. Landsbergis as a "representative of the people" of Lithuania, and not in his capacity as president, Mr. Popadiuk said.

This was also the case in Mr. Bush's meeting earlier this year with Lithuanian Prime Minister Kazimiera Prunskiene, the spokesman said at Mr. Bush's second stop on a five-day South American tour.

The United States has never recognized the annexation of the Baltic states by the Soviet Union or the unilaterally declared independence of Lithuania this year, but has encouraged dialogue between the Baltic state and Moscow.

Lithuanian sources in Washington said Mr. Landsbergis should discuss with Mr. Bush the state of consultations on independence between Vilnius and Moscow, "the increasingly tough rhetoric by President (Mikhail) Gorbachev against Lithuania and the other two Baltic states" and the Lithuanian economy which was damaged by a 74-day Soviet economic blockade this year.

Mr. Landsbergis, who visited Washington twice last year as the elected leader of the Sajudis independent democratic movement, will visit Canada December 5 to 9 before heading on to Washington.

#90338d5630 12/04/1990 ~French/German News Agency

LONDON (DEC. 4) - The British electronics group General Electric Company (GEC) reported a four percent drop in pre-tax profits to 342 million pounds for the third quarter of this year.

The result was in line with analysts forecasts of between 335 and 352 million pounds.

GEC blamed the fall on its purchase during the year of the radar division of Ferranti International and, jointly with Siemens, its British competitor Plessey Telecommunications.

The company's liquidity fell from 1.27 billion pounds a year ago to 614

million pounds.

Turnover rose 20 percent to 4.4 billion pounds compared with 3.66 billion and the company has an order book worth an estimated 10.84 billion pounds compared with 7.98 billion pounds at the same time last year.

GEC shares lost eight pence to 177 pence on the London stock exchange.

Duesseldorf (DEC. 4) - Deutsche Bank, Germany's largest credit institute, has registered record growth in the current year, board spokesman Hilmar Kopper reported here Tuesday.

Presenting the company's interim report for 1990, Kopper said business volume grew by nearly 53 billion marks (about 35 billion dollars) or 15.2 per cent and surpassed the 400 billion mark level (266 billion dollars) for the first time ever at the end of October, reaching 401.8 billion marks (267.8 billion dollars).

Contributing massively to the growth was the takeover of the British Morgan Grenfell Group and the inclusion of the Deutsche Bank-Kreditbank Ag.

Business volume of the joint-stock company alone rose by 26.3 billion marks (17.5 billion dollars) or 12 percent to 245.8 billion marks (163.8 billion dollars).

Profits for the entire firm rose by 6 percent to 4.13 billion marks (2.75 billion dollars).

#90338d5800 12/04/1990 ~French/German News Agency

LONDON (DEC. 4) - British Prime Minister John Major in his inaugural speech Tuesday called on his Conservative party to stop its internal bickering and pull together to beat the opposition Labour party and win the next general election.

"The message for the whole party, from the branches to the constituencies, from the backbenches to the cabinet room, is this: there must be no back-biting, no recriminations, no post-mortems. There is too much at stake. We have an election to win," he said.

He said he was determined to fight inflation. "I loathe inflation," he said. "It means the destruction of competitiveness for industry and commerce. It brings the destruction of peace of mind for people who see prices rising beyond their capacity to pay. It is economically destructive and socially divisive...

so the centrepiece of our policy must be an intolerance of inflation and a determination to beat it."

On Europe, Mr. Major said Britain would not be deterred by the cry that "we are insufficiently European... Politely but firmly we shall say what we think."

He also drew a vision of a classless society, "not in the grey sense of drab uniformity, but in the sense that we remove the artificial barriers to choice and achievement."

Mentioning an outcry over racist comments made in Cheltenham (south-west England) by a local Conservative party member concerning the party's black candidate, Mr. Major said "there should be no artificial barrier of background, religion or race... Every man and woman should be able to go as far as their talent, ambition and effort take them."

He also promised that his government would "listen" and "make the changes necessary" regarding the recently introduced and much reviled local tax known as the 'poll tax'.

Mr. Major paid hommage to his predecessor, Margaret Thatcher, brought down largely because of that 'poll tax' community charge and her attitudes on Europe.

"There can be no doubt that history will record her as one of the great figures of our century - in Britain and far beyond."

#90338d5820 12/04/1990 ~French/German News Agency

PARIS (DEC. 4) - The French Group Thomson-CSF is to supply Saudi Arabia with ground-to-air Crotale missile systems in a 3.4 billion francs (680 million dollar) contract, the company announced here Tuesday.

The Crotale, developed with another French company Matra, is a mobile short-range missile whose primary use is for protecting military bases and other military installations.

The equipment will be delivered rapidly, said the company, which signed the deal through the French defence ministry's arms purchasing agency SOFRESA.

It is the biggest contract between France and Saudi Arabia since Iraq's invasion of Kuwait August 2.

Thomson refused to give details about the number of missiles involved or what versions had been ordered. But industrial sources said the order covered several hundred missiles.

They also said the model chosen was the Crotale missile already in service with the French army since 1982, designed to protect air bases.

In this version the missile, with a range of between five and 15 kilometers (3-10 miles), is fired from light armoured vehicles and has an accompanying missile radar guidance vehicle.

The deal already has the approval of the inter-ministerial commission for war material exports, informed sources said.

Saudi Arabia, a major client of the French armaments industry, has stepped up its orders markedly since the Gulf crisis began.

In the first six months of this year Riyadh placed orders worth an estimated 11 billion francs (2.2 billion dollars) and further orders worth another eight billion francs (1.6 billion dollars) are expected before the end of the year.

Saudi Arabia has operated the Crotale missile system since the beginning of the 1980s and has an estimated 3,000 in service in three versions -- the fixed version, subject of the latest order, an EDIR anti-naval version (with a range of 200 kms, 125 miles), and the Shahine (desert lion) which equips Saudi Arabia's AMX 30 tanks.

Thomson has sold more than 6,500 Crotales in 11 countries, including Egypt, the United Arab Emirates and Morocco.

BRUSSELS (DEC. 4) - The foreign ministers of the European Community (EC) on Tuesday proposed to send up to two billion dollars in food aid to the Soviet Union before the end of the winter, Belgian Foreign Minister Mark Eyskens announced.

The Soviet Union had presented the European Commission, the EC's executive branch, with a long list of food staples needed to feed its population, according to Mr. Eyskens, who spoke on the sidelines of a foreign ministers' meeting here.

"We are going to send them this food," he said, adding that the operation "should cost around one or two billion dollars."

British Foreign Secretary Douglas Hurd said Britain will not object to the aid package if it was ensured that food would really reach Soviet stores.

"To be effective food must be taken directly to the villages", Mr. Eyskens said.

The foreign ministers also proposed to give full support to Soviet membership in the International Monetary Fund (IMF) and the World Bank so that both bodies can offer financial aid, Mr. Eyskens said.

French Foreign Minister Roland Dumas insisted that EC aid to eastern Europe be part of an overall aid package by the International Monetary Fund and the World Bank.

To help the Soviet Union introduce a free-market system, Jacques Delors, President of the European Commission, proposed food aid and loans, balance of payments assistance, assistance in making the ruble convertible and talks for a more comprehensive trade agreement.

The upcoming EC summit meeting in Rome will have to give the green light for short-term aid, Mr. Delors quoted foreign ministers as saying.

"We must reach an agreement in Rome," Hans-Dietrich Genscher of Germany said.

Ministers also spoke out in favour of large-scale energy cooperation between the Soviet Union and its western neighbours including major energy purchases by the EC, according to Mr. Eyskens.

Ministers proposed that up to seven billion dollars of trade and public debts by eastern European nations be rescheduled.

The International Monetary Fund has earmarked 24 billion dollars to help eastern Europe over the next three years including five billion for 1991, Mr. Eyskens quoted the Commission president as saying.

Experts from 24 western nations will discuss assistance to eastern Europe at a meeting here Wednesday.

LIMA (DEC. 4) - Fighting between suspected leftist rebels and government security forces over the last two days in Peru's Andes mountains and parts of the Amazon has left 46 dead and seven wounded, police said Tuesday.

Forty suspected rebels of the Tupac Amaru Revolutionary Movement (MRTA) were killed in the Alto Mayo valley, some 830 kilometers (500 miles) northeast of Lima in fighting with 30 police who were in two armored trucks, police said.

The clash occurred Monday near an MRTA training camp after rebels attacked the armored trucks. Police captured the camp after several hours of fighting and an undetermined number of rebels fled into the surrounding jungle, police said.

Rebel violence in Peru has left at least 20,000 dead over the last decade with

the pro-Castro MRTA operating mostly in the northeastern jungle region and the ultraleftist Shining Path operating in the Andean and Amazon regions.

Two unidentified men were killed Tuesday by suspected members of the Maoist-inspired Shining Path guerrillas on a main road in the town of Huancayo, some 300 kilometers (180 miles) east of Lima, police said.

Also Monday, a column of Shining Path rebels seized the town of Puebla Libre near Huancavelica, some 520 kilometers (310 miles) southeast of Lima on the anniversary of the birthday of Shining Path founder Abimael Guzman, 56.

Two town officials and two farmers were taken from their homes by the rebels and submitted to a "people's court" as government collaborators and traitors to the guerrilla movement.

Some 100 townspeople were forced to participate in rebel proceedings and despite townspeoples' pleas for their lives, the throats of the four were slit. The townspeople were also forced to sing songs for the rebel leader's birthday.

The Shining Path rebels sent armed patrols through Ayacucho, a city of 90,000 residents, to force the town to shut down for 24 hours Monday to commemorate Mr. Guzman's birthday.

SAN SALVADOR, (DEC 4) - Salvadoran guerrillas, firing a surface-to-air missile, shot down a military transport plane with a crew of seven Tuesday as fighting intensified in the countryside, the military said.

Air Force Commander General Rafael Villamariona said the seven crew members parachuted from the stricken AC-47 before it crashed but only the pilot had been rescued. The fate of the other six was not known, he said.

It was the third time since the start of a rebel offensive November 10 that the guerrillas have shot down a Salvadoran military aircraft with shoulder-fired surface-to-air missiles.

The shoot-down came amid a new wave of attacks by the guerrillas, who attacked nine military positions in eastern and northern El Salvador Tuesday, leaving 16 dead and 21 wounded on both sides.

The heaviest fighting was reported near La Laguna, 90 kilometers (54 miles) north of San Salvador in Chalatenango province, where the government said eight guerrillas and two soldiers were killed.

Rebels fighting at La Laguna fired the missile that hit the AC-47, which crashed near the settlement of Cuatro Pinos, Gen. Villamariona said.

The transport plane, which was reported to have taken off from the Ilopango Air Force Base in San Salvador, was carrying two pilots, two gunners and three technicians, the general said.

In other fighting, the military said five guerrillas and a soldier were killed in combat on a farm in the eastern province of San Miguel.

Rebels also fired a barrage of 81-mm mortars at the barracks of the Sixth Infantry Brigade and the Atonal Battalion in Usulutan. No casualties were reported.

Clashes also were reported elsewhere in the provinces of Usulutan, San Salvador and La Libertad.

#90338d7830 12/04/1990 ~French/German News Agency

PANAMA CITY, (DEC 4) - The Panamanian Government has expelled two Cuban diplomats and accused the embassy of allowing a Panamanian staying there to plot by telephone with deposed general Manuel Noriega.

Panama's Deputy Foreign Minister Jose Molino sent a note Tuesday afternoon to the Cuban Embassy giving economic attache Guillermo Mendez Perez (eds: correct) and commercial attache Oscar Braulio Gutierrez five days to leave the country.

The note indicated that the expulsions were in retaliation for Cuba's permitting former legislator Luis Cordoba to telephone deposed General Manuel Noriega from the Cuban Embassy, where he sought asylum 11 months ago.

Mr. Noriega is in jail in Miami awaiting trial on drug trafficking charges.

According to the Panamanian protest, Mr. Cordoba and Mr. Noriega "gave details about diverse activities that affect public tranquility and that evidently tend toward development of actions designed to destabilize the legitimate government of President Guillermo Endara."

The conversations were in violation of the 1954 Asylum Convention of Caracas, the Panamanian Government said.

#90338d7910 12/04/1990 ~French/German News Agency

CAIRO, (DEC 5) - Egypt, Saudi Arabia, and Syria called on the Iraqi leadership Tuesday to respond to United Nations and Arab Summit resolutions urging Baghdad to withdraw its troops from Kuwait.

The communique issued after a meeting in the Egyptian capital also expressed dismay over what it called a campaign of repression being waged by the Iraqi occupational forces against the Kuwaiti people.

Egyptian President Hosny Mubarak met with Syrian Foreign Minister Farouk-al-Sharaa and Saudi Arabian Foreign Minister Prince Saud al-Faisal to discuss developments in the Gulf crisis.

The meeting was also attended by Egyptian Foreign Minister Esmat Abdel-Meguid and information ministers of the three countries.

''The foreign and information ministers of Egypt, Saudi Arabia and Syria called on the Iraqi leadership to respond to the initiatives that seek to implement the demands of international legitimacy,'' the communique said.

''The ministers express their deep dismay over the reports coming from Kuwait about the campaign of repression being waged by the Iraqi occupation forces against the unarmed Kuwaiti people.''

The resolution said the ministers ''praised the Security Council Resolution 677 which calls on the U.N. Secretary General to preserve the civil registers authorized by the Kuwaiti government and which list the names of Kuwaiti citizens and others who were living in Kuwait before 2 August.''

''They also praised the resolution that embodies the international community's determination to reject all Iraqi attempts to obliterate the Kuwaiti people's identity,'' it said.

#90338d8120 12/04/1990 ~French/German News Agency

BAGHDAD, (DEC 5) - President Saddam Hussein of Iraq gathered three sympathetic Arab leaders Tuesday night to discuss the start of an American-Iraqi dialogue and the necessity of involving the Palestinian question.

The Iraqi News Agency (INA) said King Hussein of Jordan, chairman Yasser Arafat of the Palestine Liberation Organization and the vice president of Yemen, Ali Salem al-Beid, all held with Mr. Hussein "deep consultations on the situation in the Gulf in the light of the start of the American-Iraqi dialogue."

The agency did not mention Iraq's occupation of Kuwait.

Though U.S. President George Bush reaffirmed in Montevideo, during a Latin American tour, that there was no question of linking Israel's occupation of the West Bank and Gaza strip with Iraq's occupation of Kuwait, the Iraqi agency said the four leaders in Baghdad emphasized such a link.

They "affirmed the need to work within an Arab and international framework for the resolution of all regional problems, notably the Palestinian question, to achieve global and lasting peace in the region."

The agency reported that the four leaders called on Arab countries to undertake "an active and effective action" to mobilize "all their political potential for a global resolution of all the problems in the region, notably the Palestinian question."

The four leaders first met with their aides, then by themselves.

In Cairo, the foreign ministers of Egypt, Syria and Saudi Arabia called on Iraq to "respond positively to the initiatives designed to implement" United Nations resolutions on Iraq's invasion of Kuwait.

Earlier, a senior Jordanian official in Amman told Agence France-Presse that his country wanted talks to begin between Iraq, Saudi Arabia and Kuwait "to preserve Arab interests in resolving the Gulf crisis."

He said such discussions must be organized soon "in light of developments on the international scene, marked by the adoption of (United Nations) Security Council resolution 678, authorizing the use of force against Iraq, and the U.S. decision to initiate talks with Baghdad."

He was referring to the resolution adopted Thursday sanctioning a military operation to dislodge Iraqi troops from Kuwait and Mr. Bush's proposal Friday to hold a dialogue with Iraq.

The official said Algiers would be proposed as the venue for the tripartite meeting, since Algeria is one of the countries that has not contributed to a multinational force massed against Iraq and maintains good ties with all parties to the dispute.

After the meeting, King Hussein flew back to Amman, where a spokesman said he

and Mr. Hussein underscored their "desire for a political resolution of the Gulf crisis through a serious and constructive dialogue."

#90338d8160 12/04/1990 ~French/German News Agency

WASHINGTON, (DEC 4) - In a bid to avert a catastrophic oil spill, the U.S. Government announced it was forming a task force to review operation of the Alaska pipeline, in particular because of concerns of corrosion.

"It is our way of locking the barn door before the horse runs away," said Travis Dugan, head of the Research and Special Programs Administration of the U.S. Transportation Department.

The task force will examine operation, maintenance and safety of the 1,280-kilometer-long (800-mile-) pipeline that carries nearly a quarter of the United States' domestically produced crude oil, Mr. Dugan said.

It will also look at environmental protection and emergency response procedures, he said.

"It is vital that the safety and operational procedures used in this system are of the highest caliber," Mr. Dugan said. "We formed this task force to avoid potential disaster, which could easily occur if the pipeline is neglected."

In May, a report by the investigative branch of Congress, the General Accounting Office, said there had been no proper watch over maintenance of the 13-year old pipeline.

The situation was worrisome because of reports of corrosion on the pipeline, the report said, adding that split pipes could mean a spill on land as disastrous as the March 1989 spill by the tanker Exxon Valdez in Prince William Sound.

The line is operated by Alyeska Pipeline Service Co., which said last month it expected to spend between 600 million and 800 million dollars to repair corroded portions of the pipeline by 1993.

Alyeska is a consortium of subsidiaries of the Exxon, British Petroleum, ARCO, Mobil, Unocal, Phillips and Amerada Hess oil companies.

The 1.2 meter-wide (four-foot) pipeline carries about two million barrels of crude oil per day.

JERUSALEM (DEC. 5) - The Jewish Agency, Israel's body in charge of immigration, has decided to send 20 metric tonnes of food to "the Soviet people," Agency president Simha Dinitz said here Tuesday.

"The Jewish Agency wants to show its gratitude to the Soviet Union, which has opened its doors to Jews who wish to emigrate to Israel," Mr. Dinitz told a news conference.

"We cannot forget the benefits of this immigration for Israeli society and our gesture, modest though it may be, should help the Soviet people whose financial and food situation is critical."

A first El-Al plane carrying two tonnes of tomatoes and three tonnes of melons took off late Tuesday from Tel Aviv's Ben Gurion Airport for Moscow. It was to return via Bucharest with 220 immigrants.

A second aircraft was to take 15 tonnes of milk to Moscow on Thursday, returning via Warsaw with 220 more immigrants.

The agency also announced here that it had opened an office in the Soviet capital last week.

#90338e0013 12/04/1990 ~Latin America New Agency

YAOUNDE (DEC 4) EFE - Cameroun became the latest African country to move towards democratic rule when President Paul Biya authorized the adoption of a multi-party system Tuesday.

Permission to form opposition parties came after three weeks of parliamentary debate which culminated with a reform of the constitution and the introduction of 30 new laws for political change.

Opposition groups had pressured Biya to legalize new parties to challenge the

hold on power of the Democratic Association of the Cameroun People, the only legal political organization until now.

Political parties have been banned in Cameroun since 1966.

In accepting the multi-party system, Biya said political groupings receiving funds from abroad could not form parties nor could groups drawn up on tribal or regional lines.

Meanwhile, opposition groups criticized Biya for being ambigous about holding general elections and for restoring censorship for both the private and state media.

Some politicians have called for the return of the federalist system which was in force until 1972. They consider it the only way of protecting the rights of the English-speaking minority against the French-speaking majority.

#90338e0015 12/04/1990 ~Latin America New Agency

PARIS (DEC 4) EFE - The French government listed Tuesday for the first time issues it would like to see discussed at an international conference which would look at ways to resolve Middle East crises.

"France supports the view that this international conference would discuss peace in Lebanon, the conflict between Israelis and Palestinians, and the Gulf crisis," French Foreign Minister Roland Dumas said.

The idea of a conference at which the peaceful withdrawal of Iraqi troops from Kuwait would be linked to the Palestinian problem in Israel's Occupied Territories was originally proposed by Iraqi President Saddam Hussein.

The proposal was rejected by the United States and other Western countries who insisted on an unconditional withdrawal by Iraq as demanded by the United Nations Security Council.

Dumas suggested Tuesday that the conference could be divided into "subconferences," each dealing with a different problem in the region.

This aspect of the French proposal was an attempt to forestall Western objections that the Iraqi withdrawal from Kuwait was being linked to the Palestinian problem, political observers said.

PANAMA CITY (DEC. 4) EFE - A former chief of Panama's revamped police force escaped from prison Tuesday where he was being held in connection with an alleged plot to destabilize the government, a Panamanian television station reported.

Channel 13 said former Col. Eduardo Herrera broke out of jail on Naos island, near the capital, and headed toward the outskirts of Panama City.

The station said police units had been sent to the area to try recapture him.

Herrera and four police officers were arrested in late October for allegedly participating in a plot to destabilize the government of President Guillermo Endara.

The former colonel was named chief of the revamped security forces after the U.S. invasion last December to oust military strongman Manuel Antonio Noriega.

He was dismissed in August for unexplained reasons.

Endara was installed as president during the invasion.

Herrera had previously served under Noriega until the two had a falling out.

The government gave no details of the plot at the time of Herrera's arrest, but observers said it was linked to series of bomb attacks in Chiriqui province, near the Costa Rican border, in August and September.

#90338f0682 12/04/1990 ~United Press International

(DEC. 4) UPI - The Boston Celtics honored a man who has described many of their games. They also played the kind of game he has so often described.

Robert Parish scored 22 points Monday night, leading eight Celtics in double figures for a 135-102 victory over the Seattle SuperSonics, losers of five in a row.

In halftime ceremonies, Boston paid homage to long-time radio announcer Johnny Most. In the third quarter, Boston took control of the game with a 17-2 surge.

''We're a very unselfish team,'' said Boston's Dee Brown. ''We just try to get it to the open guy nearest the basket.''

''It's kind of been the story of the season, getting a lot of guys in double figures,'' said Celtics sixth man Kevin McHale.

The triumph was the Celtics' ninth in 10 games and improved their record to 13-3, best in the Atlantic Division. Seattle, which lost for the ninth time in 10 outings, drops to 4-9 on the season.

Most was honored for his 37 years as the Celtics' radio voice. A silver-plated microphone was put on permanent display on the facade of the radio booth where Most used to broadcast the games from ''high above courtside.''

The gravel-voiced Most, 67, retired before this season due to failing health.

The Celtics, who held a 50-35 rebounding advantage, shot 65 percent, hitting 56 of 86 field-goal attempts. The SuperSonics shot just 45 percent, hitting only 45 of 101 attempts from the floor.

''Anytime you come to the Boston Garden, your game has to be at your top,'' said Seattle's Xavier McDaniel. ''If not, you see what happens.''

For Boston, McHale added 18, Reggie Lewis had 16, Brian Shaw 14, Kevin Gamble 12, Larry Bird 11 and Brown and Joe Kleine scored 10 each.

For Seattle, Sedale Threatt scored 20 points, Shawn Kemp had 19 and Derrick McKey 17.

''We went bad .... and the game is history,'' said Seattle Coach K.C. Jones, whose team shot just 18 percent (5 of 28) in the quarter.

''We played pretty good defense in the third quarter and got them out of their offense and it snowballed from there,'' said McHale. ''We came out playing good defense, running and getting the ball around the court. ''

Jazz 135, Bullets 101

At Salt Lake City, Karl Malone scored 38 points and pulled down 15 rebounds and Jeff Malone added 28 points, leading Utah. The Jazz jumped to a 22-2 lead to down Washington for the seventh straight time. Washington last defeated the Jazz in February of 1987. The Bullets have lost six straight on the road and are 1-8 away from home. Washington's leading scorer, Bernard King, finished with a team-high 24 points after going scoreless in the first period.

ISLAMABAD (DEC. 4) XINHUA - THE PAKISTAN GOVERNMENT HAS DECIDED TO RUSH A DONATION OF 10,000 TONS OF RICE TO ASSIST THE THE SOVIET UNION IN MEETING ITS ACUTE FOODSTUFF SHORTAGE IT IS FACING, OFFICIAL SOURCES SAID HERE TUESDAY.

"IT IS A GESTURE OF GOODWILL THAT THE HUMANITARIAN RELIEF IS BEING PROVIDED," THE SOURCES QUOTED FINANCE MINISTER SARTAJ AZIZ AS SAYING.

AFTER THE SOVIET TROOPS WITHDRAWAL FROM AFGHANISTAN TWO YEARS AGO, BOTH PAKISTAN AND THE SOVIET UNION HAVE EXPRESSED DESIRE TO IMPROVE THEIR SOURED

RELATIONS IN THE PAST OVER TEN YEARS DUE TO THE SOVIET AGGRESSION AGAINST PAKISTAN'S NEIGHBOUR AFGHANISTAN IN 1979. THE NEWLY FORMED GOVERNMENT OF PAKISTAN HAS ALSO EXPRESSED THE SAME DESIRE TO DEVELOP GOOD RELATIONS WITH THE USSR.

THE UNITED NATIONS HAS MADE A CALL FOR DEPATCHING FOODSTUFF AID TO THE SOVIET UNION, CERTAIN PARTS OF WHICH ARE FACING DRAUGHT AND CONSEQUIENT FOOD SHORTAGE.

SOME WESTERN COUNTRIES HAVE ALREADY PROVIDED FOODSTUFF AND GRAIN ASSISTANCE IN THIS REGARD.

#90338h0015 12/04/1990 ~Chinese News Agency

ISLAMABAD (DEC. 4) XINHUA - PAKISTAN IS EXPECTED TO EARN ABOUT 2.4 BILLION U.S. DOLLARS BY EXPORTING COTTON, YARN, TEXTILE AND GARMENTS DURING THE CURRENT FINANCIAL YEAR 1990-91 (BEGINNING JULY 1), A GOVERNMENT OFFICIAL SAID HERE TUESDAY.

PAKISTAN HAS BECOME THE THIRD LARGEST EXPORTER OF RAW COTTON AFTER THE UNITED STATES AND EGYPT WITH AN EIGHT PERCENT SHARE OF THE WORLD COTTON TRADE. IT HAS A 22.3 PERCENT SHARE IN EXPORT OF YARN AND 10 PERCENT SHARE IN TEXTILE AND FABRICS IN THE WORLD COTTON CLOTH TRADE.

PAKISTAN IS ALSO THE LARGEST EXPORTER OF COURSE COUNTS COTTON YARN IN THE WORLD. ACCORDING TO THE ALL PAKISTAN TEXTILE MILLS ASSOCIATION (APTMA), COTTON YARN EXPORT INCREASED FROM 125.3 MILLION KILOGRAMS IN 1984-85 TO 291.95 MILLION KILOGRAMS IN 1989-90. IN THE SAME PERIOD EXPORT OF COTTON CLOTH ROSE FROM 688 RPT 688 MILLION SQUARE METERS TO 1,005 MILLION SQUARE METERS.

ABOUT 38 TEXTILE AND SPINNING MILLS IN PAKISTAN WILL GO INTO PRODUCTION DURING THE CURRENT FINANCIAL YEAR, RAISING THE TOTAL NUMBER OF INSTALLED SPINDLES TO 5.928 MILLION.

#90338h0027 12/04/1990 ~Chinese News Agency

ISLAMABAD (DEC. 4) XINHUA - PAKISTAN WILL PRESS FOR ENDING TEXTILE QUOTA RESTRICTIONS BY THE MAJOR IMPORTING COUNTRIES UNDER THE MULTI-FIBER ARRANGEMENTS (MFA) AT THE FINAL URUGUAY ROUND OF NEGOTIATIONS BEGINNING IN BRUSSELS TODAY, PAKISTAN COMMERCE MINISTRY OFFICIALS SAID HERE TODAY.

AS A TEXTILE EXPORTING COUNTRY, PAKISTAN WANTS QUOTA RESTRICTIONS ON TEXTILES TO BE PHASED OUT SO THAT THE COUNTRY MIGHT HAVE FREE ACCESS TO INDUSTRIALIZED MARKETS.

COMMERCE MINISTER MALIK NAEEM KHAN IS LEADING THE PAKISTAN DELEGATION AT THE BRUSSELS MINISTERIAL CONFERENCE WHICH IS SCHEDULED ON DECEMBER 3-8 TO FINALIZE

LIBERALIZATION OF GLOBAL TRADE IN 14 AREAS AFTER FOUR YEARS OF INCONCLUSIVE DISCUSSIONS AT OFFICIAL, DIPLOMATIC AND MINISTERIAL LEVELS, OFFICIALS SAID.

PAKISTAN HAD SUCCEEDED IN IMPROVING ITS TEXTILE ACCORD WITH THE UNITED STATES AFTER INTENSE NEGOTIATION HERE LAST YEAR. THE RESTRUCTURED PAKISTAN-U.S. ACCORD OF DECEMBER 1989 HAD LIFTED QUOTA RESTRICTIONS FOR 66 OUT OF 80 CATEGORIES OF MAN-MADE (SYNTHETIC) FIBER WHICH PAKISTAN EXPORTS TO THE UNITED STATES, THE SAME SOURCES SAID.

NAIROBI (DEC. 4) XINHUA - KENYA MAY EARN ABOUT ONE BILLION SHILLINGS (NEARLY 43.5 MILLION U.S. DOLLARS) FROM EXPORTING COFFEE AND TEA TO SAUDI ARABIA, ACCORDING TO A "DAILY NATION" REPORT TODAY.

A THREE-MAN TRADE DELEGATION FROM ASTRA FARMS, THE LARGEST SAUDI ARABIAN FOOD SUPPLIER, IS NOW ON A VISIT TO KENYA SHOPPING FOR THESE COMMODITIES TO MEET THE NEEDS OF NEARLY HALF MILLION MILITARY PERSONNEL STATIONED IN THE KINGDOM.

AT A MEETING YESTERDAY, LEADER OF THE SAUDI DELEGATION AHMED AL-MASRI TOLD CHAIRMAN OF THE KENYA EXTERNAL TRADE AUTHORITY NICHOLAS GOR THAT BESIDES THE COFFEE AND TEA DEALS, SAUDI ARABIA WILL IMPORT THOUSANDS OF TONS OF KENYA'S HORTICULTURAL PRODUCE INCLUDING FLOWERS, FRUITS, VEGETABLES AND FRENCH BEANS.

KENYA EXPORTED TO RIYADH MAINLY COFFEE, SODIUM CARBONATE AND HORTICULTURAL PRODUCE WHILE IMPORTING FROM THE KINGDOM GAS OIL, POLYPROPYLENE, SULPHUR AND OTHER PRODUCTS.

#90338h0041 12/04/1990 ~Chinese News Agency

SHANGHAI (DEC. 4) XINHUA - SHANGHAI GENERATED AN INDUSTRIAL OUTPUT VALUE OF OVER 10.33 BILLION YUAN IN NOVEMBER, UP 2.7 PERCENT OVER THE PREVIOUS MONTH AND 14.6 PERCENT OVER THE SAME PERIOD OF LAST YEAR, ACCORDING TO TODAY'S ANNOUNCEMENT BY THE MUNICIPAL STATISTICAL BUREAU.

ECONOMISTS SAY THAT THIS INDICATES SHANGHAI'S INDUSTRIAL PRODUCTION IS NORMAL.

SHANGHAI'S INDUSTRIAL PRODUCTION, WHICH WAS AFFECTED BY A SLUGGISH MARKET AND A SHORTAGE OF FUNDS AND RAW MATERIALS, HAD DROPPED SINCE THE FOURTH QUARTER OF LAST YEAR.

THE CITY'S MONTHLY INDUSTRIAL OUTPUT VALUE IN THE FIRST TWO MONTHS OF THIS YEAR WAS LESS THAN EIGHT BILLION YUAN PER MONTH, BUT IT HAS RISEN SINCE MARCH AND REACHED THE RECORD LAST MONTH.

THE OUTPUT VALUE OF LIGHT INDUSTRY INCREASED BY 12.1 PERCENT OVER THE SAME PERIOD LAST YEAR, WHILE HEAVY INDUSTRY WAS UP 17.7 PERCENT. AMONG DIFFERENT SECTORS, STATE ENTERPRISES UP 7.2 PERCENT AND COLLECTIVE-RUN INDUSTRIES UP 14.1 PERCENT.

SHANGHAI HAS MADE STEADY PROGRESS IN ADJUSTING INDUSTRIAL STRUCTURE, AND THE PRODUCT MIX, IN PARTICULAR, AND THE EXPORT-ORIENTED ECONOMY HAS INCREASED STEADILY.

STATISTICS REVEAL THAT FOREIGN-FUNDED ENTERPRISES GENERATED OUTPUT VALUE OF 676 MILLION YUAN LAST MONTH, DOUBLE THE FIGURE FOR THE SAME PERIOD OF LAST YEAR.

AT PRESENT, SHANGHAI'S INDUSTRIAL ENTERPRISES ARE CONTINUOUSLY ADJUSTING STRUCTURE, DEVELOPING NEW VARIETIES OF PRODUCTS AND IMPROVING ECONOMIC EFFICIENCY.

#90338h0042 12/04/1990 ~Chinese News Agency

NEW DELHI (DEC. 4) XINHUA - DEPRECIATION OF INDIAN RUPEE AGAINST THE U.S. DOLLAR IN RECENT YEARS HAS SERIOUSLY INFLATED INDIA'S EXTERNAL DEBT, THE PRESS TRUST OF INDIA (PTI) REPORTED.

THE EXCHANGE RATE OF THE RUPEE TO THE DOLLAR WAS 15.04 TO ONE AT THE END OF THE YEAR 1988, BUT NOW HAS BECOME 18 TO ONE.

THE VALUE OF INDIA'S AGGREGATE DEBT AS ON DECEMBER 31, 1988, WOULD WORK OUT TO 1,025,920 MILLION RUPEES AT THE EXCHANGE RATE OF THE DOLLAR AT THAT TIME. BUT AT TODAY'S EXCHANGE RATE OF OVER 18 RUPEES TO A DOLLAR, THE VALUE OF THE DEBT GOES UP TO OVER 1,250,000 MILLION RUPEES. THIS DOES NOT TAKE INTO ACCOUNT ANY ADDITIONS TO THE DEBT OR REPAYMENTS MADE DURING THE COURSE OF THE YEAR.

INDIA'S EXTERNAL DEBT, WHICH STOOD AT 68,354 MILLION U.S. DOLLARS ON DECEMBER 31, 1988, INCREASED TO 69,695 MILLION U.S. DOLLARS AT THE END OF 1989, ACCORDING TO OECD (THE ORGANIZATION FOR ECONOMIC COOPERATION AND DEVELOPMENT) EXTERNAL DEBT STATISTICS.

THERE HAS BEEN STEEP DEPRECIATION OF THE RUPEE VIS-A-VIS OTHER CURRENCIES -- FROM 12.82 RUPEES TO A DOLLAR AT THE END OF 1987 TO 18.05 RUPEES ON NOVEMBER 30 LAST, 23.9 RUPEES TO A POUND STERLING TO 35.16 RUPEES OVER THE SAME PERIOD, 8.04 RUPEES TO A DEUTCHEMARK TO 12.00 RUPEES, 103.84 RUPEES FOR 100 JAPANESE YEN TO 136.05 RUPEES.

ACCORDING TO THE EXTERNAL DEBT TABLES OF OECD, INDIA IS THE THIRD LARGEST DEBTOR IN THE DEVELOPING COUNTRIES IN 1989 -- THE FIRST TWO BEING MEXICO WITH 110,500 MILLION U.S. DOLLARS AND BRAZIL WITH 108,627 MILLION U.S. DOLLARS.

#90338h0051 12/04/1990 ~Chinese News Agency

NEW DELHI (DEC. 4) XINHUA - INDIA IS TRYING TO OBTAIN THE TECHNOLOGY FOR THE CRYOGENIC STAGE OF THE GEO-SYNCHRONOUS LAUNCH VEHICLE (GSLV) FROM THE SOVIET UNION.

ACCORDING TO A REPORT BY "THE TIMES OF INDIA" TODAY, A HIGH-LEVEL SOVIET TEAM HAS VISITED THE INDIAN SPACE RESEARCH ORGANIZATION (ISRO) CENTERS IN BANGALORE CAPITAL OF THE SOUTHERN STATE OF KARNATAKA, AND TRIVANDRUM, CAPITAL OF THE SOUTHWESTERN STATE OF KERALA, FOR DISCUSSIONS RECENTLY.

THE REPORT QUOTED RELIABLE SOURCES AS SAYING THAT THE TECHNOLOGY TRANSFER DEAL IS LIKELY TO BE FINALIZED IN THE NEXT FEW MONTHS.

THE SOURCES SAID THAT THOUGH JAPAN, FRANCE AND THE UNITED STATES HAVE BEEN APPROACHED FOR THE TECHNOLOGY, IT IS THE SOVIET TERMS WHICH ARE MOST ATTRACTIVE.

INDIA IS PLANNING TO DEVELOP GSLV IN THE 1990S, WHICH WILL ENABLE INDIA TO LAUNCH THE 2000-KILOGRAM INSAT-2 SERIES OF COMMUNICATION SATELLITES.

THE SOURCES ALSO SAID THAT THE ISRO HAS SOUGHT SOVIET HELP IN DOING THE WIND TUNNEL TESTS ON THE ASLV (AUGMENTED SATELLITE LAUNCH VEHICLE) AND PSLV (POLAR SATELLITE LAUNCH VEHICLE). THE SOVIET UNION IS EXPECTED TO COOPERATE IN THIS TOO.

ISRO, THE SOURCES CLAIMED, HAS APPROACHED HOLLAND FOR THE TESTS BUT THE DUTCH HAS REFUSED.

#90338h0062 12/04/1990 ~Chinese News Agency

CANBERRA (DEC. 4) XINHUA - AUSTRALIA'S PUBLIC SECTOR NET DEBT DECREASED TO 99.906 BILLION AUSTRALIAN DOLLARS (ABOUT 78 BILLION U.S. DOLLARS) ON JUNE 30 THIS YEAR, ACCORDING TO INDICATIVE ESTIMATES RELEASED HERE TODAY BY THE AUSTRALIAN BUREAU OF STATISTICS.

THE INDICATIVE ESTIMATES SHOW THAT PUBLIC SECTOR DEBT DECREASED SUBSTANTIALLY IN REAL TERMS FROM 41.1 PERCENT OF GDP ON JUNE 30, 1987 TO 27.1 PERCENT OF GDP ON JUNE 30 THIS YEAR.

LARGE DECREASES IN COMMONWEALTH GOVERNMENT NET DEBT HAVE BEEN ONLY PARTIALLY AFFECTED BY SMALLER INCREASES IN STATE AND LOCAL GOVERNMENT DEBT OVER THE PAST FOUR YEARS.

THE SHARES OF THE NET DEBT ON JUNE 30, 1990 WERE: COMMONWEALTH GOVERNMENT, 27.5 PERCENT STATE GOVERNMENT, 68.4 PERCENT AND LOCAL GOVERNMENT, 4.2 PERCENT.

#90338h0069 12/04/1990 ~Chinese News Agency

NEW DELHI (DEC. 4) XINHUA - INDIA'S EXPORTS OF GEMS AND JEWELERY, THE LARGEST FOREIGN EXCHANGE EARNER FOR THE COUNTRY, FELL BY 6.04 PERCENT DURING APRIL-SEPTEMBER THIS YEAR, COMPARED WITH THE CORRESPONDING PERIOD LAST YEAR, THE PRESS TRUST OF INDIA REPORTED TODAY.

K. P. LAL, A SPOKESMAN FOR THE JUST CONCLUDED INTERNATIONAL GEM STONE TRAINING PROGRAM IN JAIPUR, RAJASTHAN STATE, WAS QUOTED AS SAYING THE EXPORTS OF CUT AND POLISHED DIAMONDS ALONE FELL BY ABOUT NINE PERCENT.

HE ATTRIBUTED THE DROP IN GEM AND JEWELERY EXPORTS TO THE ECONOMIC SLUMP IN THE UNITED STATES -- THE SINGLE LARGEST IMPORTER OF INDIAN GEM AND JEWELERY -- FOLLOWING THE GULF CRISIS.

OTHER REASONS FOR THE STAGNANT GEM EXPORT SITUATION ARE THE COMPARATIVELY SLOW GROWTH AND CONSUMPTION OF CUT AND POLISHED DIAMONDS, DEVALUATION OF JAPANESE YEN AGAINST THE U.S. DOLLAR AND THE FALL IN DEMAND FOR LOWER AND MEDIUM QUALITY DIAMONDS, LAL SAID.

INDIA'S GEM AND JEWELERY EXPORTS WERE ESTIMATED ACCOUNTING FOR NEARLY 20 PERCENT OF THE COUNTRY'S TOTAL EXPORTS IN 1989-90. DIAMONDS ALONE ACCOUNTED FOR ABOUT 91 PERCENT OF ALL EXPORTED GEMS AND JEWELERY.

OTHER MAJOR BUYERS OF INDIAN GEMS AND JEWELERY ARE JAPAN, BELGIUM, HONGKONG, THAILAND, SWITZERLAND, ISRAEL, BRITAIN, THE UNITED ARAB EMIRATES, GERMANY, SINGAPORE AND AUSTRALIA.

#90338h0071 12/04/1990 ~Chinese News Agency
KATHMANDU (DEC. 4) XINHUA - FARMERS IN NEPAL ARE FACING SHORTAGE OF CHEMICAL FERTILIZERS AND THIS YEAR'S WINTER CROPS ARE BOUND TO BE AFFECTED AS A RESULT.

IN THE FIRST FOUR MONTHS OF THIS FISCAL YEAR (STARTING FROM JULY 16), THE AGRICULTURE INPUTS CORPORATION (AIC) SUPPLIED 62,555 TONS OF CHEMICAL FERTILIZER TO FARMERS, 5,055 TONS MORE THAN THE CORRESPONDING PERIOD OF LAST FISCAL YEAR, 11,670 TONS BEHIND THE TARGET.

AIC GENERAL MANAGER JAGDISH CHANDRA GAUTAM SAID THAT FERTILIZERS IMPORTED FROM OVERSEAS HAVE NOT YET ARRIVED AND THE QUANTUM OF FERTILIZERS TO BE GIVEN BY INDIA AS ASSISTANCE TO MEET THE EMERGENCY IS NOT EXPECTED TO ARRIVE ON TIME.

IN ORDER THAT THE PROBLEM IS SOLVED FOREVER, HE SAID, THERE HAS TO BE STOCKING FACILITIES FOR AT LEAST A YEAR.

THE DEMAND OF FERTILIZER FOR THE FISCAL YEAR HAS BEEN ESTIMATED AT 200,000 TONS BUT THE COUNTRY'S GODOWN FACILITIES STAND AT 70,000 TONS ONLY.

-30- 1075

#90338h0072 12/04/1990 ~Chinese News Agency
ULAN BATOR (DEC. 4) XINHUA - MONGOLIA HAS BANNED SOME COMMODITIES IN SHORT SUPPLY FROM BEING TAKEN OR SENT OUT OF THE COUNTRY THROUGH INTERNATIONAL POSTAL PACKETS OR WITH FOREIGN TRAVELLERS, THE "PEOPLE'S POWER" NEWSPAPER REPORTED TODAY.

THE GENERAL OFFICE OF CUSTOMS STATED THAT THIS INCLUDED CARS, MOTORCYCLES, T.V. SETS, VIDEOS, RECORDERS, REFRIGERATORS, WASHING MACHINES, COTTON TEXTILES WOOL FABRICS, CHILDREN CLOTHES, RICE, WHEAT, AND OIL. THE BAN CAME INTO EFFECT ON DECEMBER 1.

THE NEWSPAPER REPORTED THAT ELECTRICAL EQUIPMENT FOR FAMILY USE AND DAILY NECESSITIES HAD BEEN IN SHORT SUPPLY EVEN THOUGH THE GOVERNMENT HAD ARRANGED IMPORTS TO MEET THE DEMAND. COMPLAINTS HAD BEEN MADE THAT THERE HAD BEEN PANIC-BUYING BY FOREIGNERS.

-30- 918

#90338h0076 12/04/1990 ~Chinese News Agency
GABORONE (DEC. 4) XINHUA - ABOUT 10,000 PEOPLE WERE KILLED AND OTHER 32,000 SERIOUSLY INJURED IN LAST YEAR'S 434,000 CAR ACCIDENTS IN SOUTH AFRICA, THE "SOWETEAN" NEWSPAPER OF SOUTH AFRICA REPORTED TODAY.

THE PAPER QUOTED BERNARD MANDELL, FEDERAL COUNCIL CHAIRMAN OF THE MEDICAL ASSOCIATION OF SOUTH AFRICA, AS SAYING THAT THE CARNAGE ON ROADS HAD REACHED FRIGHTENING PROPORITONS AND STATI- STICS SHOW THAT 15 PEOPLE WERE KILLED IN ACCIDENTS PER DAY.

IT IS BELIEVED THAT DRUNKEN DRIVING WAS A CONTRIBUTORY FACTOR TO THE HIGH ACCIDENT RATE IN THE COUNTRY.

-30- 726

#90338h0077 12/04/1990 ~Chinese News Agency

GABORONE (DEC. 4) XINHUA - THREE BAGS OF HEROIN AND 103,000 MANDRAX TABLETS WITH A COMBINED VALUE OF 17 MILLION RAND (ABOUT 6.76 MILLION U.S. DOLLARS) HAVE BEEN SEIZED AT JAN SMUTS AIRPORT IN SOUTH AFRICA.

"THE CITIZEN" NEWSPAPER OF SOUTH AFRICA TODAY QUOTED A SOUTH AFRICAN POLICE LIAISON OFFICER AS TELLING A PRESS CONFERENCE YESTERDAY THAT THE HEROIN APPARENTLY ARRIVED IN SOUTH AFRICA ON A BRITISH AIRWAYS AIRCRAFT ON ITS WAY FROM KARACHI, VIA NAI- ROBI AND JAN SMUTS, TO MAPUTO.

THE DRUGS ARE BELIEVED TO BE THE BIGGEST HAUL EVER SEIZED AT A SOUTH AFRICAN AIRPORT.

#90338h0085 12/04/1990 ~Chinese News Agency

AMMAN (DEC. 4) XINHUA - THE CENTRAL BANK OF JORDAN (CBJ) HAS PLANS TO ISSUE A SET OF NEW BANKNOTES TO REPLACE THE LEGAL TENDER NOW IN CIRCULATION, ACCORDING TO THE LATEST ISSUE OF THE "JORDAN ECONOMIC MONITOR", A MONTHLY NEWSLETTER.

THE "MONITOR," KNOWN FOR INSIDER INFORMATION AND ANALYSIS OF THE JORDANIAN ECONOMY, SAID THAT THE SECURITY APPARATUS AND THE CBJ BELIEVE THAT ISRAEL IS INVOLVED IN PRODUCING COUNTERFEITS IN SUBSTANTIAL AMOUNTS, HENCE THE PLAN TO ISSUE NEW BANKNOTES.

THE "MONITOR" SAID THE NEW BANKNOTES, WHILE SMALLER IN SIZE, WILL BE MORE DIFFICULT TO FORGE.

IN THE EARLY 1970'S, COUNTERFEITS OF 10 JORDANIAN DINARS IN DENOMINATION WERE FOUND. COUNTERFEITS EXCLUSIVELY OF 20 JD IN FACE VALUE WERE FOUND TWICE, IN 1987 AND THIS YEAR.

BANKERS SAY THE 1987 FORGERY WAS OF LIMITED SUCCESS BUT THE MOST RECENT FORGERY WAS SERIOUS DECEPTIVE ENOUGH.

ABOUT 300 FORGED NOTES HAVE BEEN SINGLED OUT BY THE CBJ SO FAR THIS YEAR. REPORTS SAID THE ONLY LIKELY SOURCE OF THE FORGERY WAS THE ARAB TERRITORIES UNDER ISRAELI OCCUPATION.

"IT IS NOW FAIRLY ESTABLISHED THAT THE FORGERY HAS BEEN MASTER-MINDED BY THE ISRAELI INTELLIGENCE SERVICES (MOSSAD), AND THAT LARGE AMOUNTS OF THE JD-20 -- PERHAPS IN EXCESS OF 6 MILLION JD -- HAVE BEEN PRINTED." ACCORDING TO A REPORT

IN THE ENGLISH LANGUAGE "JORDAN TIMES."

#90338h0129 12/04/1990 ~Chinese News Agency

ADDIS ABABA (DEC. 4) XINHUA - THE ETHIOPIAN MINISTRY OF COFFEE AND TEA DEVELOPMENT HAS INTRODUCED NEW COFFEE MARKE- TING PROCEDURES TO CONTAIN ILLICIT TRADE IN THE CROP.

UNDER NEW MEASURES ANNOUNCED AT A MEETING ATTENDED BY GOVERNMENT OFFICIALS AND THOSE INVOLVED IN COFFEE EXPORT, PEOPLE WHO CLOSELY COOPERATE WITH GOVERNMENT AGENCIES IN CHECKING ILLEGAL COFFEE MARKETING OR PIP OFF ILLICIT TRANSACTIONS WILL RECEIVE 60 PERCENT OF THE PROCEEDS FROM THE SALE OF THE COFFEE CAPTURED FROM CONTRABANDISTS.

THE MINISTRY ALSO ANNOUNCED THE ETHIOPIAN COFFEE MARKETING CORPORATION AND THE

ETHIOPIAN DOMESTIC DISTRIBUTION CORPORATION WILL BE THE ONLY BODIES IN THE SALE AND MARKETING OF COFFEE FOR LOCAL CONSUMPTION.

QUALITY COFFEE WILL BE DISTRIBUTED TO THE PEOPLE DIRECTLY BY THE TWO CORPORATIONS INSTEAD THROUGH LOCAL NEIGHBOURHOOD COMMITTEES OR OTHER TRADE OUTLETS AS DONE IN THE PAST.

ETHIOPIA PRODUCES BETWEEN 150,000 TO 18,000 TONS OF COFFEE EVERY YEAR, AND ABOUT HALF OF THE OUTPUT IS CONSUMED AT HOME.

CONTRABAND TRADE HAS BEEN CONSIDERED AS ONE OF THE MAJOR CAUSES HINDERING ETHIOPIA FROM EXPORTING MORE QUALITY COFFEE IN THE INTERNATIONAL MARKET. COFFEE IS THE COUNTRY'S NUMBER ONE FOREIGN EXCHANGE EARNER.

TOKYO (DEC. 4) KYODO - KIKKOMAN CORP.'S JOINT VENTURE IN TAIWAN, PRESIDENT KIKKOMAN INC., HAS BEGUN SHIPMENT OF SOYSAUCE, COMPANY OFFICIALS SAID TUESDAY.

IT IS THE FOURTH KIKKOMAN MANUFACTURING BASE ABROAD TO START SHIPMENT, FOLLOWING COMPANIES IN THE U.S., SINGAPORE, AND BRAZIL, THEY SAID.

IN ADDITION TO THE REGULAR SOYSAUCE, THE COMPANY WILL SELL SWEET SOYSAUCE TARGETED FOR THE TAIWANESE MARKET. THE OFFICIALS SAID THAT WITHIN A FEW YEARS THEY HOPE TO RAISE SALES TO 3,000 KILOLITERS A YEAR.

-30- 658

#90338k0029 12/04/1990 ~Japanese News Agency

NAGOYA (DEC. 4) KYODO - TOYOTA MOTOR CORP. SAID TUESDAY IT IS STUDYING PLANS TO BUILD A SECOND LIGHT TRUCK ASSEMBLY PLANT IN THAILAND TO KEEP UP WITH THE EXPANDING MARKET THERE.

VEHICLE SALES IN THAILAND HAVE EXPANDED 50 PERCENT FROM JANUARY TO SEPTEMBER, COMPARED WITH THE SAME PERIOD LAST YEAR, TO 245,868 VEHICLES, OFFICIALS SAID. TOYOTA ACCOUNTED FOR 61,990 OF THOSE VEHICLES.

THE OFFICIALS ADDED THAT THAILAND'S HIGH CUSTOMS DUTIES ON IMPORTED VEHICLES COULD BE AVOIDED BY ASSEMBLING MORE TRUCKS IN THAILAND.

THE PROPOSED PLANT'S LOCATION HAS YET TO BE DECIDED, BUT, IF THE COMPANY APPROVES THE PLANS, IT HOPES TO BEGIN CONSTRUCTION NEXT YEAR, WITH COMPLETION IN 1993, OFFICIALS SAID.

THE NEW PLANT WOULD ASSEMBLE 100,000 VEHICLES PER YEAR, INCREASING TOYOTA'S YEARLY LIGHT TRUCK OUTPUT IN THAILAND TO 160,000 VEHICLES, OFFICIALS SAID.

TOYOTA MOTOR THAILAND CO., A WHOLLY OWNED SUBSIDIARY OF THE PARENT COMPANY, NOW ASSEMBLES ABOUT 60,000 LIGHT TRUCKS PER YEAR ON THE OUTSKIRTS OF BANGKOK, OFFICIALS SAID.

TOKYO (DEC. 4) KYODO - FUJITSU LTD. SAID TUESDAY IT HAS AGREED WITH QUOTIENT PLC OF BRITAIN TO JOINTLY DEVELOP A COMPUTER SOFTWARE PACKAGE FOR MANAGING INTERNATIONAL FINANCIAL TRANSACTIONS.

THE NEW SYSTEM IS EXPECTED TO BE COMMERCIALIZED BY FEBRUARY 1993, WITH SALES TARGETED AT JAPANESE AND BRITISH SECURITIES HOUSES, FUJITSU SAID.

WITH THE SYSTEM, SECURITIES FIRMS AND BANKS WILL BE ABLE BOTH TO PLACE GLOBAL ORDERS FOR STOCKS AND BONDS AND ALSO MANAGE AND SETTLE THE TRANSACTIONS, FOR THE FIRST TIME, FUJITUSU SAID.

THE PACKAGE WILL BE SUITABLE FOR USE IN CONJUNCTION WITH FUJITSU'S M-SERIES MAIN FRAME COMPUTERS, IT SAID.

FUJITSU SAID THE SYSTEM IS CAPABLE OF TRANSFERRING INFORMATION TO DIVERSE HOST COMPUTERS, AVOIDING DUPLICATION OF DOMESTIC AND INTERNATIONAL BUSINESS TASKS. FINANCIAL INSTITUTIONS USUALLY RUN DOMESTIC AND INTERNATIONAL SECTORS SEPARATELY.

THE PACKAGE WILL BE OWNED, MARKETED AND SUPPORTED WORLDWIDE BY BOTH FUJITSU AND QUOTIENT.

THE LONDON-BASED QUOTIENT IS A FINANCIAL SYSTEMS CONSULTANT, AS WELL AS A SUPPLIER OF COMPUTER SOFTWARE SYSTEMS TO FINANCIAL HOUSES. THE QUOTIENT GROUP IS CAPITALIZED AT 3.3 MILLION POUNDS AND RECORDED A TURNOVER OF 19 MILLION POUNDS LAST YEAR.

OSAKA (DEC. 4) KYODO - SANYO ELECTRIC CO. SAID TUESDAY IT WILL BEGIN CONSTRUCTION OF A NEW PLANT TO MANUFACTURE LIQUID CRYSTAL DISPLAY UNITS IN JAPAN EARLY NEXT YEAR.

OFFICIALS SAID THE NEW PLANT WILL FOCUS ON FABRICATING ACTIVE MATRIX, THIN-FILM TRANSISTOR COLOR DISPLAYS FOR PORTABLE TELEVISIONS AND PROJECTORS.

THE 30 BILLION YEN, TWO-STORY PLANT WILL SIT ON A 15,000 SQUARE METER LANDSITE IN GIFU PREFECTURE, COMPANY OFFICIALS SAID.

CONSTRUCTION OF THE NEW PLANT WILL BEGIN IN SPRING 1991, WITH PRODUCTION TO

START SOMETIME IN 1993, THEY SAID.

THE PLANT IS EXPECTED TO PRODUCE 30 BILLION YEN WORTH OF LCD PRODUCTS IN 1995, INCLUDING 10-INCH DISPLAY UNITS, THEY SAID.

-30- 851

#90338k0063 12/04/1990 ~Japanese News Agency

MANILA (DEC. 4) KYODO - THE PHILIPPINE INFLATION RATE ROSE TO 13.1 PERCENT IN NOVEMBER, UP FROM THE 12.0 PERCENT IN OCTOBER, AS PRICES OF CONSUMER GOODS AND SERVICES SURGED, THE GOVERNMENT SAID TUESDAY.

THE INFLATION RATE FOR MANILA JUMPED TO 16.6 PERCENT IN NOVEMBER FROM 15.8 PERCENT THE PREVIOUS MONTH, WHILE THAT IN AREAS OUTSIDE METROPOLITAN MANILA WAS PUT AT 12.3 PERCENT, UP FROM 11.2 PERCENT IN OCTOBER.

THE PRICES OF MOST CONSUMER ITEMS INCREASED SIGNIFICANTLY IN NOVEMBER AS REFLECTED IN A 2.0 PERCENT MONTH-ON-MONTH HIKE IN THE CONSUMER PRICE INDEX.

THE CONSUMER PRICE INDEX FOR THE COUNTRY AS A WHOLE WAS 525.5, WHILE FOR METROPOLITAN MANILA IT WAS 580.6 AND FOR AREAS OUTSIDE METROPOLITAN MANILA IT WAS 514.9. THE INDEX WAS 100 IN THE BASE YEAR 1979.

TOKYO (DEC. 4) KYODO - A NEWLY FORMED JAPANESE PARLIAMENTARIANS' GROUP TO PROMOTE FRIENDSHIP WITH SOVIET SAKHALIN ON TUESDAY URGED PRIME MINISTER TOSHIKI KAIFU TO OFFER FOOD AND MEDICAL ASSISTANCE TO JAPAN'S "NORTHERN NEIGHBOR."

"GERMANY, FRANCE AND OTHER WESTERN COUNTRIES HAVE ALREADY CONCRETIZED PLANS TO HELP THE SOVIET UNION OVERCOME SEVERE SHORTAGES AS IT MOVES TO INTRODUCE A MARKET ECONOMY," THE SAKHALIN FRIENDSHIP PARLIAMENTARIANS LEAGUE SAID IN A PETITION TO KAIFU.

NOTING THAT SAKHALIN IS CLOSER TO TOKYO THAN TO MOSCOW, THE 45- MEMBER SUPRAPARTISAN GROUP URGED THE GOVERNMENT TO OFFER NECESSARY ASSISTANCE TO THE SOVIET FAR EAST ISLAND, NORTH OF HOKKAIDO.

THE FOREIGN MINISTRY HAS INDICATED IT IS READY TO OFFER MEDICAL AID, BUT NOT FOOD ASSISTANCE TO THE SOVIET UNION.

MINISTRY OFFICIALS SAY THAT IT IS DIFFICULT FOR JAPAN TO OFFER FOOD AID BECAUSE THE SOVIET UNION IS NOT ELIGIBLE UNDER JAPAN'S OFFICIAL FOREIGN AID PROGRAM.

THE SAKHALIN FRIENDSHIP PARLIAMENTARIANS LEAGUE WAS ESTABLISHED LAST MONTH TO PROMOTE PRIVATE-SECTOR ECONOMIC AND CULTURAL EXCHANGES WITH SAKHALIN.

THE GROUP ALSO HOPES TO HELP BUILD TRUST BETWEEN THE TWO NATIONS IN ADVANCE OF SOVIET PRESIDENT MIKHAIL GORBACHEV'S VISIT TO JAPAN, PLANNED FOR NEXT APRIL.

LEAGUE CHAIRMAN IS FUMIO ABE, A LIBERAL DEMOCRATIC PARTY MEMBER OF THE HOUSE OF REPRESENTATIVES FROM HOKKAIDO.

NEW DELHI (DEC. 4) KYODO - BANGLADESHI OPPOSITION SUPPORTERS ON TUESDAY STAGED AN EIGHT-HOUR GENERAL STRIKE AND REJECTED A PROPOSAL MADE BY PRESIDENT HOSSAIN MOHAMMAD ERSHAD MONDAY NIGHT IN WHICH HE OFFERED TO RESIGN TEMPORARILY PRIOR TO THE NEXT PRESIDENTIAL ELECTION, ACCORDING TO REPORTS REACHING NEW DELHI.

OPPOSITION GROUPS ALSO HELD DEMONSTRATIONS IN VARIOUS PLACES IN THE CAPITAL DHAKA, TO BACK UP THEIR DEMAND FOR ERSHAD'S IMMEDIATE RESIGNATION, THE REPORTS SAID.

SECURITY FORCES REFRAINED FROM ATTEMPTING TO CRUSH THE HUNDREDS OR THOUSANDS OF DEMONSTRATORS IN THE CAPITAL WHO SHOUTED SUCH SLOGANS AS "VICTORY IS IN OUR HANDS," AND "ERSHAD OUT," THE REPORTS SAID.

MOST OFFICES AND SHOPS IN DHAKA CLOSED DURING THE GENERAL STRIKE, WHICH BEGAN AT 6 A.M.(LOCAL TIME), AND MOST TRAFFIC IN THE CITY ALSO CAME TO A STANDSTILL, THEY SAID.

THE OPPOSITION HAS CALLED FOR NATIONWIDE DAILY EIGHT-HOUR GENERAL STRIKES FROM TUESDAY THROUGH NEXT SUNDAY AND A 72-HOUR GENERAL STRIKE NEXT MONDAY.

ON THE EVE OF THIS LATEST SERIES OF GENERAL STRIKES, ERSHAD OFFERED TO HAND OVER POWER TO A NEUTRAL VICE PRESIDENT WHO WOULD HEAD A CARETAKER GOVERNMENT IN ORDER TO PREPARE FOR THE NEXT PRESIDENTIAL AND GENERAL ELECTIONS. HE SAID HE WOULD RESIGN 15 DAYS BEFORE THE ELECTIONS ARE HELD.

ERSHAD ALSO PLEDGED TO LIFT THE STATE OF EMERGENCY ON DECEMBER 16. A STATE OF EMERGENCY WAS DECLARED NOVEMBER 27 AMID GROWING GOVERNMENT-OPPOSITION CONFRONTATIONS.

ON TUESDAY, HOWEVER, MAJOR OPPOSITION PARTIES INCLUDING THE BANGLADESH NATIONALIST PARTY AND THE AWAMI LEAGUE FLATLY REJECTED ERSHAD'S PROPOSAL AND REITERATED THEIR DEMAND THAT HE IMMEDIATELY RESIGN AND HAND OVER POWER TO A CARETAKER GOVERNMENT.

BANGKOK (DEC. 4) KYODO - THE THAI GOVERNMENT ON TUESDAY ADOPTED A REVISED POLICY TOWARD THE SOVIET UNION, EMPHASIZING THE PROMOTION OF ECONOMIC AND TRADE RELATIONS, FOREIGN MINISTER SUBIN PINKHAYAN SAID.

SUBIN TOLD REPORTERS THAT THAI PRIVATE BUSINESS WILL BE ENCOURAGED TO DIRECTLY APPROACH THE VARIOUS COMPONENT REPUBLICS OF THE SOVIET UNION ON TRADE, INVESTMENT, AND OTHER ECONOMIC ACTIVITIES, WITHOUT GOING THROUGH THE CENTRAL SOVIET GOVERNMENT AS IN THE PAST.

THE THAI GOVERNMENT WOULD SET UP A JOINT COMMITTEE WITH THE PRIVATE SECTOR TO FACILITATE SUCH A MOVE, HE SAID.

THE NEW POLICY, BASED ON A FOREIGN MINISTRY PROPOSAL, WAS APPROVED BY THE CABINET IN A WEEKLY MEETING TUESDAY, SUBIN SAID.

THE MOVE, ACCORDING TO ANOTHER GOVERNMENT SOURCE, WAS PART OF AN ENTIRE REVISED POLICY OF THAILAND TOWARD THE SOVIET UNION BECAUSE OF THE GREAT CHANGES TAKING PLACE THERE.

THAT REVISED POLICY, PROPOSED BY THAILAND'S NATIONAL SECURITY COUNCIL AND ALSO APPROVED ON TUESDAY, FULLY ENCOURAGES GREATER ECONOMIC EXCHANGE, BUT CAUTIONS AGAINST CLOSER POLITICAL AND CULTURAL TIES WITH THE SOVIET UNION, THE SOURCE SAID.

THE THAI GOVERNEMENT, HOWEVER, WILL CONTINUE TO ADHERE TO THE GENERAL POLICY THE ASSOCIATION OF SOUTHEAST ASIA (ASEAN) TAKES TOWARD THE SOVIET UNION, THE SOURCE SAID.

TOKYO (DEC. 4) KYODO - JAPAN AND CHINA WILL OPEN NEGOTIATIONS ON REGULAR FERRY SERVICE BETWEEN THE TWO COUNTRIES DECEMBER 11 IN BEIJING, THE TRANSPORT MINISTRY ANNOUNCED TUESDAY.

THE TALKS WILL FOCUS ON TOKYO'S REQUEST THAT JAPANESE SHIPPING LINES BE ALLOWED TO OPERATE TWO ROUTES.

CHINA NOW OPERATES TWO ONCE-A-MONTH ROUTES FROM SHANGHAI TO KOBE AND YOKOHAMA.

JAPAN WILL ALSO ASK THAT JAPANESE SHIPPING FIRMS BE ALLOWED TO OPEN OFFICES IN CHINA TO CONDUCT BUSINESS, THE MINISTRY SAID.

THE TWO COUNTRIES HELD TEIR FIRST ROUND OF NEGOTIATIONS IN DECEMBER 1988.

-30- 718

#90338k0095 12/04/1990 ~Japanese News Agency

TOKYO (DEC. 4) KYODO - THE FINANCE MINISTRY IS STUDYING MEASURES AIMED AT CURBING LENDING BY BANKS AND OTHER FINANCIAL INSTITUTIONS FOR REAL ESTATE TRANSACTIONS IN ORDER TO STEM LAND PRICE INFLATION, MINISTRY SOURCES SAID TUESDAY.

BANK LOANS TO FINANCE REAL ESTATE DEALS HAVE BEEN CRITICIZED AS A MAJOR CAUSE OF THE ONGOING LAND PRICE SPIRAL.

THE LATEST MOVE FOLLOWS THE EARLIER SETTING BY THE MINISTRY OF REGULATIONS GOVERNING GROWTH IN REAL ESTATE-RELATED LOANS, WHICH HAVE ALREADY SERVED TO SLASH SUCH LENDING BY FINANCIAL INSTITUTIONS.

THE SOURCES SAID THE MINISTRY, AMONG OTHER THINGS, IS PLANNING WHAT IT CALLS A ''TRIGGER'' SYSTEM, A MECHANISM UNDER WHICH REAL ESTATE-RELATED LENDING WOULD BE LIMITED WHENEVER GROWTH IN SUCH LOANS OUTPACES THAT IN OVERALL LENDING FOR TWO MONTHS OR MORE.

ALSO BEING CONSIDERED IS NEW LEGISLATION GOVERNING SO-CALLED ''NON-BANK'' INSTITUTIONS SUCH AS CREDIT AND LEASING COMPANIES IN ORDER TO REGULATE THEIR LENDING ACTIVITIES.

THESE COMPANIES PLAY A MAJOR PART IN THE NATION'S REAL ESTATE MARKET, WITH THEIR OVERALL OUTSTANDING LOANS EXCEEDING THOSE BY THE NATION'S CREDIT UNIONS.

AS FOR INSURANCE COMPANIES, THE MINISTRY PLANS TO MAINTAIN ITS INSTRUCTION DEMANDING THAT THEY KEEP GROWTH IN REAL ESTATE INVESTMENT BELOW THAT IN OVERALL ASSETS, THE SOURCES SAID.

THESE MEASURES, WHICH ARE IN LINE WITH RECOMMENDATIONS MADE TUESDAY BY THE RULING LIBERAL DEMOCRATIC PARTY'S PANEL ON FINANCE, WILL BE DRAFTED IN DETAIL AS EARLY AS NEXT SPRING, THE SOURCES SAID.

#90338k0101 12/04/1990 ~Japanese News Agency

SEOUL (DEC. 4) KYODO - JAPANESE GANGSTERS HAVE GATHERED IN THE SOUTH KOREAN PORT CITY OF PUSAN, OSTENSIBLY FOR A "YEAR-END" PARTY AND SOME TOURISM, POLICE SAID TUESDAY.

BUT POLICE AND LOCAL AUTHORITIES FEAR THE VISIT MAY BE AN EFFORT TO STRENGTHEN TIES BETWEEN UNDERWORLD GROUPS ON OPPOSITE SIDES OF THE NARROW STRAITS THAT SEPARATE THE TWO NATIONS.

ACCORDING TO PUSAN POLICE, OVER 70 MEMBERS OF A FUKUOKA-BASED GANG AFFILIATED WITH JAPAN'S LARGEST YAKUZA FAMILY, THE YAMAGUCHI-GUMI, HAVE BEEN ARRIVING IN THE SOUTHEASTERN COASTAL CITY SINCE SUNDAY.

THE JAPANESE GANGSTERS HAVE STRESSED THAT THEY ARE IN PUSAN FOR A "YEAR-END" PARTY AND SOME TOURISM, BUT POLICE REMAIN SUSPICIOUS, SINCE EACH MEMBER IS REPORTEDLY CARRYING BETWEEN 600,000 YEN AND 1 MILLION YEN.

THE SOUTH KOREAN PRESS HAS SOUNDED THE ALARM, SAYING THAT THE JAPANESE YAKUZA HAVE LANDED AND ARE AIMING TO LEND SUPPORT TO KOREAN GANGSTERS.

THE JAPANESE CONSULATE IN PUSAN SAID IT IS KEEPING IN TOUCH WITH THE POLICE.

#90338m0001 12/04/1990 ~Market Consensus Surveys
FALLS CHURCH, VA (DEC. 4) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

IN THE NEWS:

The NIKKEI fell 863.38 points or 3.8% on light volume. ... In London midday trading, stocks are lower and the FTSE is down 7.1. ... Brent North Sea crude is up a quarter to $29.85 ... The dollar is down in early morning trading. ... The NATIONAL ASSOCIATION OF PURCHASING MANAGEMENT says its index of economic activity fell to 41.3% in November from 43.4% in October, placing it at its lowest point since November 1982. ... The COMMERCE DEPARTMENT says construction spending rose 1.3% in October, largely because of record government spending. protection.

WHAT'S AHEAD:

New home sales for October are scheduled for release at 10 a.m. EST. They are expected to show a drop of 2% to 3%, indicating a continuing slump in the nation's real-estate industry. ... SEARS is expected to report that its sales in stores open at least a year declined as much as 4% in November. ... "The Wall Street Journal" is reporting that in an effort to reduce the credit crunch, the FEDERAL RESERVE may lower the reserve requirement today - the first change in seven years.

FROM THE BULLS:

"There is something in the market for everybody," says JON GROVEMAN, president of LADENBURG, THALMANN & CO. Although he says the economy remains "a disaster " he also says the encouraging developments in the Middle East crisis are giving investors some confidence about putting money into stocks. "I wouldn't get carried away on the buy side," he says, "but I think the burden of proof at this stage is on the bears rather than the bulls." Mr. Groveman says investors also are being encouraged by the dollar's rebound from its recent lows. (WSJ, 12/4)

FROM THE BEARS:

"No one is willing to throw all their pennies into the pond yet," says DAN WILLIAMS at DILLON, READ & CO. ("USA Today", 12/4)

STOCK MARKET:

"The Dow [Monday] was kind of misleading to me," says ED NICOSKI at PIPER, JAFFRAY HOPWOOD. "Even though the Dow stocks were up, the real strength was

in secondary issues, particularly technology, brought about by the NCR bid." Nicoski looks for the market to trend lower until the January 15 deadline for Iraq to leave Kuwait, and says the Dow could be misleading. "I think 2650 or 2700 is a possibility in terms of the Dow, but I don't think the Dow's going to be that meaningful." ("Investor's Daily", 12/4)

"I think rather than getting really bullish just here, I would be content to hold my positions in pharmaceuticals, tobacco, soft drinks and utilities and stick with those through the end of the year to see if this really does turn the bottom and we get into a new bull market phase," says RONALD HILL at BROWN BROS. HARRIMAN. "The underpinnings for a new, very strong, very good market are in place. What you need to take away, however, is this geopolitical uncertainty [in the Middle East]. As long as that remains, it's going to be very hard to become very, very bullish about equities." (CNBC "Market Wrap-Up", 12/4)

"The market's had a big rebound off of its low a few weeks a go," says SCUDDER STEVENS & CLARK's HOWARD WARD. He says the market may "take a rest for a while," but is encouraged that stocks were able to "hold on to their gains." (FNN "Marketwrap", 12/3)

"It's a whipsaw market with concentration of specific stocks," says JACK SOLOMON, technical analyst at BEAR STEARNS. Even though a peaceful solution to the Mideast crisis may now be possible, money managers remain deeply concerned about a U.S. recession. (WSJ, 12/4)

"What we are seeing is a buildup of investor conviction," says EUGENE PERONI, chief technical analyst at JANNEY MONTGOMERY SCOTT in Philadelphia. He adds that "the market handled itself well last week, despite all the economic ambiguities and military uncertainties." (NYT, 12/4)

"The real excitement [yesterday] was pretty much limited to NCR and AT&T," says THOMAS GALLAGHER at OPPENHEIMER. "But compared to what we've been seeing trading in the broader market was fairly heavy. For many weeks, on Monday the market has done absolutely nothing, but today was definitely different." ("The Washington Post", 12/4)

STOCK TIPS:

In the quarter ended September 30, computer disk maker SEAGATE turned in results lower than anticipated by Wall Street after losing market share at the low end of PC market. But analyst ALEXA McCLOUGHAN at INTERNATIONAL DATA CORPORATION says, "There is a lot of change afoot at Seagate. It's like the company woke up." The company developed the disk drive for the PC in 1979. After being slow to reacting to changes in the volatile industry, the company promises a new strategy of plentiful new products brought quickly to market. ("Investor's Daily", 12/4)

Analysts say AT&T will acquire NCR - it's just a matter of price. "I think that at that price [90 a share], NCR's in play," says DICK SHAFFER of TECHNOLOGIC PARTNERS. "The company is gone." He says combining the two companies would be easier than other mergers. "If AT&T can shrink NCR without sapping its morale, there's a huge customer base to capitalize on." WILLIAM ZACHMANN, president of CANOPUS RESEARCH INC., says: "If I was sitting at IBM headquarters, I'd be biting my fingernails really hard. AT&T is in a remarkably good position to challenge not only IBM but a lot of other players in the computer business." ("USA Today", 12/4)

"I believe that NCR and AT&T combined will bring out the new generation of computers, a multi-media media computer carrying voice, video, data, fax - integrating all these media together into one terminal whereas before you had many different appliances doing the same function," says STUART CRANE at GRUNTAL & CO. (CNBC "Market Wrap-Up", 12/4)

"AT&T is trying to do several things" with its buyout bid for NCR," according to SANFORD C. BERNSTEIN & CO. telecommunications analyst GREG SAWERS. He says AT&T is attempting to strengthen its computer business. He says the $90 price is fair, and that AT&T is likely to do whatever is necessary to make sure the deal goes through. ("Nightly Business Report", 12/3)

Airline stocks "are terrible investments," says LOUIS EHRENKRANTZ of LADENBURG THALMANN. He says that the only hopes of profiting in airline stocks are through takeovers. (CNBC "The Moneywheel", 12/4)

-30- 6687

#90338m0002 12/04/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (DEC. 4) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

The currency market sees the Middle East negotiations as "another case of things are good, but not that good, so we shouldn't sell dollars quite yet," says JOSE GONZALEZ, manager of foreign exchange at the NATIONAL BANK OF DETROIT. (WSJ, 12/4)

A TREASURY DEPARTMENT report says the government wants to see the trade deficit reduced through an improving economy, not through a weak dollar. "That would be a change," says ROBERT BRUSCA, chief economist at NIKKO SECURITIES. "The administration has been in favor of letting the dollar fall to improve U.S. competitiveness." ("USA Today", 12/4)

"We're seeing where banks are just cutting back on lines of credit to CONFERENCE. Those cuts hurt the ability of businesses to find credit and

therefore to operate normally. (FNN "Marketwrap", 12/3)

"It is very clear that the Japanese banks, especially the second tier banks, are having funding problems of the kind that American banks have had - that is to say they have trouble attracting deposits, attracting CDs," says BILL WOLMAN, chief economist at "BusinessWeek" and "CNBC." He says the Japanese banks were heavily into the federal funds market in the United States last week "and that's why federal funds stayed high even though the Fed was pumping out like mad. That is a new phenomenon in the world. That is extremely interesting and has large implications." (CNBC "Market Wrap-Up", 12/4)

MERRILL LYNCH has been touting bonds for months, but chief investment officer CHARLES CLOUGH says his bullishness has gotten more intense after the invasion of Kuwait. Clough believes world economic leaders will make a concerted effort to hold down rates after the crisis has passed and his expectations for a rising dollar would make bonds doubly attractive. Clough likes a portfolio of 40% bonds, 50% stocks - with an emphasis on utilities - and 10% cash. ("Investor's Daily", 12/4)

Five of six market strategists interviewed by "Investor's Daily" expect interest rates to decline in 1991 by 25-100 basis points, depending on bond maturity. But LEHMAN's STEPHEN SLIFER sees at least a 50% chance of war in the Mideast which would result in higher oil prices, higher interest rates and a weaker economy. "I would not want to own bonds. I would take my profits and run," says Slifer. He thinks a war would trigger the second recession since World War II in which bond yields do not drop - the first was in 1973-1975 after the Arab oil embargo. ("Investor's Daily", 12/4)

"Given the lack of reaction to the purchasing managers' report, you have to wonder if, for the short-term, there isn't too much bullish sentiment already built into [bond] prices," says WARD McCARTHY, a managing director at STONE & McCARTHY RESEARCH ASSOCIATES. (NYT, 12/4)

THE ECONOMY:

"I would assume the fourth quarter will be negative," says SIDNEY JONES, assistant secretary of the TREASURY for economic policy and one of the economists who helps prepare the White House forecast. "If what we know now holds, the first quarter probably would be negative as well." Mr. Jones stressed, however, that developments over the next few weeks could change how he and others in the administration view the economy. (WSJ, 12/4)

ALAN LEVINSON, an economist with WEFA GROUP, says the figures in the declining purchasing managers' index "confirm the fact that we are slipping deeper into recession." ROBERT CHANDROSS, chief economist at LLOYDS BANK, calls the survey figures "unambiguously weak." ("The Washington Post", 12/4)

The purchasing managers' index "is a dose of gloom," says NORMAN ROBERTSON,

chief economist at MELLON BANK in Pittsburgh. "It suggests further declines in output and rising unemployment." (WSJ, 12/4)

"Construction spending will get worse before it gets better," says WILLIAM MacREYNOLDS of the U.S. CHAMBER OF COMMERCE. "The purchasing managers index is quite a bit below the danger point." He says that means we are currently in a recession. (FNN "Marketwrap", 12/3)

"What we've got here is a triple whammy," says DANIEL BARRY, retail analyst at KIDDER, PEABODY & CO. "A recessionary economy, a lack of exciting new toys and a slowing Nintendo. All this doesn't spell a very Merry Christmas." PAUL VALENTINE, toy analyst at STANDARD & POOR'S CORP., adds, "The overall dollars spent on toys this Christmas has got to be less than last year. I just don't see how they could equal." (WSJ, 12/4)

IN WASHINGTON:

Former Secretary of State ALEXANDER HAIG, now with WORLDWIDE ASSOCIATES says "the thought of an 18-month stalemate [over the crisis in the Persian Gulf], with inflated oil prices throughout that period, is a rather serious picture for the global economic situation." He says that developments in Eastern Europe and the Soviet Union make it imperative to solve the crisis immediately. Haig is "skeptical" that the visit by current SECRETARY OF STATE JAMES BAKER "will reinforce the message we have already sent." (FNN "Marketwrap", 12/3)

"It is my feeling that we should be patient in applying military force" against Iraq, says SEN. ROBERT BYRD (D. - West Va.). Other Senators express similar reservations about the use of force to remove Saddam Hussein's troops from Kuwait. "Military action is justified," says SEN. SAM NUNN (D. - Georgia). "The question is whether it is necessary and wise at this time or whether the U.N. embargo has a reasonable chance of accomplishing our goals." (CNBC "World Business Today", 12/4)

MILWAUKEE (DEC. 4) PR NEWSWIRE - Classic Medical Group Inc. reported net sales of $3,450,002 for the year ended Sept. 30, 1990, an increase of 17 percent over net sales for the year ended Sept. 30, 1989. Net income for year ended Sept. 30, 1990, was $457,327 or 13.4 cents per share, compared to net income of $3,364.00 or .001 cents per share for the previous year.

Robert A. Macur, president of the company, explained that the increase in sales was attributable to growth in base accounts. He also stated that 1990

was an investment year in an additional plant, equipment, and people to assure that Classics' productive and human capacity could meet the demand, and service needs of its customers in 1991 and 1992.

Classic Medical Group Inc. manufactures and distributes disposable medical electrodes for a broad variety of medical procedures such as ECG, EKG, Stimulation, EMG and Impedance. Classic Medical sells to dealers, distributors, and instrumentation manufacturers (OEM).

Classic Medical Group Inc. was formerly named Primus Development Group I, Ltd. The name change was effective Sept. 20, 1990. Classic Medical Group Inc.'s stock is traded OTC. Hayne, Miller and Farni Inc., Minneapolis, Minn., makes a market in the stock.

#90338p0023 12/04/1990 ~PR Newswire

WASHINGTON (DEC. 4) PR NEWSWIRE - In conformity with a recent Supreme Court decision, Judge Robert Sweet of the U.S. District Court in New York today ordered three LTV Steel Co. pension plans be restored to the company.

"With today's order, LTV can now take the necessary steps to complete its bankruptcy reorganization and emerge as a viable company, while workers and retirees can have their full pensions as originally promised," Pension Benefit Guaranty Corporation Executive Director James B. Lockhart said of the decision.

In ordering the restoration, Judge Sweet rejected LTV's argument that one of the plans, the J&L Hourly Plan, had no assets, and might have to be reterminated. PBGC had told the court that the allegation had no factual or legal basis, and the court agreed.

To terminate any of the restored plans would require union agreement and the company would have to prove that it and all LTV affiliates could not continue in business and fund the plans. "We don't think termination is necessary or merited. PBGC has proposed an affordable schedule to LTV for funding the restored pension plans," Lockhart said.

Last month, PBGC proposed a restoration payment schedule for the plans that would allow LTV to pay its unfunded pension liabilities over a 30-year period.

The schedule, based on an analysis of LTV's finances by PBGC and its financial adviser, Salomon Brothers, concluded that LTV could meet the schedule to fully fund the plans while allowing the company to emerge from bankruptcy.

The next step for PBGC is to complete an agreement with LTV on the schedule to fund the plans. LTV's written comments on the proposed schedule are due by Jan. 3, 1991.

With the ruling, LTV will be assuming full responsibility for the plans. PBGC terminated LTV's plans in 1987 after the company, in Chapter 11 bankruptcy, stopped funding them.

PBGC is a federal agency that guarantees payment of basic retirement benefits earned by American workers participating in private-sector, defined benefit pension plans. PBGC administers two insurance programs, which cover nearly 40 million people in some 100,000 pension plans. At year-end 1989, the PBGC had assets of $3.2 billion and liabilities of $4.2 billion.

HOUSTON (DEC. 4) PR NEWSWIRE - As promised, Continental Airlines maintained full operations yesterday during the first day of Chapter 11 reorganization. Airline industry analysts and travel agents Monday generally showed support for Continental's decision to reorganize, as the airline continued its business-as-usual, full-service schedule.

"I think they will re-emerge from reorganization, and we will see Continental Airlines as one of the mega-carriers of the industry," said Paul Karos, an airline analyst with First Boston Corp. who appeared Tuesday on a national television talk show.

"They have a very strong domestic route system, with hubs in Houston, Newark, and Denver. They have a very strong international business, which as you know is becoming the real growth area for the business. And they now have the lowest operating costs of any major carrier," Karos said.

During its first day under reorganization protection, more than 87,500 people flew the airline as it turned in a performance that bettered industry averages despite severe winter weather.

- Continental's completion factor, the percentage of scheduled miles actually flown, was 99.1 percent.
- Of 1,385 flights, only 26 trip segments were cancelled, none due to the

Chapter 11 filing. Most were weather related.
- More than a foot of snow fell over much of the Midwest and Northeast Monday, yet 94 percent of Continental's departures and 92 percent of arrivals systemwide were within 60 minutes of schedule.

As the airline continued normal operations, travel agencies across the country continued selling Continental tickets. Consolidated Travel Service, a consortium of 20 Houston-based travel agencies that annually sells about $25 million in Continental tickets, also praised the airline for protecting agents and consumers.

"In their filing, Continental has taken unprecedented steps to protect the travelling public, Continental employees and the travel agency community," said a CTS official.

Hollis Harris, Continental's chairman, president and chief executive officer, praised the carrier's 37,000 employees and stressed Continental would fly out of Chapter 11 a stronger airline.

"Continental has the highest productivity and lowest operating costs of any airline," said Harris. "Our 37,000 employees have earned a reputation for working hard and smart while providing American travellers with the services they need."

#90338p0034 12/04/1990 ~PR Newswire

TULSA, OK (DEC. 4) PR NEWSWIRE - Vintage Petroleum Inc. (NYSE: VPI) announced today that it has recently entered into a definitive agreement with Saturn Land Co. Inc. and related entities to acquire additional interests in certain oil and gas properties and a 100 percent interest in a gathering system located in the Shawnee Townsite Field, Pottawatomie County, Okla., for approximately $3.3 million. Closing is scheduled for Jan. 4, 1991.

Current net daily production from the additional interests averages approximately 128 Bbls of oil and 822 Mcf of gas. The gathering system is approximately 2 1/2 miles long and is composed of an eight-inch crude oil line and a three-inch natural gas line with current average daily throughput of 250 barrels of oil and 850 Mcf of gas.

Prior to acquiring the additional interests from Saturn, Vintage had operations and owned interests in the Shawnee Townsite Field which represented approximately 14 percent of its proved reserves at year end 1989. Vintage is continuing to pursue the unitization of this field for a secondary recovery project and believes significant additional proved reserves will be added in 1991 resulting from the project.

GREENWICH, CT (DEC. 4) PR NEWSWIRE - Strategic Distribution, Inc. ("the company") today announced that it has hired Ted R. Rieple as president of the company, effective immediately. Rieple's responsibilities will include direction of the company's SafetyMaster subsidiary, as well as planning and implementing the company's announced acquisition program in the safety and industrial equipment distribution businesses. The company, through its SafetyMaster subsidiary, currently distributes a variety of safety supplies to industrial, municipal and commercial customers in the Rocky Mountain states.

Prior to joining the company, Rieple spent 20 years at Diversey Corporation and its subsidiaries, most recently serving since 1984 as president, chief executive officer and director of its Diversey Wyandotte Corporation subsidiary. Diversey Corporation is a worldwide leader in the manufacture and distribution of cleaning and sanitation products and services to industrial, food processing, institutional and laundry businesses.

The company's common stock is traded in the over-the-counter market.

CULVER CITY, CA (DEC. 4) PR NEWSWIRE - Fleet Aerospace, Inc. (NASDAQ: FLAI) reports a loss from continuing operations of $15,259,000 (a loss of $2.63 per share) for the year ended Sept. 30, 1990. This compares to a loss from continuing operations of $49,000 (a loss of $0.03 per share) for the corresponding period of the previous year. Revenue for the year was $51,970,000 compared to $56,748,000 for the year ended September 30, 1989. The majority of the fiscal 1990 loss results from the non-cash writedown of the goodwill component of the company's assets.

During the latest fiscal year the company reported additional losses from discontinued operations of $8,966,000 raising the net loss of the company to $24,225,000 ($4.16 per share), compared to a net loss of $960,000 ($0.19 per share) incurred in the 1989 fiscal year.

KANATA, ONTARIO, (DEC. 4) PRNEWSWIRE - Newbridge Networks Corp. (NASDAQ: NNCFX, Toronto: NNC) today announced the appointment of Peter Sommerer as chief operating officer of the company. After considering several candidates for the position, the board of directors was unanimous in its choice of Sommerer, the only internal candidate.

Commenting on the appointment Newbridge Chairman Terence Matthews said, "I am pleased with the board's appointment of Peter Sommerer to this important position. He is extremely knowledgeable of the networking industry and has, over the years, earned the trust and respect of Newbridge management and staff. I have every confidence in his ability to lead the company into an era of stable growth.''

Sommerer received a P. Engineering degree at HTBLUVA in Modling, Austria prior

to earning an masters of business administration at Wirtschraftsuniversitat in Vienna, Austria. Upon graduation, he spent 10 years in engineering at ITT Austria in the development of both software and hardware products. Sommerer left ITT Austria to join Mitel Corp. in Canada where he spent three years in product management before being appointed general manager of the Mitel subsidiary in Germany.

In the spring of 1987, Sommerer joined Newbridge Networks Corp. as the director of product management for the highly successful 3624 MainStreet Intelligent T-1 Channel Bank and the 2600 MainStreet series of ISDN interfaces. He has been the acting chief operating officer of Newbrdige since the position was created six months ago.

Newbridge Networks is an international company which specializes in the design manufacture and marketing of voice and data communications equipment for global networks. Offices and manufacturing facilities are located in Canada, the United States, Europe and Asia.

#90338p0080 12/04/1990 ~PR Newswire

KANATA, Ontario (DEC. 5) PR NEWSWIRE - Newbridge Networks Corp. (NASDAQ: NNCXF) (Toronto: NNC) today announced financial results for the second quarter of fiscal year 1991, ending Nov. 3, 1990.

Revenues for the second quarter were $39,443,000, representing an increase of 24.5 percent over the revenues for the same period in fiscal year 1990 and 3.5 percent over the revenues for the first quarter of fiscal year 1991. Net loss for the second quarter was $2,726,000 ($0.08 per share basic and fully diluted - Canadian GAAP) after a provision of $3,510,000 charged against income for the restructuring of manufacturing operations. This compares with net income of $5,013,000 ($0.15 per share basic and fully diluted - Canadian GAAP) for the second quarter of fiscal year 1990 and a net income of $180,000 ($0.01 per share basic and fully diluted - Canadian GAAP) for the first quarter of the current fiscal year.

Both product and service revenues increased during the quarter as did average sell prices. The gross margin of 60.4 percent declined from 60.6 percent in the first quarter. During the second quarter, the company continued to strengthen its operating controls. Operating expenses were less than 1/2 of one percent over those recorded in the first quarter, resulting in an increase in income from operations to $3,008,000 compared to the first quarter operating income of $2,351,000.

The provision for restructuring costs resulted from a thorough review of the

company's operations. The restructuring plan includes the consolidation and streamlining of manufacturing through a reduction of more than one third of the facilities currently utilized for manufacturing. This is expected to result in lower production overhead costs and an improvement to the product line gross margins.

Cash in the amount of $4,974,000 was generated from operations during the second quarter versus $9,651,000 used for operations in the first quarter. Cash consumption, after considering investing and financing activities, which was $15,845,000 in the first quarter, was reduced to $655,000 in the second quarter.

Days sales outstanding in accounts receivable was reduced to 129 days during the quarter, while inventory levels at the end of the second quarter were approximately the same as the inventory levels at the end of the first quarter.

During the second quarter, Newbridge successfully demonstrated a new high-speed fiber-connected 3645 MainStreet peripheral shelf. The new offering represents the first release of a SONET-based product line. Also during the quarter, the company released the first of a series of frame relay switching products for the 3600 MainStreet line of multiplexers and introduced a new high-end voice processing product line called the NVP1000 series which is currently undergoing customer acceptance testing.

Commenting on the second quarter, Newbridge Chairman Terence Matthews said, "Operating controls introduced since the start of the fiscal year are beginning to take effect. In particular, I am pleased with the improvements being made in accounts receivable collections, inventory and cash management. I am expecting that the restructuring and streamlining of operations should provide considerable improvement to operating results for the last half of the fiscal year."

A summary of financial results follows. Newbridge Networks is an international company which specializes in the design, manufacture and marketing of voice and data communications equipment for worldwide networks. Manufacturing facilities and offices are located in the United States, Europe, Canada, Asia and the Soviet Union.

Newbridge Networks Corp. is a public company whose common shares are listed for trading on the Toronto Stock Exchange (NNC) in Canada and quoted for trading on the NASDAQ National Market System (NNCXF) in the United States.

SAN FRANCISCO (DEC. 4) PR NEWSWIRE - San Francisco-based Transcisco Industries Inc. (AMEX: TNIA and TNIB) announced today that its international subsidiary, Transcisco Trading Co., signed a letter of intent to establish a joint venture railcar leasing company in Czechoslovakia. The joint venture partners will be Transcisco Trading Co., Haka Corp. of Finland and the Czechoslovakian Railway (CSD). The joint venture will use Transcisco's proprietary Uni-Temp tank car heating system for a group of over 2,000 tankers that will be leased to Czechoslovakian and Western European petrochemical shippers. The joint venture will purchase existing Czechoslovakian tank cars, retrofit them with Transcisco's Uni-Temp heating system, then lease the Uni-Temp retrofitted cars to Czechoslovakian and other refineries in Eastern and Western Europe.

Mark C. Hungerford, chairman of Transcisco, said, "This is our fourth Central or Eastern European leasing company start-up joint venture. Transcisco has been operating, profitably, a tank car leasing operation in the U.S.S.R. since early 1989, and has signed similar protocols for establishing railcar leasing operations in Poland, Hungary, and now Czechoslovakia. The signing in Czechoslovakia achieves our stated goal for 1990 to organize rail leasing operations in all four of these major Central and Eastern European countries that use large fleets of tank cars for transporting essential export petrochemicals and petroleum products that generate hard currency. In all four countries, rail transport bears an unusually large proportion of the tonnage because the highway and pipeline systems are inadequate, but the rail systems function quite well."

Transcisco Industries operates railcar maintenance and retrofitting operations through its Transcisco Rail Services Division, and its wholly owned subsidiary Transcisco Tours, operates a dinner train in San Antonio, Texas and will commence operation of a luxury "cruise train" service to Tahoe and Reno from the San Francisco Bay Area starting late 1990. Transcisco owns 36 percent of PLM International, an AMEX-listed diversified equipment leasing company and Transcisco also owns 20 percent of SOVFINAMTRANS, a U.S.S.R. railcar leasing company that operates tank cars with Transcisco's Uni-Temp heating system.

#90338p9673 12/04/1990 ~PR Newswire

LONDON (DEC. 4) PR NEWSWIRE - The Board of Huntingdon International Holdings plc (ADRs - NYSE: HTD) today reported fourth quarter results and announced the preliminary results of the Group for the year ending Sept. 30, 1990.

The company issued the following statement: As discussed in the previous report, the fourth quarter of 1989 exhibited an exceptional growth in the Group's profits and consequently it was expected that it would be difficult to improve on these results in the fourth quarter of 1990. The task was made more challenging by a 14 percent decline in the average exchange rate of U.S. dollars for pounds sterling, compared with the last quarter of 1989. This decline reduced the value of our U.S. earnings on translation to pounds sterling for consolidation into the Group results. It is therefore gratifying to report that revenues for the quarter increased by 28 percent, gross profit by 17 percent, profit before tax by 13 percent and net income by 8 percent.

The preliminary results for the year are in accordance with the Group's growth objectives, with revenues increasing by 28 percent, gross profit by 21 percent and profit before tax by 20 percent. The year-on- year increase in net income shows a lower growth of 15 percent due to the higher effective tax rate which resulted from lower capital expenditure by Huntingdon Research Centre.

The Life Sciences segment of the Group achieved healthy growth for the year, and maintained operating margins at a similar level to last year. The improvement and expansion of facilities at Huntingdon Research Centre has continued, although a major construction project to extend the Metabolism laboratory started later than planned.

We are pleased to announce the formation of a new company, Leicester Clinical Research Centre. This company will conduct Phase I Clinical trials on pharmaceutical products, work which Huntingdon Research Centre has historically subcontracted. A 15,000-square-foot clinical facility is currently being constructed adjacent to Leicester General Hospital in Leicester, England. The addition of this capability to the already wide range of services provided by our Life Sciences segment will greatly enhance opportunities for growth.

The Engineering/Environmental segment of the Group continued to grow rapidly during the year, aided in the last quarter by the acquisition of Southwestern Laboratories and Thomas-Hartig. These acquisitions have both met and in Southwestern's case exceeded pre-acquisition expectations and are expected to make a major contribution to the performance of this segment in the future. For the reasons explained in our third quarter's report, there was a small decline in Engineering/Environmental margins as a percentage of sales during the second half of the year but in making a comparison with the same period

for 1989, it should be remembered that the last half of 1989 was a period of high capacity utilization which raised margins to exceptional levels. We believe, however, that the Engineering/Environmental Group has the ability to repeat and surpass these levels in the future.

It is proposed to pay a final dividend of 1.8 pence per share (9.0 pence per ADR) to shareholders of record as at Jan. 4, 1991. This, together with the interim dividend of 0.8 pence per share (4.0 pence per ADR), will give a total dividend for the year of 2.6 pence per share (13.0 pence per ADR). Accordingly, 2,442,000 pounds has been provided out of income for the year.

ATLANTA (DEC. 4) PR NEWSWIRE - Flexel Inc. has named C. Flemming Heilmann to its board of directors.

This is a new board position. Flexel, a flexible materials manufacturer and distributor, is the world's largest producer of cellulose film (cellophane.) It acquired the cellophane division of Olin Chemical and du Pont to become the only United States manufacturer of the premier product wrapping material.

"We are structuring a board of directors to lead Flexel through a planned growth phase," said W. Lindsey Walters, chairman and chief executive officer. "Although we are the primary source of a dynamic product, we view ourselves as 'customer dependent.' Our focus is on continuing improvement of the way we support our customers, both in product quality and service.

"Mr. Heilmann brings to the Flexel board more than 30 years of worldwide packaging industry experience," said Walters. "His knowledge will contribute significantly to Flexel's progress."

Heilmann is chairman and chief executive officer of Brockway Standard Inc., Atlanta. The company manufactures and sells rigid metal containers for industrial and consumer products.

Earlier, Heilmann held senior executive management positions with Onex Packaging, Continental Group, Continental Can Company, and Metal Box.

Born in Malaysia of Danish parents, he was educated in Australia, Denmark and the United Kingdom. He earned both bachelor's and master's degrees in ecomomics and law at Cambridge University, England. He is a member of the University of Toronto Business School Advisory Council.

Flexel's headquarters are in Atlanta. Manufacturing plants are in Tecumseh, Kan.; Covington, Ind.; Lemont, Ill.; and Glastonbury, Conn.

WASHINGTON (DEC. 4) PR NEWSWIRE - GE Information Services, the recognized leader in EDI services, announced today Version 7.0 of the EDI PC System.

A major enhancement of EDI PC 7.0 is the simulation of a user's desktop. In/out baskets, rules baskets, report baskets, and hold baskets appear on the screen as easy-to-read icons, enabling the user to manage the flow of information simply by moving documents from one basket to another as they're acted upon.

Another enhancement of EDI PC 7.0 is the search feature which enables a user to access and manage information in the system based on the user's specified set of criteria. For example, if the status of a purchase order or shipment notice is needed on a specific trading partner, the user simply conducts an item number search and the information is automatically placed in a basket. The user then can access the file, perform a variety of functions and streamline the management of the information.

Users of the previous version of the EDI PC System who are under current maintenance agreements will receive Version 7.0 at no additional cost.

The EDI PC System is an EDI microcomputer software package which enables EDI trading partners to electronically prepare and exchange business data in standardized document formats. EDI PC can be used as a stand-alone workstation or as a front-end to an in-house host computer, as well as a front-end to use the GE Information Services' EDI EXPRESS Service.

GE Information Services offers a full portfolio of value-added services,

including comprehensive training and implementation assistance for prompt, effective system start-up, as well as 24-hour worldwide technical support for quick problem resolution. A division of General Electric Company, USA (NYSE: GE), GE Information Services is headquartered in Rockville, Md.

#90338p9685 12/04/1990 ~PR Newswire

BOSTON (DEC. 4) PR NEWSWIRE - A genetically engineered hybrid protein developed by Seragen, Inc. shows promising anti-tumor effects in patients with certain leukemias and lymphomas that had resisted previous treatment, a key researcher reported today. In its initial human safety trials, the compound, called Interleukin-2 (IL-2) fusion toxin, showed milder side effects than other present-day cancer therapies.

Half of the 24 patients in Phase I clinical trials in Boston and Houston who received Hopkinton, Mass.-based Seragen's IL-2 fusion toxin showed significant anti-tumor effects. The majority of Phase I patients were treated by Dr. C. Frederic LeMaistre of the University of Texas Health Science Center at San Antonio, who reported his findings at today's joint meeting of the American and International Societies of Hematology in Boston.

"We believe a key differentiating factor for IL-2 fusion toxin is that it can shrink some cancers without the kinds of side effects seen with chemotherapy," said Dr. LeMaistre. "The patients in these trials whose tumors responded to the Seragen compound were unresponsive to conventional cancer therapies. More importantly, all of the patients showed milder side effects than they experienced with traditional treatments."

Richard Svrluga, president and CEO of Seragen, said the company has been asked by the National Cancer Institute (NCI) to enter its IL-2 fusion toxin into NCI-supported clinical trials, based upon the Phase I findings. These studies will be in addition to Seragen's own Phase II studies of the compound which are already underway.

Fusion toxins, such as those being developed by Seragen, are a new class of therapeutics that recognize, penetrate and destroy disease- causing cells with great precision. They are created by genetically splicing toxic portions of naturally occuring diphtheria toxin molecules with new targeting mechanisms that direct the toxins to specific disease-causing cells.

Svrluga said Seragen's first product is the result of successfully fusing portions of the diphtheria toxin molecule with sequences for Interleukin-2, an immune system protein. "This first-in-the-industry compound acts like a guided missile, delivering the potent toxin to specific cancer-causing cells and destroying them," Svrluga said.

"While the Phase I study was designed primarily to test safety, the significant anti-tumor effect shown by IL-2 fusion toxin is very encouraging for the testing of a larger group of patients in Phase II trials," he added.

Seragen is a bio-pharmaceutical company developing a new class of highly specific and potent therapeutic products based on a core technology utilizing the diphtheria toxin molecule. These products, known as fusion toxins, are designed to treat a broad range of diseases which currently have inferior or non-existent treatments, beginning with cancers and severe rheumatoid arthritis and including other autoimmune diseases, AIDS and transplant rejection.

PHOENIX (DEC. 4) PR NEWSWIRE - Riggs Resources Inc., (pinksheets) which owns and operates some of the most notable mining properties in the Arizona mountains, announced today a major precious metals find at their bid Red Mine Property near Mesa.

Initial assays reported on a per head ton basis are: 1.3 ounces of gold; 1.7 ounces of silver; 1.4 ounces of rhodium; 2.8 ounces of platinum; and 2.4 ounces of iridium. Andy Riggs, president of Riggs Resources Inc., said, "This is a significant find in North America. The property has proven to be rich in a number of precious metals in abundance and quality which is rare in this area of the world."

Riggs Resources also owns and holds leases to many valuable properties in the Bradshaw Mountains such as the Davis-Dunkirk, the Henrietta, and the Bannie mines, near Prescott, Ariz.

The company indicated that they currently have two major buyers for concentrated ore from the Big Red property, which will be in production in December of 1990. "Because of the high level of precious metals in the ore, we are able to sell the concentrated ore (concentrated at approximately 20 tons to 1) without the expense of the normal chemical extraction or smelting processes being applied," said Robert Hooker.

Hooker, a metallurgist specializing in the concentration of sulfide ore, has developed a fusion technique which concentrates ore producing significant improvements in the amount of precious metals which can be processed from it. Hooker has agreed to apply his technique and expertise in the development of the Riggs properties.

Riggs Resources Inc., a publicly held company which trades in the over-the-counter market, engages in the mining, development and production of gold, silver and tungsten. The company primarily operates mines that were former producers that terminated production at a time when the price of mineral products had declined and mining technology was minimal. Through the application of modern technology, a number of properties owned by Riggs have an extremely high potential for development of precious metals.

ANKENY, IA (DEC. 4) PR NEWSWIRE - Lower profit margins on gasoline contributed to a decline in earnings for Casey's General Stores Inc. (NASDAQ: CASY) in the convenience-store chain's fiscal second quarter. Continued increases in the number of gallons of gasoline sold, plus higher retail prices caused Casey's quarterly sales to advance to an all-time record high.

Earnings for the quarter ended Oct. 31 were $3.1 million, or 27 cents a share, compared to $3.4 million, or 30 cents a share in the year-ago second quarter. Sales were $157.2 million, up 23 percent over last year's second quarter of $127.8 million.

For the first half, earnings were $5.5 million, or 48 cents a share, compared to $5.8 million, or 51 cents a share in last year's comparable period. Sales for the six months totaled a record $298.7 million, up 14.2 percent over last year's first-half sales of $261.5 million.

"We experienced excellent gains in gasoline market share during the second quarter," said Casey's Chairman and CEO Donald F. Lamberti. "Our gasoline volume was at the highest level ever. However, the rapid increase in wholesale gasoline prices outpaced our ability to increase retail prices. As a result, per-gallon profit margin slipped from last year's levels."

Profits in this year's second quarter were adversely affected by an adjustment to earnings of $689,000, or approximately 6 cents per share, due to LIFO inventory accounting. The adjustment during the quarter was the result of volatile wholesale gasoline pricing.

The average number of shares outstanding in the second quarter was 11.3 million, compared to 11.4 million a year ago. Since announcing Sept. 5 a repurchase plan of up to one million shares of outstanding stock, Casey's has purchased nearly 435,000 shares.

Casey's board of directors declared a quarterly dividend of 2.5 cents per share of common stock, payable Feb. 15, 1991 to shareholders of record Feb. 1,

1991. This is the third consecutive dividend declared by the convenience-store chain.

As of Oct. 31, Casey's operated 774 stores in its eight-state market area, including 571 corporate and 203 franchise outlets. This is an increase of 23 stores since the end of the second quarter a year ago.

Through the first half of the fiscal year, Casey's has completed major remodeling projects at 14 stores and is currently renovating 32 others. Both new-store construction and remodeling are on schedule with Casey's earlier announced plans.

#90338p9688 12/04/1990 ~PR Newswire

GLENDALE, CALIF. (DEC. 4) PR NEWSWIRE - Mail Boxes Coast to Coast Inc. (NASDAQ: MBCC) announced today the resignation of the company's chief executive officer, Herbert Goffstein.

Goffstein has been with the company since its inception in 1984 and has primarily been responsible for the development of the company's exclusive territory of Manhattan, N.Y. over the last three years.

Prior to joining Mail Boxes Coast to Coast, Goffstein was a co-founder of Mail Boxes Etc. (NASDAQ: MAIL), the world's largest chain of private postal, business, shipping and communications centers, where he served as the company's chairman and chief executive officer from 1980 to 1983.

Gary M. Williams, president of Mail Boxes Coast to Coast, said, "Mr. Goffstein has made a substantial contribution to the mail receiving industry both as a co-founder of Mail Boxes Etc. and Mail Boxes Coast to Coast."

Williams added, "It is anticipated this reorganization for the company will provide a significant reduction in overhead in excess of $150,000 per year with the termination of Mr. Goffstein's employment agreement, along with other related expenses." He further stated, "The recently announced reorganization of the company whereby the company realized a gain of $346,078 by selling some of the company's less desirable areas, has given the company the ability to refocus on it's core business of Los Angeles County, Calif. and Manhattan, N.Y. It also has produced a substantial reduction in overhead and has dramatically reduced the company's long-term debt to less than $36,000.

"With the cost savings from Mr. Goffstein's resignation, added to the results of the reorganization, this will substantially ease the company's liquidity position, and posture the company to be on a course of being able to achieve an operational profit, as well as maximize shareholder value."

Mail Boxes Coast to Coast currently has 96 MBE Franchise Centers within its exclusive territory of Los Angeles County and Manhattan and is the largest area franchise developer for Mail Boxes Etc., which has over 1,400 centers worldwide.

CANTON, OHIO (DEC. 4) PR NEWSWIRE - Diebold, Incorporated (NYSE: DBD) chairman and chief executive officer Robert W. Mahoney announced today that Gerald F. Morris has been named senior vice president and chief financial officer of Diebold, replacing Harry E. Parr, Jr., who will retire Jan. 4, 1991. Morris will be responsible for Diebold's entire financial function, including treasury, tax, controller, internal audit, risk management, financial planning and analysis, management information systems and adminstration.

Previously, Morris was senior vice president, treasurer and chief financial officer of the $598 million Foxboro Company, Foxboro, Mass., which was acquired by a British company that elected to bring in its own management team.

"Gerry Morris brings considerable expertise in mergers and acquisitions as well as in international finance to Diebold, which will complement our global strategies during the decade of the 90s," said Mahoney. "His international activities included foreign financial responsibilities as well as representing Foxboro on the boards of several international subsidiaries and joint ventures."

In 1981, Morris joined Foxboro as vice president-treasurer and chief financial officer, positions he held until being named senior vice president in 1990, responsible for the company's entire financial function, as well as for investor relations, risk management, benefits design, legal, contracts and patents. He previously was assistant vice president and director of corporate planning for Textron, Inc., Providence, R.I., which he joined in 1970. Morris also held positions with Itek Corporation, Lexington, Mass., New York Telephone Company, New York, and Eastman Kodak Company, Rochester, N.Y.

He holds an MBA from Harvard University, Boston, and a bachelor's degree in mechanical engineering from Worchester Polytechnic Institute, Worchester, Mass.

Diebold, Incorporated is a world leader in the automation of self-service transactions, security products, software and service for these systems. Headquartered in Canton, Ohio, Diebold maintains offices worldwide.

AKRON, OHIO (DEC. 4) PR NEWSWIRE - Telxon Corporation NASDAQ/NMS: TLXN) announced today that it is raising its earnings estimates for the fiscal 1991 third quarter and year.

"Earnings per share from third-quarter operations are expected to be in excess of $.25, and revenue will be more than $46 million, up from the October 1990 estimates of more than $.20 per share and in excess of $42 million in revenue " said Raymond D. Meyo, Telxon president and chief executive officer. "This excludes the $.03 extraordinary gain from our purchase of $2.1 million face amount of 7-1/2 percent convertible subordinated debentures in the third quarter.

"For the year, we estimate revenue will be in the $175 million to $180 million range, with earnings per share from operations in the $.85 to $.90 range," Meyo said. The company previously estimated fiscal 1991 revenue in the $170 million to $175 million range, and earnings per share from operations in the $.75 to $.80 range.

Looking to fiscal 1992, Meyo said the company expects revenue to be in excess of $210 million.

Telxon portable tele-transaction computers gather, process and store on-site, real-time data which is communicated to a host computer. These systems incorporate the company's proprietary operating and applications software, associated peripheral equipment and communications devices.

Telxon's executive and engineering offices are located in Akron, Ohio, and its manufacturing facility is in Houston. Telxon customers are served by 41 sales and service offices worldwide.

DETROIT (DEC. 4) PR NEWSWIRE - PolyCell, Inc., a subsidiary of Quest BioTechnology, Inc. (NASDAQ: QBIO) announced today that it has compiled a scientific bibliography which lists publications on the development of bispecific monoclonal antibodies and their use for research and clinical applications including diagnosis, imaging and therapy.

The bibliography and copies of selected articles are available free of charge upon request by contacting Dr. Werner H. Wahl, vice president, Science and Technology.

PolyCell has the worldwide rights to the patented Recombinant Monoclonal Antibody ("RMA") process that biologically produces QUADROMA(tm) cells which secrete bispecific monoclonal antibodies.

Bispecific antibodies may overcome the difficulties and limitations arising from covalent modification of monoclonal antibodies used in diagnostic and therapeutic applications. PolyCell has granted non- exclusive licenses for the QUADROMA technology and entered into corporate relationships with Cetus Corporation, Centocor, Inc., Medicorp, Inc., MCA Development BV, Sumitomo Corporation and another leading Japanese pharmaceutical company. PolyCell is seeking additional similar collaborations.

PolyCell is a development stage company organized to develop and commercialize the proprietary QUADROMA technology which biologically produces bispecific monoclonal antibodies primarily for cancer, cardiovascular and autoimmune disease therapy and diagnostic applications.

Quest is a development stage company organized to acquire, develop and commercialize biotechnology and human health care products and processes. Quest is organized into two groups, the Technology Development Group which manages Quest's two wholly owned subsidiaries, PolyCell and Quest Blood Substitute, Inc. and the Clinical Diagnostics Group, formed to implement turnarounds of diagnostic-based businesses.

QUADROMA is a trademark of PolyCell, Inc.

BAKERSFIELD, CALIF. (DEC. 4) PR NEWSWIRE - Nahama & Weagant Energy Co. (NASDAQ: NAWE) reported a substantial improvement in revenues and profits for both the third quarter and fiscal year to date period ended Oct. 31, 1990.

Net income for the third quarter increased to $367,000, equal to 7 cents per share, which included $159,000, or 3 cents per share, of extraordinary credit from the utilization of net operating loss carryforwards. In the corresponding quarter a year ago, the company reported net income of $41,000, equal to 1 cent per share.

Third quarter revenues increased nearly four-fold to $1,135,000 from $338,000 in the previous year.

For the first three quarters, net income totaled $464,000, equal to 9 cents per share, which included $201,000, or 4 cents per share, of extraordinary credit as described above. For the first nine months of the prior year, the

company had a net loss of $88,000 or 3 cents per share.

Revenues for the nine months climbed to $2,273,000, more than double $966,000 one year earlier.

Rodney Nahama, president and chief executive officer, said: "We are pleased by the company's outstanding progress in the third quarter. The strong improvement in our results reflected significant increases in oil and gas sales from our new field discoveries.

"Oil revenues benefited from higher production as a result of the company's December, 1989 discovery at North Rosedale Ranch, and the average price we received for our oil during the third quarter was up 54 percent from the same months a year ago. Higher gas production reflected the company's new field discoveries at South Putah Sink and Tracy Townsite which were made in January, 1990. The average gas price increasedd 11 percent as compared with the corresponding period of the previous year.

Based in Bakersfield, Nahama & Weagant Energy Co. is an independent engaging in oil and gas exploration, develpoment and production, primarily in California and Oregon.

#90338p9707 12/04/1990 ~PR Newswire

HIROSHIMA, Japan (DEC. 4) PR NEWSWIRE - Mazda launched a new locally-produced passenger car named the Mazda MR90 in the Indonesian market yesterday.

The new model, based on the FR (front-engine, rear-drive) Mazda 323, is a five-door hatchback with all new exterior and interior designs developed specifically for the local market.

The MR90 will be affordably priced among passenger cars in the Indonesian market. Monthly sales are expected to be approximately 1,500 units. The addition of the new car to Mazda's existing model lineup in Indonesia, the current FF (front-engine, front-drive) 323 and the 626, is expected to help Mazda secure a leading position in the country's passenger car market.

Supported by the sound growth of the national economy, the automotive market in Indonesia is experiencing vigorous expansion. Overall sales for January to October, 1990, totaled approximately 221,000 units, marking a 53-percent increase over the corresponding period in 1989. Continued strong sales should lead to a record high for the current year.

Mazda hopes the introduction of the affordably priced MR90 will further

stimulate demand in this market, and contribute to economic growth and increased motorization in Indonesia.

Speaking at the ceremony held yesterday in Indonesia, Norimasa Furuta, president of Mazda Motor Corporation, said, ''We learned through a market survey that a passenger car at an affordable price was what the Indonesian market truly needed. I'm convinced that the MR90, by filling that need, will prove very popular and become the 'people's car' in this country.''

The Mazda MR90 is locally produced, achieving nearly 75 percent local content overall in the manufacturing process, from raw material purchasing to final assembly. To promote this local passenger car production project, Mazda established in July 1989 an engine and body manufacturing plant, P.T. Mazda Indonesia Manufacturing, which commenced operation in August 1990.

#90338p9708 12/04/1990 ~PR Newswire

JACKSONVILLE, FL (DEC. 4) PR NEWSWIRE - AT&T today announced a three-month extension of its free-for-life charter membership plan for holders of the AT&T Universal Card, enabling people who have not yet applied to join more than seven million customers who are using their AT&T Universal Cards for shopping, dining, travel and discounts on long-distance calls.

Charter members of the AT&T Universal Card -- issued by Universal Bank of Columbus, Ga. -- pay no annual fees for the rest of their lives, as long as they sign up for the card within the charter membership period and use it as they normally would a MasterCard or VISA card, for a purchase at least once a year.

When launching the AT&T Universal Card on March 26, 1990, AT&T and Universal Bank had said the charter membership period would last through Dec. 31, 1990. Today's announcement extends the deadline through the one-year anniversary of the AT&T Universal Card -- March 26, 1991.

"We're delighted to continue offering the card that has set records in the credit card industry in less than a year," said Paul Kahn, president, AT&T Universal Card Services Corp. "This is our way to say 'thanks' to consumers, who have voted loudly and clearly that we're offering a combination of quality value and service that's been missing in the bank card industry.

"Extending charter membership will allow even more consumers to take advantage of a unique and innovative card that comes with no annual fee for life -- and during our research, consumers were most vocal about their dislike of annual fees associated with bank credit cards."

Kahn said a decision has not been made on any annual fee consumers might pay when signing up for the card after March 26, 1991, and that an announcement would not be forthcoming until early next year.

AT&T said the response to its AT&T Universal Card continues to exceed all expectations. In eight months, more than four million AT&T Universal Card accounts have been opened. Card members have used their cards to charge more than $3.3 billion in goods and services, and receivables stand at more than $1.3 billion. With more than 6.8 million cards in circulation, the AT&T Universal Card has quickly become the fifth most popular bank credit card in the country.

"Consumers have made it clear they want simple, basic, reliable products at a fair price," Kahn said. "They want quality and service they can count on...and no gimmicks. We've shown we provide that."

The AT&T Universal Card is accepted by all MasterCard and VISA merchants, includes a 10 percent discount on AT&T long-distance calling card rates, offers an interest rate lower than its major competitors, and is supported by the only unconditional service guarantee offered on any MasterCard or VISA card.

In addition, features normally associated only with gold bank cards are standard on the AT&T Universal Card. These include free collision damage coverage on rental cars, free extension of a manufacturer's warranty on products purchased with the AT&T Universal Card and free purchase protection from loss, theft or breakage.

To apply for the card, consumers should call toll-free 800-66-APPLY. Customer service associates are available 24 hours a day.

HOLLAND, MI (DEC. 4) PR NEWSWIRE - Donald G. Auch has been appointed vice president of Automotive Marketing and Sales at Donnelly Corporation (AMEX: DON). In this role, he will be responsible for all marketing and sales programs for all automotive products, including Automotive Vision Systems and Modular Window Systems. These two major automotive products groups produce interior and exterior rearview mirror components, complete interior and exterior rearview mirror assemblies, advanced added feature interior mirror systems (including lighted mirrors, lighted mirrors with electronic compass, and electrochromic mirrors), a variety of automotive interior trim and lighting products, and Modular Window Systems.

Auch has been with Donnelly for 17 years, serving in a wide variety of sales and marketing positions. His most recent area of responsibility was vice president for Marketing and Sales for Modular Window Systems. He has also been instrumental in establishing joint ventures and/or license agreements in both domestic and international markets.

An alumnus of Michigan State University, Auch is also a member of numerous automotive committees and societies.

Auch and his wife, Judy, live in Spring Lake, Mich. They have two sons. Donnelly Corporation is an international company dedicated to serving customers around the world with high-quality fabricated, molded, and coated glass products for the transportation and electronics markets. The company has been based in Holland since 1905 and today operates from 12 separate facilities in western Michigan.

In addition, Donnelly has a major manufacturing facility in Naas, Ireland; a marketing liaison office in Tokyo and in Detroit; an Advanced Technology Center in Tucson, Ariz.; and a manufacturing facility (in conjunction with Asahi Glass of Japan) in Mount Pleasant, Tenn. Donnelly is also recognized as a leader in the application of participative management practices.

HOLLAND, MICH. (DEC. 4) PR NEWSWIRE - John W. Carter has been appointed vice president for Modular Window Systems Engineering at Donnelly Corporation (AMEX: DON). In this role, he will be responsible for all engineering programs in the Modular Window Systems Business Group.

Growth in demand for automotive modular windows has been strong in recent years and this growth is expected to continue because the glass is encapsulated in plastic material to produce an assembly which is easily installed into an automobile, truck, or van. These window assemblies result in higher quality, offer greater aerodynamics and design freedom to automotive manufacturers, and they are more cost competitive than conventional windows.

Carter joined Donnelly in 1986 as Modular Systems Engineering operations manager and served in that role until he accepted this new appointment. He has been very active in supporting the rapid growth of the Modular Systems Group and was instrumental in expanding production facilities, developing a strong CAD/CAM technology in the company, building a stronger engineering group in Modular Systems, and in the establishment of a Detroit sales office.

Donnelly Corporation is an international company dedicated to serving customers around the world with high-quality fabricated, molded, and coated class products for the transportation and electronics markets. The company has been based in Holland, Mich., since 1905 and today operates from 12 separate facilities in western Michigan. In addition, Donnelly has a major manufacturing facility in Naas, Ireland; a marketing liaison office in Tokyo, and in Detroit; and Advanced Technology Center in Tucson, Ariz.; and a manufacturing facility (in conjunction with Asahi Glass of Japan) in Mount Pleasant, Tenn. HOUSTON (DEC. 4) PR NEWSWIRE - CRSS, Inc. (NYSE: CRX), through its subsidiaries one of the largest and most diversified design and construction services companies in the nation, today announced expected earnings for the current fiscal year within the range of $0.85 to $1.05 per share. Earnings for the year ended June 30, 1990, were $1.31 per share.

Commenting on the announcement, Richard L. Daerr, president and chief operating officer stated, "The expected earnings reflect a slowdown in new orders and the timing of capital spending decisions experienced by our design and construction services subsidiary, CRSS Services, Inc., resulting primarily from the economic and political uncertainty existing today."

Earnings for the quarter ended Dec. 31, 1990 are expected to be within the range of $0.20 to $0.22 per share compared with the earnings for the second quarter of the prior fiscal year of $0.35 per share.

"Although our short-term operating results are expected to be impacted by the current economic and political uncertainty, our confidence in the long-term prospects of CRSS Inc. is very strong," Daerr commented. He added that the company continues to expect to double revenues, net income and cash flow by 1995.

CRSS, through its subsidiaries, is a diversified design and construction services company and is involved in the independent power/cogeneration industry. CRSS has also expanded through its interest in NaTec Resources, Inc., into the acid rain pollution control market.

MINNEAPOLIS (DEC. 4) PR NEWSWIRE - Ciatti's, Inc. (NASDAQ: CIATU) president and chief executive officer William C. Ferril today announced the election of Christopher L. Collier as vice president and chief financial officer of Ciatti's in addition to his present responsibilities as treasurer and assistant secretary. The CFO responsibilities previously were held by Ferril who remains president and CEO.

Collier, (29), joined Ciatti's in May 1988, initially as controller and was elected treasurer and assistant secretary in November of that year. During the past two and a half years, he has effectively managed the development and implementation of the current computerized financial reporting system and has been instrumental in working with Ciatti's lenders.

Prior to joining the firm, he was with the accounting firm of KPMG Peat Marwick for five years in their Minneapolis office. Collier received his B.A. degree in 1983 from Miami University in Oxford, Ohio, and his C.P.A. certification in 1983.

Collier resides in Chanhassen, Minn., with his wife, Margie, and his daughter, Lindsey.

CEO William C. Ferril commented, "In the past two and half years, Chris has made outstanding contributions to the growth and management of Ciatti's. This promotion recognizes his contributions and his growing responsibilities."

Ciatti's Inc. is a Minneapolis-based corporation operating 10 Italian restaurants in Minnesota and Wisconsin.

DARIEN, CT (DEC. 4) PR NEWSWIRE - Bowater Incorporated (NYSE: BOW) confirmed the announcement made earlier today by Georgia- Pacific Corp. (NYSE: GP) that Bowater will conduct jointly with Georgia- Pacific an engineering and financial feasibility study of the properties in Millinocket and East Millinocket, Maine, which Georgia-Pacific acquired last year upon its merger

with Great Northern Nekoosa Corp.

The objective of the joint studies, which are expected to take about six months, is to develop a long range strategy and investment plan for the properties, possibly leading to a joint venture expansion of the lightweight coated groundwood publication paper grades manufactured there.

"It is well known that Bowater has been looking for a way to expand its base in coated publication papers," said A.P. Gammie, Bowater chairman and C.E.O. "Therefore, when Georgia-Pacific approached us and invited us to apply our extensive experience in making newsprint, groundwood based coated paper and other groundwood grades to the development of the Maine properties, we saw a possibility in time of gaining the extra production we seek. Manufacturing in Maine would allow us to add lighter weight, northern fiber papers to our well established southern grades."

Gammie stressed that all the two companies have agreed at the present time is to do the joint studies announced today. "We do not expect to make any further announcements on the project until we know the outcome of the studies " he said.

Bowater Incorporated is a major manufacturer of newsprint, coated publication papers, bleached kraft market pulp, and a converter of communication papers for business.

#90338p9722 12/04/1990 ~PR Newswire

MINNEAPOLIS (DEC. 4) PR NEWSWIRE - Minneapolis-based London Diagnostics, Inc. announced today the signing of a three-year, $5.5 million agreement with Maruzen Petrochemical Co., Ltd., of Tokyo, Japan.

This agreement, along with a separate, $4.5 million agreement with Maruzen which was signed in April 1989, brings to $10 million the total of agreements between the two companies between 1989 and 1993.

In conjunction with the signing of the second contract, London Diagnostics received $2.875 million from Maruzen, a portion of which is for the purchase of an equity interest in London Diagnostics and a portion of which is for support of research and development. The balance of the $10 million will be paid as London Diagnostics develops products specified by the agreements.

Under the agreement, London Diagnostics will develop endocrine diagnostic products, for use in the thyroid, fertility, pituitary and pancreatic testing markets. Maruzen will receive manufacturing and distribution rights for London Diagnostics' products to the Far East, but London Diagnostics will retain

manufacturing and distribution rights for the rest of the world.

"We are tremendously excited about this second agreement with Maruzen," said Iraj Beheshti, Ph.D., founder, president and chief executive officer of London Diagnostics. "It represents recognition by Maruzen of the strength of our research and development team. And it has secured funding for us at a point when we are ready to expand dramatically our product offerings."

London Diagnostics, Inc., which is privately held, was founded in 1985. It develops and manufactures diagnostic products for the endocrine market. Its products utilize chemiluminescence, a natural phenomenon in which light is emitted during a chemical reaction.

London Diagnostics customers include some of the nation's preeminent medical centers, including Massachusetts General, the National Institutes of Health, Johns Hopkins, University of Minnesota, Cedars Sinai Hospital, and Walter Reed Army Medical Center.

Maruzen Petrochemical Co., Ltd., based in Tokyo, is a multinational corporation engaged in the import and export, manufacture, processing, and training of petrochemical and other products.

LAS VEGAS (DEC. 4) PR NEWSWIRE - MICOM Communications Corp. will announce a new local terminal server capability at DEXPO West '90, the national exhibition for users of Digital Equipment Corp. equipment, to be held in Las Vegas next week.

The InstaGate 1500 Terminal Server, available in single protocol and dual protocol versions, provides full local terminal server access to any device on an Ethernet local-area network (LAN). The LAN Interface Module, a board-level plug-in product for the InstaGate 1500, supports the three popular Ethernet LAN wiring variations: Thinnet, Thicknet and twisted-pair.

The single protocol Module provides DEC LAT networking capability. The dual protocol version is targeted at networks where both DEC LAT and TCP/IP are being used. Forward and reverse LAT, and forward and reverse Telnet are supported. rlogin capability will be added in early 1991.

Additionally, MICOM now offers an X.25 Interface Module for the InstaGate 1500 Terminal Server that provides remote access via an X.25 Packet Data Network connection. The InstaGate 1500 can also support remote connections through a modem or multiplexor link or via MICOM's Instanet CommServer, one of the

industry's best selling communications servers.

Pricing of the InstaGate 1500 Local Terminal Server begins at $5,499 which provides 32 ports with LAT support. Up to 128 channels can be supported in DEC LAT networks. The dual protocol version adds $400 to the base price. Pricing for the X.25 Interface Module has been set at $3,199.

MICOM Communications Corp. is a global supplier of data/voice integration, local networking and wide area networking (WAN) products including X.25 products.

For more information, write MICOM Communications Corp. at 4100 Los Angeles Ave., Simi Valley, CA 93063. Phone: 805-583-8600. Fax: 805-583-1997.

PITTSBURGH (DEC. 4) PR NEWSWIRE - Equibank today awarded a grant of $4,200.00 to the Homewood-Brushton Revitalization Development Corp. (HBRDC), it was announced.

The grant will be used to purchase computer equipment for the corporation's office.

"We are very pleased to receive this grant from Equibank," noted Mulugetta Birru, director of the Homewood-Brushton Revitalization Development Corp. "The computer equipment will enable us to manage our office more efficiently and upgrade the services to our community."

Equibank's grant to the Homewood-Brushton Revitalization Development Corp. is part of the bank's ongoing program to assist the city's neighborhoods. The bank is committed to assisting organizations and citizens through programs that promote economic self-sufficiency.

Howard Slaughter, community development officer at Equibank, made the presentation and added, "Equibank is happy to help HBRDC purchase this equipment. Office automation is essential to efficient management of an organization with such important responsibilities."

Equibank is a subsidiary of Equimark Corp. (NYSE: EQK), a diversified financial services corporation with assets of $3.5 billion. Equibank, with assets of $2.8 billion, operates 55 offices in southwestern Pennsylvania.

HOUSTON (DEC. 4) PR NEWSWIRE - Tescorp, Inc. (NASDAQ: TESC) today announced the execution of a nonbinding letter of intent to acquire Reed Products, Inc. a Houston-based manufacturer of molded underwater electrical connectors used in the geophysical industry and in other applications.

According to C. Robert Bunch, president and chief executive officer of Tescorp "Reed will be an important addition to our geophysical products product line. We are excited about this acquisition, especially considering the excellent Reed people who will join the Tescorp team." Terms of the transaction were not disclosed.

Separately, Tescorp announced that its board of directors has declared a regular quarterly cash dividend of $0.125 per share on its Series 1990 convertible preferred stock. The cash dividend is payable Jan. 11, 1991 to shareholders of record as of Dec. 14, 1990.

Tescorp manufactures and sells cable, connectors and geophones to the geophysical industry through its Tescorp Seismic Products division. The company also manufactures and distributes oil and gas production equipment through its Clif Mock division. For the six months ended Sept. 30, 1990, Tescorp's revenues were $12,033,000 and net income was $705,000, or $0.08 per share.

FORT LAUDERDALE, FLA. (DEC. 4) PR NEWSWIRE - James J. Whidden, chairman of Bio-Monitor Inc. (NASDAQ: BMON) today announced that the company has signed an exclusive agreement with Florida-based Product Delivery Services, Inc. (PDS), a distributor of durable medical equipment and disposable medical products, granting Bio-Monitor the exclusive right to sell PDS' product line at its Medical Depot Superstores. Per the agreement, a majority of these products will be distributed from warehouses opened and maintained by PDS.

Concurrently, Bio-Monitor signed an agreement with Florida-based Kiosk Systems granting the company the U.S. marketing rights to a highly advanced computer control system that can administer the warehousing and delivery of up to 50,000 different items, including all point of sale ordering, invoicing, inventory management, accounting and billing functions. One of the keys to the system is on-line links from Medical Depot store locations to terminals located at warehouse facilities and customer locations. Bio-Monitor will install the first system in its Margate, Fla. Medical Depot Superstore in December 1990 and the system is expected to be fully operational with customers on-line in March 1991.

Taken together, the two agreements will allow Bio-Monitor, as well as all other Medical Depot franchisees, to increase the amount of product stocked in each Superstore from 1,500 items to 15,000 items, and also make another 15,000 items available for 24 hour "Just In Time" delivery. Each store will also have available a 50,000 item computerized catalog, in comparison to the previously available 4,000 item mail order catalog. As well, orders from large volume, wholesale purchasers, such as hospitals or home healthcare providers, can be entered directly into the system and quickly transmitted to the nearest Medical Depot store for prompt delivery to the customer.

Commenting further, Whidden stated, "We believe these agreements will grant Bio-Monitor and other Medical Depot franchisees an unparalleled ability to meet the medical equipment and product needs of the healthcare industry on an economical, timely and efficient basis at a time in which cost control and containment are becoming the watch words of our industry. As such, this enhancement to the Medical Depot concept will also allow our wholesale customers to enjoy the benefits offered by one-stop-shopping and 'stockless' inventory."

The Medical Depot franchise is a retail store offering a complete selection of durable and disposable medical equipment, supplies and comfort items, sold to the public at retail, and segments of the healthcare industry at wholesale. The "depot" concept is modeled after the popular Home Depot and Office Depot concepts. Bio-Monitor's first two Medical Depot Superstores are located in Margate, Fla. and Deerfield Beach, Fla.

MIAMI LAKES, FLA. (DEC. 4) PR NEWSWIRE - A joint announcement was made today of the closing by Oak Tree Construction Computers, Inc. (NASDAQ: AOAK) of its acquisition of First Security Funding, Inc., Fort Worth, Texas, a major funder-processor of medical insurance receivables, according to Irwin B. Stack chairman of Oak Tree and D.R. Smith, president of First Security Funding. The final agreement was all stock transaction which places the principals of First Security in a majority position.

Simultaneously, the signing of a funding-processing contract with Century Health Care Corporation (Tulsa, Okla.) was announced by First Security which will commence immediately with the funding and processing of medical claims for several of the group's facilities. The $89,000,000 volume hospital group operates units in several states.

First Security Funding, Inc. is rapidly becoming one of the leading firms in the industry. The firm currently processes approximately $200,000,000 in medical insurance receivable claims primarily for hospitals, clinics and various medical facilities in 28 states.

"We are now in contract discussions with several other major providers," stated Smith, "and consequently anticipate that we will substantially increase our current volume within the first quarter of 1991 which should reflect in a significant return to profitability by the new Oak Tree," he concluded.

Predicated on shareholder approval, Oak Tree intends to increase its authorized but unissued common stock partially to accommodate the needs of the First Security transaction which calls for an initial exchange of 6,000,000 shares and a subsequent issuance of 5,960,000 shares to acquire all the oustanding stock of First Security.

Immediately after the closing, D.R. Smith, Terry D. Cashion and Mickey Yates, the former principal shareholders and current operating officers of First Security, were appointed to the board of directors of Oak Tree. Irwin Bosh Stack, also a former shareholder of First Security, will continue as chairman of the board of Oak Tree, a position he has held since 1986. In addition, Smith was named president, and Cashion and Yates were both appointed vice presidents of Oak Tree.

Oak Tree, founded in Nashua, N.H., originally marketed its own line of computer hardware and software to the construction industry, primarily in New England. The severe decline of the building industry led the company to

abandon that direction and seek new business avenues.

BUFFALO, NY (DEC. 4) PR NEWSWIRE - Net revenues for Ecology and Environment, Inc. (AMEX: EEI) for the first quarter ended Oct. 27, 1990, reached a record high of $20.9 million, up 25 percent from the first quarter of last year. Net income increased 27 percent to $1.5 million, or $.38 per share, the company announced today.

Ronald L. Frank, executive vice president and chief financial officer, attributes the increase in net income to increased net revenues. Operating margins remained steady between the two periods. The higher net revenues were primarily due to the company's continued expansion of its investigation and remediation services with clients other than the U.S. Environmental Protection Agency. Frank anticipates that the company's increased market penetration of the private sector, as well as performance of services to a greater number of government agencies, will continue to positively affect growth trends in the near future.

Ecology and Environment, Inc., headquartered in Lancaster, N.Y., a suburb of Buffalo, is a firm of international specialists in the environment. Founded in 1970, the company has offices in 25 cities throughout the United States, and is represented in more than 22 countries around the world. It presently employs over 1,200 employees.

NEW YORK (DEC. 4) PR NEWSWIRE - Paramount Communications Inc. (NYSE: PCI) today announced the appointment of Anthony E. Hull to the newly created position of senior director, financial planning, at the entertainment and

publishing company.

Hull, 32, had been a vice president in the mergers and acquisitions department of the communications group of Morgan Stanley & Co. Incorporated. Prior to joining Morgan Stanley, he was assistant production manager for Metromedia Television, WNEW-TV, the predecessor of WNYW, Fox TV.

In his new position, Hull will be responsible for acquisition planning and analysis, business forecasting, and special project work. He will report to Ronald L. Nelson, executive vice president and chief financial officer.

"Tony Hull's knowledge of the media and entertainment businesses will be extremely valuable as we continue our strategy of building assets to provide long-term shareholder returns," Nelson said.

Hull holds a bachelor's degree in economics from Amherst College and an M.B.A. from Columbia University Graduate School of Business.

HILLSIDE, IL (DEC. 4) PR NEWSWIRE - Wallace Computer Services, Inc. (NYSE: WCS) had a 1.7 percent increase in sales and a 1.5 percent increase in net income for its first quarter of Fiscal 1991.

For the three months ended Oct. 31, 1990, Wallace had net income of $9,216,000 or 43 cents per share compared with $9,079,000 or 43 cents per share in the comparable period last year. Prior year figures include income of $1,550,000 from the settlement of a patent infringement lawsuit.

Sales for the quarter were $112,100,000 versus $110,211,000 last year. "Business conditions in the first quarter remained very competitive, as we had anticipated; however, our Wallace Press, Label and TOPS Divisions reported favorable improvements in both sales and operating margins," said Ted Dimitriou, chairman and chief executive officer.

"The Business Forms Division results were not up to historical standards for the first quarter due to very aggressive market pricing conditions. We do not expect any significant change in market conditions for Business Forms in the near future," he added.

Wallace Computer Services, Inc. is a leader in the computer services and supply industry. The company's products and services include business forms, commercial printing, computer hardware and software, computer labels and accessories, machine ribbons and other office products. Wallace has sales offices, and manufacturing and distribution facilities throughout the United

States.

COLUMBUS, OH (DEC. 4) PR NEWSWIRE - Holiday shoppers who put off their shopping until the last possible moment have another option besides running from store to store in a frenzy on Christmas Eve.

The electronic Mall(R), an online shopping service available to members of the CompuServe Information Service, allows shoppers to bypass the long lines and harried store clerks, and place orders directly with the merchant via their personal computer and modem.

This holiday season, connect charges for the Electronic Mall are free until 1991. (Normally, members pay $12.50 per hour while using CompuServe.) As an added service for last-minute shoppers, the Mall provides a list of its merchants who deliver overnight and can accommodate an "eleventh hour" order.

Thus, shoppers can order a gift from some merchants, including Brooks Brothers Hammacher Schlemmer, and Sears Catalog, on December 23 and receive it on Christmas Eve - a pace to make even Santa envious.

"We're seeing heavier traffic in the Mall later and later each season," said Regina Brady, CompuServe's director of customer promotion. "It's evident that the last-minute online shoppers are growing in number. We're trying to make it easier for shoppers to find what they want and order it quickly, without ever having to leave home."

Many of the items available through the Mall can be seen in "Go Mall," the printed guide to the Electronic Mall included in each issue of CompuServe Magazine, which is mailed monthly to all CompuServe members. For each gift item mentioned in the December issue of "Go Mall," order information includes "order by" dates for standard delivery, plus any rush delivery services offered by the merchant.

The Mall's 100 merchants, ranging from small specialty stores to retail giants such as Sears Catalog and JCPenney, offer thousands of items, including fresh fruit and flowers, European vacations, automobiles, apparel and home electronics. Throughout the holiday season, CompuServe and the merchants provide a variety of consulting services to help members find appropriate gifts.

"Holiday Bazaar '90," a gift guide appearing both online and in "Go Mall," saves time for the last-minute shopper by offering several gift suggestions in each of 13 categories. Categories include "Babes in Toyland," "Out-of-the-Ordinary Offerings," "Scrooge's Source" (gifts under $10) and "Rudolph's Ransom" (gifts priced at $1,000 and up).

Gift suggestions include a St. Andrew's golf sweater from Austad's Golf Shop, a talking Bart Simpson doll from JCPenny and a tin full of Christmas cookies from Pepperidge Farm.

MIDDLEBORO, MA (DEC. 4) PR NEWSWIRE - The Mayflower Co-operative Bank (NASDAQ: MFLR) announced net earnings of $34,000 or 4 cents per share for the second quarter ending Oct. 31, 1990, compared to earnings of $62,000 or 7 cents per share for the same quarter last year.

Net earnings for the six months ended Oct. 31, 1990, were $79,000 or 9 cents per share compared to $194,000 or 22 cents per share, for the comparable period one year ago.

William C. MacLeod, president and chief executive officer, stated, "The earnings of the bank continue to be effected by the overall weakness in the regional real estate market. As a result of these continued depressed economic conditions, the bank has continued to review and evaluate its loan portfolio and has provided $120,000 in the second quarter for possible loan losses bringing the year-to-date provision to $200,000."

As of Oct. 31, 1990, the bank's loans delinquent 90 days or more totaled $3.4 million or 4.50 percent of total loans and 3.72 percent of total assets. At Oct. 31, 1990, the bank's reserve for loan losses totaled $452,000 which was 13.45 percent of loans delinquent 90 days or more and 0.60 percent of total loans.

The Mayflower Co-operative Bank, with three offices in southeastern Massachusetts, is a state-chartered co-operative bank and has its deposits insured by the Federal Deposit Insurance Corporation (FDIC) and the Share Insurance Fund (SIF) of Massachusetts.

HOUSTON (DEC. 4) PR NEWSWIRE - American General Corporation (NYSE: AGC) announced that it is reviewing two proposals relating to its Home Service insurance subsidiaries received pursuant to its previously announced invitation for bids. No proposals were received for the company as a whole.

"We expect to report directly to our board of directors at a meeting to be held on Thursday, Dec. 6," said Senior Vice President James S. D'Agostino Jr. "We do not expect to comment further until the board has considered the matter and determined what course of action will best serve the interests of our shareholders."

On Oct. 25, 1990, American General's board set the Dec. 3, 1990, deadline for submitting bids in connection with the pending sale process. This deadline applied to both the proposed sale of the company as a whole, announced on May 2, 1990, and the restructuring plan providing for the sale of the Home Service insurance companies, announced on Sept. 19, 1990.

American General is a consumer financial services organization with assets of $34 billion. Headquartered in Houston, American General is one of the nation's leading providers of life insurance, tax-qualified retirement plans, and consumer loans. American General common stock is listed on the New York, Pacific, London, and Swiss stock exchanges.

PEARL RIVER, NY (DEC. 4) PR NEWSWIRE - CGI-Informatique, a worldwide software products and services firm based in Paris, announced today that it has acquired Yourdon, Inc. from the Eastman Kodak Company.

Yourdon, Inc. markets, develops and supports automated tools used by large organizations to develop custom software applications such as billing and inventory systems. The company was founded in 1974 by Edward Yourdon, a noted computer industry author and developer of the Yourdon Structured Method.

The Yourdon Structured Method, which divides the software development process into a series of highly structured steps, is the world's most widely used software development approach. More than 200,000 software developers worldwide use the Yourdon Structured Method to build software applications.

Yourdon, Inc, which is based in Raleigh, N.C., has revenues of approximately $7 million and 50 employees. The company also has offices in London and in four U.S. cities.

CGI-Informatique, a publicly held firm traded on the French stock exchange, has revenues of $260 million, employs 3,000 people in more than 40 locations and has business activities on five continents.

Bernard Chapot, vice chairman and chief operating officer of CGI-Informatique, said the acquisition of Yourdon, Inc. represents a significant step in the company's strategy to expand its software and service activities, particularly in North America.

CGI-Informatique's wholly owned subsidiary - CGI Systems, Inc in Pearl River, N.Y. - is responsible for the marketing and support of the company's computer-aided software engineering (CASE) tools PACBASE and PACLAN in the United States and Canada.

CGI Consulting Inc., in Berwyn, Pa., provides software consulting and training in the United States. CGI Systems, Inc. and CGI Consulting, Inc. have a combined staff of 500 employees and revenues of $40 million.

#90338p9758 12/04/1990 ~PR Newswire

MOLINE, ILL. (DEC. 4) PR NEWSWIRE - Deere & Company (NYSE: DE) Chairman and Chief Executive Officer Hans W. Becherer said today, "The lower net income in the final quarter of 1990 resulted primarily from significantly lower production of lawn and grounds care products and industrial equipment, reflecting our response to a weaker general economy in North America. Sales incentive costs were substantially higher due to extremely competitive market conditions. Fourth quarter results in 1989 were affected by a four-week strike at the company's lawn and grounds care equipment factory in Wisconsin.

The company's worldwide equipment operations, which exclude income from the financial services subsidiaries, had net income of $39.8 million in the fourth quarter of 1990, compared with $66.4 million in the year-ago period. For the entire year, these operations earned $284 million in 1990, compared with $248 million in 1989. Income tax rates in the fourth quarter of both years were low due to previously unrecognized tax credits.

Net income from credit, insurance and health care operations for the fourth quarter of 1990 was $33.7 million, compared with $36.5 million in the same period last year. Net income of these operations was $121.7 million in the 1990 fiscal year, compared with income of $124.0 million in 1989.

North American retail sales of John Deere agricultrual equipment improved for the entire 1990 fiscal year, but were lower in the fourth quarter. Lawn and grounds care product retail sales were down significantly compared with last year's final quarter, and were lower for the entire year. Retail sales of John Deere industrial equipment were relatively unchanged in the fourth quarter of 1990, but somewhat higher for the year. Demand for John Deere products overseas was flat for the fiscal year and lower for the quarter.

Total consolidated assets at Oct. 31, 1990, were $10.664 billion, which included $5.067 billion of financial services assets. Total assets increased by $1.519 billion during 1990, $639 million of which was attributable to the continued growth of the company's credit, insurance and health care operations.

The following information is disclosed on behalf of the company's U.S. credit subsidiary, John Deere Capital Corporation, in connection with the disclosure requirements of programs providing for the issuance of debt securities:

John Deere Capital Corporation earned $14.4 million in the fourth quarter of 1990, compared with $20.2 million in the same period last year. For the 1990 fiscal year, net income totaled $66.3 million, compared with net income of $67.4 million in 1989.

The slightly lower fiscal year income resulted mainly from a higher provision for credit losses on new lines of business, which was partially offset by higher margins earned on a larger volume of receivables financed this year and by increased gains on sales of retail notes to other financial institutions. The lower net income for the fourth quarter this year also reflects a higher provision for credit losses and higher expenses resulting mainly from refinements relating to the deferral of receivable acquisition costs, which were partially offset by increased margins earned on a higher volume of receivables financed.

Total net credit receivables and leases of John Deere Capital Corporation were $3.516 billion at Oct. 31, 1990, compared with $3.044 billion one year ago.

MINNEAPOLIS (DEC. 4) PR NEWSWIRE - Metropolitan Financial Corporation (NYSE: MFC), Minneapolis, announced today that it has completed its offering of 425,000 units consisting of one share of $2.875 cumulative perpetual preferred stock and one warrant to purchase one-half share of common stock.

The units were priced at $25 per unit with the warrant entitling the holder to purchase one-half share of the common stock at $12.50 per share. The preferred stock is nonredeemable for five years and the warrants expire in ten.

The company noted that the offering's underwriters, Dain Bosworth Incorporated and Piper, Jaffray & Hopwood Incorporated, both of Minneapolis, exercised an overallotment option granted them by the company and purchased an additional 63,750 units, the full amount granted under the option.

The offering raised $12.2 million for Metropolitan. Proceeds will be used to enhance the financial condition of the company's insured savings bank subsidiary, Metropolitan Federal Bank, fsb, and to facilitate its expansion in the Upper Midwest.

Prior to the offering the bank exceeded all the current and fully phased in regulatory capital requirements. After giving effect to the application of proceeds, the pro forma tangible, core, and risk-based capital ratios of the bank at Sept. 30, 1990 would have been 3.30 percent, 4.40 percent, and 11.80 percent, respectively, as compared with the fully phased in requirements of 3.00 percent, 3.00 percent and 8.00 percent, respectively.

Metropolitan Financial Corporation is a regional financial services holding company. Its full service consumer savings bank, Metropolitan Federal Bank, Fargo, N.D., operates 110 offices in 92 communities in the states of North Dakota, Minnesota, Iowa, South Dakota, Wisconsin, and Arizona and is the Twin Cities largest originator of residential mortgage loans.

Its real estate sales and brokerage subsidiary, Edina Realty, is Minnesota's largest home seller. At Sept. 30, 1990 the company reported consolidated

assets of nearly $4.2 billion. Metropolitan Financial Corporation's common and preferred stock trade on the New York Stock Exchange. The common under the symbol MFC. The newly issued units trade on the NASDAQ National Market System under the symbol MFCNU.

JACKSONVILLE, FL (DEC. 4) PR NEWSWIRE - In an effort to better utilize technology in offering products and service, Barnett Banks, Inc. (NYSE: BBI) has formed a new company, Barnett Technologies Inc.

The new company is a merger of the former Barnett Operations Company and Barnett Computing Company. Jonathan Palmer, executive vice president, will serve as chairman and chief executive of the new company.

"This new structure will help us deliver industry-leading, technology-based products and services," Palmer said. "Ultimately, this will provide customers with more convenience and better service."

Before the merger, operations and computing operated independently of each other. With Barnett Technologies, the operations and computing areas will work together closely to deliver operating and information services to Barnett's 32 banks in Florida and Georgia.

"We have now aligned ourselves to better serve our 32 affiliate banks. This will help as we continue to increase our information technology development," Palmer said.

"Information technology" includes projects such as check imaging, which will create a computer picture of every check Barnett handles, enabling the company to work with the image rather than the check itself. This will reduce the repetitive handling of documents and improve customer service and productivity.

In the future, Barnett customers may receive image statements. Instead of checks, customers will get high-quality picture images of their checks. This will eliminate the need for Barnett to send the checks themselves, reducing the weight of a statement package and reducing customers' costs.

Customer convenience is one of Barnett Technologies' top priorities, Palmer said. "We are working to develop the technological infrastructure that will enable customers to do business at any place, any time."

Barnett's Automated Response Telephone (BART) is already helping to accomplish this goal. It currently receives more than 100,000 calls a month from customers needing information about their accounts.

"We plan to develop systems that can support customers' needs and anticipate changes in business. Barnett Technologies Inc. will give us the combined resources to accomplish our goals," Palmer said.

With $31.4 billion in assets and 590 offices in Florida and Georgia, Barnett is the leading financial institution in Florida and the 20th-largest in the country. The company's stock (BBI) is listed on the New York Stock Exchange.

AVON, MASS. (DEC. 4) PR NEWSWIRE - Child World, Inc. (NASDAQ-NMS: CWLD) today announced a plan to conserve cash during the Christmas season.

Under the plan, the company will continue to pay interest on its loans and full payments will be made on any merchandise orders placed between Dec. 5, 1990, and Jan. 15, 1991. After that period, the company would expect to seek the resumption of normal trade terms. The plan also calls for a suspension through Jan. 15, on principal payments on the company's seasonal working capital line. Child World is also negotiating for an extension of its working capital line until 1992.

The plan has been adopted to put vendors and lenders on an even footing and to provide a continual supply of merchandise during the critical Christmas season. The company said that cash on hand, together with cash generated from operations, will be enough to assure vendors of prompt payment for new shipments.

"This is a prudent response to an unexpected combination of events," said Child World President Peter Hayes. "I am optimistic of a successful outcome. It is in the best interests of all parties -- vendors and lenders -- to ensure that Child World's Christmas season, the source of half of our annual sales, is as strong as possible. Child World expects to maintain its position as a major customer for its suppliers."

Child World, the second-largest retail toy supermarket chain in the United States, will aggressively pursue meetings with its suppliers this week. The agent bank for Child World already has indicated its support for the plan. Company management will also discuss the program with the Toy Manufacturers Association later this week.

Child World also announced its results for the third quarter which ended Nov. 3, 1990. Net sales for the quarter of $185.6 million increased 18 percent

over last year's net sales of $157.3 million. For the first nine months of 1990, net sales rose 9.6 percent to $466.5 million from $425.6 million for the first nine months a year ago. Third-quarter comparable store sales increased 3.5 percent while comparable store sales for the first nine months were flat.

Sales benefited from improvement of in-stock levels, marketing programs that emphasized aggressive pricing and the company's "Fair Price Guarantee." More frequent circular advertising and television advertising also promoted the company's unique layaway program.

The third-quarter net loss was $14.4 million, or $1.26 per share, compared to a net loss of $4.1 million, or $.36 per share, in the third quarter last year. The increased net loss was due to a reduction in the estimated effective rate for taxes for the entire year from 49 percent to 32 percent, and a lower gross margin rate associated with promotional pricing and increased advertising to stimulate additional customer traffic. Expenses for stores opened less than a year also contributed to the increased net loss. The nine-month net loss was $30.3 million, or $2.66 per share, compared to a net loss of $14.4 million, or $1.26 per share, in 1989.

Child World's business is highly seasonal. Operations in the fourth quarter, which includes the Christmas selling season, historically provide approximately half the annual sales and all of the company's earnings for the year.

In the fourth quarter, Child World expects to provide for restructuring its operations. Possible actions include additional markdowns and further reductions in fixed costs. These moves, for which charges will be reflected in the fourth quarter, will result in Child World reporting a substantial loss for the year.

Child World is actively pursuing other strategic alternatives, including a restructuring of its working capital lines, programs to reduce working capital needs, new sources of financing, and a renewed effort to sell the company.

Hayes said that Child World has a number of operating strengths that the company plans to exploit.

First, while Child World is the second-largest retail toy supermarket in the country, most of its stores are in New England and the Midwest, leaving room for expansion into other areas, like California, without saturating the market.

Second, Child World has valuable leases in desirable marketing areas that would be difficult for competitors to match on the same terms.

Third, the company's test of a new store format in nine stores has been extremely successful. The new format creates more open space and a less rigid presentation of product while requiring less inventory.

Fourth, Child World is generally among the top five purchasers across all lines of toys and toy-related items.

Child World operates 182 toy supermarket stores in 32 states. The company opened eight new stores this year, including its first in the Southern California market. Child World stores offer a broad assortment of merchandise including toys, bicycles, baby furniture, electronics, learning toys, juvenile apparel, children's sporting goods, and outdoor play equipment.

EDWARDS AIR FORCE BASE, CA (DEC. 4) PR NEWSWIRE - A Lockheed team YF-22 Advanced Tactical Fighter prototype conducted the first missile launch by an ATF during flight testing here last week.

With General Dynamics (NYSE: GD) test pilot Jon Beesley at the controls, the YF-22 successfully launched an unarmed AIM-9M Sidewinder missile on a range at the China Lake Naval Weapons Center.

"Our weapon delivery system performed within prescribed limits," said Sherm Mullin, Lockheed vice president and general manager, F-22 Team Program office. "Since our prototype is so close to the production version we are proposing, this demonstrates that our weapon employment suite is on its way to a low risk full scale development," he said.

"This is the culmination of a four-year development effort. After the initial design phase, extensive wind tunnel separation tests were conducted to develop the weapon carriage and launch system tested here. The success of this test

confirms that the analysis tools we're using are very accurate," Mullin said.

This aircraft is Lockheed's primary demonstrator for weapons bay characteristics and launch performance. In December, plans call for it to launch an AIM-120A AMRAAM missile.

Lockheed's YF-22 represents one of two proposed designs in the United States Air Force's Advanced Tactical Fighter competition. Lockheed, teamed with Boeing (NYSE: BA) and General Dynamics, designed, built and in now flight testing its YF-22 prototype under a $697-million Air Force contract.

The Lockheed team will continue to fly the two YF-22 prototypes through the end of this year. In 1991, the Air Force will select a single weapon system design to go into full-scale development.

#90338p9780 12/04/1990 ~PR Newswire

PHILADELPHIA (DEC. 4) PR NEWSWIRE - Consolidated Rail Corp. (NYSE: CRR) has completed a three-year, $33 million program increasing the vertical clearance on its tracks between Chicago and the metropolitan New York/New Jersey area to 20-feet, 6-inches.

The work enables double-stack trains with high cubic capacity containers to use the route.

In all, Conrail increased vertical clearances at 98 bridges and tunnels along the route since work began in 1988.

"This achievement is another demonstration of Conrail's commitment to double-stack transportation," said James A. Hagen, Conrail's chairman, president and chief executive officer. "With the higher clearance between Chicago and New York, Conrail expands its capabilities on this key east-west route to meet the growing demand by both international and domestic customers for double-stack service. Conrail is now able to fully develop its domestic container programs between Chicago and New York, two of the largest consumer markets in the nation."

Additional benefits will be realized when work funded by the state of New Jersey is completed. The work involves construction of a new connection at Marion Junction in Jersey City which will improve operational efficiency in the northern New Jersey area.

Conrail has operated double-stack trains between Chicago and northern New Jersey since 1984. However, because of the previous clearance of 19-feet, 4-inches, a high cubic capacity container could only be stacked with a smaller

container. The 20-foot, 6-inch clearance allows the route to accommodate two high cubic capacity containers stacked one atop another, further improving the significant efficiency advantages of double-stack transportation.

Double-stack has been used primarily for mini-landbridge service, the through movement by ship and rail of containerized cargo originating in the Far East and bound for the heavily populated U.S. East Coast consumer markets. Mini-landbridge is up to two weeks faster than the all-water route from Asia via the Panama Canal.

Domestic shippers have also started to use double-stack service in increasing numbers. "Conrail's investment in the clearance program also reflects our belief in the future growth of this domestic market," said Hagen.

In 1989, Conrail transported approximately 216,000 containers in double-stack service, representing about one-fifth of the 1,132,000 containers and trailers Conrail handled in its inter-modal business that year. In 1984, the first year of double-stack service on Conrail, they totaled about 14,000 units, about 1.7 percent of the 832,000 intermodal trailers and containers Conrail transported.

Conrail provides rail freight transportation service in 14 Northeastern and Midwestern states, the District of Columbia, and the Province of Quebec.

MIAMI (DEC. 4) PR NEWSWIRE - Pan Am Express will increase its service to the Bahamas on Dec. 15 when it begins flying between Miami and both Treasure Cay and Marsh Harbour.

The airline will operate two daily flights between Miami and each of the two Bahamian destinations, and plans to increase it to four daily flights in each market on Jan. 1.

"We realize the great market potential the Bahamas can offer and the value that serving the islands through Miami can add to our already strong presence in Florida," said William Lange, president of Pan Am Express. "We now offer service to eight cities in Florida and two islands in the Bahamas and that number will continue to grow," he added.

Flight 4601 will depart Miami at 11:45 a.m., arrive in Treasure Cay at 12:55 p.m. and continue on to Marsh Harbour where it will arrive at 1:30 p.m. Flight 4605 will depart Miami at 2:10 p.m., arrive in Treasure Cay at 3:20 p.m. and is scheduled to arrive in Marsh Harbour at 3:55 p.m.

The return flight will depart Treasure Cay at 1:15 p.m. continue on to Marsh

Harbour where it will depart at 2:00 p.m. and arrive back in Miami at 3:20 p.m. The later flight will depart Treasure Cay at 3:40 p.m., Marsh Harbour at 4:10 p.m. and arrive in Miami at 5:30 p.m.

On Jan. 1, Pan Am Express will add a morning and evening flight in both directions. All flights will be operated with British Aerospace Jetstream 31 aircraft.

#90338p9784 12/04/1990 ~PR Newswire

DENVER (DEC. 4) PR NEWSWIRE - Western Gas Resources Inc. (NYSE: WGR) ("Resources") announced today that, through its 52 percent owned subsidiary Western Gas Processors Ltd. (NYSE: WGP) ("Western"), it has an executed letter of intent with Amoco Production Co. ("Amoco") for the purchase of Amoco's Edgewood Gas Processing Plant and related production, located approximately 35 miles northwest of Tyler, Texas. Western believes that a purchase and sale agreement is very close to being signed. The purchase price is $36 million with an expected closing to occur by Feb. 1, 1991 with an effective date of Jan. 1, 1991. The closing will be contingent on the satisfactory outcome of an environmental audit which is currently underway.

The Edgewood Plant gathers gas produced from the Smackover formation in Eastern Texas. The plant currently processes approximately 49 MMcfd. Of this 22 MMcfd is produced from wells operated by Western and Western will own a majority interest in upon consummation of the acquisition and 27 MMcfd is third party gas dedicated to the Edgewood Plant. Western has also contracted with Dallas Production Inc. to gather and process its gas that is located in the vicinity of the plant. Western estimates that the initial gas production from three recently completed Dallas Production wells to be hooked up during the first quarter of 1991 will contribute significantly to plant throughput.

Gas produced from the Smackover formation is "sour", meaning it contains significant amounts of hydrogen sulfide (H_2S) and carbon dioxide (CO_2). Additionally, the gas stream contains significant amounts of liquid hydrocarbons ("NGLs"). The plant was designed to remove the H_2S, CO_2 and NGLs from the gas stream and separate the pure products.

The plant uses a chemical "sweetening" process to remove the H_2S and CO_2. Another process is used to remove the liquid hydrocarbons. The remaining residue gas is then ready for delivery to the pipeline for public use. The NGLs are further fractionated into propane, butane and natural gasoline and are ready for sale. The removed H_2S is converted to elemental sulfur and is sold in molten form. The liquid processing also results in stabilized condensate that is available for marketing. Daily production currently averages approximately 15,000 gallons of propane, 20,000 gallons of butane,

7,000 gallons of natural gasoline, 65,000 gallons of stabilized condensate and 200 long tons of sulfur. These amounts will increase after the Dallas Production gas is added in 1991.

PURCHASE, NY (DEC. 4) PR NEWSWIRE - IBM announced today it will make available $4.5 million in computer systems to federally funded disabilities support centers being established nationwide.

Under a program called the IBM Disabilities Assistance Network, personal computers and software will be loaned at no charge to the agencies and nonprofit organizations designated by the states and U.S. territories to operate the centers.

The computers will be available to centers receiving federal grants to help them assess needs, coordinate resources and answer telephone inquiries. The equipment also will be used to provide demonstrations of computer technology solutions that assist people with disabilities.

Twenty-three states have received grants through the Technology Related Assistance for Individuals with Disabilities Act of 1988, and additional states and territories are expected to be funded within the next two years.

"This program builds on the partnerships IBM has established with state agencies and nonprofit organizations that work with people who have disabilities," said James G. Parkel, IBM director of corporate support and community programs.

"Computer technology is providing solutions that help many of the estimated 43 million Americans with disabilities to lead more independent lives. The IBM network will help make those solutions available to individuals, families, educators, rehabilitation professionals and employers across the country."

Through the program, centers will be eligible for IBM Personal System/2 models peripherals, software and databases that assist people with disabilities. IBM products designed to assist people with hearing, vision, speech and other disabilities will also be available to the centers.

The loan program will be managed by the company's National Support Center for Persons with Disabilities in Atlanta. The center opened in 1985 to increase awareness of the ways personal computers can enhance the quality of life for people with disabilities.

#90338p9787 12/04/1990 ~PR Newswire
ATLANTA (DEC. 4) PR NEWSWIRE - The Coca-Cola Company (NYSE: KO) and Hoechst Celanese Corporation today announced plans to introduce early next year the first-ever plastic soft drink bottles made with a blend of recycled plastic, a significant breakthrough in plastics recycling.

The two companies have developed commercial viable technology which actually breaks down plastic soft drink bottle polymer into original molecules, then reconstructs the purified resin for use in making new plastic soft drink bottles.

Bottles made from recycled plastic have never been marketed before. The bottles will be introduced in test market early next year.

"Producing new plastic beverage bottles with a blend of recycled plastic is a significant step ahead in plastics recycling," says M. Douglas Ivester, senior vice president, The Coca-Cola Company and president, Coca-Cola USA. "The technology will allow the 'closed loop' recycling of our plastic bottles, just as our other suppliers use recycled aluminum and steel for cans and recycled glass for glass bottles."

The resin produced by Hoechst Celanese Corporation's affiliate company, Cape Industries, meets The Coca-Cola Company's strict packaging standards for product quality, consumer safety and environmental impact. The companies have been in contact with the U.S. Food and Drug Administration which is reviewing the process.

Until now, the more than 200 million pounds of plastic soft drink containers recycled in the U.S. were used in making carpeting, fiberfill stuffing for jackets and comforters, lumber, piping, patio furniture and non-food bottles. Not only will the recycling technology expand end-use markets for recycled plastic containers, but it will also help increase the 28 percent recycling rate for all plastic soft drink bottles produced in the U.S., Mr. Ivester said.

Over time, The Coca-Cola Company has reduced the amount of raw material used to produce its packaging, including glass bottles, aluminum cans and plastic soft drink containers by 43 percent, 35 percent and 21 percent, respectively.

STAMFORD, CONN. (DEC. 4) PR NEWSWIRE - General Host Corporation (NYSE: GH)

today reported a substantial improvement in results for its third-quarter and nine-month periods ended Nov. 4, 1990.

In its seasonally slow third quarter, normally a loss period, the nation's largest lawn and garden retailer cut last year's deficit by nearly 27 percent in the wake of reduced operating expenses and improved same-store sales. The company reported a loss from net and continuing operations of $4.9 million, or 27 cents per share, compared with a loss of $6.7 million, or 35 cents per share, the prior year. The comparison would have been even more favorable except for a 5.6 percent reduction in average shares outstanding stemming from an ongoing corporate stock repurchase program, it was noted.

Same-store sales increased 4.1 percent in the third quarter while total sales rose 4.4 percent to just over $100 million. Selling, general and administrative (SG&A) expenses were cut 8.5 percent over the prior year.

Through nine months, the company reported income from net and continuing operations of $61,000 vs. a year-earlier net loss of $8.1 million, or 42 cents per share. In the year-earlier period the company lost $4.7 million, or 24 cents per share, from continuing operations -- the 18 cents per share differential reflecting a charge to discontinued operations from settlement of a lawsuit. Total sales reached $379 million, an improvement of 4.3 percent, and same-store sales rose 3.4 percent. Through 40 weeks, SG&A expenses were reduced 10 percent from the prior year.

General Host said its flagship subsidiary, Frank's Nursery & Crafts, has completed installation of laser scanning and price lookup on each of its 1,600 cash registers. Going forward, these computer systems are expected to speed up checkout lines by at least 30 percent, generate higher sales, cut payroll expenses, improve margins and reduce shrinkage.

With 280 stores in 18 states, General Host operates the nation's largest specialty retail chain devoted specifically to the sale of lawn and garden products, crafts, and Christmas merchandise. Its main operating unit is Frank's Nursery & Crafts.

#90338p9805 12/04/1990 ~PR Newswire

CHICAGO (DEC. 4) PR NEWSWIRE - Midway Airlines, Inc. (NYSE: MDW) today reported traffic results for November 1990.

Revenue passenger miles (RPMs) for November 1990 increased 31.6 percent over November 1989 to 398,321,000. Available seat miles (ASMs) increased 24.9 percent to 679,717,000. The company enplaned 571,395 passengers during the month, an increase of 29.2 percent over November 1989. The system load factor for November 1990 was 58.6 percent, 3.0 points above the previous November load factor.

Midway Airlines set daily enplanement records through the Thanksgiving holiday

travel period and boarded a record 30,300 passengers on Nov. 25.

Year-to-date (YTD) RPMs increased 40.9 percent over 1989 to 4.5 billion. ASMs increased 36.9 percent to 7.8 billion YTD. The company enplaned 6,565,073 passengers YTD, an increase of 38.6 percent. The system load factor YTD was 58.4 percent.

The data includes the operations of the company's wholly owned commuter subsidiary, the Midway Commuter.

Midway Airlines offers coast-to-coast service from its hubs at Chicago's close-in Midway Airport and Philadelphia International Airport. Midway Airlines and its wholly owned subsidiary, the Midway Commuter, serve 60 destinations in the United States, Canada, U.S. Virgin Islands and the Bahamas.

TAMPA, FL (DEC. 4) PR NEWSWIRE - Environmental Resources Management-South, Inc. is expanding its Florida operations with the opening of a new South Florida office in Boca Raton, Fla. Albert R. Capellini, P.E., has been named manager of the new office of ERM-South, which has its headquarters in Tampa and operates one other branch office in Miami.

Paul Gruber, P.G., principal-in-charge of Florida operations who made the announcement, said the Boca Raton office will be instrumental in extending ERM's consulting services statewide at a time when Florida businesses are faced with a growing number of environmental regulations. Since it was formed in 1983, ERM-South has consulted on approximately 450 environmental projects

in 30 of Florida's 67 counties. This year the company's total billings will approach $10 million.

"Concern over the environment is once again becoming a major issue for both businesses and government in Florida. The tremendous level of urban and commercial development associated with Florida's population growth in the past two decades is shaping up to be a leading factor in redirecting Florida's priorities toward environmental protection in the 1990s," according to Gruber, who chairs the Tampa Chamber of Commerce Water Issues Task Force and served as past legislative chairman of the Florida Section of the American Institute of Professional Geologists.

"More Florida companies than ever before are seeking solutions to environmental problems and assessing how environmental laws affect their growth plans," said Gruber, who oversees a staff of 55 scientists, engineers and support personnel in the three Florida offices.

Capellini, 43, has been a Deerfield Beach city commissioner since 1989. He has been an environmental engineer for the past 17 years and is a board-certified member of the American Academy of Environmental Engineers.

ERM-South is part of the ERM Group, a Pennsylvania-based environmental consulting company with a network of 50 offices worldwide and 1990 annual revenues of approximately $200 million.

The ERM Group is a multidisciplinary company specializing in engineering (environmental, civil, mechanical and agriculture), geology and hydrogeology, soil science, agronomy and aquatic and marine biology. According to Engineering New Record, an industry trade publication, the company is the fourth-largest hazardous waste consultant in the U.S. and 46th largest engineering company in the U.S. In four of the past five years, The ERM Group has been cited by INC. Magazine as one the fastest-growing young, privately held companies in the U.S.

#90338p9812 12/04/1990 ~PR Newswire

DALLAS (DEC. 4) PR NEWSWIRE - Comstock Resources, Inc. (NASDAQ-NMS: CMRE) announced today that its board of directors has unanimously adopted a stockholder rights plan. Under the plan, preferred stock purchase rights will be distributed as a dividend at the rate of one right for each share of common stock held of record as of the close of business on Dec. 17, 1990. The rights will expire on Dec. 17, 2000.

Under the plan, each right will entitle holders of Comstock's common stock to

buy one one-hundredth of a newly issued share of Series A junior participating preferred stock at an exercise price of $15.00. The rights are exercisable only if a person or group acquires beneficial ownership of 20 percent or more of Comstock's common stock, a person owning 10 percent or more of Comstock's common stock is declared an "adverse person" or a person or group commences a tender or exchange offer upon consummation of which that person or group would beneficially own 20 percent or more of the common stock.

Generally, if any person (i) becomes a beneficial owner of 20 percent or more of Comstock's common stock other than pursuant to an offer for all shares determined by a majority of unaffiliated continuing directors to be fair to the stockholders and otherwise in the best interests of both Comstock and its stockholders or (ii) the board declares a person or group beneficially owning at least 10 percent of Comstock's common stock to be an "adverse person", each right not owned by the acquiring or adverse person or related parties will enable its holder to purchase, at the right's then current exercise price, shares of Comstock's common stock (or, in certain circumstances as determined by the board, a combination of cash, property, common shares, or other securities) having a calculated value of twice the rights exercise price.

In addition, any time after a person or group acquires beneficial ownership of 20 percent or more of the outstanding shares of Comstock's common stock (except pursuant to an offer for all outstanding shares of common stock determined by a majority of the unaffiliated continuing directors to be at a price which is fair to the stockholders and otherwise in the best interests of Comstock or its stockholders), Comstock is acquired in a merger or other business combination, or more than 50 percent of its assets, cash flow, or earning power is transferred in any one transaction or a series of related transactions to another person or persons, each right that has not previously been exercised will entitle its holder to purchase, at the right's then current exercise price, shares of common stock of such other person having a calculated value of twice the right's exercise price.

Further, at any time after a person or group acquires 20 percent or more of Comstock's outstanding commons stock or is declared an "adverse person", but such person holds less than 50 percent of Comstock's outstanding common stock, the board of directors may, at its option, exchange part or all of the rights (other than rights held by the acquiring or adverse person) for shares of Comstock's common stock on a one-for-one basis.

Comstock will generally be entitled to redeem the rights at $.01 per right at any time until the close of business on the earlier of the tenth day following public announcement that a 20 percent position has been acquired or the tenth business day after a person is declared to be an adverse person.

Comstock Resources, Inc., with headquarters in Dallas, owns and manages income producing assets in oil, casinghead and natural gas, precious metals and real estate, with subsidiary operations since 1865. Additional information about

the company may be obtained by contacting M. Jay Allison, president and chief executive officer, at 5005 LBJ Freeway, Suite 1150, Dallas, Texas 75244; telephone 214-701-2100.

NORTH HOLLYWOOD, CA (DEC. 4) PR NEWSWIRE - Westrec Properties Inc. of North Hollywood and Brandy Group Inc., of Boca Raton, Fla., today announced that Westrec has acquired the operations of Brandy Group, combining two of the leading firms in marina ownership and management in the United States.

Westrec President Mike Sachs and Brandy President Bruce Blomgren made the announcement jointly.

Westrec is the largest marina chain in the country, now owning and managing 17 marinas in five states (California, Arizona, Texas, Florida and Georgia) and the District of Columbia. Its properties are primarily full-service marinas, featuring restaurants, hotels, condominiums and retail facilities.

The Brandy Group is a 13-year-old marina management and consulting firm. Its consultants perform market research for waterfront planning and use studies as well as provide counsel on marina construction and capital management. Blomgren has coordinated hundreds of consulting assignments domestically and internationally. Among other duties, he will handle both national and international marketing and consulting.

"We are delighted that this acquisition is taking place," said Sachs. "Mr. Blomgren's experience in marina ownership, development and management is extensive, and our ability to add his firm's expertise will greatly benefit Westrec."

The former Brandy Group, Inc., will be merged into Westrec Consulting Inc., which will be renamed Westrec/Brandy Associates, Inc. Blomgren will serve as president of this Westrec subsidiary. All of the properties currently managed by Brandy will now join the Westrec network.

"The concept of a chain of marinas has been my personal vision for many years " Blomgren said. "This association with Westrec will bring us much closer to realizing our mutual dream of a national and one day, international chain of marinas."

The Brandy Group's newsletter, which goes to boat and marina owners and managers nationwide, and has a circulation of 15,000, will be renamed the Westrec/Brandy newsletter. The addition of Westrec's client base will

increase the circulation to more than 30,000 and will position the newsletter as one of the leading publications covering the marina business.

Westrec will continue to be active in the acquisition, management, development and financing of marinas and will expand its planning and consulting businesses.

Westrec owns and manages marinas across the U.S., accommodating more than 7500 boats in both wet-slip and dry-storage facilities. Created in 1987 by founder Michael Sachs, Westrec and its operating companies provide a full range of marina-related services, beginning with consulting for marina design and financing through construction and day-to-day marina management.

ATLANTA (DEC. 4) PR NEWSWIRE - The Ritz-Carlton Hotel Co. today announced its plans to officially begin construction on The Ritz-Carlton, Kapalua on the Hawaiian island of Maui.

The 550-guest room hotel will be part of the world renowned Kapalua resort development and is scheduled to open in late 1992. Located on Honokahua Bay, the site contains approximately 40 acres and is contiguous to the third hole of Kapalua's Bay Course. The site enjoys panoramic views of the Pacific as well as one of Maui's most beautiful white sand beaches.

The Ritz-Carlton, Kapalua is being developed by The Ritz-Carlton Hotel Co. and is owned by Kaptel Associates; a joint venture between Nissho Iwai Corp., Maui Land & Pineapple Co. Inc. and The Ritz-Carlton Hotel Co. The Ritz-Carlton Hotel Co., with its international headquarters in Atlanta, will be the operator.

Upon making the announcement, William B. Johnson, chairman of the board of The Ritz-Carlton Hotel Co., noted that: "We are truly pleased to have this opportunity to become a part of Kapalua. It is one of the most select and beautiful resort communities in the world."

The Ritz-Carlton, Kapalua will blend the relaxed beauty of the tropics with the genteel ambience of a Ritz-Carlton hotel. Decorated in the traditional Hawaiian style of the late 19th century, the hotel will offer spacious guest rooms with large lanais overlooking the Pacific. For meetings, the resort features a 16,000-square-foot ballroom as well as two boardrooms and eight meeting rooms. Dining will be unsurpassed, combining the island's freshest local foods with the genius of world renowned chefs.

Leisure activities include championship golf at the resort's three world-class golf courses. The Ritz-Carlton, Kapalua will also embrace 10 tennis courts, a fitness center and spa facilities, a swimming pool and outdoor jacuzzi. And, of course, guests may wile away the hours on the white sandy beach which fronts the hotel.

The Ritz-Carlton, Kapalua is the company's second hotel in Hawaii. The Ritz-Carlton, Mauna Lani will open on Hawaii's Big Island on Dec. 15. The Ritz-Carlton Hotel Co. also operates hotels and resorts in Atlanta, Buckhead (uptown Atlanta), Boston, Cleveland, Dearborn (Michigan), Houston, Kansas City Laguna Niguel (California), Marina del Rey (California), Naples, New York, Pentagon City (Arlington, Va.), Phoenix, Philadelphia, Rancho Mirage (California), St. Louis, Sydney (Australia) and Washington, D.C. Other hotels scheduled to open in 1991 include Amelia Island (Florida), Palm Beach, The Huntington Hotel in Pasadena (California), San Francisco, as well as hotels in London and Barcelona.

CHICAGO (DEC. 4) PR NEWSWIRE - United States Gypsum Company and Northern Indiana Public Service Company (NIPSCO) today jointly announced the signing of a synthetic gypsum supply agreement which establishes NIPSCO's Bailly Generating Station as the future supplier of synthetic gypsum to U.S. Gypsum Company's East Chicago, Ind., gypsum wallboard plant.

In an effort to reduce sulfur dioxide emissions well in advance of the requirements of the 1990 Clean Air Act, a limestone scrubber is currently under construction at NIPSCO's Bailly plant. When completed in mid-1992, this advanced flue gas desulfurization facility will convert sulfur dioxide emissions into synthetic gypsum and bring the Bailly facility into compliance with the 1990 Clean Air Act three years ahead of its requirements.

Under the terms of the agreement, U.S. Gypsum Company will purchase a minimum of 140,000 tons of the synthetic gypsum per year for use in the production of gypsum wallboard at its East Chicago facility.

Further terms of the agreement were not disclosed.

U.S. Gypsum Company currently utilizes synthetic gypsum at its Galena Park, Texas, and Baltimore plants. The Bailly facility scrubber will be owned and operated by Pure Air, a joint venture of Air Products and Mitsubishi Heavy Industries, but NIPSCO will retain title to the synthetic gypsum produced at the facility. The project is being partially funded by the U.S. Department of Energy under its Clean Coal Technology program.

U.S. Gypsum Company is a wholly owned subsidiary of USG Corporation (NYSE: USG), a Fortune 500 corporation with operating subsidiaries that are leading manufacturers and distributors of building materials such as gypsum wallboard and related products, home improvement products and ceiling, wall and floor systems.

The Northern Indiana Public Service Company is a subsidiary of NIPSCO Industries and is the state's largest utility company.

BETHPAGE, N.Y. (DEC. 4) PR NEWSWIRE - Grumman Corporation (NYSE: GQ) announced today that Renso L. Caporali has been confirmed as the chairman of the board and chief executive officer.

On July 19, Caporali was elected chairman and CEO to replace John O'Brien, who resigned unexpectedly for personal reasons. At the same time, a search committee was also formed, composed of the eight non- employee members of the board of directors, to consider candidates for the position from both inside and outside the company. The chairman of the search committee, John T. Sargent, announced today at a meeting of employees that, after reviewing the field of qualified candidates, the board had unanimously confirmed Caporali as the best choice.

"My first priority," said Caporali, "is now to recommend to the board my choice of a president and chief operating officer who can help move the company on the course we have set. We must continue to improve our financial performance, reduce our debt and our operating costs, earn the confidence of our customers and develop products and technologies that make sense in our changing markets."

Explaining why the board conducted a search after electing Caporali in July, Sargent said, "Perhaps the most important decision a board has to make is the selection of a chief executive. We have an obligation to the shareholders and all the other people who put their trust in Grumman to make sure we have considered every qualified candidate. We did have the opportunity to consider some outstanding people -- senior executives with brilliant track records in some of America's great corporations."

Caporali joined the company in 1959, after serving as a U.S. Navy aviator. His career has included engineering, development and general management assignments. He was president of the Aircraft Systems Division from 1985 to 1988, and had been vice chairman-corporate technology from July 1988 until his election as chairman in July of this year. Caporali holds a bachelor's degree in civil engineering and a master's in mechanical engineering from

Clarkson College of Technology. He earned three degrees in aeronautical engineering from Princeton: a master's, a master of arts, and a Ph.D.

Grumman Corporation is best known as a leading maker of military aircraft and aerospace systems. Other businesses include integrated information processing systems, emergency vehicles and aluminum truck bodies. The company has headquarters at Bethpage and employs 25,500 worldwide. Sales in 1989 were $3.56 billion.

HANOVER, MD (DEC. 4) PR NEWSWIRE - Significant control of European corn borer in corn by InCide(TM) biopesticide, a genetically engineered plant vaccine, was announced today by Crop Genetics International (NASDAQ: CROP).

Dr. James Davis of CROP stated that 1990 field performance trials confirmed the company's InCide plant vaccine provided significant reduction in European corn borer damage in inoculated corn plants grown under field conditions. Based upon these successful field trials, CROP is seeking approval from the Environmental Protection Agency (EPA) and the United States Department of Agriculture (USDA) to expand testing of its InCide genetically engineered corn bioinsecticide. CROP is proposing to conduct InCide field tests in Nebraska and at its Maryland research farms. It is estimated that the European corn borer, a major corn insect, causes more than $400 million in yield losses annually in the United States.

The application to the EPA and USDA follows successful 1989 greenhouse tests and the 1990 field performance tests conducted in Maryland. "These field performance trials represent a key milestone in InCide's developmental progress," said CROP entomologist Dr. Mark Beach. "It means that a recombinant product, which demonstrated insecticide activity in greenhouse trials,

performs in a similar or better fashion under field conditions."

Davis also announced that CROP conducted 1990 hybrid selection studies to determine which Midwest corn hybrids would be most compatible with the InCide system. CROP, in conjunction with DeKalb Plant Genetics, NC(Plus) Hybrids and Hoegemeyer Hybrids evaluated 27 corn hybrids at 48 Midwest locations. An additional 50 hybrids were tested at the company's research farm in Maryland. Hybrids demonstrating favorable characteristics will advance as commercial candidates for development with the technology.

CROP said it expects its first application of the InCide technology will allow farmers to eliminate insecticide usage for corn borer control. While seed costs would increase with the InCide technology, InCide treated seed could save corn growers $7.50-$25 per acre on insecticides.

Crop Genetics is an agricultural biotechnology company that is developing, manufacturing and marketing biological products which improve crop productivity, while reducing the costs and environmental hazards associated with traditional crop protection pesticides.

TORRANCE, CA (DEC. 4) PR NEWSWIRE - Lexus November sales of 5,847 rose 54.3 percent compared to November '89, according to figures released today by the luxury division of Toyota Motor Sales U.S.A. Inc.

Sales of 3,983 LS 400 models -- a one month record -- were up 45.5 percent from a year ago, while ES 250 sales of 1,864 were up 77.6 percent. Year-to-date 1990 Lexus sales reached 56,791. The best previous month for LS 400 sales was August 1990 (3,856).

"The big jump in ES 250 sales indicates the overall Lexus increase is more than just people wanting to avoid the luxury tax," said Dave Illingworth, Lexus group vice president. "November's sales results is an indication of the continued momentum that has been built by both Lexus models."

Illingworth pointed to the surging sales of the ES 250, not affected by the luxury tax, as an indication of Lexus' overall strength in the marketplace. ES 250 sales were up more than 50 percent for the third straight month.

NEW YORK, (DEC. 4) PR NEWSWIRE - Transmedia Network, Inc. (NASDAQ: TMNI), which owns and markets a restaurant charge card offering 25 percent savings on meals, today announced record revenues of $7,534,343; earnings of $308,828 and earnings per share of 15 cents for its year ended Sept. 30, 1990, compared to $4,711,239, $165,330 and 8 cents, respectively, for 1989.

Total revenues for the year included net sales of $7,088,571, compared to $4,422,836 a year earlier, membership and renewal fee income of $392,401, compared to $288,403 for 1989, and initial and continuing franchise fee income of $53,371.

Melvin Chasen, Transmedia's chairman, pointed out that during this banner year:

-- "For the first time in the company's history, sales momentum carried us to record earnings in our fourth quarter, a period usually marked by a seasonal lag in business;

-- "We launched our first franchise (most of the state of New Jersey); -- "We continued to gain credibility and recognition with organizations such as Chemical Bank distributing Transmedia's Executive Savings Card to their employees;

-- "Our number of member restaurants reached more than 600 and cardmembers 31,000, compared to more than 450 and 20,000, respectively, the year before.

Chasen added, "We foresee even greater growth in the number of finer restaurants, as well as diners, discovering Transmedia's value-added services in coming years."

He explained, "This growth will occur as restaurants, facing an increasingly difficult economic and competitive environment, realize Transmedia can provide both capital and patrons, two badly needed assets for survival. It will come also as diners, who are becoming progressively value- and price-oriented, realize they can save 25 percent on meals at a growing list of finer restaurants."

Transmedia Network, Inc., established in 1984, derives its income from membership fees and cardmembers' use of the Executive Savings Card which converts food and beverage credits issued to the company by restaurants in return for cash advancements used by these dining establishments for a wide variety of needs.

DALLAS (DEC. 4) PR NEWSWIRE - Maxus Energy Corp. (NYSE: MXS) announced that plans are progressing ahead of schedule to reach 200,000 gross barrels per day from its Intan and Widuri fields in the Southeast Sumatra contract area of Indonesia by year-end.

Production of 80,000 gross barrels per day from the Widuri-A platform commenced this week with the installation of the permanent processing facility. This is an addition to the 45,000 gross barrels per day of production from the Intan-A and B platforms which were already producing.

During December, the Widuri-B, C, and D platforms will be added to bring production from the Intan and Widuri fields to 200,000 gross barrels per day. With Intan and Widuri on stream, Maxus' worldwide net oil production for 1991 will be approximately 50 percent greater than in 1990.

Total production from all fields in the Southeast Sumatra contract area of Indonesia is expected to average 240,000 gross barrels per day in 1991 compared to an average 95,000 gross barrels per day in 1990. Using a $20 per barrel price, the net production to Maxus from this area in 1991 would be 56,500 barrels per day.

The production from approximately 60 wells in the Intan and Widuri fields is being processed through the permanent processing facility. The facility is designed to perform gas, oil and water separation for up to 300,000 barrels of fluids per day.

After being processed, the oil will be pumped approximately two miles for storage in the permanently moored storage tanker, the "Maxus Widuri." Capable of storing two million barrels of oil, the "Maxus Widuri" will loan Intan and Widuri crude for shipment to worldwide markets.

Maxus Energy is operator with 56 percent of the contractor's interest in the Southeast Sumatra production-sharing contract area. The other interests in the contract area are held by BP Petroleum Development (SES) Ltd., C. Itoh Energy Development Co., Ltd., Deminex Sumatra OEL GmbH, Repsol Exploracion S.A., Hudbay Oil (Indonesia) Ltd., Inpex Sumatra, Ltd., Lasmo Sumatra Ltd., Sunda Shell N.V., TCR Sumatra AG and Warrior Oil Co. The contract area is held with Pertamina, the Indonesian state oil company.

DARIEN, CT. (DEC. 4) PR NEWSWIRE - Transact International Inc. (NASDAQ: TACT) today reported a profit for the three-month period ended Oct. 31, 1990, the second quarter of fiscal 1991. The company stated that, while the quarterly profit was marginal, it represented the fifth consecutive profitable quarter.

Sales for the second quarter were $3,083,890 compared to $3,208,596 for the same period a year earlier. Net income was $11,573, the equivalent of less than 1 cent per share, versus a net income of $240,978 or 4 cents per share for the same period in fiscal 1990.

For the six months ended Oct. 31, 1990, sales were $5,927,419 compared with $4,956,782 for the same period a year earlier. Net income for the first half of fiscal 1991 was $166,125 or 3 cents per share, versus net income of $4,924, equivalent to less than 1 cent per share, during the first six months of fiscal 1990.

Frank B. Carder, president of Transact, pointed out that the company continues a profitable trend which began 15 months ago. He also noted that the company's backlog of orders as of the end of October stands at $11.8 million, compared to $6.2 million a year ago, up over 90 percent. He added, "The Oct. 31, 1990 backlog includes $8.3 million of U.S. Air Force orders received in fiscal 1991."

Transact International is a specialized design, engineering and manufacturing organization which produces air cargo handling systems and equipment for airlines, air freight companies, airport authorities and the U.S. Air Force. The company's executive offices are in Darien, Conn., and its manufacturing facilities are in Memphis, Tenn.

ATLANTA (DEC. 4) PR NEWSWIRE - The Georgia Public Service Commission (PSC) today approved a one-year trial of Southern Bell's request to offer Caller ID which is part of the company's TouchStar(R) service.

With Caller ID service and a special display unit, customers will be able to identify the telephone numbers of incoming calls from the immediate local calling area.

"We believe Caller ID has great potential to reduce obscene and harassing calls," said Carl Swearingen, Southern Bell's vice president for Georgia.

The charge for Caller ID service will be $6 a month for residence customers and $9.50 a month for single-line business customers. Customers who subscribe to the service will also need to rent or purchase a separate display unit. Southern Bell will provide blocking of Caller ID service to law enforcement and crisis intervention agencies.

"Privacy and security are growing public concerns and we think that Caller ID service helps address those concerns," Swearingen said. "Caller ID increases privacy and security for the person receiving calls."

Caller ID service will be offered in most of Southern Bell's service areas throughout Georgia by the second quarter of 1991.

AUSTIN, TEXAS (DEC. 4) PR NEWSWIRE - The CompuAdd Corp., which opened 74 retail PC stores between April 1989 and January 1990, today announced that the second wave of its retail expansion will focus on 12 large "superstores" in new and existing markets.

The superstores will range from 12,000 to 25,000 square feet, compared with the current store average of about 5,500 square feet.

"We believe that larger stores in selected markets will yield a higher return as we continue our investment in the retail distribution channel," said Richard McLemore, director of sales and marketing. "The superstore concept has great potential to service large numbers of customers, and we intend to be at the forefront of this phenomenon."

CompuAdd plans to roll out its superstores at the rate of about one per month, beginning Dec. 9 in the Chicago suburb of Schaumberg. Planned locations range from coast to coast and include cities such as Portland, Ore., Boston, New Orleans, Louisville, Washington, D.C., and Dallas.

CompuAdd, with 1989 sales of $400.1 million, designs, manufactures and supports its own line of award-winning PCs. It also sells more than 2,000 related products through a company-owned product delivery system that also includes direct marketing and direct sales operations.

In a recent independent Dataquest survey of U.S. PC users, CompuAdd was ranked No. 1 in overall customer satisfaction, quality, customer commitment and price/value.

HIGHLAND PARK, MI (DEC. 4) PR NEWSWIRE - Robert A. Scroggie, director of Logistics for Chrysler Corporation (NYSE: C) and Douglas J. Glass, assistant vice president of Automotive Group for Union Pacific Railroad, today dedicated the transportation industry's first fully closed, 20-foot tri-level rail car at Chrysler's Sterling Heights Assembly Plant.

The multi-level rail car, designed jointly by Chrysler, Union Pacific Railroad and Thrall Manufacturing, will accommodate passenger cars, minivans and medium size truck units produced in the Detroit/ Windsor, Ontario area.

Each new tri-level rail car will transport 15 to 18 units per shipment in contrast to 10 to 12 units on a bi-level rail car.

"The new tri-level rail cars take advantage of increased rail clearance necessary for the shipment of double-stack container trains, reduce in-transit damage and eliminate the 'top decking' of minivans and truck units," said Scroggie. "The design of the new tri-level rail car will improve transportation efficiency and result in a cost savings to Chrysler."

Chrysler will place over 150 tri-level rail cars in operation by the end of the year.

On the new tri-level rail cars, passenger car units are loaded on the first deck and minivans and medium size trucks on the second and third decks.

Traditionally, trucks and vans were shipped on bi-level units and passenger cars were shipped on tri-level rail cars.

HONOLULU (DEC. 4) PR NEWSWIRE - First Nationwide Bank's home loan business apparently has not been affected by its recent sale of its 19 branch offices here.

First Nationwide, third largest sales and loan lender on the Islands, has seen a slight decline in new home loans, "but that's probably a result of a slowdown in residential sales," said Leatrice Kauahi, district manager and vice president for the San Francisco-based thrift.

She said her 4,000 Island customers either send their mortgage payments to a central facility in California or drop them off at the bank's office at 1001 Bishop Street. "At the most, only ten percent of our customers were making their mortgage payments at our branches," she noted.

Virtually all home mortgages in Hawaii originate with a realtor, Kauahi noted, and First Nationwide continues to keep in touch with that important group. Tonight, some 200 local realtors are expected to attend a reception at Honolulu's Plaza Club with First Nationwide's home office executive in charge of real estate lending.

Hawaii is a bright spot in the nation's home market, Kauahi said. "It's taking a little longer to sell a house or condo now," she acknowledged. "Before, properties often sold before listings, but demand is still strong, and we don't expect much of a slow down."

First Nationwide's entire $832 million loan portfolio in Hawaii is in single-family dwellings and condominiums. Kauahi, a member of the

implementation committee of the Hawaiian Community Reinvestment Corp., observed that the greatest demand is for low-to-moderate-income housing.

The Community Reinvestment Corp. is a consortium of banks and savings and loan associations being formed now to create ways to finance housing for low-income residents.

"We will be getting a lot of input from our colleagues on the Mainland," said Kauahi. She noted that First Nationwide Bank is one of a handful of thrifts to have been judged "outstanding" in its community reinvestment activities. First Nationwide, a subsidiary of Ford Motor Co., operates more than 300 offices in 11 states. The bank sold its Hawaii branches last October.

GERMANTOWN, MD. (DEC. 4) PR NEWSWIRE - Microlog Corporation (NASDAQ-NMS: MLOG) announced that it has completed its acquisition of Genesis Electronics Corporation, which is now a subsidiary of Microlog.

The acquisition price consists of up to 675,000 shares of Microlog common stock and $500,000 in cash, less certain adjustments. The closing of the acquisition followed Microlog's receipt on Nov. 28, 1990, of approval of the transaction in a California state fairness hearing.

Genesis, located near Sacramento, Calif., manufactures and markets voice mail systems and software for small and medium-size organizations through a large network of distributors.

Microlog Corporation designs, assembles, markets and services voice processing systems with a variety of applications. The company also provides, through its subsidiaries Old Dominion Systems Incorporated of Maryland and Old Dominion Services, Inc., performance analysis and technical and administrative support services, primarily to a prime contractor to the U.S. Navy.

#90338p9881 12/04/1990 ~PR Newswire

DALLAS (DEC. 4) PR NEWSWIRE - A capital spending budget for 1991 of $308 million was approved today by Enserch Corporation's board of directors. This budget compares with an estimated spending level of approximately $221 million for 1990.

"We anticipate improved cash flow next year to support the budgeted level of capital spending," said W.C. McCord, Enserch chairman and president. "More than 95 percent of the increase and about two-thirds of next year's budget represents planned spending for Enserch's petroleum exploration and production business in anticipation of improved production levels and higher average prices of oil, natural gas liquids and natural gas compared with those in 1990."

Capital expenditures for petroleum exploration and production activities are budgeted at about $205 million, more than a 60 percent increase from 1990 estimated capital expenditures of $123 million.

About 25 percent of the total estimated 1991 spending for this segment has been allocated to the corporation's Gulf of Mexico oil and gas development program.

The natural gas transmission and distribution segment has budgeted 1991 spending of $79 million, compared with $73 million in estimated 1990 spending. About $8 million will be spent in 1991 to complete the Bethel salt-dome storage facility located about 85 miles southeast of Dallas.

An $8 million, 26-mile, 20-inch pipeline will be constructed to fortify Lone Star Gas Co.'s pipeline system and to provide additional natural gas to the North Dallas market area. The remainder of the funds will be used generally for additional fortifications and replacements of gathering, transmission, and distribution system properties, and for extensions to new customers.

The remaining capital expenditures, or some $24 million, are budgeted for Enserch Corporation's engineering and construction activities and general corporate requirements. Enserch Corporation is a diversified energy, engineering and construction company.

WILMINGTON, DE. (DEC. 4) PR NEWSWIRE - Du Pont (NYSE DD) and Perstorp Polyols Inc. have signed a letter of intent for Perstorp to buy Du Pont's formaldehyde plant in Toledo, Ohio.

The sale is subject to negotiation of a definitive agreement and is expected to be completed by year-end. Terms were not disclosed.

The plant produces formaldehyde solutions and has an operating capacity of more than 200 million pounds per year. Perstorp plans to operate the facility to supply its paint additives plant adjacent to the Du Pont plant. The plant

also will supply Du Pont with formaldehyde for its customers in the region.

Perstorp said it anticipates offering employment opportunities to current employees, subject to discussions with them and their bargaining representatives. "This purchase would represent an excellent strategic fit for Perstorp with our plans for continued growth," said Bengt Sallmen, president of Perstorp Polyols Inc.

Du Pont has produced formaldehyde in Toledo since 1947. The transaction does not involve a second DuPont plant in Toledo that produces automotive paint products.

Perstorp is a diversified specialty chemical, laminate and plastic products company with parent headquarters in Sweden and plants in Toledo, Florence, Mass., and 11 other locations in North America. Products manufactured in Toledo include pentaerythritol and trimethylolpropane for the resins and coatings industry as well as for use in the manufacture of plastics and synthetic lubricants.

Du Pont is a diversified global chemicals and energy company with 1989 sales of more than $35 billion.

HOUSTON (DEC. 4) PR NEWSWIRE - Columbia Gas Development Corp., the Houston-based oil and gas exploration and production subsidiary of the Columbia Gas System Inc. (NYSE: CG), today announced the successful completion of three Austin Chalk wells in Texas.

Two of these wells, the Charles Schultz No. 3 and the Hovorak- Lightsey No. 1,

are located in the Giddings Field in Burleson and Lee counties. The third well, the Shiner No. A-3, is located in the Pearsall Field in Frio County.

The three wells have a combined production rate of 2,217 barrels of oil and 519,000 cubic feet of gas per day, according to John P. Bornman Jr., president of Columbia Gas Development.

-- The Charles Schultz No. 3, a vertically drilled well, was last flowing (Nov. 28, 1990) at a rate of 857 barrels of oil per day through a 24/64-inch choke with a flowing tubing pressure of 500 p.s.i. Gemini Exploration Co., of Dallas, is the operator of the well. Columbia Development has a 50 percent working interest.

-- The Hovorak-Lightsey No. 1, a horizontally drilled well, had an initial potential rate of 832 barrels of oil and 319,000 cubic feet of gas per day through a 36/64-inch choke with a flowing tubing pressure of 150 p.s.i. Union Pacific Resources Co. (UPRC), of Fort Worth, Texas, is the operator of the well. Columbia Development has a 19.6 percent working interest.

-- The Shiner No. A-3, another horizontal well, was put on pump at a rate of 528 barrels of oil and 200,000 cubic feet of gas per day. Hinton Production Co., of Mt. Pleasant, Texas, is the operator of the Shiner No. A-3 well. Columbia Development has a 37.15 percent working interest.

Columbia Gas Development is engaged in domestic oil and gas exploration, production and marketing along the Gulf Coast (both onshore and offshore), in California, and in the Mid-Continent and Rocky Mountain regions.

The Columbia Gas System Inc. is one of the nation's largest natural gas systems. Subsidiary companies are engaged in the exploration, production, purchase, storage, transmission and distribution of natural gas. Columbia serves, directly or indirectly, more than 8 million customers in 17 states and the District of Columbia.

CYPRESS, CA (DEC. 4) PR NEWSWIRE - Long awaited shipments of the new 1991 3000GT grand touring sports car entered Mitsubishi Motors' dealerships this past month, contribution more than 550 units of the 12,958 total vehicles sold during November. Total year-to-date sales reached 176,690 units representing a 31 percent increase from a year earlier.

While the automotive industry is down as a whole, Mitsubishi Motor Sales of America expects to reach a total of 189,000 by year-end - a 24 percent increase over calendar year 1989. According to Kevin Ormes, vice president of sales, the company predicts even stronger sales for next year.

"The coming year will provide four new product introductions, all emphasizing Mitsubishi's affordable technology and philosophy of active safety," said Ormes.

The Diamante, a luxury performance sedan, is scheduled for a spring introduction and is Mitsubishi's first entry in the burgeoning luxury car segment of the American market.

The company plans to also introduce an all-new Montero sport/utility vehicle, as well as two light recreational vehicles later in the year, a five-passenger model and a larger seven-passenger model, each with distinctive styling.

Passenger car sales for the month of November reached 11,171 units and included record-breaking Montero sales of 2,206 units. The domestically built Eclipse continued to provide strong sales for the month, with year-to-date figures reaching 46,073 units and marking a 61 percent increase over a year earlier.

Mitsubishi Motor Sales of America Inc., Cypress, was established in 1981 by Mitsubishi Motors Corp., Tokyo, and markets a full line of subcompacts, compacts, sport coupes, light trucks and sport/utility vehicles.

RARITAN, N.J. (DEC. 4) PR NEWSWIRE - In response to questions, Advanced Care Products, a division of Ortho Pharmaceutical Corporation, a Johnson & Johnson (NYSE: JNJ) company, announced today that it is awaiting approval by the FDA of its application to make Monistat(R) 7 (miconazole nitrate 2 percent) available without a prescription.

Monistat is the leading product prescribed by physicians to cure vulvovaginal candidiasis, or yeast infections, which affects more than 13.6 million women each year in the U.S. Last year more than half (59 percent) of all prescriptions written to treat vaginal yeast infections were for Monistat, which is prescribed four times more frequently than any other manufacturer's brand.

"Although it is our policy not to speculate on the timing of FDA approvals, we are satisfied with the progress of the Monistat application at the agency," said Peter Gonze, vice president, marketing. "We expect Monistat 7 to be the primary choice in the OTC arena, as it has been as a prescription product."

Monistat was recommended for availability without a prescription by an FDA advisory committee on June 15. The committee agreed in a unanimous vote that "vulvovaginal candidiasis can be safely and adequately self-treated by the consumer." The committee recommended that labeling of OTC vaginal antifungals should caution against use by women who are experiencing their first vaginal yeast infection, as well as by women who have experienced more than four yeast infections in the past year.

DETROIT (DEC. 4) PR NEWSWIRE - General Motors corporate and divisional displays at the 1991 North American International Auto Show (NAIAS) will demonstrate the company's resolve in "putting quality on the road," according to GM President Lloyd E. Reuss.

"In just two years, the North American International Auto Show has established itself as one of the world's best," Reuss said. "Our 1991 exhibit plans, and those of other domestic and foreign automakers, should further increase its prominence." Reuss released these details of GM's participation in the Detroit show, Jan. 12-20:

- Nine new GM concept and special show vehicles and eight new production models will be on display, many for the first time anywhere.
- Chevrolet, Pontiac, Oldsmobile, Buick, Cadillac and GMC Truck divisions, along with Saturn Corporation, will display 196 vehicles, including some 1992 models. GM's total exhibit space for 1991 will be 159,000 square feet, an increase of more than 10 percent from 1990.

- A corporate exhibit will highlight how GM is "putting quality on the road" and its technological capability to develop totally new vehicles for tomorrow's environment.

A major feature of the GM exhibit will be the Impact, an electric car that GM intends to produce. The Impact, Reuss said, will be driven around a track within the exhibit - a first for an auto show. Other highlights of the GM exhibit include:

- Solar-powered vehicles, developed by University of Michigan, Western Washington University and the University of Maryland, that finished in the top three positions in the GM-sponsored 1990 Sunrayce USA.

These vehicles, sponsored by GM, also finished among the top seven entries in the recently concluded 1990 World Solar Challenge in Australia. The inaugural race three years ago was won by the GM Sunraycer, which still holds the record for fastest time;

- A unique simulation program that lets showgoers feel as if they are actually road testing GM cars and trucks.

"The GM lineup of cars and trucks that visitors will see at the show," Reuss said, "represents a continuation of our commitment since the mid-1980s to design and engineer vehicles to dramatically improve quality and answer customer demand for reliability and durability.

"These cars and trucks are built with new technology and new production methods in new and refurbished plants by many of the most dedicated workers in the world."

CINCINNATI, (DEC. 4) PR NEWSWIRE - The Penn Central Corporation (NYSE: PC) announced that it has entered into a definitive agreement with American Financial Corporation ("AFC") for the previously announced purchase by Penn Central of AFC's non-standard automobile insurance group (the "NSA Group") for $335 million, subject to certain closing adjustments. As previously announced the purchase price is also subject to further modification in 1995, based on actual 1991-94 pre-tax earnings of this business, by a reduction of up to $20 million or an increase of up to $40 million, in each case plus interest.

Under the terms of the transaction, all non-investment grade securities and real estate interests, all equity securities (other than approximately 900,000 shares of Chiquita Brands International, Inc.) and certain other assets will be removed from the investment portfolios of the NSA Group prior to closing

and replaced with cash and marketable securities from Penn Central. As a result, the cash to be paid by Penn Central to AFC in connection with the transaction will be reduced to an amount currently estimated at $105 million.

Completion of the transaction is subject to certain conditions, including receipt of required regulatory approvals. A year-end closing is anticipated.

Penn Central operates businesses primarily in the areas of industrial manufacturing, defense services, insurance and energy.

HOUSTON (DEC. 4) PR NEWSWIRE - The Board of Directors of Browning-Ferris Industries Inc. (NYSE: BFI) today declared an increase in the corporation's regular quarterly cash dividend on common stock and established the date for the company's Annual Meeting of Stockholders.

The cash dividend of 17 cents per common share, payable Jan. 4, 1991 to shareholders of record on Dec. 21, 1990, was declared at the board's quarterly meeting. It represents an indicated annual rate of 68 cents per common share, up from the prior indicated annual rate of 64 cents per common share.

The Board of Directors also established that the company's 1991 Annual Meeting of Stockholders will be March 6, 1991, 2:00 p.m., at The Westchase Hilton, Houston. Stockholders of record at the close of business on Jan. 4, 1991 will be entitled to notice of and to vote at the meeting.

Browning-Ferris Industries Inc. is one of the largest publicly-held companies engaged in providing waste services. Subsidiaries and affiliates collect, transport, treat and dispose of commercial, residential and municipal solid waste and industrial wastes. BFI subsidiaries are also involved in recycling, resource recovery facilities, medical waste services, portable restroom services, and municipal and commercial sweeping operations.

#90338p9908 12/04/1990 ~PR Newswire

MORRIS TOWNSHIP, NJ (DEC. 4) PR NEWSWIRE - Bellcore has developed experimental software that takes the paper out of paperwork. The new information networking system computerizes the entire process of handling business forms - selecting the appropriate form, filling it out, touting it for approvals and even signing it.

Bellcore researcher Kamran Rafieyan unveiled the SuperForms system in a paper presented today at GlobeCom'90 in San Diego, and announced plans to convert the laboratory version into a practical system, initially for Bellcore's internal use.

"Forms produced electronically are a more reliable and more efficient way to handle internal company business," said co-researcher Yaocov Yacobi. "Electronic forms offer many features and conveniences that paper forms don't have, especially in the area of privacy and security," he said.

For example, a system like SuperForms can selectively unveil sections of a document to each reviewer without necessarily having them see it in its entirety, he noted.

Though some commercial software allows forms to be created on desktop computers, they can't be electronically annotated or signed. In addition, most lack security measures to prevent unauthorized access.

Bellcore's SuperForms software relies on modern encryption techniques to insure that forms - or parts of forms - are seen only by authorized recipients.

Users can be issued tamper-resistant smart cards that contain all necessary information (public and secret keys) for encryption and authentication. According to project manager Richard Graveman, a user can "sign" a form by using the "smart card" to apply the secret half of two-part cryptographic key before passing the form along to the next "signer."

This "marks" the form with a readily verifiable and forgery-proof "digital signature." Once a form has been signed, any attempt to alter the contents would render the signature invalid.

Bellcore's system currently runs on a multimedia workstation, but future users will not need such sophisticated equipment. The software takes advantage of scanning and image-processing techniques to recreate realistic blank electronic forms from paper copies, including logo and letterhead.

Its "user-centered" design features error checking, "help" menus, and automated spreadsheet-like calculations, as well as automatic routing and tracking. It can also be programmed to send a reminder when action on a form is due.

NEW YORK (DEC. 4) PR NEWSWIRE - The Daily News today began publication of an afternoon edition highlighted by the use of spot-color printing on the front page. This edition becomes the city's only afternoon newspaper providing New Yorkers with late breaking news, sports and business.

An initial run of 30,000 afternoon papers was prepared for sales by hawkers at commuter locations and high visibility areas throughout Manhattan. Production of the afternoon edition will be expanded in the days ahead to accommodate afternoon sales in other parts of the city. The front page of the new edition is distinguished from other newspapers through the use of Ad Pro 733 Blue.

John Sloan, the paper's vice president, said the new edition is part of The Daily News' commitment to expand services to readers and advertisers alike. "News readers and advertisers can anticipate in the weeks ahead expanded coverage, increased distribution systems, and more editions as part of our commitment to New Yorkers. This Big Blue- afternoon edition is just the start " Sloan said.

The major announcement of an afternoon edition of The Daily News comes one day after the paper began sales in the subway system and on the Long Island Rail Road. Yesterday, a federal district court judge reaffirmed a decision allowing The Daily News to sell newspapers in the New York transit system. So far, the hawker program has been responsible for sales of more than 200,000 papers daily, in addition to papers sold by the 3,183 retail dealers who now carry The Daily News. The number of dealers carrying The News increased by nearly 40 percent over the course of last week.

HIGHLAND PARK, MI (DEC. 4) PR NEWSWIRE - Chrysler Corporation (NYSE: C) today

reported an increase in its estimated market share for car and truck sales for late November despite a decrease in sales volumes compared to the same period a year ago.

Chrysler increased its domestic car share by 1.3 percentage points to 14.2 percent of the market and increased its total market share by half a point, to 11.2 percent, marking one of its best market penetration performances of the year.

Chrysler's truck share for the period increased to 23.5 percent of the domestic market and 20.9 percent of the total market, its highest since January.

Plymouth Sundance and Laser (up 13 percent), Dodge Shadow (up nine percent), Plymouth Acclaim and Eagle Talon registered the best gains among car nameplates.

ANN ARBOR, MI. (DEC. 4) PR NEWSWIRE - Gelman Sciences (AMEX: GSC) reported that net sales for the first quarter of fiscal year 1991 increased 7 percent to $18.8 million from $17.6 million for the same period last year. Net earnings for the first quarter of fiscal year 1991 rose 56 percent to $305,000 or $.13 per share from $196,000, or $.08 per share for the same period one year prior.

U.S. sales were up 6 percent in spite of a sluggish economy and continued weakness in some of the key markets they serve. International sales improved, particularly in Europe. However, sales of the company's Australian subsidiary declined 25 percent from the prior year because of the effect of the depressed national economy in that country. The company also reported that overall gross margins were negatively affected as it responded to stronger price competition and, to a lesser extent, by the company's product mix.

During the first quarter the company concluded a major contract with the China National Pharmaceutical Foreign Trade Corporation, worth $5.2 million of anticipated revenues over seven years, to sell them the technology, equipment and membrane product to produce microfiltration cartridges for pharmaceutical applications in China.

Chairman and chief executive officer, Charles Gelman, said he is looking ahead to the balance of fiscal 1991 with cautious optimism and reaffirmed the company's commitment to controlled growth and sustained profitability.

CHICAGO (DEC. 4) PR NEWSWIRE - Chicago Title and Trust Co. today announced the signing of a definitive agreement under which it will purchase the title insurance subsidiaries of Westwood Equities Corp., holding company for Los Angeles-based Ticor Title Insurance Companies.

Completion of the transaction is subject to various regulatory requirements and other conditions. The transaction is anticipated to close in the first quarter of 1991.

"This acquisition is an excellent strategic fit that will benefit customers, policyholders, employees and agents of both companies. Ticor has been an important organization in our industry for 97 years, and we will be proud to add it to our family of companies," said Richard P. Toft, president and chief executive officer of Chicago Title and Trust Co.

Chicago Title and Trust Co. is a wholly owned subsidiary of New York-based Alleghany Corp. (NYSE: Y). It is the parent of Chicago Title Insurance Co. and Security Union Title Insurance Co. (formerly Safeco Title Insurance Co.). Chicago Title and Trust Co. and its subsidiaries have total consolidated assets of $1 billion.

The Ticor Title Insurance Companies include Ticor Title Insurance Co. of California, Ticor Title Insurance Co. and Ticor Title Guarantee Co. (New York).

BURBANK, CA (DEC. 4) PR NEWSWIRE - Two Lockheed team YF-22 Advanced Tactical

Fighter prototypes are currently demonstrating their capabilities in the skies over Edwards Air Force Base, Calif., as part of an intensive flight test program. "Aircraft performance has been outstanding," said Sherm Mullin, Lockheed vice president and general manager, team program office.

"These airplanes have done everything we've asked of them," Mullin said. "Supersonic performance has been especially impressive. Well over an hour of supersonic time has already been logged, including 22 minutes on a single flight.

"The YF-22 has supercruised (without afterburner) a number of times and both prototypes have achieved top speeds in excess of Mach 1.5. We've also operated supersonically at altitudes up to 50,000 feet," he said.

Many other major milestones have also been accomplished. In demonstrations of thrust vectoring the revolutionary system has performed as predicted. A series of satisfactory weapons bay acoustic tests led to the successful launch of an AIM-9 missile by the number two prototype on Nov. 28. Both jets have achieved full tanker qualification and have accomplished numerous air refuelings.

Other flight test program accomplishments pointed out by Mullin include a variety of performance and handling qualities tests. "We've performed engine airstarts, single engine dings and 20 knot crosswind landings," he said, adding that by mid-November all of the Lockheed team and Air Force test pilots had flown the YF-22.

Noting that YF-22 flight testing is proceeding at an exceptional pace, Mullin said, "The rate at which we are generating sorties and the amount of data we have collected are unprecedented for a program of this magnitude, and we are continuing to expand the envelope every flying day."

Through Dec. 1 the two prototypes had flown a total of 38 test flights, posting 40.7 hours of combined flight time. Since going through a planned layup in early November to perform modifications necessary for the next round of flight testing, the two aircraft have flown almost every day except for Sundays and Thanksgiving, logging 13 hours for ten flights in seven flying days.

Lockheed's number one prototype made its first flight on Sept. 29. Equipped with General Electric YF120 engines it has since compiled 27.7 hours over 25 flights.

The team's second prototype, powered by Pratt & Whitney F119 engines, is the primary demonstrator for weapons by characteristics. Two days after its first flight on Oct. 30, it proved its readiness by making four test flights on two days. Since then it has built up 13 hours of flying time over 13 sorties.

Lockheed's YF-22 represents one of two proposed designs in the U.S. Air

Force's Advanced Tactical Fighter competition. Lockheed, teamed with Boeing and General Dynamics, designed, built and is now flight testing its YF-22 prototypes under a $697-million Air Force contract.

CAMBRIDGE, MASS. (DEC. 4) PR NEWSWIRE - Boston Technology (NASDAQ: BSTN) and Southwestern Bell (NYSE: SBC) announced today that they have signed a General Purchase Agreement whereby Southwestern Bell can purchase Boston Technology's CO ACCESS voice processing platforms.

The systems will be used to offer residential and small business voice messaging services, and other voice processing applications to customers of Southwestern Bell. Southwestern Bell will also use the systems for various internal messaging applications. Southwestern Bell Telephone Company uses Boston Technology platforms to serve its large business customers in selected cities in its five state area covering Arkansas, Missouri, Kansas, Oklahoma and Texas.

"The signing of this General Purchase Agreement will pave the way for a more accelerated offering of messaging services by Southwestern Bell," said Greg Carr, president of Boston Technology. "We are confident that these messaging services will provide tremendous value to Southwestern Bell customers and we are excited to be a participant."

Boston Technology develops, manufactures and markets enhanced voice processing platforms, primarily to Regional Bell Operating Companies, cellular providers, and independent telephone companies.

TORRANCE, CA (DEC. 4) PR NEWSWIRE - Toyota Motor Sales (TMS), U.S.A., Inc. today announced November car sales of 58,476 units.

Truck sales for the month were 12,803. Combined monthly car and truck sales were 71,279, compared to 72,819 a year ago.

November domestic car sales totaled 23,291 (10,163 Corollas and 13,128 Camrys) versus 21,058 (7,526 Corollas and 13,532 Camrys) during the same period last year.

"Despite the unsettled situation in the Persian Gulf, sales of Toyota vehicles

continue on an upward trend," said Bob McCurry, TMS executive vice president. "In fact, sales calendar-year-to-date already have exceeded total sales for 1989."

McCurry added, "meeting demand, especially for Toyota's core models, is a priority. The construction of a new manufacturing plant in Georgetown, Ky., will help us achieve this goal."

Lexus, Toyota's luxury division, reported a best-ever November sales totaling 5,847, up 54.3 percent compared to November '89. Sales of 3,983 LS 400 models -- a one-month record -- were up 45.5 percent from a year ago, while ES 250 sales were up 77.6 percent.

#90338p9933 12/04/1990 ~PR Newswire

TORRANCE, CALIF. (DEC. 4) PR NEWSWIRE - Ashton-Tate Corp. (NASDAQ: TATE) today announced that the company met its dBASE Cross- Platform Challenge at Comdex '90 by successfully porting over 40 customer-submitted, DOS-based dBASE applications to VMS, UNIX and Macintosh operating systems on the fly at the booth. Participants included both U.S. and international developers, users and corporate MIS managers who brought their existing dBASE applications and data to the Ashton-Tate booth to port to the platform of their choice.

"The participants seemed to be most impressed by the true portability that dBASE IV for VMS, Sun and 386 UNIX offer," said Dave Proctor, executive vice president of Ashton-Tate product development. "To be able to run an existing dBASE DOS-originated application on a VAX VMS System, Sun or 386 UNIX workstation or Macintosh computer, without modifying or re-compiling code, opens numerous avenues for growth to our existing customer base."

Customer Reaction "We were surprised at the high degree of reliability and ease of transportability," said Robert Davies, president and chief executive officer of SBT Corp., who ported the company's DOS-based dBASE IV business accounting program to a Sun Microsystems SPARCstation. "Our application performed well beyond our expectations on the Sun workstation -- the operating speed was amazing," Davies added.

"With dBASE IV, I can stay in my own comfortable DOS world and still develop programs for VMS, Sun and MAC machines," said Charles Mohler, president of Charles Mohler Consulting, who ported an address sorting program to a VAXstation 3100. "The demonstration at Comdex proved that code I write for a DOS machine can be seamlessly -- even painlessly -- ported to a variety of other platforms," Mohler added.

The dBASE IV Cross-Platform Challenge Continues Because it received such positive reaction from the participants, the company has extended the Cross-Platform Challenge through the end of the year.

Anyone interested in having a current dBASE application ported from DOS to a VMS, UNIX or Macintosh platform should contact the company's Advance Consulting Group at 213-583-6116, by no later than Dec. 17, 1990.

Participants will be asked to send their application of no more than 5,000 lines of pure dBASE Code and data on either a 5-1/4 inch or 3-1/2 inch disk to Ashton-Tate, noting the target platform. Participants should also include additional blank media compatible with the target environment so a copy of the ported application can be returned to them.

Headquartered in Torrance, Ashton-Tate Corp. develops and markets microcomputer business applications and advanced connectivity software. The company's major product categories include database management systems, word processing, integrated decision support, spreadsheets, graphics and software utilities. Ashton-Tate has international operations in most countries around the world, with products available in 20 languages in more than 50 countries. The company also offers a comprehensive line of training and support services for individuals, corporations and government agencies.

#90338p9938 12/04/1990 ~PR Newswire

MIAMI (DEC. 4) PR NEWSWIRE - When Mary Puckett became a Southern Bell operator in 1970, technology hadn't made many inroads in the telephone monopoly. "The equipment was very basic," she says. "We still used cordboards to process calls and had to clock the conversations manually. Efficiency wasn't a big concern when you were using a stopwatch to keep track of how long the customer was talking."

Computer terminals eventually replaced the cordboards, and, with the advent of computerized identification systems, operators could throw away their stopwatches and concentrate on connecting customers. And as the telecommunications revolution took hold, another thing changed -- Southern Bell ceased to be a monopoly. Competition flooded the telecommunications industry after the AT&T breakup in the early 80s. Suddenly Southern Bell wasn't the only company in the marketplace.

But strapped by regulations that capped its return on equity at a specified level, the company still operated as a monopoly with little motiviation to be efficient. "The company was like a freighter that was sluggish to changes in directions," says Tom Lohman, Southern Bell operations manager-comptrollers. "In a pure competitive system, the potential for profits is almost unlimited and so is the incentive to make them. But when your return on equity is capped, there really is little point in struggling to bring out new services or being more efficient, because you don't get to reap the rewards after enduring the headaches associated with changes. The normal human reaction is, 'Why bother?' There is no motivation to take the risks involved in reducing costs and developing new products more quickly when your rate of return is capped. There really is little motivation to find creative ways to increase production when all benefits are taken away by a cap on earning."

That motivation finally arrived in late 1988 in the form of incentive regulation. Under the new regulation, the cap on return on equity is 16 percent. And the company was allowed to keep 40 percent of the earnings above 14 percent until cap is reached.

"Before Incentive Regulation (under traditional regulation, a range of 12.2 percent to 14.2 percent would be allowed around a rate setting point of 13.2 percent), Southern Bell couldn't keep one cent after a rate of return of 14.2 percent was reached. So, there was no tangible reason to try for a higher return," says Lohman. "Incentive Regulation builds a corporate culture that says, 'I have to be the best.' We are now motivated to introduce new products and lower costs even when our jobs may be harder because of the changes, we know we must maintain innovation quality and efficiency to strengthen the customer base."

#90338p9939 12/04/1990 ~PR Newswire

KALAMAZOO, MI (DEC. 4) PR NEWSWIRE - The Upjohn Company (NYSE: UPJ) and Biopure Corporation today announced an agreement under which Upjohn will acquire sales and marketing rights to bovine hemoglobin-derived blood substitute products being developed by Biopure for human and animal use.

Hemopure, the potential product for human use, is awaiting U.S. Food and Drug Administration (FDA) approval to begin human clinical testing. Biopure has a pending patent application for the bovine-derived hemoglobin product and its method for manufacturing. Clinical trials for Oxyglobin, for animal use, have already commenced.

Under terms of the agreement, Upjohn will receive world sales and marketing rights (except for Central and South America, and Western Europe) for all blood-related products of Biopure. Upjohn will make an initial payment of $25 million and subsequent payments based on development milestones could total an additional $154 million. The payments will be used to purchase securities convertible into a minority interest in Biopure common stock. The agreement also includes a profit sharing formula.

Upjohn will be responsible for and obligated to pay the costs of preclinical and clinical development of Hemopure through final regulatory approval. Biopure will be responsible for manufacturing development. Upjohn will also provide technical and management oversight in connection with the operation of Biopure's manufacturing plants. As a biological product, there are a number of manufacturing and distribution issues that will need to be resolved.

Commenting on the agreement, Upjohn Chairman of the Board, President and Chief Executive Officer Theodore Cooper said: "We are excited about the opportunity to participate with Biopure in the development of these blood-substitute products. They will help alleviate blood shortages and offer advantages in the areas of blood transfusion, where human blood may pose a serious risk. Our broad experience in the areas of clinical development, manufacturing and marketing of human and animal health care products will help exploit the potential opportunities for these products."

Boston-based Biopure is a privately owned, development-stage pharmaceutical manufacturing company co-founded in 1984 by Carl Rausch and David N. (Jim) Judelson, vice chairman. Its primary activity is development of a blood substitute and blood-related products extracted from bovine hemoglobin.

The Upjohn Company is a worldwide, research-based provider of human health care products, animal health products, agronomic and vegetable seeds and specialty chemicals. Headquartered in Kalamazoo, the company has been dedicated to improving health and nutrition for more than a century.

#90338p9942 12/04/1990 ~PR Newswire

BOSTON (DEC. 4) PR NEWSWIRE - Biopure Corporation, a development- stage pharmaceutical manufacturing company based here, has named former U.S. Surgeon General Dr. C. Everett Koop chairman of its scientific advisory committee.

Prior to his tenure as U.S. Surgeon General during the Reagan administration, Dr. Koop was an innovative pediatric surgeon well-known in international circles. He has long been interested in shock hemorrhage, plasma substitutes, protein metabolism and total intravenous nutrition. During World War II, Dr. Koop was commissioned by the U.S. Office of Scientific Research and Development to study gelatin as a plasma substitute at the University of Pennsylvania, where he was awarded the degree of Doctor of Science in Medicine.

Biopure's primary activity is the patent-pending development of blood substitutes and blood-related products extracted from bovine hemoglobin -- Hemopure(R), which is awaiting FDA approval for human clinical trials, and Oxyglobin(R), for animal use, which is undergoing clinical trials.

Biopure Corporation, as separately announced today, has entered into an agreement with the Upjohn Company under which Upjohn will acquire sales and marketing rights for much of the world to the bovine hemoglobin-derived blood substitute products being developed by Biopure for human and animal use. A senior executive of Upjohn will be represented on the five-member Biopure board together with Rausch; David N. Judelson, vice chairman of Biopure;

Joachim Schnell, vice chairman of B. Braun Melsungen AG, the German pharmaceutical manufacturer which is the licensee for the Hemopure product in Europe; and Dr. Koop.

In addition to the blood substitute and related products, the developments from Biopure's proprietary large scale ultra purification separation technology is being applied through its licensee Boerhinger Mannheim in the area of cephalosporin drug manufacturing. The company's ongoing research and development activities encompass ultrapurification of other significant health care products in the areas of biological therapy.

Biopure Corp. is a privately owned company co-founded in 1984 by Rausch and Judelson (former president and co-founder of Gulf+Western Industries).

#90338p9949 12/04/1990 ~PR Newswire

PLANO, TX (DEC. 4) PR NEWSWIRE - Texas Instruments Inc. (NYSE: TXN) and Palo Alto-based Micro Focus Inc. have completed an agreement authorizing TI to sell Micro Focus COBOL/2(TM) in conjunction with the Information Engineering Facility(TM) (IEF(TM)) for OS/2(R) product sales. The IEF is TI's integrated computer-aided software engineering (CASE) product.

"TI and Micro Focus(R) are providing sophisticated workstation solutions to many of the same progressive system developers. This agreement will keep our basic technologies synchronized, the sales and support logistics will be simpler and the future directions of both vendors will remain more closely aligned," said Greg Mann, IEF Marketing Manager.

The IEF Planning, Analysis, and Design Toolsets are used to build business system specifications. An OS/2-based IEF Construction Toolset can then generate:

- COBOL or C Source code - Application logic - Screens
- Diagram trace code (if selected) for use by the IEF Diagram Testing Tool SQL source
- DBM Data Manipulation Language (DML)
- DBM Data Definition Language (DDL)
- Command file that controls source code compilation, link-edit, bind and installation

The COBOL/2 compiler is used by the IEF Implementation Toolset, which runs in OS/2 environments, to compile COBOL code generated by the IEF Construction Toolset.

COBOL/2 is transparently executed by the Implementation Toolset that performs the compile, link-edit, bind, and installation of the business systems. Systems can then be executed on the OS/2 workstation with or without the use of the IEF Diagram Testing Tool.

If diagram testing (trace) is selected at generation time then IEF developed diagrams can be viewed (rather than source code) at run time to examine executing systems. Any desired changes can be made in a separate OS/2 window, and then the system (or selected portion of the system) can be regenerated and retested.

Many IEF generated systems have been built to interface with existing, non-IEF generated, COBOL systems. Micro Focus COBOL/2 and the popular Micro Focus COBOL/2 Workbench(TM) tools are used by many organizations to manage these more traditional COBOL systems and the interfaces to them.

"Micro Focus products will help IEF customers couple IEF and non-IEF built applications and thoroughly test systems on the workstation before implementing them on the target platform," said Scott Whalen, Vice President of Sales for Micro Focus. "Micro Focus believes the partnership will be good for customers and is the beginning of a productive relationship between Micro Focus and TI."

RESTON, VA. (DEC. 4) PR NEWSWIRE - Lucas Aerospace Inc. officially opened its new North American Headquarters in Reston in a ceremony today.

The new building, designed specifically for the company at 11180 Sunrise Valley Drive, will house more than 80 Lucas Aerospace and Lucas Industries employees. The new facility was built by Quadrangle Development of Reston.

Najeeb Halaby, former head of Pan American Airlines, administrator of the Federal Aviation Administration under the Kennedy administration, and current chairman and chief executive officer of Dulles Access Rapid Transit Inc., was the keynote speaker. Halaby remarked on the contribution Lucas Aerospace and other aerospace firms are making to the growth and economic vitality of Northern Virginia, and specifically to the "Dulles Technology Corridor."

In his remarks at the opening, Denis Magee, president of Lucas Aerospace Inc., said: "This new headquarters facility is really just one small part of our investment in North America. Within the last year we opened major new manufacturing facilities in Park City, Utah, and Aurora, Ohio, and are planning in early 1991 to open an advanced technology engineering center in the Northeast. We are also continuing to invest significant resources in our

manufacturing operations in Utica, N.Y.; City of Industry, Calif.; and Jamestown, N.D. Of course, we are very proud of our new headquarters here, but our manufacturing facilities throughout the U.S. are the driving force of our organization."

Lucas Aerospace is part of Lucas Industries plc. With sales of more than $4.3 billion, of which $1 billion is generated by sales in North America, Lucas Industries plc has international interests in aerospace, automotive and industrial markets throughout the world.

FRANKENMUTH, MI (DEC. 4) PR NEWSWIRE - Frankenmuth Old German Style Bock Beer is being released today for the 1990-91 winter season. Trucks are leaving the brewery with its precious cargo for major markets in Michigan and surrounding states, assuring availability on store shelves for the holiday season.

Frankenmuth Bock received the Silver Medal at the Great American Beer Festival in Denver in 1989. "It has won many friends and is ideally suited for the holidays and the cooler winter months," said Frankenmuth President Ferdinand M. (Fred) Schumacher.

Made like the real Bock beer in the Old German tradition, Frankenmuth Brewery's brewmaster, Fred Scheer, uses six different malts to come up with a full-bodied, yet smooth-tasting Bock beer. "I challenge any brewery in the country to make a better-tasting Bock beer than Frankenmuth's," said Scheer.

Frankenmuth's Bock beer will be available from now until April 1991 when the season ends. By making its Bock beer seasonal, Frankenmuth Brewery continues a tradition started by monasteries in the Middle Ages.

PEAPACK, NJ (DEC. 4) PR NEWSWIRE - Fedders Corporation (NYSE: FJQ) today reported it plans to complete the previously announced acquisition of Emerson Quiet Kool no later than Jan. 18, 1991. The purchase price, based on the Nov. 2 balance sheet of Emerson, will be $56 million in cash plus the assumption of certain current liabilities. The price, which reflects primarily the purchase of working capital, will be adjusted at closing to reflect cash flow since Nov. 2. The transaction has received clearance under the Hart-Scott- Rodino Antitrust Improvements Act and is subject to approval of the seller's existing lenders, who must release liens on the assets.

Emerson Quiet Kool is the room air conditioner division of the Jepson Corporation, a subsidiary of Great American Management and Investment, Inc. (NASDAQ: GAMI).

Sal Giordano, Jr., chief executive officer of Fedders Corporation, commented that "the marriage of Emerson Quiet Kool and Fedders will create a provider of high-value, low-cost room air conditioners able to compete successfully against imports over the long term."

Both Fedders and Emerson Quiet Kool have manufactured and marketed quality room air conditioners for more than 40 years.

MOUNTAIN VIEW, CA (DEC. 4) PR NEWSWIRE - Consilium Inc. (NASDAQ: CSIM), the leading supplier of integrated factory floor management software, announced today that revenue for its fiscal year ended Oct. 31, 1990, was $32,427,000, a 40 percent increase over revenue of $23,118,000 for the previous fiscal year. Net income for fiscal 1990 increased 60 percent to $5,644,000, or $.82 per share, from $3,528,000, or $.59 per share, for the previous year.

For its fourth quarter, Consilium reported revenue of $9,020,000, up 38 percent from $6,519,000 in the like period last year. Net income for the quarter was $1,620,000, or $.23 per share, an increase of 36 percent from net income of $1,187,000, or $.17 per share, for the fourth quarter of fiscal 1989.

"We are delighted with the strong financial performance the company achieved in fiscal 1990, including major increases in both our revenue and net income," said Thomas Tomasetti, president and chief executive officer. "We had record sales and significantly increased our international business. In addition, we had several key sales to major multinational corporations.

International business in fiscal year 1990 accounted for 36 percent of revenue compared with 25 percent for the previous year. Consilium's sales to Asia, accounting for 20 percent of this year's revenue, were primarily to

electronics and semiconductor companies while the company's European sales, accounting for 16 percent of revenue, were spread throughout a diverse range of industries, including textiles, pharmaceuticals, electronics and appliances. In response to its growing European business, Consilium opened a sales office in France, bringing the number of international offices and distributors to 10.

Fourth qaurter highlights include the hiring of Peter Rieman as vice president of corporate development and Joseph Seidler as vice president of marketing. Subsequent to the close of the quarter, Consilium introduced a major new product, FlowStream(TM). Developed in cooperation with Digital Equipment Corp. (NYSE: DEC), FlowStream is factory and plant floor management software designed to run in manufacturing environments not served by the company's current product offerings.

Consilium Inc. is the leading supplier of integrated factory and plant floor management software and services. With its FlowStream and WorkStream product lines, Consilium offers a suite of comprehensive factory and plant management solutions that fulfill multiple operations requirements and allow manufacturers to achieve World Class Manufacturing. The company is headquartered in Mountain View.

WorkStream is a registered trademark and FlowStream is a trademark of Consilium Inc.

HOUSTON (DEC. 4) PR NEWSWIRE - BP Exploration, Inc. and Barker-Patrinely Group, Inc., jointly announced plans today for BP Plaza, a 20-story, 555,000-square-foot office facility to be located in West Houston's "Energy Corridor" near Interstate 10 and Highway 6.

The new building, scheduled for completion by the end of 1992, will be the new home of BP Exploration's approximately 1,000 employees who work out of the company's present offices at the 5151 Sage Plaza, in the Galleria/Post Oak area. BP Exploration will occupy 430,000 square feet in the new building, leaving approximately 125,000 square feet of net rentable area to be leased to third parties.

The project will be a development of a Texas limited partnership, which includes Barker-Patrinely Group, Inc., a national real estate company based in Houston which will serve as managing partner and developer of BP Plaza; and limited partner and major tenant BP Exploration, Inc., a subsidiary of British Petroleum Company, PLC.

BP Plaza will be located on a nine-acre site in WestLake Park, a prestigious development in West Houston with approximately two million square feet of occupied space. Earlier this year, BP Exploration secured an option to purchase the land, and since July has worked with Barker-Patrinely Group on development plans. According to Bill Sears of BP Exploration, the company studied several alternatives before deciding on BP Plaza as its new home.

Ironically, BP Plaza marks the first Houston development for Barker-Patrinely Group, a company which is headquartered in the city but has concentrated its efforts elsewhere. Founded in 1983 by Michael D. Barker and C. Dean Patrinely who formerly worked together at Gerald D. Hines Interests, Barker-Patrinely Group has achieved national stature with major projects in California and Florida.

BP Plaza also utilizes the internationally renowned talents of former Houston resident Rick Keating, who is now design partner with the Los Angeles architectural firm of Keating, Mann, Jernigan and Rottet. The partners and principals of the architectural firm have practiced together for 12-15 years, and previously headed the Houston and Los Angeles offices of Skidmore Owings & Merrill, during which time they were responsible for the design and documentation of more than 40 million square feet of projects.

#90338p9973 12/04/1990 ~PR Newswire

PLANO, TX (DEC. 4) PR NEWSWIRE - Texas Instruments (NYSE: TXN) today announced the planned release of an integrated, full function investment management software system for the Insurance and Mutual Fund marketplace.

The MAXIMIS(R) system offers substantial advantage over conventional accounting packages in that it is the first to be developed using CASE technology and it offers a full function, mainframe, relational data base solution for investment management.

The MAXIMIS system integrates the functionality needed for investment accounting, regulatory reporting, portfolio management, and investment operations.

The included function has been defined and tested operationally in the IMIS predecessor product which was acquired by TI in June of 1990 from the Business Information Services unit of Control Data Corp.

IMIS is successfully installed at many leading insurance companies. Initially, the MAXIMIS software will mirror the latest release of IMIS from a functional point of view.

Since MAXIMIS has been designed using the Information Engineering Facility(TM) (IEF(TM)) product (TI's CASE technology), it will be available for execution on the target computing environments supported by the IEF product line, and as such substantially broadens the options available to customers.

"With MAXIMIS there is now a function rich product offered in a relational data base environment and developed using state of the art CASE technology (the IEF) which will serve customers' changing needs for years to come," said Jim Smith, Director of Financial Software for TI's Advanced Information Management Division (AIM).

The IEF CASE tool provides the productivity needed for meeting the goal of continued enhancement of MAXIMIS to support new investment instruments and

strategies and support regulatory requirements in the insurance industry.

The MAXIMIS relational environment will provide a superior data repository of investment information for use throughout a user company. First, because the information structures are easy to understand and it is easy to produce reports utilizing SQL-based utility languages, users will get more value from the information, and the quality of the data will be enhanced.

In addition, integration of function or interface to other systems requiring access to investment information will be greatly facilitated. Finally, the relational table driven design of MAXIMIS will help it to stay current with new investment instruments and methods with fewer disruptive program changes.

NEW YORK (DEC. 4) PR NEWSWIRE - Alva O. Way, chairman of the board of IBJ Schroder Bank and Trust Company, today announced the appointment of Donald H. McCree, Jr., as president and chief executive officer of IBJ Schroder Bank, effective Jan. 1, 1991.

McCree joins IBJ Schroder following a 30-year career with Manufacturers Hanover Trust Company. He most recently served as group executive in charge of Manufacturers Hanover's financial institutions and distribution. As chief executive officer of IBJ Schroder, he will oversee the bank's expanding operations in such major areas as corporate banking, trust and private banking.

During his tenure with Manufacturers Hanover, McCree served as Officer-in-Charge of the bank's London Branch, later holding the positions of executive vice president, North American Division, and sector executive vice president, corporate banking. As part of his responsibilities, he directed the bank's North American middle market lending effort and managed the bank's private banking and trust business in North America.

WASHINGTON (DEC. 4) PR NEWSWIRE - The Oversight Board of the Reaslution Trust Corporation today announced the appointment of Philip F. Searle, former chairman of SunBanks Inc. in Orlando, Fla., as chairman of its national advisory board.

Prior to being named national chairman, Searle served as chairman of the

Atlanta-based region 2 advisory board.

Searle currently serves as board chairman of SunBank/Naples N.A. in Naples, Fla., a consultant to SunBanks Inc. in Orlando, and a director of SunBank/Sarasota County, N.A.

The Financial Institutions Reform, Recovery and Enforcement Act of 1989 (FIRREA) mandated that the Oversight Board establish one national and at least six regional advisory boards to provide advice to the Oversight Board and the Resolution Trust Corporation (RTC) on policies and programs for the sale of real estate assets of the nation's failed thrifts.

The national board meets in Washington at least four times a year to advise the Oversight Board on the status of the real estate sales efforts of the RTC in each region. As national chairman, Searle will serve a two year term.

The national board is comprised of the national chairman and the six regional advisory board chairmen. The regional advisory boards are headquartered in Atlanta, Dallas, Denver, Kansas City, Los Angeles and New York.

The Oversight Board, established by FIRREA in 1989, formulates the policy, approves the funding, and provides the general oversight of the Resolution Trust Corporation.

NEW YORK, (DEC. 4) PR NEWSWIRE - Corroon & Black Corporation announced today the appointment of John Douglas Strohl as president and chief executive officer of Corroon & Black of New Jersey, Inc., a subsidiary located in Parsippany.

Strohl's appointment, which takes effect immediately, was announced by James M. Corroon, director of the Northeast Region of Corroon & Black's Brokerage Services Group.

In making the announcement, Corroon commented: "We are pleased to welcome Doug to Corroon & Black, and we look forward to enjoying the value-added benefits his skills and experience will bring to the clients, prospects, and employees of Corroon & Black of New Jersey."

Strohl, who has nearly 20 years of insurance industry experience, served most recently as manager of the account management department in an office of another international insurance brokerage firm. He has held numerous other positions, and has worked as an account executive, casualty underwriter, and

an underwriting supervisor. Strohl has technical expertise with complex casualty accounts, and expertise with other insurance lines, including property, marine, aviation and life. He graduated from Davidson College in Davidson, N.C.

Corroon & Black Corporation, now an operating division of Willis Corroon plc, is headquartered in New York City. Corroon & Black is one of the world's largest full-service insurance intermediaries, providing insurance brokerage, risk management services, reinsurance brokerage, and employee benefits, compensation, and actuarial consulting to individuals, local governments, professions, business and industry. It has offices across the United States and affiliated offices throughout the world. Willis Corroon (ADRs traded on NYSE & PSE: WCG) traces its origins to 1828, with the establishment in London of Henry Willis & Company. Its Corroon & Black division was founded in 1905 in New York City.

ALLENTOWN, PA. (DEC. 4) PR NEWSWIRE - Steve Furst, president of Hess's Department Stores, Allentown, Pa., has announced the appointment of Frank Galik, Jr. as vice president, director of stores for Hess's southern regions.

Galik will be responsible for the merchandising, profitability, operations and personnel of the 37 Hess's locations throughout Tennessee, Kentucky, Virginia, Georgia, Indiana and North Carolina. He will supervise five corporate regional directors and 37 store management teams.

Galik is only third individual to be named corporate director of stores in Hess's 93-year history.

Furst said, "Frank Galik brings a great deal of valuable experience to this position. He will lend additional guidance and direction to Hess's expansion plans for our southern markets."

Prior to joining Hess's, Galik was senior vice president and director of stores for Millers, Knoxville, Tenn. (purchased by Hess's in 1987), and executive vice president and director of stores for Joske's, Dallas. He also held management positions with M. O'Neil Company (May Company), Marriott Corporation and Gimbel Brothers. He was also executive vice president/general merchandise manager and director of stores for World Bazaar, East Pointe, Ga.

Galik attended Pennsylvania State University and earned his bachelor of arts degree from the University of Pittsburgh. He and his wife, Marlene, have two children, a daughter, 14 and a son, 19. They reside in Atlanta and will be relocated to Knoxville.

Hess's is a wholly owned subsidiary of Crown American Corporation, one of the nation's leading real estate developers, which is based in Johnstown, Pa. Hess's has 75 locations throughout Tennessee, Kentucky, Georgia, North Carolina, Pennsylvania, New York, New Jersey, Maryland, Virginia, West Virginia and Indiana.

BLUE BELL, PA (DEC. 4) PR NEWSWIRE - Nutri/System Inc. today announced the appointment of Albert J. DiMarco as president and chief operating officer effective immediately.

DiMarco will be in charge of all day-to-day operations and functions of Nutri/System Inc. A. Donald McCulloch Jr. assumes the position of chairman

and chief executive officer.

"It is a great pleasure for me to announce the return of Al DiMarco," said McCulloch. "His appointment allows me to focus more on the long-term planning for our business."

DiMarco previously was one of the original partners to participate in the leveraged buy-out of Nutri/System Inc. in August 1986. He served in various capacities with the company during his tenure from 1985 to 1989.

"I have a great personal interest in this company. I look forward to contributing to its future success. I'm delighted to be returning as the president and chief operating officer."

DiMarco left the company in 1989 and has been developing new business ventures in the past year.

Prior to joining Nutri/System in 1985, DiMarco served as president of Chaps, Ralph Lauren, a division of Warnaco Inc.

Nutri/System is a privately held company serving more than 200,000 clients weekly and more than 1,800 centers throughout the United States, Canada, Australia and the United Kingdom.

BRIDGEPORT, CT. (DEC. 4) PR NEWSWIRE - The board of directors of Citytrust Bancorp, Inc. (NYSE: CYT) has elected Norman M. Steere to the position of president, chief executive officer and a director of Citytrust. He was also elected president, chief executive officer and a director of the holding company, Citytrust Bancorp, Inc., subject to final regulatory approval by the Federal Reserve Bank.

Steere, 59 years old, takes over the responsibilities of chief executive officer from George F. Taylor, who remains chairman of the board of Citytrust Bancorp, Inc. and Citytrust.

Steere was vice chairman and a director of Mellon Bank Corporation, a $30 billion bank holding company in Pittsburgh, and its subsidiary, Mellon Bank, N.A., when he retired in late 1987. He served with the Mellon organization for 30 years.

In making the announcement, Taylor said, "Steere is an outstanding banking executive with a superior record of achievement in all aspects of the business. He brings to Citytrust the broad experience and leadership capabilities that will help restore our organization to financial health. We are very fortunate that he has chosen to come out of retirement to accept this challenge."

During four years as a vice chairman of Mellon Bank, the 21st largest bank in the nation, Steere was directly responsible for $13 billion in assets and 1,800 employees and more than $480 million in revenues. He oversaw the bank's corporate banking, cash management services, data processing centers, international banking, leasing activities and the economics office.

Prior to his promotion to vice chairman, he served as executive vice president of corporate banking for six years. In that capacity, he was responsible for

more than a hundred commercial lending officers and correspondent bankers, while developing one of the country's best-known cash management and date service centers with a staff of more than 400.

Earlier in his career at Mellon Bank, he served as vice president- western division head; vice president-international banking in Buenos Aires, Argentina; and vice president and manager, Gateway Branch in Pittsburgh's business district.

Steere earned a B.A. degree from Brown University and an M.B.A. degree from Harvard Business School. Steere and his wife, Blyth, currently live in the Pittsburgh area but will relocate to Connecticut. The have three grown children.

Citytrust Bancorp, Inc. is an independent Connecticut bank holding company. Its subsidiary, Citytrust, serves major markets throughout Connecticut through 46 retail branches and 10 commercial lending offices.

DETROIT (DEC. 4) PR NEWSWIRE - Disturbed with appearances of unclear authority at Metro Airport following the collision Monday (Dec. 3) of two jet aircraft which took eight lives, Wayne County Commission Chairman Arthur B. Blackwell II has appointed a special committee to investigate lines of administrative responsibility.

Blackwell, with himself as chairman of the new committee, has named Commissioner Susan L. Hubbard as vice chair, along with Commissioners Kay Beard, David P. Cavanagh and Kevin F. Kelley.

"My concern is not only that the tragedy occurred, but how emergency measures were carried out, and under whose direction, after it happened," said Blackwell.

"We need to know if an absence of authority or administrative confusion contributed to the cause of the incident, and if more direct authority could have prevented it all together or made rescue operations more effective," Blackwell added.

Blackwell said the recent resignation of former airport director Richard B. Jamison leaves uncertain who is the senior airport official, although former deputy director Robert C. Braun serves as acting director.

"Considering that sources other than Braun were disseminating supposedly

official information about the crash, apparently some of it erroneous, we truly don't know who was technically in charge at the time of the accident and afterward," said Blackwell.

"For example," Blackwell pointed out, "there were conflicting statements made regarding authority to close the airport, whether it is the airport administration or the FAA. At least that much should be clear and definite in the new hierarchy, and the public deserves the comfort of that knowledge."

Blackwell said the committee will consider it essential to know if Jamison has been officially replaced, and who will replace Braun if he is being permanently advanced. Besides overall evaluation of airport operations, said Blackwell, the committee will examine adequacy of the official airport rules and regulations currently being revised.

Blackwell said the committee will also carefully evaluate new requests for emergency operations equipment and assess what might have been provided years ago to lessen danger at the airport. He said he has granted "blanket authority" for airport officials to enter into contracts for repair, construction and equipment until the airport cleanup is complete.

#90338u0132 12/04/1990 ~United Press International

SAN FRANCISCO (DEC. 4) UPI - Usually it's the San Francisco 49ers' offense that comes up with the big plays, but Monday night their defense starred in a 7-3 triumph over the New York Giants in the lowest-scoring game in the NFL this season.

The defense yielded but three points on a pair of goal-line stands, held the the Giants to just four-of-14 third-down conversions, pressured New York into going to its passing game and forced three fumbles.

Quarterback Phil Simms completed just 14-of-32 passes for 153 yards and the Giants' ground game picked up a mere 75.

''This is probably the best defensive game we've ever played since I've been with the 49ers,'' said head coach George Seifert, who formerly was the club's defensive coordinator. ''I think the running game was the key, as was the defense and the special teams. I think that we ran the ball at times very effectively.''

While the defense was throttling the Giants, Joe Montana and the 49ers' offense suffered through its second sub-par week. The top-ranked offense in the NFC gained but 240 yards in total offense and misfired on a 43-yard Mike Cofer field goal.

However, the club's struggling ground game managed to gain 88 yards and helped chew up 3:19 of the game's final 3:55. John Taylor, who has not returned punts since early in the year, returned five punts for 63 yards in a game where every yard counted.

Montana found his touch when he needed it, directing yet another magical two-minute drive to give San Francsico its winning 7-3 margin at the half. Montana - who was 12-of-29 for 152 yards and was not sacked in the contest - hit Roger Craig with a 31-yard pass on a delay out of the backfield and then followed two plays later with a 23-yard scoring strike to a sliding John Taylor, who beat cornerback Mark Collins.

The Giants had earlier taken a 3-0 lead on a 20-yard Matt Bahr field goal, but never could gain any momentum as Charles Haley sparked the emotional 49er defense with five tackles, one and a half sacks and forced two fumbles.

''I put my prepared pep talk in my pocket,'' said Seifert. ''And let the players take it from there.''

The Giants lost despite getting three favorable bounces. A Phil Simms pass bounced off Rodney Hampton's hands and Stephen Baker caught it on the carom for a first down at the San Francisco 3. Simms also had two of his three fumbles picked up by Ottis Anderson, who advanced them for gains of 2 and 20 yards.

''Fortunately those were the main gains they got, off those fumbles,'' Seifert said.''And other than that, we were able to contain them.''

New York Coach Bill Parcells, who saw his team drop two straight, said the Giants had their chances but couldn't capitalize.

''We had our chances, we had our shot,'' said Parcells. ''We just didn't get it done.''

New York's evening came down to a crucial drive in the fourth quarter. The Giants marched from their 35 to a first down on the San Francisco 9. But three consecutive Simms passes fell incomplete.

On fourth down, Parcells decided to go for the win instead of settling for a field goal and a 7-6 deficit. On the play, Lionel Manuel had broken free in the end zone, but cornerback Darryl Pollard managed to deflect the ball.

The game was played in front of 66,092 fans, the largest crowd in Candlestick Park history.

#90338u0143 12/04/1990 ~United Press International

(DEC. 4) UPI - At least eight people are dead and 21 others injured in the collision of two Northwest Airlines jets on a fog-shrouded runway at Detroit's airport. Authorities say a Boeing 727 traveling at about 140 miles an hour on a takeoff roll clipped a D-C-9 that had strayed onto the runway, causing the second airplane to burst into flames.

The Supreme Court Monday strengthened the protection of criminal suspects against self-incrimination. The justices ruled that once an accused asks to have a lawyer present during questioning that right remains in effect indefinitely. It says once a suspect invokes his so- called Miranda rights, he cannot later be forced into confession without a lawyer present.

Hawaii Democratic Senator Daniel Inouye went to bat Monday for the so-called Keating Five senators who are accused of influence-peddling. Inouye condemned the allegations as ''ridiculous'' and said- quoting- ''I have never found them

to be wanting in honesty or integrity. They are men of unimpeachable character.''

Democrats Alan Cranston of California, Dennis DeConcini of Arizona, John Glenn of Ohio and Donald Riegle of Michigan and Republican John McCain of Arizona are accused of improperly pressuring federal bank regulators to benefit savings and loan kingpin Charles Keating. Keating gave the lawmakers one-point-three Million dollars in political contributions.

In New York, prosecutors say seven young men have been indicted in the beating death of a homeless man during a Halloween night of violence. Manhattan District Attorney Robert Morgenthau says the attack on Ward's Island deomonstrated ''a complete and total disregard for human life.''

Most Americans think they eat right and see NO reason to change. That's according to two government nutritionists who say their preliminary data suggest that perceptions and reality don't always match. Although studies suggest Americans eat too much fat... about 37 percent instead of the recommended 30 percent or less.

#90338u0147 12/04/1990 ~United Press International
(DEC. 4) UPI - Arab opposition to Iraq's invasion of Kuwait solidified with the foreign ministers of three major Arab states agreeing at a conference in Cairo to step up diplomatic efforts to dislodge Saddam Hussein's army from Kuwait before a U.N. Jan. 15 deadline.

The Arab initiative was agreed to Monday, the same day Yemeni Vice President Ali Salem al Baid, whose country supports Iraq in the crisis, flew to the Jordanian capital Amman for talks on the 4-month-old standoff, Amman Radio reported.

Persian Gulf states have labeled Jordan's King Hussein, who on Monday met in Amman with a delegation from the exiled Kuwaiti government, an aopologist for Saddam because of the Hashemite monarch's refusal to condemn Iraq's Aug. 2 invasion and annexation of Kuwait.

Cairo newspapers said Saudi Arabia, Egypt and Syria hope they can cause a rift between Saddam and his handful of Arab allies, thus persuading him of the futility of remaining in the oil-rich emirate after Jan. 15, a date set by the United Nations to let diplomatic efforts work before resorting to force.

''The foreign ministers ... have agreed to step up diplomatic efforts to persuade Iraqi President Saddam Hussein that peace can best be achieved by his withdrawal from Kuwait,'' the official said.

He said the efforts are crucial to avert force in the area.

Egypt's Middle East News Agency quoted a government official as saying the talks, which were to resume Tuesday in the presence of Egyptian President Hosni Mubarak, are intended to contain the crisis before it explodes.

''The vital interests of the Arab nation require the employment of its strategic, economic, military and human potential to adopt a unified action to deal with the crisis, and pull the Arab nation out of its current plight,'' MENA quoted the unnamed government official as saying.

''The three Arab capitals do not want a war against Iraq, but the restoration of an Arab land to its legitimate owners,'' the official said.

''They will step up contacts with (pro-Iraqi) states such as Yemen, Tunisia, Jordan, Sudan and the Palestine Liberation Organization to persuade Saddam that honorable withdrawal is better than dishonorable defeat in a war,'' the official said.

The meeting came as an Iraqi official boasted that any military attempt to free Kuwait would be a catastrophe for the attackers and their friends.

That threat came two days after Saddam accepted a U.S. proposal for last-minute talks on the crisis before the Jan. 15 U.N. deadline and a day after it tested a Soviet-designed Scud missile.

In Washington, Defense Secretary Dick Cheney told a Senate hearing on U.S. policy in the gulf that U.N.-imposed economic sanctions against Iraq will not force him to withdraw from Kuwait.

In Kuala Lumpur, Prime Minister Mahathir Mohamad said Monday Malaysia and other Islamic countries are prepared to mediate to help resolve the crisis.

Iraq's official INA news agency quoted Information Minister Latif Nsayef Jassim as saying any allied attack on Iraq to liberate Kuwait ''would be a catastrophe to the aggressing forces and the parties that invited them,'' a reference to such Arab states as Saudi Arabia and the United Arab Emirates.

Egypt and Syria have sent troops to the gulf to serve with the U.S.- led multinational force deployed there since the invasion of Kuwait.

Syria has sent some 4,000 troops to Saudi Arabia and the United Arab Emirates to counter any further Iraqi aggression, and Syrian Defense Minister Mustafa Tlass was quoted over the weekend as saying his country is ready to send an another 500,000 troops if necessary.

Syria and Iraq are ruled by rival wings of the Baath Arab Socialist party and Syrian President Hafez Assad considers Saddam his main enemy in the Arab world.

Egypt has dispatched up to 20,000 troops to the gulf and is the third largest contributor after the United States and Britain, which is boosting the size of its force to 30,000.

Cheney told a Senate committee he does not think economic sanctions alone will work against Saddam and told congressional critics who want delays that stalling could be dangerous.

Cheney told the Senate Armed Services Committee that time can weaken the international coalition arrayed against Iraq and that further damage could occur to politically and economically fragile nations, permitting Iraq to bolster its military strength.

As for sanctions, he said: ''My personal view is that given the nature of that regime, given Saddam Hussein's brutality to his own people, given his very tight control over that society, his ability to allocate resources for the military, their ability to produce their own food, basically, inside, that he can ride them out.

''Those who would have us rely indefinitely on economic sanctions alone need to face the possibility that they will fail to achieve our aims. Such a failure will have very serious consequence and those consequences must also be faced,'' said Cheney.

''My personal view is that it is far better to deal with him now, while the coalition is intact, while we have the United Nations behind us, while we have some 26 other nations assembled with military forces in the gulf, than it will be for us to deal with him five or 10 years from now when the members of the coalition have gone their disparate ways and when Saddam has become a better armed and more threatening regional superpower than he is at present,'' said Cheney.

#90338u0199 12/04/1990 ~United Press International

(DEC. 4) UPI - Federal investigators are trying to determine how one Northwest Airlines jetliner got on the takeoff runway in the path of another at Detroit airport. The mix-up caused a deadly collision in heavy fog between a Boeing 727 and a D-C-9. At least eight people were killed and 21 others were injured. National Transportation Safety Board investigator Robert Benzon said- ''It's too early to tell what happened, but there were two planes on the runway at the same time and that's not supposed do happen.''

Miami authorities say they've managed to bring the situation under control after hundreds of angry youths rioted through the city's Woodwind section. Police say the youths were enraged at the acquittal of six policemen in the beating death of a Puerto Rican drug dealer. They rampaged for four hours in the predominately Puerto Rican neighborhood north of downtown... burning

buildings and cars and throwing rocks and bottles. There were NO reports of injuries.

Arab leaders are solidifying their opposition to Iraq's invasion of Kuwait. The foreign ministers of three major Arab states Monday agreed at a conference in Cairo to step up diplomatic efforts to dislodge Saddam Hussein's army from Kuwait before a U-N January 15th deadline. Cairo newspapers reported that Saudi Arabia, Egypt and Syria hope they can cause a rift between Saddam and his handful of Arab allies, thus persuading him of the futility of staying in Kuwait until he's forced out.

President Bush heads to Uruguay Tuesday on the second leg of his five-nation tour of South America. During his visit to Brazil, a rebellion by military officers in Argentina distracted some of the symbolic focus of Bush's swing to promote political and economic change. U-S officials tried to discount the significance of the fighting in Argentina between government and dissident troops. But White House spokesman Marlin Fitzwater acknowledged it appeared intended to embarrass Argentine President Carlos Menem with Bush due in Buenos Aires on Wednesday.

A noisy protest by farmers over subsidy cuts and deep U-S-Europe discord over agriculture marred Monday's opening of the final week of world trade talks in Brussels. Tens of thousands of farmers, mostly from Europe, set fire to tires and rubbish, uprooted street signs and parking meters and broke windows at a European Parliament building to protest the trade talks. Police used tear gas and a water cannon to control the farmers. The farmers said their livelihoods are threatened by plans to cut agriculture supports.

(DEC. 4) UPI - Angry youths in Miami's Windwood section burned buildings and cars and threw rocks and bottles last night after the acquittal of six policeman charged in the beating death of a drug dealer. There were NO injuries reported.

At least eight people died and 21 were injured Monday in Detroit when a jet taking off at 140 miles an hour clipped another jet standing still on the runway. The DC-9 on the ground erupted in flames. The other jet landed immediately.

Defense Secretary Cheney told a Senate hearing Monday that sanctions against Iraq will not force a withdrawal from Kuwait. Cheney toldcongressional critics who want delays that stalling could be dangerous.

Aides to President Bush say he still plans to visit Argentina Wednesday, despite a coup attempt. Troops loyal to President Carlos Menem crushed the attempted overthrow. At least eight people died in the uprising.

In Brussels Monday, riot police used tear gas and a water cannon to control farmers who staged a protest at the opening of the final week of world trade talks. The farmers were upset over subsidy cuts.

The shuttle Columbia astronauts took manual control of a troublesome 50 Million dollar shuttle telescope mount Monday. They gathered priceless information about the cosmos while trying to fix the computerized pointing system.

#90338u0235 12/04/1990 ~United Press International

(DEC. 4) UPI - Ranger fans thought they'd have to choose between watching their favorite hockey club in person or the New York Giants and San Francisco 49ers on Monday Night Football.

As things turned out, many were able to do both.

A stinko performance by the Rangers started fans for the exits early in the second period Monday night, and the Pittsburgh Penguins proceeded to a 9-4 rout.

''We needed it for our confidence and we needed it for our morale,'' said John Cullen, Pittsburgh's leading scorer. ''We were getting killed (recently) and our goalies were facing 40 shots every night. Tonight we played good 'D,' killed two 5-on-3's. We just played an overall good game.''

''It just wasn't our night from the first goal,'' New York Coach Roger Neilson said. ''It was above the guys' heads. The first three were tipped in. You can't blame the goalkeeper; that's just the way it went. And we just didn't recover from that misfortune.''

Mark Recchi set up five goals and Phil Bourque scored a hat trick as the Penguins ended a three-game losing streak. Recchi set up three of Pittsburgh's four first-period goals, then helped Bourque complete his hat trick with two third-period assists.

Recchi assisted on Bourque's tip just 68 seconds into the game, triggering the Penguins to only their second win in their last eight games.

New York, overall point leader in the NHL, has lost three of its last four - giving up 24 goals in the process. Ranger goalie John Vanbiesbrouck left after 20 minutes in favor of Mike Richter, who allowed three goals in his first 6:06. Bernie Nicholls scored two goals and an assist for New York.

Pittsburgh lost defenseman Zarley Zalapski - its best plus-minus player - with a second-period concussion. He was admitted to Lenox Hill Hospital with a slight concussion. He was to stay overnight for observation.

The Peguins killed a double-minor in the first period, and 1:11 and 1:42 of two-man disadvantages in the third.

By the way, the fans who left Madison Square Garden couldn't have been too pleased with the football result, either. The Giants lost 7-3.

Whalers 4, Canadiens 2

At Montreal, Kevin Dineen scored two goals, one of them just 10 seconds into the game, leading Hartford. The Whalers scored three times in the middle period, moving into third place in the Adams Division, one point ahead of Buffalo. The crowd was announced at 16,143, but it actually was the smallest attendance of the season due to a storm that was expected to dump 10 inches of snow.

Devils 4, Jets 4

At Winnipeg, Ed Olczyk scored a power-play goal 41 seconds into the third period, completing a rally from a 3-1 deficit. Olczyk skated in front of goalie Sean Burke to deflect Fredrik Oluasson's shot from the point. New Jersey scored on its third, fourth and sixth shots of the game.

#90338u0265 12/04/1990 ~United Press International

(DEC. 4) UPI - Around the world... Around the clock... U-P-I brings the latest news.

Federal investigators are tryng to find out why two Northwest Airlines jetliners collided at Detroit airport. The collision killed at least eight people and injured 21 others. Authorities say Northwest Boeing 727C-9 that had strayed onto the runway in heavy fog.

In Miami, the acquittal of six police officers in the beating death of a Puerto Rican drug dealer touched off a riot in the city's Windwood section, north of downtown. Authorities say hundreds of angry youths rampaged for

several hours... looting, setting fires and throwing rocks in the Hispanic neighborhood before riot police quelled the unrest. NO one was injured.

Aides say an attempted coup in Argentina won't disrupt President Bush's plans to visit the country tomorrow. Fighting erupted early yesterday when rebels seized three key installations in the greater Buenos Aires area. But loyalst government troops crushed the rebellion hours later. At least eight people died and dozens were wounded.

Continental Airlines Holdings has filed for Chapter 11 bankruptcy protection from its customers. The nation's fifth-largest carrier blames its woes on skyrocketing jet fuel prices triggered by the Persian Gulf crisis. Continental says its fuel costs have jumped 125 percent since Iraq invaded Kuwait on August 2nd.

A squadron of radar-elusive stealth fighters will arrive in the Persian Gulf region Tuesday. The arrival of the 22 so-called ''ghost'' bombers will double the number of stealth fighters that have been deployed under Operation Desert Shield. Officials say the remainder of the Air Force's 56 stealth fighters will remain in the United States.

Michigan's so-called ''suicide doctor'' has been charged with first- degree murder for helping a Portland, Oregon, woman with Alzheimer's disease take her own life. Dr. Jack Kevorkian allowed 54-year-old Janet Adkins to kill herself by using his ''suicide machine'' to release a lethal drug into her body.

#90338u0292 12/04/1990 ~United Press International
(DEC. 4) UPI - TODAY'S PEOPLE:

HEPBURN DOES IT HER WAY: Katharine Hepburn never bothered to show up to receive any of her four Oscars but she did make it to Washington to be honored at the Kennedy Center for her contribution to the arts. Hepburn did it in her own way, too, wearing sneakers to the State Department and her usual pants suit to the weekend functions and on the conditions that she not have to go through receiving lines or mingle too much. Also honored with awards were Dizzy Gillespie, director Billy Wilder, opera star Rise Stevens and composer Jule Styne. On hand to honor them were Angela Lansbury, John Candy, Glenn Close, Walter Cronkite, Vice President Dan Quayle and his wife, Marilyn, Marvin Hamlisch, Jack Lemmon, Walter Matthau, Christopher Plummer, Phylicia Rashad, Lynn Redgrave, Bill Cosby, movie mogul Lew Wasserman, James Woods and Lauren Bacall, who was relieved to have finished a long wait in line to shake hands with President Bush. ''I'm going to go have a drink - right now,'' she said. ''Where's the bar?''

MILLI VANILLI WON'T COUNT: The National Academy of Recording Arts & Sciences has mailed out ballots listing the disgraced Milli Vanilli on the 1990 Grammy Awards ballot but their votes will not be counted. The first-round ballots, which will be used to select the actual nominees for the awards were printed and mailed to 6,000 voting members of the academy before it was revealed that Rob Pilatus and Fabrice Morvan did not sing on the album, ''Girl You Know It's True,'' which won them a Grammy as best new artists last year. However, their song ''Blame It on the Rain'' is on the ballot for song of the year, a category that honors the songwriter - in this case Dianne Warren - and still might be included in the voting.

BETTY, MEET BART: Baghdad Betty obviously has never seen Bart Simpson. Betty, 1990's version of Tokyo Rose, is a product of the Iraqi propaganda machine and her radio broadcasts are supposed to demoralize the U.S. forces in the Saudi desert. But a letter from Sgt. 1st Class Joseph J. Torregrossa indicates Betty isn't very well informed about American culture since she puts Bart in the matinee idol class. ''Let me give you a Baghdad Betty quote,'' Torregrossa wrote. '''Why are you Americans here? Don't you know you will die in the desert? While you are here your wives and girlfriends are dating American movie stars. Movie stars like Tom Selleck, Paul Newman and ... Bart Simpson!' ... Needless to say all the guys howled over that. We're all waiting for our letter, the 'Dear John' one, the one dumping us for Bart.''

GLIMPSES: The drive to pay Willie Nelson's $16.7 million tax bill is going slowly. A weekend fund-raiser at an Austin, Texas, nightclub brought in $1,000 but a ''Willie-Aid'' campaign by an Austin barber has raised only $327 ... ''The Naked Gun'' has been reloaded. The hit movie spoof will be followed by ''The Naked Gun II 1/2: The Smell of Fear.'' Paramount Pictures issued a release announcing its ''inability to stop the start of production for 'The Naked Gun II 1/2: The Smell of Fear. Leslie Nielsen and Priscilla Presley have been coerced into repeating the starring roles.''

#90338u0399 12/04/1990 ~United Press International

BANGKOK, THAILAND (DEC. 4) UPI - The ''black box'' flight recorders of a Bangkok Airways plane that crashed last month and killed 38 people were sent to Canada Tuesday for analysis to determine what caused the crash, officials said.

Prasert Prasart-thong-osoth, chairman of the airline, said the recorders, known as ''black boxes,'' were sent to Canada early Tuesday for examination by a team of aviation officials and technicians from Thailand and Canada.

''The truth must wait until officials finish analyzing the flight black boxes. This will determine whether it was a problem with the plane or the pilots or the weather,'' Prasert said.

The Canadian-made Dash-8 turboprop plane, operated by Bangkok Airways, crashed Nov. 21 into a coconut grove on Samui Island, 300 miles south of Bangkok.

The crash killed nine Thais, nine Germans, five Japanese, five Swedes, four Australians, two Americans, two Italians, one Swiss and one Finn.

Prasert said tiny Samui Airport, which was built by the airline, has acceptable air safety standards even though it does not have radar equipment.

The runway is 5,900 feet long, and the Dash-8 plane needs only 2,950 feet for operation, he said.

The most likely cause of the crash, Prasert said, was a sudden thunderstorm that struck as the plane started to land.

''We do not take any risk for any landing but the weather was not a problem when the plane was preparing to land,'' Prasert said.

Tossaporn Bunyaruck, director of flight operations for the airline, agreed.

Tossaporn said maintenance checks had confirmed the plane was in good condition and that the pilots were experienced.

He said aviation experts examined the wreckage and the inspection of the black boxes was expected to be finished within six weeks.

#90338u0594 12/04/1990 ~United Press International

CONCORD, NH (DEC. 4) UPI - Dr. Constantine L. Hampers, a prominent physician who pioneered the use of kidney dialysis, pleaded guilty Monday to two misdemeanor charges of importing the pelts of endangered animals he killed while big-game hunting in Mexico.

The guilty plea came the day before Hampers' second trial on the charges was to begin in U.S. District Court. As part of the plea bargain agreement, prosecutors dropped 13 related felony charges.

Hampers was immediately sentenced by U.S. District Court Judge Shane Devine to pay a fine of $20,000, donate $180,000 to the World Wildlife Fund and forfeit the mounted pelts of three ocelots and two jaguars.

He could have faced a maximum penalty of 65 years in prison and a fine of $2.6 million on the original charges.

His first trial ended in June with a hung jury.

Hampers, of Dublin, and another doctor, Edward B. Hager of Lyndeborough, were accused of illegally killing the three ocelots in 1985 and the two jaguars in 1986 while hunting on Mexico's Yucatan Peninsula. He admitted that a courier delivered the pelts in a plastic bag to the doctors in their room at the Las Vegas Hilton, where they were attending a Safari Club convention.

He told U.S. District Court Judge Shane Devine that he ''should have known'' that he violated the U.S. Endangered Species Act and other wildlife conservation laws.

Hampers is the husband of L. Joyce Hampers, an assistant U.S. commerce secretary and former Massachusetts revenue commissioner.

He is founder and chairman of National Medical Care Inc. of Waltham, Mass., which was a leader in making kidney dialysis widely accessible since the 1960s.

Hager had pleaded guilty earlier to one felony count of smuggling. He was placed on probation for one year and paid a $75,000 fine.

(DEC. 4) UPI - Iraq says that all Soviet hostages will be allowed to leave the country beginning tomorrow. Moscow said last week that it would not send troops to the Gulf to serve with the U-S-led multinational force, but warned that it would NOT hesitate to send troops if Soviet nationals in Iraq are endangered. There are an estimated 33-hundred Soviets being held by Iraq.

Federal investigators will continue their investigation today into the collision of two Northwest Airlines jets at Detroit's airport yesterday. At least eight people died and 21 were injured when a jet taking off struck another on the ground. That jet burst into flames. The National Weather Service said visibility was one-quarter mile in the air and less on the ground.

Philippine Foreign Secretary Raul Manglapus and special U-S negotiator Richard Armitage held one-on-one talks today on the future of key U-S bases in the Philippines. Earlier, Philippine spokesman Rafael Alunan said technical panels had reached an impasse in discussing arrangements on the U-S Clark Air Base at the expiration of American basing rights in September 1991.

Church bells and a 21-gun salute marked the inauguration of Ireland's first woman president yesterday. Mary Robinson promised to represent ''an open Ireland.'' The Socialist-backed attorney was sworn in as the seventh president in the history of the republic in a largely military ceremony. The Irish president's role is largely ceremonial.

The jury in New York's Central Park jogger rape case ended its fourth day of deliberations yesterday and does NOT appear to be near a verdict. Suitcases with extra clothing were brought to court and one juror's husband sent flowers saying he missed his wife. Two teen-agers face 13 criminal charges, including rape and attempted murder.

In New York City this morning, an armed robber was shot and wounded when a Vietnam veteran who was with his girlfriend pulled a gun and fired on him. The suspect was shot three times and was taken to a hospital for treatment. Police say the suspect had earlier robbed two other men. The robber was charged with robbery, attempted robbery and criminal possession of a weapon.

#90338u0627 12/04/1990 ~United Press International

PONTIAC, MI (DEC. 4) UPI - Dr. Jack Kevorkian is out on bond after being charged with first-degree murder for helping a woman with Alzheimer's disease kill herself with his ''suicide machine.''

''Dr. Kevorkian was the primary and legal cause of Janet Adkins' death,'' Oakland County Prosecutor Richard Thompson said at a news conference Monday.''He cannot avoid his criminal culpability by the clever use of a switch.''

Adkins, 54, of Portland, Ore., died in Kevorkian's van in a rural Oakland County park on June 4 after pressing a button on his suicide device that released a lethal drug into her system.

Under Michigan law, conviction on a charge of first-degree murder carries a mandatory penalty of life in prison without possibility of parole. Thompson conceded it would not be easy to get a conviction.

''There's no question about it. This is going to be a difficult case to convict Dr. Kevorkian on because of the emotional aspects of the case,'' Thompson said. ''I fulfilled my sworn duty and I just can hope that the jury performs their duty.''

Kevorkian was arraigned later Monday in 52nd District Court in Clarkston before Judge Gerald McNally, who set a $100,000 personal and $50,000 cash bond with 10 percent allowed, meaning Kevorkian could be released after posting $5,000. He was taken to the Oakland County Jail late Monday afternoon but was released about 9:30 p.m. when bond was posted.

''I don't take this seriously. This is all immoral anyway,'' Kevorkian said. ''The time has come for this thing,'' he said, referring to doctor-assisted suicides.

Thompson said it took nearly six months to charge Kevorkian because his office wanted to carefully research all the medical and legal implications of the case.

Telephone conversations between Kevorkian and Dr. Murray Raskind, Adkins's physician, will be central to the prosecution's case, Thompson said.

''Kevorkian called Dr. Raskind on May 16 and Raskin returned the call on the 18th, at which time Kevorkian informed him what he was going to do to his patient, Janet Adkins. Raskind told Kevorkian he felt it was inappropriate, that Janet Adkins had several more years of quality life, '' Thompson said.

Thompson said the conversation is documented by medical records from the University of Washington Hospital, where Adkins was being treated with an experimental drug.

Kevorkian, anticipating Monday's announcement, said late last week he does not fear criminal prosecution.

''Send me to jail. Put me in solitary if you want. At least I'll be with honest people when I'm by myself.''

Thompson said he would base his case against Kevorkian on a 1920 Michigan Supreme Court opinion that held that a husband who mixed and placed poison near his wife at her request so that she could drink it was guilty of first-degree murder when she died as a result of drinking the poison.

To date, the case has not been reversed by the Michigan Supreme Court, nor has it been revised by the Michigan Legislature, Thompson said.

Thompson said his investigation into the Adkins case led him to conclude that there was no reason for her to take her own life and no reason for Kevorkian to assist with the device he invented.

''Janet Adkins was not terminally ill or suffering pain,'' he said. ''For me not to charge Dr. Kevorkian under these circumstances would be a courruption of the law and turn Oakland County into the suicide mecca of our nation.

''Dr. Jack Kevorkian is not above the law; and if he wants to change the law, he should address the legislative branch of government. If physicians are to have a license to kill in addition to their license to heal, that license must come from the legislature, not the prosecutor.''

Thompson's announcement came one day before trial was to begin in a civil case brought by his office in response to Adkins's death nearly six months earlier.

Kevorkian has insisted he has broken no laws and is convinced authorities are acting imporoperly in proceeding against him.

#90338u0653 12/04/1990 ~United Press International

NEW YORK (DEC. 4) UPI - Former world heavyweight boxing champion Muhammad Ali arrived in New York Tuesday following a trip to Iraq where he gained the release of several hostages.

Authorities said Ali arrived at Kennedy International Airport at 5:30 a.m. on a Royal Jordanian Airline flight.

Reports that Ali arrived with six former American hostages held in Iraq were unconfirmed, said Port Authority Police Officer Jim Keuchler.

Ali left Baghdad with 15 American hostages Sunday. He had delayed his trip in an apparently unsuccessful attempt to free three more Americans, Egypt's Middle East News Agency had said.

An undetermined number of Belgians and British nationals, freed by Iraqi President Saddam Hussein late last week, also were on the plane when Ali arrived in Cairo, the agency said.

Ali went against State Department warnings on travel to Iraq to meet with Saddam in Baghdad on an independent mission to win freedom for some of the estimated 700 Americans trapped in Iraq and occupied Kuwait.

Ali was scheduled to leave Iraq Saturday but remained an extra day to try to win the release of three more unidentified American hostages.

A spokesman for Ali said he planned to return to Baghdad at Christmas in hopes of bringing out more hostages.

Many of the Americans are being held at key economic and military installations as a human shield against U.S. attack. Saddam has promised to release all foreigners in batches beginning on Christmas Day.

#90338u0662 12/04/1990 ~United Press International

LUSAKA, Zambia (DEC. 4) UPI - President Kenneth Kaunda fired the editors of Zambia's two major newspapers without explanation Tuesday after they had become increasingly bold in their coverage of the movement for a restoration of a multi-party democracy.

Kaunda also unexpectedly dismissed his minister of defense, Lt. Gen. Hananiah Lungu, who was appointed in the wake of an abortive coup attempt in June. He gave no reason for the firing.

''I have to regret that some of my ablest ministers have to be dropped,'' Kaunda told a brief news conference on the same day parliament scheduled final reading on a bill restoring a multi-party democracy in Zambia.

Kaunda, known to place budding military men into the diplomatic service, hinted Lungu might receive a foreign posting. He commended Lungu for a quick response to a recent attack in Zambia by right-wing Mozambican guerrillas.

The general was replaced by Dodson Siatalimi, presently minister of state for defense. At the same time, Kaunda also dropped Enos Haimbe, the minister of power, transport and communications, who is on study leave in Britain.

Komani Kachinga, for five years the editor of the nation's largest newspaper, The Times of Zambia, and Cyrus Sikaze, editor of the Zambia Daily Mail, were both dismissed by Kaunda without explanation. He said only that they would be given ''other posts.''

However, The Times of Zambia, which Kaunda's ruling United Independence Party (UNIP) claims as its own, and the government-owned Zambia Daily Mail, had in recent months given prominent coverage to the opposition forces agitating for a multi-party democracy.

Their more bolder coverage began to emerge last year with the political developments of Eastern Europe.

With the approval of a constitutional amendment bill as early as Tuesday that will allow the formation of other political parties for the first time in 17 years, Zambia moves a step closer to elections, which Kaunda is expected to call by October 1991.

As replacements, Kaunda named Bwendo Mulengela, a lecturer at the University of Zambia's English department, to head The Times of Zambia, and Calvin Mutumweno, a lecturer at the UNIP ideological President Citizenship College to head the Zambia Daily Mail.

Once active election campaigning begins, control of the media is expected to be challenged by Kaunda's rivals. Multi-party lobbyists say The Times of Zambia was purchased in the 1970s with taxpayers' money and contend the UNIP does not therefore own it.

#90338u0695 12/04/1990 ~United Press International

ATLANTA (DEC. 4) UPI - Former President Jimmy Carter charged the Bush administration with abandoning ''the American commitment to saving energy,'' and called for a national energy policy designed to wean the United States from its oil dependence.

In a ceremony Monday at the Carter Presidential Center to comemmorate the 10th anniversary of the Alaska Lands Act, Carter also said the Bush administration was willing to destroy pristine Alaska land for oil.

''Drilling for oil irresponsibly will only extend our addiction to that fuel

'' Carter said. ''It should be clear to us by now that laws passed in the 1970s increasing energy efficiency were the most sensible way to cure our energy problems.''

The current Persian Gulf crisis has increased efforts by the oil industry to open such environmentally fragile areas as Alaska's Arctic National Wildlife Refuge to oil development.

Carter criticized those efforts, saying they contradicted the goal of the Alaska Lands Act of 1980, which established several new national parks, nine national wildlife refuges and 25 wild and scenic rivers. Seven other wildlife refuges were expanded under the act.

''We can't correct our energy problems by doubling our production,'' said Carter, adding that drilling in Alaska would increase domestic oil production by only 2 percent.

''To substitute a destruction of the precarious Alaska lands, particularly the wildlife refuges, instead of having reasonable conservation measures, I think is criminal.''

Carter said the Bush administration has ''abandoned the American commitment to saving energy.''

George T. Frampton, president of the Wilderness Society, predicted President Bush's energy plan - expected to be released early next year - will focus on traditional energy production rather than provide a comprehensive blueprint to lessen U.S. oil dependency.

''This addiction results in damage to pristine lands, oil spills, pollution and global warming,'' Frampton said. ''We fear that next year another great ecosystem in the world, the coastal plain of the Arctic Refuge, may become the next victim of our dependence on oil.''

#90338u0707 12/04/1990 ~United Press International

JERUSALEM (DEC. 4) UPI - A Palestinian resident of the Israeli-occupied Gaza Strip was killed while trying to escape from soldiers who stopped the fishing boat he was on, military and Palestinian sources reported Tuesday.

The crew of an Israeli navy gunboat that was on a routine patrol off the southern coast of the Gaza Strip noticed what they regarded a suspicious looking fishing boat moving southwest late Monday, the military sources said.

The Israeli vessel signaled for the boat to stop, but it moved toward the open sea, the sources said. Air force helicopters, in conjunction with the gunboat, forced the fishing boat back to a Gaza beach where Israeli soldiers were

waiting to arrest its occupants, the sources reported.

One of those on the fishing boat tried to escape from the soldiers, and was shot and killed, military sources said. Palestinian sources identified the slain man as a resident of the Gaza Strip's Beach refugee camp.

The military imposed a curfew on the refugee camp in an effort to prevent disturbances after residents heard of the incident, the Palestinian sources said.

Authorities began an investigation into whether the occupants of the fishing boat were involved in recent activities in Gaza related to the nearly 3-year-old Palestinian uprising, military sources said.

#90338u0709 12/04/1990 ~United Press International

BRUSSELS, Belgium (DEC. 4) UPI - Deadlock over farm subsidies persisted Tuesday on the second day of world trade talks, despite warnings that an immediate breakthrough was needed to avert collapse of the 107-nation negotiations.

Farm exporting countries, including the United States, rejected as woefully inadequate a statistical ''explanation'' by the 12-nation European Community of its agriculture proposal in talks under the General Agreement on Tariffs and Trade.

''It seems rather late in the day for methodology,'' said Australian Trade Minister Neal Blewett, who called for ''explicit'' EC commitments rather than analytical ''mumbo-jumbo.''

The EC is under pressure to deeply reduce its massive farm supports, and to offer specific guarantees on market access and cuts to price- distorting export subsidies.

The United States wants farm subsidies at levels far lower than those sought by the EC and European farmers, and is seeking a 75 percent reduction in the current supports.

Developing countries that produce food cheaply say they are frozen out of world markets by the generous subsidies given European farmers, which create surpluses and drive prices down.

''There are ... farmers from all over the world who want a fairer shake,'' Deputy U.S. Trade Representative Rufus Yerxa said.

Although the talks are due to conclude Friday, officials said time could in fact run out much sooner.

''It has been made clear by some countries that we need to see some progress on agriculture in the next few hours'' in order to save the talks, a GATT spokesman said at midday.

Renewed agriculture negotiations were slated for late in the day.

This week's talks cap a four-year round of GATT talks, known as the Uruguay Round after the country where it began in 1986.

Negotiations over services, investment and other key areas have been stalled over the farm-subsidies impasse.

The United States, backed by the 14-nation Cairns Group of farm exporters - including Australia, Brazil and New Zealand - seek a 75 percent cut in subsidies, including a 90 percent slash in export refunds.

The EC has proposed a 30 percent cut from 1986 levels, with no specific guarantee on export subsidies or market access.

The EC agriculture commissioner, Ray MacSharry, circulated documents on Tuesday claiming that 30 percent cuts in EC internal supports would in fact create ''significant reduction in export refunds by 1995,'' including a 40 percent reduction for wheat subsidies as EC and world prices converged.

He said EC and U.S. expenditure on export assistance for wheat were comparable in recent years, and insisted the EC was also providing adequate market access. For 1987-1989, he said, butter imports into the EC made up 4.4 percent of domestic use, compared to 0.2 percent for butter imports into the United States.

The United States rejected the EC's new arguments even before they were presented.

''We don't need to have their position explained. We need to see some movement '' said Richard Crowder, U.S. Agriculture undersecretary.

On Monday, about 25,000 farmers, mostly from Europe, protested against any cuts in subsidies, claiming their livelihoods depend on government supports.

#90338u0742 12/04/1990 ~United Press International

BELFAST, NORTHERN IRELAND (DEC. 4) UPI - The father of a newborn died in a hail of gunfire as he went to feed the family pet in a rural town northwest of Belfast, the Royal Ulster Constabulary said Tuesday.

David Andrew Shiels, 30, was shot dead Monday night outside his mobile home in Maghera, 50 miles northwest of Belfast, a short distance from where a former soldier was shot dead Saturday by the outlawed Irish Republican Army.

Shiels had no known connections with Protestant paramilitaries or British security forces in Northern Ireland, police said. They believed the baker's assistant was a random target for the terrorists fighting to liberate Northern Ireland from British control.

He was the 74th victim to be killed this year, and the second to die since security chiefs warned of a major escalation of IRA terror before Christmas.

Shiels' wife and child survived the attack, as gunfire ripped through their fragile home, missing them by inches.

Protestant politicians have called on security chiefs to launch a massive operation and arrest known nationalist and loyalist guerrillas to stop the spiral of killings.

Mid-Ulster member of Parliament William Crea called on the government to stop talking about military action and mount an offensive against the IRA before ''the Protestant communities in parts of Northern Ireland are wiped out.''

An extra 600 British troops were flown into the province to back up 11,000 troops already here.

Security along the 230-mile border with the Irish Republic has been intensified, with troops being deployed in remote areas. A number of border checkpoints also have been closed at nights.

Six soldiers and a civilian were killed last month when the IRA mounted a ''human bomb'' offensive against border checkpoints. Civilians were tied to seats on trucks and forced to drive the bombs to the checkpoints where they were detonated by remote control.

A number of similar attacks failed when the bombs did not explode, one at Rosslea, 85 miles west of Belfast, 12 days ago, when the IRA packed a 1.5-ton bomb onto a truck. To prevent the driver from escaping, the bombers held his family at gunpoint and tried to break his legs.

But he escaped the blast when the detonator dislodged from the bomb, the

largest known to have been used by the IRA.

#90338u0743 12/04/1990 ~United Press International

NEW YORK (DEC. 4) UPI - The head of the public schools system wants to permit distribution of condoms to high school students as a way of fighting the nation's worst teenage AIDS outbreak, a published report said Tuesday.

The New York Times said that students could obtain condoms even without parental consent under Schools Chancellor Joseph Fernandez's plan.

Fernandez, who will propose the plan to the Board of Eucation on Wednesday, said in a memorandum to the Board of Education recently that New York City is leading the nation in adolescent AIDS cases, the Times said.

''We cannot afford to ignore this crisis,'' he said.

Under the plan, students at each high school, not only the 17 with health clinics, would be able to get free condoms from male and female staff volunteers at a variety of school sites and at specified times in the school day.

Any of the city's 261,000 high school students, no matter how young, would be eligible to get them, the Times quoted aides to the chancellor as saying.

As to why no parental consent or birth control counseling would be required, Fernadnez said, ''People at any age have ready access to condoms at supermarkets and drugstores without benefit of an educational or counselig component.''

The Times said that of the seven board members, only two have indicated opposition in principle to distribution of condoms and a third has indicated some reservations.

The Center of Population Options in Washington said that few high schools in the United States distribute condoms, even those with health clinics.

The Board of Education was expected to vote on the matter in January and if the proposal is approved, condom distribution could start by spring.

Roman Catholic officials have said they would oppose the plan.

Fernandez issued statistics showing that New York City accounted for 16 percent of the nation's AIDS cases among male adolescents and 32 percent among female adolescents. As of August, 33 boys and 14 girls in the city had AIDS.

#90338u0766 12/04/1990 ~United Press International

ROMULUS, MI (DEC. 4) UPI - The sequence of events in Monday's collision of two Northwest Airlines jets at Detroit Metropolitan Airport, based on reports from witnesses and authorities:

1. Both airliners leave the Northwest domestic terminal at about 1:30 p.m. Flight 299, a Boeing 727-200 with 156 people aboard, proceeds to the south end of Runway 3-C and is cleared for takeoff to Memphis, Tenn.

2. Flight 1482, a DC-9 bound for Pittsburgh with 44 people aboard, is supposed to turn onto Taxiway J, parallel to the runway. Instead it turns into the path of the larger Boeing 727. DC-9 pilot realizes error; radios tower he thinks he's on runway.

3. Tower warns DC-9 it must turn off runway immediately but the warning is too late. The 727 starts its takeoff roll and, 2,500 feet into the roll at more than 100 mph, it clips the DC-9.

4. The 727's right wing slices into DC-9 fuselage at window level, ripping full length of plane and knocking off DC-9's right engine. The 727 continues another 3,000 feet down the runway, its right wing tip crumpled.

5. DC-9 passengers say right side of plane seemed to blow out, sending glass and debris flying through the cabin. Fuel spills and ignites into a fireball that sweeps forward through the passenger compartment. Some passengers escape through an exit onto the left wing and jump 8 feet to the ground. Other passengers in the front of the DC-9 jump from the front door onto an escape chute. Passengers drag the injured away from the plane, fearing an explosion from leaking fuel.

WASHINGTON (DEC. 4) UPI - Sales of single-family homes dropped to a seasonally adjusted rate of 491,000 in October, the Commerce Department said Tuesday.

Sales declined 23 percent from a rate of 636,000 sales a year ago, according to the monthly report by the Bureau of the Census and the Department of Housing and Urban Development.

The figures represented a decline from the revised September rate of 509,000, officials said.

New home sales through October declined 16 percent to 474,000 compared with 563,000 for the like 1989 period last year, officials said.

The median sales price of new houses sold in October was $121,800 while the average sales price was $157,500, the government said. The seasonally adjusted estimate of new houses for sale was 334,000 at the end of October, a supply of 8.4 months.

(DEC. 4) UPI - C O R R E C T I O N

In second story, make first sentence read xxx to one of the smallest, etc.

Government investigators today began piecing together the series of events that caused a Northwest Airlines D-C-9 with 44 people aboard to stray onto the wrong runway at fog-shrouded Detroit Metropolitan Airport yesterday. Eight people were killed and 21 others were injured when the right wing of a larger Northwest jet on a takeoff roll hit the fuselage of the D-Cpilot's seat, causing the smaller plane to burst into flames.

President Bush flew from the largest country in South America to one of the smallest today. Bush headed from Brazil to Uruguay on the second day of a 12-thousand-mile goodwill tour to mark a turning point in U-S relations with Latin America. A rebellion by military officers in Argentina diverted some of the symbolic focus of Bush's mission yesterday. Bush is due to go to Argentina tomorrow.

It took about four hours last night for police to restore calm in a Miami neighborhood where rioting broke out after the acquittal of six policemen charged in the beating death of a Puerto Rican drug dealer. Youths rampaged through several blocks of the city's predominantly Puerto Rican Windwood section. The rioters burned buildings and cars and tossed rocks and bottles. There were NO reports of serious injuries.

Outer space is a bit crowded today. As the seven shuttle Columbia astronauts continue their astronomy mission, a Soviet spaceship has docked with the Mir space station. The soviet spaceship is carrying two Soviet cosmonauts and a Japanese journalist. The docking occurred on the 34th orbit of the Soyuz spacecraft.

In Cairo, the foreign ministers of three major Arab states taking part in the multi-national Persian Gulf force resumed talks today. Egypt, Syria and Saudia Arabia yesterday agreed to step up diplomatic efforts to dislodge Saddam Hussein's army from Kuwait before the January 15th deadline. Egyptian President Hosni Mubarak joined in the talks.

A Boeing 707 carrying 10 people on a mission of mercy for war- and famine-stricken Sudan crashed today on approach to Kenya's Jomo Kenyatta Airport, killing everyone aboard. The Trans Arabian Airlines plane was flying to Kenya to pick up relief supplies for southern Sudan, where a seven-year war has caused acute food shortages for the past two years.

#90338u0830 12/04/1990 ~United Press International
BONN (DEC. 4) UPI - The western German economy continued to boom in the third quarter, sparked by increased domestic investments and high demand from the new eastern part of Germany, the Federal Statistics Office said Tuesday.

Western Germany's gross national product soared 5.5 percent in the third quarter this year compared with the year-ago quarter, the report said.

Increased investment activity within the country and high demand from eastern Germany, which became part of the Federal Republic Oct. 3, boosted the GNP in the western part of the country, the report said.

The report did not include the growth rate for former East Germany, which has been hit with a severe economic crisis for the past months, marked by skyrocketing unemployment, bankruptcies and climbing prices.

Economics Minister Helmut Haussmann, who announced Monday after Sunday's national elections he would leave the government for private business, said Tuesday he expected a 4.5-percent average growth rate for western Germany this year.

The economics ministry released a report Tuesday, saying that industrial production in September and October combined rose by 5.4 percent compared with the same period last year, but slipped a seasonally adjusted 1 percent from September to October.

The report said construction activities climbed 4 percent in October, while production in the manufacturing sector fell 1.5 percent, in the mining sector 2.5 percent and utilities output dropped 3 percent.

#90338u0853 12/04/1990 ~United Press International
(DEC. 4) UPI - A team of investigators from the National Transportation Safety Board arrived in Detroit last night to investigate the collision of two jets that killed at least eight and injured 21. Investigators boarded the burned-out remains of the McDonnell Douglas D-C-9 for an initial inspection. The D-C-9 was struck while on a runway by a larger jet that was taking off.

Tony Dresden, a spokesman for the Air Traffic Controllers' Association, reportedly said the pilot of the D-C-9 was confused about his location and gave the tower inaccurate information. He said that controllers were allowed to review the tower tape yesterday and had briefed him on its contents.

Iraq's news agency says King Hussein of Jordan arrived in Baghdad today for talks with Iraqi President Saddam Hussein on the Gulf crisis. Arab diplomatic sources in Cairo said King Hussein would try to persuade Saddam to be more

flexible in his talks with Secretary of State Baker later this month. The king has taken a sympathetic stand toward Iraq.

Former boxing champ Muhammad Ali arrived in New York early today following his trip to gain the release of several of the hostages held in Iraq. Ali arrived at Kennedy International Airport. Port Authority police could NOT confirm reprors that six former American hostages held in Iraq were on the plane with Ali, who left Baghdad with 15 American hostages Sunday.

The Iraqi government announced today that it will permit all 33- hundred Soviet hostages held in Iraq to leave, beginning Wednesday.

A doctor charged with first-degree murder for helping a woman with Alzheimer's disease take her own life has been released on bond. Dr. Jack Kevorkian said he used his ''suicide machine'' in June to help Janet Adkins die in his van in Michigan. Oakland County Prosecutor Richard Thompson said Kevorkian- in his words ''cannot avoid his criminal culpability by the clever use of a switch.''

A deadlock over farm subsidies continued today on the second day of world trade talks in Brussels. There were warnings that an immediate breakthrough is needed to avert collapse of the 107-nation negotiations. Yesterday, about 25-thousand farmers, most of them from Europe, protested against any subsidy cuts, claiming their livelihoods depend on government supports.

A prominent physician who pioneered the use of kidney dialysis pleaded guilty yesterday to two misdemeanor charges of importing the pelts of endangered animals he killed while big-game hunting in Mexico. Dr. Constantine Hampers pleaded guilty in Concord, New Hampshire the day before his second trial on the charges was to begin. Hampers was fined 20-thousand dollars and must donate 180-thousand dollars to the World Wildlife Fund.

TOKYO (DEC. 4) UPI - Finance Minister Ryutaro Hashimoto said Tuesday the Group of Seven industrialized nations would hold a meeting of their finance ministers and central bankers early next year.

Hashimoto told a news conference at Tuesday's regular Cabinet session ''it is natural for the G-7 to hold its meeting soon because the group is holding such meetings regularly at an interval of several months.''

He said, however, that no date for the meeting has been set yet because Britain wants to discuss views with other members of the European Community in advance.

He said a wide range of topics will be discussed at the next G-7 meeting, including financial support for the Soviet Union.

The group consists of the United States, Britain, Canada, France, Italy, Germany and Japan.

#90338u0963 12/04/1990 ~United Press International
ROMULUS, MI (DEC. 4) UPI - Government officials Tuesday were trying to learn how two Northwest airliners collided on a runway at Detroit Metropolitan Airport in fog and rain, causing a DC-9 to burst into flames, killing eight and injuring 21.

Eight people were killed and 21 others were injured Monday afternoon when the right wing of a larger Northwest jet on a takeoff roll hit the fuselage of the DC-9 just behind the co-pilot's seat, causing the smaller plane to burst into flames.

The pilot of the smaller jet may have missed a turn onto a taxiway, rolling instead onto Runway 3-Center, where the crash occurred at about 1:45 p.m., authorities said.

Initial speculation centered on whether the pilot of the smaller jet became confused in the fog.

Tony Dresden, a spokesman for the Air Traffic Controllers' Association, said the pilot of the DC-9 was confused about his location and gave the tower inaccurate information. He told the Detroit News that controllers were allowed to review the tower tape monday and had briefed him on its contents.

''The DC-9 pilot became lost on the runways,'' Dresden said. ''The pilot gave the ground controller erroneous information about his position and turned right onto the runway'' where the 727 was taking off. Based on the bad information, Dresden said, the controllers told the pilot to proceed.

''At the very last moment, he realized where he was and ground control told him to exit the runway,'' Dresden said. ''But it was obviously too late.''

Just before the crash, the pilot radioed the control tower that he was lost, an airport maintenance worker on the scene told the Detroit Free Press. When the controller realized where the jet was and told him to clear the runway, the worker said, the DC-9 began veering to the left. If the DC-9 had not begun turning, the planes ''would have collided nose-to-nose and everybody would have died,'' the worker said.

A team of investigators from the National Transportation Safety Board arrived at the crash site Monday night and boarded the burned-out remains of the McDonnell Douglas DC-9 for an initial inspection, said NTSB spokesman Alan Pollock.

Pollock said the team would take a closer look at the DC-9 Tuesday following an early morning organizational meeting. The on-site investigation will take four or five days, but it will be months before an official cause of the disaster is determined, he said.

''Obviously, it's too early to speculate at this point,'' Pollock said. ''Any time you have a major accident like this ... we have to sift through the information to get fact from the fiction of any accident. We're certainly going to be looking at air traffic control operations ... and of course, the weather.''

The victims were all aboard Northwest Flight 1482, a DC-9 bound for Pittsburgh with 39 passengers and five crew members. The dead included seven passengers and a Northwest flight attendant. The injured, mostly from Pennsylvania, were taken to five area hospitals.

Northwest spokesman Bob Gibbons identified the pilot of the DC-9 as William Lovelace, 52, a 24-year veteran based in Detroit who has been captain for 11 years.

Lovelace had been on medical leave for five years due to kidney stones but returned to active duty this year and had flown 13 times prior to Monday's accident, Gibbons said. The pilot of the 727 was identified as Robert Oullette 42, of Dallas, a seven-year veteran based in Detroit.

Gibbons said one of the eight people killed was Heidi Jost, 43, a Dearborn, Mich., native with 22 years of service as a flight attendant. The other seven were passengers and their names were not released. The eight bodies were taken to the Wayne County morgue for identification.

Authorities said the DC-9 was on the ground when it was clipped by Northwest Flight 299. The larger Boeing 727-200, bound for Memphis carrying 145 passengers and eight crew members, was just lifting its nose into the air.

The DC-9 erupted in flames and quickly became a charred hulk with most of the top of its passenger cabin burned away. The 727-200 landed immediately and its passengers suffered only minor injuries.

The 727-200 was traveling approximately 140 mph when it clipped the DC-9, which was standing still, aviation sources said.

Wayne County Executive Ed McNamara said thick fog reduced visibility at the time of the 1:45 p.m. collision.

''Visibility was down very low,'' McNamara said. ''I happened to be passing by the airport and commented on it. No question, weather was a factor.''

The National Weather Service said visibility was one-quarter mile in the air and less on the ground. The airport was closed to inbound flights prior to the crash because of snow and sleet that hit the area earlier, McNamara said.

#90338u0974 12/04/1990 ~United Press International

HUNTSVILLE, TX (DEC. 4) UPI - Condemned killer Henry Lee Lucas may owe a note of thanks to Iraqi President Saddam Hussein.

Lucas's extradition from Texas' death row to Florida to stand trial for murder is being delayed because the state's chief investigator has been sent to Saudi

Arabia with a military reserve unit taking part in Operation Desert Shield.

Lucas, 54, is under a death sentence in Texas for the 1979 murder of an unidentified female hitchhiker. He was to have been executed Monday, but won a stay from a state court.

Lucas has claimed responsibility for more than 4,000 crimes committed over several years as he traveled across the country. He since has recanted all his confessions, but law enforcement agencies in various states have attributed more than 250 murders to him.

Florida has been trying to extradite Lucas for more than a year to stand trial for three slayings. A state appeals court cleared legal impediments to the move in July, when it rejected Lucas's appeal of extradition proceedings and ordered him turned over to Florida authorities.

But Florida officials did not immediately act on the extradition and less than a month later, Iraqi forces invaded Kuwait and President George Bush ordered U.S. troops to the Middle East.

Chief investigator Joe Mitchell of the Florida Department of Law Enforcement was among military reservists called to active duty and later sent to Saudi Arabia. His absence apparently has stalled further extradition efforts.

#90338u0976 12/04/1990 ~United Press International

JOHANNESBURG, SOUTH AFRICA (DEC. 4) UPI - Police found the slaughtered bodies of seven more blacks early Tuesday in townships near Johannesburg, but reported no resumption of the factional fighting that left 71 dead.

State-run radio reported the four townships east of Johannesburg where the fighting erupted Sunday were calm Tuesday following the imposition of emergency regulations Monday that included a 9 p.m.-to-4 a.m. curfew.

Both the African National Congress and the rival Zulu movement Inkatha Tuesday warned the ferocious fighting threatened to undermine efforts to negotiate a power-sharing deal with the minority white government but continued to berate each other in a series of public statements.

In one statement, the ANC called for a ''national response'' to the violence.

The ANC also reiterated its accusations of security force partiality in favor of Inkatha in the conflict, while Inkatha leader Mangosuthu Buthelezi distanced his movement from the violence and blamed it on tribal rivalries between Zulus and Xhosas.

''There is too much violence in South Africa for us to hope for speedy

solutions through the politics of negotiation,'' he said. ''Rising violence may yet totally inhibit negotiations. That would be a very ugly tragedy.''

The ANC described the urban carnage as ''not just a tragedy for the families who have lost loved ones, but a tragedy for our entire nation.''

''The perpetrators of the violence are placing in jeopardy the very peace process that has taken so much effort to bring into being and sustain,'' it said.

Two days before it stages a national day of protest, the ANC demanded the government restore electricity to all townships where it had been cut because of non-payment of utility accounts. The absence of lights ''generates even greater fear among residents and provides ideal conditions for night attacks '' it said.

It also demanded that migrant worker hostels be controlled to prevent its mainly Zulu occupants from entering nearby townships with weapons or in groups and called for a ''code of conduct for the police, acceptable and accountable to the people.''

The fighting was regarded as an escalation of the clashes between Xhosa supporters of the ANC and Inkatha that engulfed townships surrounding Johannesburg in August and left 800 dead in six weeks.

Invoking the Public Security Act, Vlok declared the townships of Thokoza, Kathlehong and Vosloorus - all in a cluster east of Johannesburg - and Bekkersdal to the West as ''unrest areas,'' enabling him to place them under a curfew.

With the discovery of seven bodies overnight Monday, authorities put the death toll at 71 in the townships since Sunday when Zulus in a squatter camp adjacent to Thokoza allegedly launched raids into the township, prompting retaliatory attacks.

#90338u1007 12/04/1990 ~United Press International

(DEC. 4) UPI - Federal officials are pressing ahead with their investigation into yesterday's fatal plane collision in Detroit. They have both the voice record and flight recorder from a burned out Northwest Airlines D-C-9 and statements have been taken from the flight crew. The D-C-9 turned onto an active runway and was struck by a Northwest Boeing 727 that was just taking off. Eight people died and another 21 people were injured.

Residents of Wisconsin are digging out from a record-breaking snowstorm that pounded the state yesterday, later spreading toward Indiana, Kentucky and Ohio. In Madison, Wisconsin, the city was buried by a record one-day snowfall of 17-point-three inches and winds gusting to 50 miles an hour piled drifts up to seven feet in parts of central Wisconsin.

Iraq has reversed an earlier stand and now says all three-thousand Soviet hostages are free to go home as of tomorrow. The Soviet Union has sided with other nations drawn up against Iraq's invasion of Kuwait and recently began using the word ''hostage'' to describe Soviet nationals trapped in Iraq. The Baghdad government up to now had said the Soviet nationals could leave only after the expiration of contracts that brought them to Iraq in the first place.

President Bush has landed in Uruguay... on Day Two of his 12- thousand-mile goodwill tour through Latin America. Bush is promoting what he calls ''Enterprise for the Americas''... a plan for expanded economic co-operation at a time when the huge Western Hemipshere market faces challenges from the aggressive economies of Asia and from a unified Europe in 1992. Uruguay has the highest per capita debt in Latin America.

In Atlanta, a former president is criticizing what he calls the current chief executive's lack of a national energy policy. Jimmy Carter says the George Bush administration is abandoning any commitment to save energy. Carter also

accused the White House of being willing to destroy environmentally fragile land in Alaska in exchange for expansion of oil drilling.

#90338u1039 12/04/1990 ~United Press International

WASHINGTON (DEC. 4) UPI - Despite their sometimes being stereotyped as selfish and self-centered, American teenagers do voluntary charitable work at about the same rate as adults, a new study reported Tuesday.

And, between trips to the mall and the movies, teens also dig into their pockets to do good, with 48 percent of teenagers contributing money to causes last year.

The average contribution was $46.

The findings, by Independent Sector, an umbrella group of voluntary, non-profit groups and big donors, come on the heels of a mid-November survey that found a marked increase in giving and volunteering by the adults of the ''baby boom'' generation.

''This news (about teens), coupled with that of the adult survey, paints an optimistic picture of the future capacity for volunteering and giving in America,'' said Brian O'Connell, president of Independent Sector.

''These findings certainly fly in the face of those who say that philanthropy in America is eroding with each generation.''

The survey of teens found that 58 percent of American teenagers volunteered in 1989, compared with 54 percent of adults.

Teens averaged 3.9 hours of volunteer time each week and over one fourth of the teen volunteers gave five or more hours each week.

According to Independent Sector, that meant a total of 1.6 billion hours of volunteer time by teens in 1989.

''One of the reasons for the specific study of teenage charitable behavior was our concern that those who came before them, the 'baby boomers,' were not showing up in surveys as particularly generous of time and money,'' O'Connell said. ''Independent Sector wanted to see if the problem began at even younger ages.''

But he noted that the report released in mid-October showed that the ''boomers'' have now caught on and are contiributing time and money in generous degrees.

''With this second study, which now indicates that the younger generation is

even more involved in service, we can be relieved and encouraged about the prospects of active citizenship and personal service for many decades,'' he said.

Schools and religious organizations emerged as the primary institutions that get teenagers involved in voluntary activities, with 52 percent of the teen volunteers indicating they got involved through their school and 50 percent citing their church or synagogue.

Through the schools, teens were most likely to get involved as volunteers in areas of arts, culture and humanities (78 percent), education (74 percent), human services (55 percent), and environmental causes (52 percent).

A growing emphasis on community service by schools is apparantly having a positive impact on teen volunteering, according to the survey. Among the 61 percent of respondents who reported their schools encouraged community service 69 percent actually volunteered. Among the 28 percent who reported their school did not encourage community service, however, just 44 percent volunteered.

About 10 percent of the young people said their schools requried a certain number of hours in community service for graduation, while 26 percent said ther schools offered one course or more in which community service was required.

Membership in religious insitutions has a major impact on both volunteering and contributing, the survey found. Among the 75 percent of teens who reported membership in religious institutions, 62 percent volunteered and 56 percent contributed money to causes. Among the 25 percent who said they were not members of a religious group, just 44 percent volunteered and 25 percent contributed.

NEW YORK (DEC. 4) UPI - The United Press International Board of Coaches Top 25 college football ratings, with record and first-place votes in parentheses, total points (based on 15 points for first place, 14 for second, etc.), and last week's ranking.

1.	Colorado (38) (10-1-1)	692	1
2.	Georgia Tech (7) (10-0-1)	638	3
3.	Texas (10-1)	568	4
4.	Miami (2) (9-2)	537	2
5.	Florida State (9-2)	475	8
6.	Notre Dame (9-2)	469	6
7.	Washington (9-2)	429	7
8.	Penn State (9-2)	381	9

9.	Brigham Young (10-2)	280	4
10.	Tennessee (8-2-2)	278	10
11.	Clemson (9-2)	216	11
12.	Michigan (8-3)	175	12
13.	Nebraska (9-2)	119	14
14.	Mississippi (9-2)	111	13
15.	Iowa (8-3)	80	15
16.	Louisville (9-1-1)	44	16
17.	Illinois (8-3)	33	19
18.	Southern Cal (8-3-1)	25	18
19.	Texas A&M (8-3-1)	13	17
20.	(tie) Michigan St. (7-3-1)	12	21
20.	(tie) Ohio State (7-3-1)	12	22
22.	Alabama (7-4)	11	NR
23.	Virginia (8-3)	10	23
24.	Southern Mississippi (8-3)	9	23
25.	San Jose State (8-2-1)	8	25

NR - not ranked

Others receiving votes: Baylor, Oregon, Virginia Tech.

The national champion will receive a $32,000 non-athletic scholarship from the Gerrits Foundation and United Press International.

By agreement with the American Football Coaches Association, teams barred from television appearances or postseason play or having lost more than 20 percent of their football scholarships are ineligible for the Top 25 and national championship consideration by the UPI Board of Coaches. Those schools are Florida, Houston, Memphis State, Oklahoma and Oklahoma State.

BONN, GERMANY (DEC. 4) UPI - More than 1,800 U.S. soldiers deployed in Saudi Arabia have been treated in U.S. military hospitals in Germany for injuries

and diseases since the beginning of ''Operation Desert Shield,'' a military official said Tuesday.

Soldiers suffer from a wide variety of medical problems, including broken bones, ear and throat infections, and psychiatric disorders, said Air Force Col. Earl Ferguson, commander of the 7100 Combat Support Wing Medical Center in Wiesbaden.

''We've seen a lot of cases of heat exhaustion, a few pregnancies, but mostly orthopedic services and general medicine,'' he said.

An Air Force spokeswoman said all U.S. troops in ''Operation Desert Shield'' needing medical attention are being treated in Germany.

Ferguson said the injured soldiers are sent to one of three military hospitals in Wiesbaden, Frankfurt and Landstuhl, where they usually stay for about one week.

''Around 1,800 troops have come through Rhine-Main air base (near Frankfurt), primarily since September,'' Ferguson said.

The Wiesbaden Medical Center has treated 639 soldiers since August, he said. After their release, 518 returned to their units in the United States, 90 went back to the gulf.

For the event of a war, the medical center staff has received special training and special teams were set up to deal with the probable deluge of wounded from the gulf.

''We would get very busy here,'' Ferguson said. ''We would close down all non-essential services, like dental and obstetric services.''

The Wiesbaden Medical Center, which is the largest military medical facility outside the United States, has a staff of 950, including 60 specialists among its 65 physicians.

MOSCOW (DEC. 4) UPI - Soviet officials said Tuesday they had no confirmation of Iraq's plans to allow all Soviet citizens in Iraq to leave the country, but said the release would not alter their policy toward the Persian Gulf crisis.

They said Soviet policy would continue to demand that Baghdad withdraw from Kuwait in accordance with U.N. resolutions.

The Iraqi government said in a statement Tuesday that Soviet workers could leave the country beginning Wednesday ''provided the Soviet government alone bears the repercussions of ending their contracts.''

Vitaly Ignatenko, President Mikhail Gorbachev's spokesman, said Moscow had ''not received any signals that could inspire such hope'' for the release of 3,232 Soviets working in Iraq.

Foreign Ministry spokesman Vitaly Churkin said he could not confirm the Baghdad claim that all Soviets left in Iraq were free to go home. He also said he had no information about Iraq's specific demands in exchange for release of the Soviets.

''Soviet representatives in Iraq are authorized to settle the legal aspects of all problems arising in this respect,'' Churkin said. ''If we receive confirmation that all Soviets are free to leave, and I hope we will, then I think we will know the modalities.

''The Soviet representatives at any rate are authorized to do such things, notwithstanding financial or other consequences or claims.''

Churkin indicated Moscow would not respond positively to any direct demand for payment in return for its citizens.

''To make the life of a Soviet citizen a bargaining chip in a political game ... is not a worthy endeavor,'' Churkin said.

#90338u1126 12/04/1990 ~United Press International
TOKYO (DEC. 4) UPI - Amid signs of an economic slowdown and rising interest rates, Japan's domestic sales of new motor vehicles in November declined 2.7 percent from a year ago to 499,563 units, posting the first year-to- year fall in 21 months, the Japan Automobile Dealers' Association said Tuesday.

It was the first year-to-year fall in domestic automobile sales since a 2.3

percent drop recorded in February 1989, when customers curbed their purchasesahead of the introduction of a lower sales tax in April of that year.

''Several factors combined to depress November sales, such as rising interest rates on car loans and higher gasoline prices as a result of the Gulf crisis '' said an official of the dealer's association.

''The sales decline also was attributable to the psychological effect of uncertainties over the Japanese economy in the future,'' said the official, who declined to be identified.

Sales of small cars were especially sluggish, the official said.

The association said combined sales for the first 11 months of this year totaled about 5.51 million units. If December sales of about 470, 000 units last year are taken into consideration, it would be difficult to attain 6 million unit sales this year, he said.

''Unless sales in December will manage a considerable improvement, it will be almost impossible to achieve the target this year,'' the official said.

Encouraged by brisk demand over the last few years, Japanese automakers predicted domestic sales would top the 6 million-unit target this year.

New-car sales totaled about 5.56 million units in 1989.

Sales have shown signs of downturn over the last few months, recording only a mild 0.3 percent year-to-year rise in September and a 0.9 percent increase in October.

''Strong demand for new cars still persists, but the comfortable sales growth recorded in the last few years can no longer be expected, as the Japanese car market now is facing a turning point,'' one industry executive said.

Domestic car sales began to pick up in May 1987, and, except for the lapse in early 1989, have since maintained year-on-year growth until November.

The November sales included 356,399 passenger cars, down 5.5 percent from a year ago, the association said.

Sales of small cars, which accounted for about 70 percent of the total sales, plunged 11.6 percent to 304,699 units, the first double- digit fall since July 1984.

Sales of large passenger cars with engine capacity of over 2 liters, including imported cars, surged 60.1 percent to 51,700 units, the association said.

Sales of imported cars continued to rise in November, totaling 16,186 units,

up 8.9 percent over a year ago.

Sales of trucks rose 4.7 percent to 140,277 units and those of buses surged 39.5 percent to 1,887 units.

Mitsubishi Motors Corp., 12 percent-owned by Chrysler Corp., and Mazda Motor Corp., 25 percent-owned by Ford Motor Co., were among a few automakers recording year-on-year sales gains in November.

Mitsubishi's sales jumped 10.4 percent to 38,213 units, raising its market share 0.9 point to 7.7 percent.

Mazda's sales grew 3.3 percent to 35,175 units, with its market share rising 0.5 point to 7.1 percent.

Sales by Japan's top automaker, Toyota Motor Corp., fell 2.4 percent to 228,674 units, although its market share still roese a mild 0.2 point to 45.9 percent, while those by its main rival, No. 2 Nissan Motor Co., declined 0.1 percent to 113,289 units for a 22.7 percent share. Nissan's market share, though was also still up, by 0.6 point.

Honda suffered the largest sales fall among leading automakers. Its sales plunged 27.9 percent to 32,960 units, with its market share dropping 2.3 points to 6.6 percent.

#90338u1132 12/04/1990 ~United Press International

EGYPTIAN CAMP, NORTHEASTERN SAUDI ARABIA (DEC. 4) UPI - Multinational forces involved in the standoff with Iraq have begun routine joint training on a vast northern plain where the ground has been packed hard by the elements and is so flat you can see the curvature of the Earth.

It's a terrain made for tank warfare, solid enough that cars will turn off a paved road and use it as a shortcut. And it stretches from northern Saudi Arabia into Kuwait, where Iraqi forces are trying to turn the same flat ground into a defensive fortress.

''All the forces, Americans, British, Syrians, Egyptians, they are all here and they are having joint exercises,'' said Col. Abdulrahim Mohamed Said, 42, the leader of an Egyptian commando unit. ''The morale is very high and the soldiers, they are here for fighting.''

The colonel said his troops trained almost daily with American special forces and other units in the area. ''It is according to plans that we have received from the Saudi authorities,'' he said. ''We all must train to get familiar with each other's ways.''

Despite language barriers, the annual Bright Star joint exercises conducted by U.S. and Egyptian forces have helped ease the difficulty in integrating a multinational and multilingual force in Saudi Arabia, he said.

''The experience we received from these exercises made a sort of language, even if we don't speak the same language, but due to continuous training we can communicate with each other better,'' Col. Said said. ''The (American) unit that we are training with, we know them by names because we've been training with them for years and years.''

It is still unclear what role the Egyptian troops and other Arab forces would play in any offensive to drive the Iraqis out of Kuwait. The mission for all forces is still to defend Saudi Arabia from attack, but most Arab leaders have yet to commit themselves to offensive action if necessary to liberate the emirate.

Several miles away, past tanks and anti-aircraft guns dug into the ground, soldiers at another Arab camp have no doubt where they would be during a strike into Kuwait. The troopers belong to a Kuwaiti tank company and they want to be at the front of the battle to recapture their homeland.

''That's what we ask and that's what our leader asks - to be in the front,'' said Capt. Ali, the 34-year-old leader of the tank company. ''It's a long time we have been away and there is a (need for) revenge. We must do it. We must be in the front.''

The captain, who declined to give his last name because of danger to relatives still in his occupied homeland, said the Kuwaitis wanted to be at the front of the offensive despite the possibility that many of their troops might be killed.

''We don't care. We were supposed to be killed there (defending Kuwait during the Aug. 2 invasion),'' he said as he stood near a Chieftan tank that rolled out of the country as the Iraqi forces advanced. ''I feel some shame, yes, because I got out without being killed there.''

Capt. Ali said information gathered from deserters indicated many of the Iraqi forces would not put up much of a fight if the multinational forces pushed across the border into Kuwait.

''The Iraqi forces want to surrender as soon as we enter there,'' he said. ''They are ready to surrender as soon as they see any attack on them.''

Elsewhere among the Arab forces in the area, soldiers express a reluctance to become involved in a war against fellow Moslems, but they said if their leaders believed it was necessary they would carry out the orders to fight.

"As a citizen of Saudi Arabia and a military man, the whole goal is to protect

Saudi Arabia,'' said Gen. Turki Hedijan al-Nife'er, the head of the Saudi 20th Brigade. ''We do not have the intent, the desire, to interfere with any other nation.''

Al-Nife'er added that his forces would ''execute any orders that come in from the joint leadership'' and that if it came to a war ''100 percent we are prepared for it and we are ready.''

The general, who has never been in combat, said he had little respect for the Iraqi military. ''The Iraqis, they exaggerate about their forces and their capabilities just like anybody else," he said. ''It's psychological warfare.''

Back at the Egyptian camp, Col. Said expressed a similar view. The colonel is one of the Arab commanders who has been in combat. His commando unit participated in the October War, when Egyptian troops crossed the Suez Canal in 1973, using pressurized water to destroy a sand wall and breach the Bar-Lev Line erected by the Israelis as an impenetrable barrier against ground attack.

The canal crossing is considered one of the great military achievements since the end of World War II. Col. Said said from what he can see, the Iraqi defenses do not stand up to what the Israelis had erected against Egypt.

''There is no way you can compare the two of them,'' the commando leader said. ''The Bar-Lev Line was much much bigger, much stronger than this one.''

#90338u1158 12/04/1990 ~United Press International

(DEC. 4) UPI - A safety inspection team is taking a closer look today at a charred D-C-9 that collided with a Boeing 727 yesterday at Detroit Metropolitan Airport. The on-site probe will take four or five days, but it will be months before an official cause of the disaster is determined. Initial speculation centered on whether the pilot of the smaller jet became confused in the fog. The seven men and one woman who died were all aboard the D-C-9 bound for Pittsburgh. Authorities say all but one of the dead were found in the plane's aisles. The airline says one of the victims was a 43-year-old Northwest flight attendant with 22 years of experience with the airline.

At least nine storm-related deaths are reported in Wisconsin as parts of the state dig out from up to 22 inches of snow. That includes a record 17-point-three inches of snow in Madison that virtually shut down the capital city. Travel is still reported either hazardous or impossible in some parts of Wisconsin because of heavy snow. Seven of the deaths are linked to snow shoveling and at least 10 people are reported to have lost fingers or parts of fingers in accidents involving snow blowers.

Unusually high tides have caused Providence, Rhode Island, to use its flood water barrier for the first time since 1985. The tides pushed water in upper

Narragansett Bay to six and one-half feet above the average sea level mark and that automatically kicked on two of the five pumps at the Fox Point Hurricane Barrier. The 26-year-old barrier protects 280 acres of land in downtown Providence. Without it, the financial district could be under as much as three feet of water.

Arab foreign ministers are meeting in Cairo again today, holding talks on the Persian Gulf crisis. There was word from yesterday's meeting that the envoys agreed to intensify diplomatic efforts to dislodge Saddam Hussein's army from Kuwait before a U-N-imposed January 15th deadline. Apparently as part of that agreement, a Middle East news agency is reporting that Jordan's King Hussein and Yemen's vice president flew to Baghdad today. One Arab diplomat in Cairo says the king may be trying to persuade Saddam to be more flexible in upcoming talks in Baghdad with Secretary of State Baker.

Japan says its economic growth slowed in the third quarter of this year to an annual rate of four-point-one percent. That's down from a five-point-five percent rate in the second quarter of 1990. One economist, Robert Alan Feldman of Salomon Brothers Asia, says the slowdown actually is a good sign for Japan and will help keep a lid on inflation.

Four years of trade negotiations have become deadlocked on the politically sensitive issue of European farm subsidies and there are warnings that the talks with 107 nations may collapse. The breakdown in Brussels, Belgium, comes as the United States and other farm exporting countries reject a proposal from the 12-nation European Community. The E-C has come under intense pressure to reduce the massive support it gives to its farmers.

Singer Billy Joel's ''Storm Front'' tour may be very aptly named. Joel and his 15-member band and crew spent an extra day stranded in Ames, Iowa, because of blizzard-like conditions that closed the Des Moines airport Sunday night. The delay cut short what was to have been a three-day break from Joel's 15-month tour of five continents. Joel's group did manage to get out last night and will resume their tour Thursday at Indianapolis.

#90338u1159 12/04/1990 ~United Press International

JERUSALEM (DEC. 4) UPI - One guerrilla was killed and two Israeli soldiers were slightly wounded late Monday in a confrontation in Israel's self-declared ''security zone'' in southern Lebanon, an army spokesman said Tuesday.

The Israeli force was carrying out ''initiated operations'' in the security zone's western sector when it encountered guerrillas and opened fire, the spokesman said. In the exchange, one of the guerrillas was killed and the soldiers wounded, the spokesman said.

Earlier Monday, South Lebanese Army soldiers killed five Lebanese gunmen in a

firefight in the security zone. It was not immediately clear whether the gunman killed by the Israeli soldiers was Lebanese or Palestinian.

Last week, five Israeli soldiers and two Palestinian gunmen were killed in the security zone, which Israel established in 1985 in an effort to place a buffer against its border to halt infiltrations and attacks against Israeli targets.

''The activities of the (Israeli) force last night represent an additional and continual link in the series of the initiated operations that the Israel Defense Force carries out against terrorists trying to infiltrate into Israeli territory and to carry out strikes on innocent citizens along the northern border,'' the Israeli army spokesman said in a statement.

U.N. spokesmen reported heavy Israeli military artillery fire north of the security zone for approximately five hours late Monday and early Tuesday. The Israeli army spokesman declined comment on the report.

-30- 1725

#90338u1171 12/04/1990 ~United Press International

(DEC. 4) UPI - Earthquake fever in seven Midwest states diminished to a mere subject for conversation Tuesday, even though the man who predicted the tremor said the chance for a major shaker would continue until Wednesday.

Many reporters and camera crews packed their bags and left New Madrid, Mo., the town that had become ''earthquake central.'' Most of those residents who had taken a day off because of the prediction returned to work.

The town of 3,300 people is located on the volatile New Madrid Fault, an underground system that runs from Illinois to Arkansas and through another five states.

New Mexico climatologist Iben Browning had predicted a 50 percent chance of a major quake between last Saturday and Wednesday along the fault, which saw one of the nation's worst earthquakes in the early 1800s.

Monday was the most likely day for the shaker, according to Browning, but that day came and went with quietly with the streets crowded with media representatives and tourists but not a tremor in the earth. Bored reporters waiting for ''The Big One'' ended up interviewing each other.

''I just hope we don't let all of the preparations we've made since Browning's forecast fall by the wayside,'' said New Madrid's Mayor Dick Phillips, noting the record number of visitors in town for the ''quakewatch.''

Schools in New Madrid and in several other states remained closed Tuesday but most planned to reopen Wednesday.

Many school officials and parents decided to keep their children home Monday. Attendance at elementary schools in St. Louis is normally 94 percent but officials said it ranged from 50 to 70 percent. Across the river in Alton, Ill., one-fourth of the 7,300 students stayed home, most of them because of the earthquake prediction.

Traffic in the St. Louis area was also noticeably light, something officials chalked up to concern over a possible tremor.

In Marissa, Ill., classes went on as usual Monday and Tuesday, but only because Superintendent William Gullick's crew of animal observers reported no suspicious behavior that might predict an earthquake. Gullick said weird behavior could have spelled a quake and trouble for the 805 students in his district.

''We had asked everyone to monitor the behavior of the animals and we kept the schools open since we had nothing untoward reported, no unusual behavior,'' Gullick said. ''What we're talking about is atypical behavior that lasts for a long period of time.''

Gullick, however, said he was not ruling out Browning's prediction of a possible quake on Dec. 31 along the New Madrid Fault. He said he and local farmers would be watching the animals for signs.

''We are also going to try to have a better awareness,'' Gullick said. ''What we've all learned from this is better preparedness on the part of the schools and villages for any disasters.''

Browning has made several other predictions of possible earthquakes in the next two years, basing them on tidal forces. However, leading U. S. scientists have said those projections have no scientific basis even though they themselves have predicted a good chance for a major temor on the New Madrid Fault in the next 10 years.

#90338u1176 12/04/1990 ~United Press International

BEIJING (DEC. 4) UPI - The Public Security Ministry has ordered police and other security workers to ''widely, thoroughly and solidly love the people'' for one month early next year, it was reported Tuesday.

The campaign is part of a determined but frustrating national bid to rout corruption and arrogance from China's security forces, the object of widespread public loathing and resentment.

China's flagship Communist Party newspaper People's Daily announced the new effort in a story headlined: Promote a Campaign to Love the People - Build a Secure Environment.

''The central content of the activity is to strengthen the construction of honesty in government, to correct unhealthy professional tendencies and to maintain close ties between the police and the people,'' the newspaper said.

A circular issued Monday orders police nationwide to ''widely, thoroughly and solidly love the people for one month during the 1991 New Year and Spring festivals,'' the daily said.

The Spring Festival, celebrated in late February, marks the start of the Chinese lunar new year and is the most festive season of the ancient Chinese calendar.

The circular ordered security organs to undergo rigorous self- examination and self-correction and to check what officials refer to as the ''three chaoses'': unauthorized accepting of funds, meting of fines and sharing of official costs.

It said police should make special efforts to overcome the public's impression that they are ''cold and hard,'' without letting up in their regular duties in other public security campaigns.

These include the ''Hit Hard'' anti-crime campaign, the ''Sweep up Pornography'' effort and the yearlong battle against the ''Six Evils'' - prostitution, selling women and children, gambling, narcotics, pornography and superstition.

#90338u1206 12/04/1990 ~United Press International

CAIRO, EGYPT (DEC. 4) UPI - Saddam Hussein's systematic destruction and looting of Kuwait may not leave much for U.S.-led forces to liberate if they opt for military sanctions to dislodge Iraq from Kuwait.

Recent reports in Arab newspapers and testimony from refugees still fleeing

the Iraqi-occupied emirate lead exiled Kuwaitis to believe that Saddam's forces continue to ''terrorize the population and conduct a systematic program of theft and destruction.''

The U.N. Security Council, which Thursday endorsed military sanctions against Iraq unless it withdrew from Kuwait by Jan. 15, has already condemned Baghdad for looting the emirate and destroying its demographic records.

The Security Council resolution of last October made it clear that Iraq would be held responsible for destroying records, forcing Kuwaitis out of their own country and relocating them against their will, and seizing and destroying public and private property.

The resolution has apparently failed to persuade Iraqi authorities to relax their grip on the emirate, which one Cairo newspaper described as an attempt to reduce Kuwait to "a wasteland, apart perhaps from its oilfields and a port.''

One Saudi Arabian official told Riyadh Radio recently that Iraq succeeded in reducing the emirate's population from 1.9 million people before the Aug. 2 invasion to as few as 250,000-500,000.

Iraq's apparent determination to devastate Kuwait involves a two-pronged effort to deport or relocate the emirate's indigenous population while stripping it of all assets that may be useful to Iraq, the Saudi official added.

He said terror remains one of the tools the Iraqis use to force Kuwaitis to leave or obey occupation troops, and cited the example of Nabil Akel, a Lebanese engineer who fled Kuwait with his family three months after the invasion.

Akel, asked by a Kuwaiti friend to find a relative's body, pretended to be a Palestinian and was given permission by Iraqi authorities to visit Kuwait's skating rink, being used as an overspill morgue.

"The stench was so appalling that I could not force myself through the door," Akel was quoted as saying. ''Bodies were spewed all over the rink on the gray and mushy ice. There was a truck outside waiting to carry the bodies away.''

Akel said one person, found carrying 150 Kuwaiti dinars after Saddam declared the currency illegal, was sprayed with bullets.

The full extent of Iraqi killings in Kuwait remain unknown, although the Kuwaiti Embassy in Damascus estimated Iraqi troops had killed some 4,500 people since Aug. 2.

Arab radio stations report that what they describe as Saddam's reign of terror

in Kuwait continues systematically, citing numerous examples of Iraqi troops and security personnel trying to intimidate the population.

Methods of intimidation include being trigger-happy and generally lawless, and human rights groups have accused Iraqi troops of random murders in the streets and during house searches and of executing people in front of their families and then burning down their homes.

Despite Saddam's decision last month to remove his cousin as governor of occupied Kuwait, refugees and other reports say Iraqi troops and security forces are still shooting and torturing people to maintain obeisance to Saddam.

In addition, Iraqi authorities are continuing their policy of turning Kuwait from a thriving commercial center into a hungry, unhealthy wasteland by looting private and public property, causing serious food shortages and deliberately interfering with essential services.

Refugees quoted in Egyptian and Saudi Arabian newspapers say huge consignments of loot from Kuwait are taken to Iraq by road convoy daily and apparently nothing is too large or too small to be stolen.

The looting is so indiscriminate that much valuable equipment has been broken or abandoned, or was incompatible and could not be used when it reached its destination, they say.

One aspect of Iraq's looting has been the destruction of the emirate's medical services, once among the best in the world. Cairo newspapers reported that the Iraqi pillage has continued, despite international protests, with hospitals and doctors' surgeries stripped of equipment and patients, including geriatrics, physically handicapped people and the insane turned out into the streets.

In addition to the lorry-loads of Kuwaiti hospital equipment, drugs and other medical provisions rumbling on the Kuwaiti-Baghdad highway, refugees report the looting of incubators, dialysis machines, blood banks and radio therapy machines used in treating cancer.

Looting of arthritis tablets has left them priced at $4 per tablet, according to exile Kuwaiti newspapers, and the only medical equipment left intact is for the use of Iraqi troops and their supporters.

NEW YORK (DEC. 4) UPI - Three days after the United States won the Davis Cup for the first time in eight years, Tom Gorman was rewarded when he was reappointed captain of the 1991 team.

''Tom has brought America's Davis Cup program to heights all of us are extremely proud of,'' David Markin, president of the U.S. Tennis Association, said Tuesday. ''He has shown sensitivity and leadership in what is a very public position and we are pleased to have him as our captain.''

This will be Gorman's sixth year as team captain. In the first five years under his guidance, the United States compiled a 10-4 record, including last weekend's Cup-winning victory over Australia at St. Petersburg, Fla. The Americans also reached the semifinals in 1989.

Gorman, a member of the 1972 championship team, is the 35th U.S. Davis Cup captain. He also led the U.S. men's Olympic team in 1988 and the U.S. women's Federation Cup and Wightman Cup teams.

#90338u1221 12/04/1990 ~United Press International

SOFIA, BULGARIA (DEC. 4) UPI - President Zhelyu Zhelev Tuesday denied reports he has files showing the former chairman of Bulgaria's opposition movement was a secret police informer.

Zhelev was asked about the sudden resignation this weekend of Petar Beron as chairman of the Union of Democratic Forces during an interview with United Press International.

Zhelev, the founder of UDF and its leader until parliament elected him state president in August 1990, denied reports in the Western media that he had been given files last week proving links between Beron and the hated secret police.

But asked if there was any truth to the allegation, Zhelev said, ''Perhaps.''

''I think he resigned because he is not going to be prime minister,'' the president said.

Later in the interview, asked once more whether Beron was a police informer and whether this led to his resignation, Zhelov said, ''No comment.''

A source close to Zhelev suggested if he had wanted to categorically deny the rumors about his colleague, he would have done so.

Beron was touted as a likely candidate for premier following the resignation last week of Andrei Lukanov and his government of former communists.

Zhelev said it is likely the new prime minister, whom he will nominate following consultations with the nation's leading political forces, will not be from any of the main political parties.

''There are various candidates, various opinions, but the most likely choice

is that the prime minister should be a neutral prime minister,'' he said. ''He shouldn't be connected with either of the two major political forces.''

Several political leaders in Sofia, speaking on condition of anonymity, said dossiers on as many as 52 UDF leaders with possible secret police connections may be circulating in Sofia.

Last summer, the Socialist Party newspaper Duma claimed a number of opposition figures were secret police informers.

One leading figure affirmed privately that as much as one-fourth of Bulgaria's parliament, the Grand National Assembly, could be tainted.

''So far its just rumors,'' said Leah Cohen, a UDF parliamentarian. ''In the other (communist) half of parliament, there are a lot of people who are quite openly still employed by the secret police. It's a big system that worked absolutely everywhere.''

Beron's resignation, made Sunday at a meeting of parliamentarians and regional leaders, was announced Monday at a UDF news conference.

He had been offered as the UDF's candidate for prime minister after the resignation of the government of Socialists - as the communists now call themselves - following a general strike over scarce food and energy supplies.

Beron's announcement that he was resigning to devote more time to his career as an entomologist took UDF leaders by surprise. Several said that as late as Friday, he continued to express interest in leading a UDF government.

The Socialist Party spokesman, Dimitar Yonchev, called it ''disgusting'' how public figures are treated.

''I don't think you should accuse one without proof,'' he said.

But Politburo member Philip Bokov speculated the rumors were true.

''In the last three months he's been mentioned twice as the UDF candidate for prime minister and suddenly he decides to step down,'' Bokov said.

''I don't see him stepping down just to study insects. Perhaps his reasons are not quite so innocent.''

Parliamentary committees are grappling with what to do with Interior Ministry files on the former behavior of Bulgarian citizens.

Bulgaria's leading political forces are meeting this week to try to formulate a new government structure, and Zhelev is expected to nominate a prime minister soon.

Another Socialist Party leader, Krasimir Premyanov, said the new government could only be transitional, and would need both technical experts in the ministries and senior leaders of the main parties as deputy prime miniseters.

''It must be strong enough to implement reforms and to command people's confidence,'' he said. ''A government of only experts cannot do this because it needs parliamentary support.''

#90338u1228 12/04/1990 ~United Press International

WASHINGTON (DEC. 4) UPI - The Navy said Tuesday it has ordered the retirement of one admiral, censured and transfered another, and disciplined a third for not adequately warning senior Pentagon officials of cost overruns in the A-12 Avenger aircraft program.

Navy Secretary Lawrence Garrett III reported the disciplinary actions in a memo to Defense Secretary Dick Cheney, made public following an inspector general's investigation of the history of reporting program problems to senior officials.

Ordered to retire effective in February was Vice Adm. Richard Gentz, commander of the Naval Air Systems Command.

Censured and transferred to other duties was Rear Adm. John Calvert, the program executive officer.

And censured and given new job reporting requirements was Capt. Lawrence Elberfeld, the program manager. Elberfeld already had been approved for promotion to rear admiral and will be allowed to retain his star.

Although the report was harsh, it said no evidence was found of any intentional effort to surpress word that the program was running well over budget.

The report also said the head of Pentagon buying programs, John Betti, was aware of the higher estimates but, rather than trying to figure out why a special analysis of the cost came up $1 billion higher than Navy figures, he relied on contractor and Navy assurances the program could be completed within cost estimates.

In a statement, Cheney said Deputy Defense Secretary Donald Atwood will review the A-12 program and ''related personnel and acquisiton issues'' and make recommendations for corrective actions to Cheney next week.

In late April, the Defense Department released its ''major aircraft review,'' examining a variety of aviation programs, including the A-12, and concluded

the program was doing fine.

Three weeks later the two contractors working to develop the carrier- based stealth attack bomber - General Dynamics and McDonnell Douglas - publicly reported overrun troubles. The report said the analyst who developed the estimate made the overrun conclusion in late March.

The nearly $5 billion development program is now forecast to be somewhere around $6 billion.

The inspector general found that the information on cost problems was known within the aviation program, but did not make its way to senior officials with suffient emphasis to raise alarm bells before the major aircraft review was completed.

Rep. Andy Ireland, R-Fla., a member of the House Armed Services Committee who has examined the issue, said top Pentagon officials repeatedly ignored substantial evidence of at least $1 billion in cost overruns in the program.

Ireland said Betti had been alerted to the likelihood of huge cost overruns but failed to alert the secretary of defense. As a result, Cheney gave the program a clean bill of health in testimony to the House Armed Services Committee April 26.

Ireland said the report demonstrates ''that there is a fundamental flaw in program accountability at the Defense Department.''

''I believe that it is part of a bigger problem with independent cost estimating procedures at the Pentagon that violate existing law. The same people who are responsible for buying major weapons systems are given oversight authority to determine whether those programs are keeping within their budget. Program managers are giving assurances about contractors' adherence to budgets based largely on the word of the contractors themselves. It is a process ripe for abuse.''

#90338u1232 12/04/1990 ~United Press International

NEW YORK (DEC. 4) UPI - USX Corp.'s fourth-quarter will be the year's best, thanks to the rise in oil prices since the Iraqi invasion of Kuwait, the chairman of the nation's No. 1 steelmaker said Tuesday.

In comments to reporters prior to his annual outlook presentation, USX Chairman Charles Corry said, ''The fourth-quarter, I would expect, should be the best quarter of the year for us - the strongest quarter.''

Corry said USX, which has substantial oil and gas interests, has benefited from the dramatic increase in oil prices following Iraq's Aug. 2 military

takeover of Kuwait.

He added, ''This is an excellent year'' despite problems with Carl Icahn, USX's largest shareholder who succeeding in compelling the company to put its steel operations on the auction block. ''This company is doing extremely well '' Corry said.

He would not give specific projections on the quarterly or yearly results, saying USX still had the month of December to finish out the fourth quarter.

For the first nine months of 1990 USX earned $551 million, or $2.10 a share, down from $721 million, or $2.82 a share, in the year-earlier period. Nine-month sales rose to $5.11 billion from $4.42 billion in the same 1989 span.

Asked if it was only a matter of when USX would divest itself of its steel operations rather than if, Corry declined to comment.

The chairman confirmed, however, USX had held talks with London-based British Steel plc on the purchase of the Pittsburgh-based company's steel operations.

The talks with British Steel are no longer underway, he said.

#90338u1244 12/04/1990 ~United Press International

LONDON (DEC. 4) UPI - Sometime before Christmas, Britain's Persian Gulf troops will get a special yuletide shipment from home - mince pies, holiday pudding, rock 'n' roll videos and tapes, party streamers and balloons.

The mission is being sponsored by the notoriously rowdy British tabloid press, not usually noted for good deeds.

Not to be outdone by U.S. soldiers, swamped with mail and gifts from home, the tabloids came up with the plan to ship Christmas gifts to British troops stationed alongside U.S. troops in Saudi Arabia.

One special cargo of good cheer, code-named Operation Mince Pies, will bring 96,000 mince pies, traditional fare they are not likely to get from army rations, to the British boys. That's six pies for every British soldier.

''We knew the boys would be feeling miserable away from their families and friends. So we've pulled out all the stops to help give them the best Christmas possible,'' said The Daily Star, one of the tabloids involved in the program.

The newspaper got the producers of Mr. Kipling's Deep Mince Pies, filled with fruit filling and seasonings, to provide 80,000 pies, and the supermarket

chain ASDA to chip in with another 16,000 pies.

The British soldiers got wind of the tabloid Santas' plans, and asked for a special shipment of 16,000 rolls of Trebor Extra Strong Mints - to take away the taste of water purifying tablets they use in the Saudi desert.

Party streamer manufacturers also got involved, and British soldiers will be whooping it up with streamers, balloons, funny noses and party blowers, provided there is no outbreak of hostilities.

''We sincerely hope that all our friends in the gulf come home with nothing more than a decent suntan,'' said members of rock band Status Quo, who are sending their records and tapes along with other British megastars like George Michael and David Bowie.

Another tabloid, The Sun, most noted for its recent campaign against European unification and sponsoring a movement to shout obscenities in unison against European Community officials, will ship 16,000 traditional Christmas puddings to the British troops.

#90338u1267 12/04/1990 ~United Press International

LONDON (DEC. 4) UPI - Stock prices closed lower in dull trading Tuesday on the London International Stock Exchange as Persian Gulf concerns and a wilting British pound hurt investor confidence.

Stocks also eased in Frankfurt. Trading was described as quiet.

London's blue-chip Financial Times 100-stock index, which gained 13.3 points Monday, lost 16.4 points to 2,146.3. The narrower top 30 industrial average fell 13.7 points to 1,681.6.

Volume amounted to around 473 million shares compared with 326 million shares changing hands Monday.

Analysts said stocks fell on news the United States will send an additional 63,000 troops to the Persian Gulf region.

Market watchers explained the additional troops weakened sentiment as the deployment undercut previous hopes for a peaceful solution to the crisis.

Additionally analysts said the recent fall of the British pound undercut investor hopes of a drop in Britain's interest rates before Christmas.

Poor corporate earnings reports also dampened enthusiam, analysts said.

Among the most widely traded stocks, Trafalgar House, the property, leisure

and shipping conglomerate, surged 32 cents to $3.63 despite reporting a 57.4 percent drop in pre-tax annual profits. The company did however boost its annual dividend payment to shareholders by 4.5 percent.

British Aerospace fell 16 cents to $9.95 in the wake of its recently announced plant closures in its defense contracting divisions.

Imperial Chemical Industries, the bellweather chemicals group, slumped 25 cents to 16.72.

EuroDisney climbed 21 cents to $18.50, boosted by support from European buyers.

Elsewhere, oil stocks reflected sluggish international oil prices. British Petroleum eased 2 cents to $6.53 while Shell also slipped 2 cents to $8.83.

On the Frankfurt Stock Exchange, the closely watched German Stock Index, which gained 21.35 points Monday, fell 16.24 points to 1,446.34.

Analysts said stocks eased as local investors focused on the realities of reunification following Chancellor Helmut Kohl's victory on Sunday.

#90338u1288 12/04/1990 ~United Press International

(DEC. 4) UPI - A team of investigators from the National Transportation Safety Board will spend much of the day going through the gutted ruins of a D-C-9 at Detroit Metropolitan Airport. The Northwest Airlines plane erupted in a ball of flame yesterday after being struck by a Northwest Boeing 727 that was taking off. Eight people died and 21 others were injured. The 727 was traveling approximately 140 miles an hour when it clipped the D- CT-S-B investigator Robert Benzon says the probe will focus on how the D-C-9 got onto the takeoff runway.

Residents of the Wynwood area north of downtown Miami are picking up the pieces today following a night of rioting, looting, arson and rock- throwing. A mob estimated as high as 300 ripped through the mostly Hispanic neighborhood after a federal court jury cleared six Miami police officers in the beating death of a Puerto Rican drug dealer. Police dressed in riot gear clashed several times with the looters, some of them wearing masks fashioned from paper bags and T-shirts.

The Commerce Department reports the sale of new, single-family homes dropped to a seasonally adjusted rate of 491-thousand in October. That's 23 percent below October of last year. And the average price of the home that sold was 157-thousand 500 dollars. At the same time, the goverment revised the September selling rate to show 509-thousand homes were sold.

Another group of Americans is home again after four months of being held

hostage by Iraq, their freedom apparently negotiated by boxing champ Muhammad Ali. At least six of those freed are Texans apparently were held at a chemical plant in Iraq where they had worked. The former hostages said they were NOT mistreaed by their captors. Ali went against State Department warnings on travel to Iraq to meet with Saddam in Baghdad. A spokesman says Ali plans to return to Baghdad at Christmas in hopes of bringing out more hostages.

Police in Northern Ireland say a new father died in a hail of gunfire as he went to feed the family pet in a rural town northwest of Belfast. Authorities say last night's shootiong took place near where a former soldier was killed Saturday by the outlawed Irish Republican Army. They say the latest killing apparently was a random target for the terrorists fighting to liberate Northern Ireland from British control, the 74th victim to be killed this year.

Two would-be entrepreneurs were re-thinking their plan in a Chicago jail today. Police say they acted on a tip and raided a North Side apartment last night... uncovering a makeshift clothing store, complete with signs pointing out special sales on half-a-Million dollars worth of allegedly stolen goods. The apartment was filled with racks of name- brand clothing... and was decorated to put shoppers in the Christmas mood. Police call it a ''highly organized fencing and shopping organization.''

#90338u1289 12/04/1990 ~United Press International

MONTEVIDEO, URUGUAY (DEC. 4) UPI - President Bush said Tuesday he does not believe that Saddam Hussein ''has gotten the message'' of the U.N. resolutions demanding the withdrawal of Iraqi forces from Kuwait.

Bush told a news conference in the Uruguayan capital a few hours after his arrival on the second day of his six-day Latin American swing that he agrees with Defense Secretary Dick Cheney who said he did not think sanctions alone will work against Iraq.

Cheney made the comments in testimony Monday before the Senate Armed Services Committee.

And Bush said, ''I don't agree with them,'' when asked about the testimony of two former chairmen of the Joint Chiefs of Staff - Adm. William Crowe and Gen. David Jones - that the United States should give as much as a year or more for the economic sanctions imposed by the U.N. to work.

''I am convinced that Saddam Hussein has not gotten the message,'' Bush told reporters. ''I don't think Saddam Hussein understands'' the impact of the U.N. resolutions condemning his Aug. 2 invasion of Kuwait. ''I hope he gets the message.''

''You know,'' he added, ''I've not been the one who's convinced that sanctions

alone will do the trick.''

Bush said he sent Cheney a note saying he had done ''a superb job'' in his testimony before congressional critics. He said he also congratulated Gen. Colin Powell, chairman of the Joint Chiefs of Staff, who appeared with Cheney.

The president sidestepped questions on newspaper reports that the five permanent members of the U.N. Security Council - the United States, Soviet Union, China, Britain and France - had agreed after approving the resolution sanctioning the use of force after Jan. 15 to offer not to attack Iraq in exchange for its withdrawal from Kuwait.

''I'm not in a negotiating mood,'' Bush said, adding that when he meets with Iraqi Foreign Minister Tariq Aziz, ''I want to make clear to him the best thing is to go through with the U.N. resolutions.''

Last Friday, Bush offered to send Secretary of State James Baker to Baghdad for talks with Saddam and said he would be willing to see Aziz in Washington. Bush's widely hailed invitation was accepted and the Iraqi official was expected to visit Washington as early as next week.

''Let's wait and see how these talks go,'' Bush added. ''But the message is get out (of Kuwait) and full compliance with the U.N. resolutions.''

State Department spokeswoman Margaret Tutwiler told reporters Tuesday that the five permanent Security Council members met following the vote on the use of military force, but had reached no agreement.

However, observers said that the no attack pledge was implicit in the resolution.

On related issues, Bush was adamant that the Palestinian question is ''totally separate'' from the Persian Gulf crisis. ''I think people around the world know of our interest'' in solving the Middle East problem, he said but added, ''There will be no linkage, no linkage whatsoever, and in the talks we have there will be no linkage.''

Saddam said that he wants the Palestinian issue discussed in tandem with other gulf questions when he meets with Baker.

Asked what he is doing to bring about a reduction in oil prices and an easing of the economic burden the sanctions against Iraq have placed on small countries, Bush said, ''I can try to make clear that there is no oil shortage today, and hopefully some of those speculators will ... see that it is true.''

But he stressed, ''I can make clear it is not going to go on forever.''

#90338u1308 12/04/1990 ~United Press International
BEIRUT, LEBANON (DEC. 4) UPI - Thousands of Syrian-backed Lebanese army troops have deployed in Beirut and replaced the war-torn city's militiamen, relieving residents but posing a question: Will the shaky peace survive?

Responding to big promises by leaders, many civilians have removed sand-bagged barricades that served as shields against gunfire in front of their shops and on balconies, but some have refrained from doing so.

Although warring Christian and Moslem militias had officially declared they disbanded ''military operations'' in Beirut, citizens remained skeptical. The militias battled for control of the city for 15 years, and finally withdrew completely from Beirut this week.

''It's relieving to see Lebanese troops on streets again, but we must remain cautious. We had many bad experiences in the past,'' said Hasan Salman, a shopkeeper in the Moslem market place of Barbir.

The shopkeeper was reluctant to remove a 6-year-old large anti- shrapnel cement wall in front of his barracks-like shop.

Salman's view was shared by many Beirutis who experienced many futile peace efforts in the past to end the civil war that erupted in 1975.

A militia-free ''greater Beirut'' has been a big slogan raised by several governments throughout 15 years of warfare.

Krikor Wartanian, who shuttles between his home in the predominantly-Christian east Beirut and his hairdressing shop in mainly-Moslem west Beirut in defiance of dangers, expressed optimism.

''I think there is a lot of credibility in these measures. The United States and Syria have put weight behind the implementation of the peace plan,'' Wartanian said.

Two recent devastating wars that pitted followers of ousted Gen. Michel Aoun against Syrian troops and Christian militiamen brought the Beirutis' lifestyle to the lowest ebb.

Because of chaos and massive damage, the residents were deprived of normal civic services, notably the distribution of water and electric power.

Until now, drinking water reached houses once or twice a month. Thousands of private electric generators roared for many hours every day, puffing poisonous gases that mingle with an outrageous stench from piles of garbage on the streets.

But a number of people feel more secure. ''Thank God, now we can sleep without the nightmare of being hit by shells and rockets, and that's a big gift,'' said Elian Haddad, the mother of three children.

During Aoun's six-month-long war against the Syrians that ended in September 1989, Beirut was heavily pounded with big shells and rockets, forcing civilians to huddle in ill-equipped, damp underground shelters or flee the city.

The civilians's morale improved against the backdrop of widespread scars of war. One would hardly find a building in Beirut that was not hit with shrapnel. In many areas along the line between east and west Beirut, only cats and rats roam alleyways among crumbled buildings.

Civilians living in apartment houses in back roads along the ''Green Line'' feel jubilant because the recurring sniper fire that constituted a daily fatal agony is gone.

''It's like magic. I had blocked my windows with sandbags for a long time. They became part of the furniture,'' said Ghazi Assi, who lives in Khandak Al Ghammeek near the demolished downtown where Christian and Moslem gunmen fought one of their fiercest battles.

Assi, a father of two children, said the ''fear of sniper fire suddenly vanished.''

In the nearby Ras Al Nabeh neighborhood, that was once inhabited by some 80,000 Christians and Moslems, violence has inflicted massive damage.

''It's unbelievable. Many Christians and Moslems come to the neighborhood, hug shake hands and recall old good days while inspecting the remains of their properties,''said Mukhtar Kanj, 50, a gray-haired barber in Ras Al Nabeh.

Kanj, known by Beirutis as ''the barber of militiamen,'' has stubbornly maintained his business in the ''war zone region'' despite recurring battles.

As civilians fled, gunmen became Kanj's sole customers.

#90338u1334 12/04/1990 ~United Press International

ATHENS, GREECE (DEC. 4) UPI - The government of conservative Prime Minister Constantine Mitsotakis introduced a bill in parliament Tuesday banning the publication or broadcast of statements by terrorist groups in the media.

The bill also permits the authorities to intercept letters, telegrams, telex messages and other communications of suspected terrorists, and lifts the confidentiality of their bank accounts.

Public Order Minister Ioannis Vassiliades said the bill followed the pattern of similar legislation in Germany and Italy but was milder in form.

Greece was the only European country without such legislation, and this contributed to the delay in eradicating terrorism in the country, he said. Last week Mitsotakis said terrorism had made dangerous headway in Greece in recent years.

The draft legislation, titled the ''Bill on the Protection of Society Against Organized Crime,'' provides for a ban on the publication or broadcast of statements by terrorist groups in the media.

It covers a wide range of organized criminal offenses, but concentrates mainly on terrorism, which has grown in Greece since 1974, when a U.S. diplomat was assassinated by left-wing terrorists in Athens.

The government introduced the bill after repeated appeals by Mitsotakis's daughter Dora Bokoyannis for newspapers not to publish the statements that terrorist groups usually issued after assassinations or bomb blasts.

Bokayannis, a member of the Vouli, or Greek parliament, said newspapers publishing the statements of terrorist groups gave undue publicity to them and encouraged them to commit further atrocities.

Bokoyannis began making the appeal after her husband, Paul Bakoyannis, also a Vouli deputy, was assassinated in September 1989 by the terrorist group calling itself ''November 17.'' Some Greek newspapers ignored her appeal.

The anti-terrorism bill provides for fines ranging from $32,000 to $320,000 on newspapers violating the ban for the first time, and $320, 000 to $640,000 the second time. Radio and television stations risk having their licenses suspended for up to six months for defying the ban.

The bill allows for bank deposits to be blocked if they ''are linked in any way with crimes committed'' by terrorists or other members of organized criminal groups, ''or are destined to be used for the perpetration or facilitation of crimes.''

The draft legislation allows for a pardon to anyone who voluntarily leaves a criminal organization and provides information to the authorities about its structure, members and activities.

It allows for rewards of at least $160,000 to people who are unconnected with criminal activities but who ''make an important contribution to the arrest of perpetrators of these crimes,'' whether the suspects are on the list of wanted criminals or not.

The left-wing parties in Greece warned earlier that the bill may infringe on the rights of law-abiding citizens, but Mitsotakis said the legislature would be within the bounds of the Greek Constitution.

#90338u1337 12/04/1990 ~United Press International

CHICAGO (DEC. 4) UPI - Prosecutors in the trial of 10 soybean traders at the Chicago Board of Trade said illegal trading practices helped the traders and hurt customers.

Closing arguments in the two-month-old trial began Monday and were expected to take several days. The defendants are accused of defrauding customers by breaking exchange rules.

Assistant U.S. Attorney Mark Rotert disputed defense arguments that customers were not harmed.

''What happened in this case was that these 10 men, each and every one of them on a regular and recurring basis, took this risk and passed it on,'' he said.

Rotert said the illegal practices not only violated exchange rules, but federal law as well.

Attorneys for each of the defendants will have an opportunity to speak during closing aruments, followed by a government rebuttal, so the case was not expected to go to the jury for several days.

#90338u1342 12/04/1990 ~United Press International

LUSAKA, ZAMBIA (DEC. 4) UPI - The Zambian Parliament unanimously approved a bill Tuesday allowing for the formation of political parties for the first time in 17 years, meeting the demands of a growing movement opposed to President Kenneth Kaunda.

The assembly voted 108-0 for removing the ban on political parties. The bill will be sent to Kaunda, who has 21 days to sign it into law.

Kaunda, who led the southern African nation to independence from Britain in 1964, imposed one-party rule a decade later but has faced in the past year a growing campaign of agitation by the Movement for Multi- Party Democracy in Zambia.

While remaining opposed to a multi-party system and vowing to guide his ruling United National Independence Party to yet another victory in elections as early as next year, Kaunda agreed to the constitutional amendment.

A week of bloody anti-government rioting in June prompted Kaunda to propose a national referendum for August 1991 to test support for a multi-party state. But after massive pro-democracy protests in September he decided to open the political process without a referendum.

The bill is not unanimously regarded as ideal, even within the ruling party. Several UNIP Members of Parliament challenged articles they thought would favor the ruling party in an election but voted for the entire bill Tuesday.

Earlier Tuesday, Kaunda announced a minor Cabinet shuffle and fired the editors of Zambia's two major newspapers without explanation after they became increasingly bold in their coverage of the multi-democracy movement.

Kaunda, known to place budding military men into the diplomatic service, unexpectedly dismissed his minister of defense, Lt. Gen. Hananiah Lungu, who was appointed in the wake of an abortive coup in June.

He was replaced by Dodson Siatalimi, presently minister of state for defense. At the same time, Kaunda also dropped Enos Haimbe, the minister of power, transport and communications, who is on study leave in Britain.

Komani Kachinga, for five years the editor of the nation's largest newspaper, The Times of Zambia, and Cyrus Sikaze, editor of the Zambia Daily Mail, were both dismissed by Kaunda without explanation. He said only they would be given ''other posts.''

However, The Times of Zambia, which is owned by Kaunda's ruling United Independence Party, and the government-owned Zambia Daily Mail had in recent months given prominent coverage to the opposition forces.

As replacements, Kaunda named Bwendo Mulengela, a lecturer in the University of Zambia's English department, to head The Times of Zambia, and Calvin Mutumweno, a lecturer at the UNIP ideological President Citizenship College to head the Zambia Daily Mail.

CAPE CANAVERAL, Fla. (DEC. 4) UPI - The Columbia astronauts coaxed a tempermental telescope mount into action Tuesday, passing close by the Soviet Mir space station as they struggled to erase a scientific ''goose egg'' with the start of routine astronomical studies.

After an around-the-clock effort to reprogram the $50 million telescope aiming system, astronaut Jeffrey Hoffman reported the computer-controlled device had successfully tracked from one target to the next without human intervention, a major milestone for the ''Astro- 1'' astronomy mission.

''What did you think? That was the first successful IDOP to IDOP,'' shuttle astronomer Samuel Durrance radioed scientists on the ground, using an acronym for ''identification operational'' that refers to automatic target acquisition.

''I wish you could have seen all the smiles downstairs,'' replied Patti Nordness from the Payload Operations Control Center in Huntsville, Ala.

Running more than a full day behind schedule because of problems activating the $150 million shuttle observatory, Columbia's seven-man crew spent the day coaxing the cantankerous Instrument Pointing System into operation and gathering priceless data about a variety of astronomical targets.

''We are operating in most cases in fully automatic modes,'' said flight director Granvil Pennington. ''This is allowing us to spend much more time on the targets. I think everybody's really enthused ... and ready to get on with it.''

While mission managers were optimistic about finally beginning routine operations, many planned astronomical targets have been lost because of the problems activating and using the four telescopes making up the Astro space observatory.

''I have to tell you, it's a big goose egg,'' mission scientist Ted Gull said of the flight's results over the first two days. ''But ... I think within the next day or two, we'll be over the 50 percent hump and observing effectively.''

The goal of the 38th shuttle mission is to study X-rays and ultraviolet light from more than 200 celestial bodies ranging from exploding stars and galaxies to possible black holes and enigmatic quasars to learn more about the structure and evolution of the universe.

Astronauts Hoffman, 46, Robert Parker, 53, and civilian researchers Durrance, 47, and Ronald Parise, 39 - all professional astronomers - are charged with operating the Astro 1 payload. Their crewmates - commander Vance Brand, 59, co-pilot Guy Gardner, 42, and flight engineer John ''Mike'' Lounge, 44 - are responsible for routine shuttle operations.

While the astronauts were struggling to fix the IPS Tuesday, Columbia passed within about 43 miles of the Soviet Mir space station just a few hours after a Soyuz capsule carrying two cosmonauts and a Japanese journalist docked with the orbital outpost. Two other cosmonauts have been on board since Aug. 1.

''Well Vance, I'll bet you back there in 1975 you did not expect to be able to say hello to Soyuz again 15 years later,'' astronaut Story Musgrave in mission control radioed Brand, who first flew in space in 1975 as part of the historic Apollo-Soyuz orbital link up.

''Yeah, that's a fact,'' Brand replied. ''I don't know if we'll get to say hello or not, but right now we're sure trying to see him.''

''OK, we're all waving down here,'' Musgrave said.

At the mission control center in Houston, a computer-generated image of Mir was projected onto tracking charts and later, Hoffman said he was able to spot the Russian space station when it passed by some 30 miles overhead as the two spacecraft sailed over the South Pacific.

''I went over to the front of the orbiter and was able to pick it up in the gryo-stabilized binoculars,'' he told Musgrave. ''It was already going away from us and I was only able to pick up one point of light.''

Despite their struggle to activate the Astro observatory, Brand and his colleagues have taken time out throughout the mission to chat with family members and ''hams'' around the world as part of an amateur radio experiment. While they did not attempt to contact Mir Tuesday, they may do so later in the mission.

The primary goal of the year's sixth shuttle flight is astronomy, the most ambitious attempt ever made to study X-rays and ultraviolet light from deep space that is blocked by Earth's atmosphere.

The astronauts had hoped to activate the ship's payload Sunday and to begin around-the-clock astronomical observations early Monday. But they quickly fell behind schedule because of a variety of technical glitches that delayed the orbital observatory's check out.

The most significant problem involved the Instrument Pointing System, a European-built computer-controlled mount carrying three ultraviolet telescopes. The other telescope on board, one sensitive to X-rays, is mounted in its own cradle in the rear of the shuttle's payload bay.

The IPS is a complex device that uses senstive star trackers, gyroscopes and other gear to automatically find and lock onto various astronomical targets.

While the shuttle astronomers can manually guide the IPS from target to target

using a joystick and a computer keyboard, the process is too slow to allow them to complete the mission objectives in the 10 days allowed for the flight.

#90338u1357 12/04/1990 ~United Press International

WASHINGTON (DEC. 4) UPI - In announcing a Center for Choice in Education on Tuesday, Education Secretary Lauro Cavazos lauded programs that permit children to choose the school they attend and chided teacher union opposition.

Various types of school choice programs exist nationwide, with seven states passing related legislation in 1990.

For example, in the state of Washington, students next year can transfer to schools within the district in which they live. Next month, students in Utah will be able to attend a school or program outside of their district. Minnesota, Arkansas, Iowa, Nebraska and Ohio have had interdistrict choice programs for some time.

''I am convinced that the radical restructuring of our education system through school choice and school-based management is the best way to reach our national education goals by the turn of the century,'' Cavazos told reporters in announcing the Center for Choice in Education.

The center, which Cavazos said will use existing departmental funds and staff, will provide the public with more information on choice through a toll-free hotline, 1-800-442-PICK, provide speakers and conduct workshops.

President Bush expressed his approval for school choice in a written statement.

''Where it has been introduced, choice has benefitted everyone involved - students, parents, teachers and the community,'' Bush said, adding it fosters excellence in education by promoting competition among schools.

But the movement has experienced some setbacks.

In Oregon, voters rejected a referendum on the November ballot to authorize school choice. And Milwaukee's program, which allows inner- city children to attend private school with state money, was ruled unconstitutional on a legal technicality, not on the plan's merits. The ruling is on appeal to the Wisconsin Supreme Court.

Cavazos, saying he knows his comments ''are going to get me in trouble,'' criticized ''organized education'' for its unwillingness to relinquish power. Most of the opposition has come from teachers' unions.

''There are too many people out there who want to preserve the status quo ... don't want to give up power,'' Cavazos said.

On Oregonians rejecting the referendum, Cavazos said, ''I really feel ... there was too much opposition from organized education. They were too organized,'' he said.

The president of the National Education Association, the nation's largest teachers' union, said Cavazos opened the school choice center to ''keep the issue alive'' since the issue is losing public confidence, as evidenced by the Oregon vote.

''This is a political issue, not an educational issue. As states get more strapped for money, you're going to see more choice programs because it's a lot cheaper than dealing with ... problems in schools,'' said association president Keith Geiger.

In a position paper, the American Association of School Administrators said efforts to improve public schools ''require constructive strategies ... not the tactics of abandonment.''

Cavazos said the abandonment of poor schools should be a signal that they are ''academically bankrupt.''

''For the first time, you have an opportunity to walk away from these schools '' the secretary said, adding states should provide equal funding to both inner-city and suburban schools so they can compete on equal footing for students.

#90338u1360 12/04/1990 ~United Press International
PARIS (DEC. 4) UPI - Defense Minister Jean-Pierre Chevenement said Tuesday the international community should make a ''subtle connection'' between the Persian Gulf crisis and other Mideast problems if Iraq proclaims its ''intention'' to retreat from Kuwait.

Chevenement told a parliamentary meeting of the Western European Union that ''the prospect of an international conference next year'' on all the problems of the region could facilitate an Iraqi withdrawal.

To avoid a war after Jan. 15, the U.N-set deadline for Iraq to leave Kuwait before force is applied, ''It is necessary that Iraq affirm its intention to withdraw from Kuwait and a subtle connection must be posed with other problems'' of the region, Chevenement said.

This should be done by holding out the prospect of an international conference next year to resolve those problems, he said.

Chevenement, a former member of the Iraqi-French friendship association who

has been criticized for his dovish stance on the gulf crisis, spoke a short time after hardline Foreign Minister Roland Dumas, also at the WEU meeting, reiterated France's longstanding call for an international peace conference on the Middle East.

Dumas said the international community could not ''in the immediate future'' link the gulf crisis and other Middle East problems, but thataid once the crisis is over resolving those issued will be ''indispensable.''

'' Given the multiplication of conflicts in that region, it seems indispensable that the international community envisage one day a global resolution of all these crises,'' said Dumas.

He referred specifically to Lebanon and the Israeli-Palestinian conflict, adding that ''many big countries agree, including the United States.''

Such a conference ought to be ''a great chapter under which one would hold sub-conferences,'' he said.

France and Saudi Arabia signed Tuesday the biggest arms deal between the two countries since the Iraqi invasion of Kuwait.

The Thomson-CSF group will supply ground-to-air Crotale missile systems and launching stations in a sale worth $678 million, the company said.

''This equipment will be delivered as soon as possible,'' said the company statement.

#90338u1370 12/04/1990 ~United Press International

SAN SALVADOR, EL SALVADOR (DEC. 4) UPI - Rebels shot down a Salvadoran military plane Tuesday, the fourth army aircraft to be downed by guerrilla fire in a recent surge of fighting.

The army said it was not known whether anyone was killed in the downing of the U.S.-made AC-47 in La Laguna, about 35 miles north of San Salvador.

An army spokesman said rebels used a Soviet-made missile to bring down the aircraft during the second day of fighting in and around the town. The spokesman said 23 rebels have been killed or wounded since Monday in clashes between government troops and guerillas of the Farabundo Marti National Liberation Front, or FMLN.

Since launching a limited offensive Nov. 20, rebels have shot down an army helicopter, a reconnaissance plane, a jet fighter and the AC-47, which U.S. Embassy officials say is a cargo plane equipped with machine guns to assist ground troops.

Rebels say they possess Soviet-made SA-7 and SA-14 and U.S.-made Redeye surface-to-air missiles.

Military and diplomatic sources estimate that more than 200 people have died in the recent fighting.

Rebels say they launched the limited offensive to force the government of President Alfredo Cristiani to give concessions in peace talks.

SAN DIEGO (DEC. 4) UPI - The management of now-troubled Great American Bank refused to heed warnings about the Arizona real estate market in the late 1980s and then sold off its best assets to keep the bad news quiet, it was reported Tuesday.

Great American, which last week sold its California branch operations to Wells Fargo amidst heavy losses, was caught in the Arizona slump only months after allegedly ignoring an in-house due-dilligence report and purchasing Home Federal Savings of Tucson in 1986.

The San Diego Daily Transcript reported that rather than cut its Arizona losses by taking an additional loss on bad Arizona loans, the thrift's executives kept profit reports up by selling off assets.

''The assets they sold were the good ones,'' a former Great American executive told the newspaper, ''so they were left with marginal assets.''

The crumbling of the nation's seventh-largest savings and loan manifested itself in a $263.4 million loss for 1989, one year after Great American reported $50 million in earnings.

The Transcript said that as the level of red ink rose, Great American could no longer block the bad news by selling off assets through its development arm, Great American Development Company.

An executive told the newspaper that squabbling over how large the losses would be in the thrift's quarterly results was based on protecting the image of the institution as well as the power base of the decision makers in the executive suite.

#90338u1380 12/04/1990 ~United Press International

MOUNTAIN VIEW, Calif. (DEC. 4) UPI - Worldwide shipments of semiconductor manufacturing equipment fell 6.7 percent in the third quarter, a trade

association reported Tuesday.

Third-quarter shipments dropped to $2.1 billion from $2.25 billion in the third quarter of 1989, according to Semiconductor Equipment and Materials International.

Shipments were up 3 percent from $2.04 billion in the second quarter, the group said.

The U.S. market, which has been soft for the last 18 months, dropped 8 percent from the second quarter to $780 million, SEMI said. The Japanese market grew 15 percent to $960 million, although 7 percent was due to currency appreciation. Shipments to the rest of the world were flat from the previous quarter at $360 million.

#90338u1382 12/04/1990 ~United Press International

UNITED NATIONS (DEC. 4) UPI - A U.N. General Assembly committee voiced its concern Tuesday about human rights violations in Iran and asked the Tehran government to investigate and rectify the situation.

The committee approved by consensus a resolution acknowledging ''important and useful information concerning a number of allegations about the situation of human rights in the Islamic Republic of Iran.''

The General Assembly's Third Committee - which deals with social, humanitarian and cultural affairs - on Monday adopted overwhelmingly a resolution condemning Iraq for human rights violations in occupied Kuwait.

A total of 132 U.N. member states voted for the anti-Iraq resolution, which condemned Iraq's ''serious violations of human rights'' in Kuwait, including torture, arrests, summary executions, disappearances and abduction.

Iraq invaded Kuwait Aug. 2 and annexed the small emirate as its 19th province. The U.N. Security Council condemned the invasion and demanded an unconditional withdrawal of Iraqi troops.

In the meantime, the London-based Amnesty International issued a prepared statement for release Wednesday in New York calling for an end to the more than a decade of ''relentless and ruthless'' violations of the most basic human rights - including the execution of more than 5,000 people in the past three years in Iran.

The organization said Tehran's ''Death Commission'' sent half of the 5,000 people to death ''in a matter of months, in the most horrific wave of political executions since the early 1980s.''

It said 2,500 Iranian political prisoners were secretly killed in a space of a few months in 1988, ''many of them unjustly imprisoned for years before their eventual execution.''

''There is no justice in the way the Iranian government denies people their fundamental rights - and takes their very lives,'' Amnesty International said.

Massoud Rajavi, the leader of the Iranian resistance movement, the People's Mujahiden, said the adoption of the resolution by the General Assembly committee represented a defeat for the Iranian government.

''The mullahs ruling Iran signed the document of their global condemnation, thus inevitably testifying to their anti-human crimes and lack of legitimacy '' Rajavi said. Rajavi's brother, Kazem, was murdered in Geneva last April 24 for his attacks against Iran's human rights violations. Swiss police said the assassination was carried out by three Iranian gunmen.

The resolution against Iran's human rights violations acknowledged a report by U.N. special representative Galindo Pohl, a Salvadoran law professor, who visited Iran twice this year to investigate charges of human rights violations.

The committee welcomed the decision by Tehran to allow the International Commitee of the Red Cross to visit prisons in Iran. It called on Tehran to implement promtly the decision.

#90338u1391 12/04/1990 ~United Press International
WASHINGTON (DEC. 4) UPI - Congress reached back to the Vietnam War Tuesday for answers on how to handle Iraqi President Saddam Hussein and the Persian Gulf crisis.

The answer, from such witnesses as former Defense Secretary Robert McNamara and historian and John F. Kennedy aide Arthur Schlesinger Jr., could be summed up in two words: ''very carefully.'' They urged patience in waiting for economic sanctions to take hold.

But President Bush, at a news conference Tuesday in Montevideo, Uruguay, said he agreed with Defense Secretary Dick Cheney that sanctions might not be enough to drive Iraq out of Kuwait.

Bush, on a six-day South American visit, said he did not believe that Saddam ''has gotten the message'' of the U.N. resolutions demanding the withdrawal of Iraqi forces.

Cheney expressed the same opinion Monday in testimony before the Senate Armed Services Committee, which ended its hearings on the administration Persian Gulf policy. He suggested quick military action might be necessary before the international coalition aligned against Iraq loses its cohesion.

McNamara, one of the early architects of the full-scale U.S. involvement in the Vietnam War, argued in testimony before the Senate Foreign Relations Committee for restraint by the United States in handling the current crisis.

He derided those who talk of ''surgical air strikes'' against Iraq. He put the chances for such strikes achieving success at between 10 percent and 20 percent.

''It is far more likely,'' he said, ''that extensive military action, leading to heavy casualties on both sides would be required.''

Furthermore, McNamara said, ''The cost of military action will not only be counted in lives lost, but in the resultant political instability and possible chaos in the region.''

He said that the evidence is that the economic sanctions have been having a devastating impact on Iraq, causing a 40 percent drop in the country's gross national product.

''I doubt that any nation, as integrated into the global economy as Iraq, can withstand such economic restrictions indefinitely,'' McNamara said, and therefore the United States should not declare them a failure after only four months.

''Surely we should be prepared to extend the sanctions over a 12- or 18-month period if that offers an opportunity to achieve our political objective without the loss of American lives. Who can doubt that a year of blockade will be cheaper than one week of war?''

Schlesinger was equally grim and cautious. ''The republic finds itself today, to the bafflement of many Americans, on the brink of war in the Persian Gulf. Not all of us are sure why we are standing at the brink. Yet before we take a fatal plunge we must clearly grasp the reasons why.''

He was critical of the administration's reasons for U.S. involvement.

''In defining our stake in the Gulf, the administration's trumpet gives an uncertain sound. It has offered a shifting series of explanations - oil one day, collective security the next, jobs, regional stability, most recently the menace of nuclear weapons. The administration's failure to frame a coherent case only confirms the doubt of many Americans as to whether our national security is really at risk.''

He asked, plaintively, ''Why are we always the fall guys, expected to do 90 percent of the fighting and take 90 percent of the casualties?''

That thought had already been voiced by Senate Foreign Relations Committee Chairman Claiborne Pell, D-R.I., who said, ''Our United Nations allies are more than willing to fight to the last American.''

Pell said the U.N. Security Council resolution, authorizing the use of force ''is an authorization and not a mandate. Prior to employing military forces ... the administration has a constituional obligation to seek and obtain the approval of the U.S. Congress.''

Schlesinger, whose recent books focus on the history of U.S. diplomacy, agreed: ''Should war be our destiny, let Congress rise to its constitutional responsibilities. ... The war-making power is a shared responsibility.''

He added, ''To give any president a blank check to go to war on his own motion is an abdication of constitutional duty and a victory for the imperial presidency.''

Schlesinger concluded his remarks, ''Before the Congress makes the fateful deciusion on war and peace, I hope that honorable members will take a few quiet minutes to revisit the Vietnam monument on the mall.''

The stark, black wall contains only the names of the more than 56,000 Americans who died in the war in Southeast Asia.

#90338u1404 12/04/1990 ~United Press International

MEXICO CITY (DEC. 4) UPI - U.S., Canadian and Mexican officials will meet next week in Washington to discuss ways of freeing up transportation services among the three countries, U.S. Transportation Secretary Samuel Skinner said Tuesday.

''Based on these talks, we may well be in a position to establish a timetable for some fundamental changes as soon as free trade discussions get underway,'' Skinner said during an American Chamber of Commerce breakfast in Mexico City.

He said trade and transportation officials are scheduled to meet next Tuesday

to examine ways to open bus, rail and trucking industries in their countries to competitors from the other two countries.

U.S. Ambassador to Mexico John D. Negroponte said U.S. Trade Representative Carla Hills, Canadian Trade Minister John Crosbie and Mexican Trade Secretary Jaime Serra Puche are meeting separately this week at world trade talks in Brussels to define a procedure for trilateral free trade talks.

Negraponte said, however, that trilateral discussions would be dismissed if they present problems for existing talks between Mexico and the United States aimed at establishing a free trade pact between the two countries.

President Bush met with Mexican President Carlos Salinas de Gortari last week in Mexico to discuss trade and other bilateral issues. Bush and Salinas hope a free trade pact between the two countries will be in effect before 1993.

Canada and the United States signed a free trade pact in 1987 after four years of negotiations.

Skinner praised Salinas for opening the country's transportation sector but said U.S. trucking companies still complain of border delays and limited access to Mexico's interior.

About 85 percent of the $51 billion in U.S.-Mexico trade is carried out by trucking and rail, Skinner said.

Salinas has deregulated domestic trucking, allowed U.S. companies to transport products to and from U.S. industrial plants along the border and has increased private sector construction of roads and highways.

Skinner said transportation is the ''linchpin'' of a successful free trade pact. He said his department hopes to settle remaining transportation disputes between Mexico and the United States prior to the signing of a free trade accord.

''We don't want the free trade agreement to be hampered by issues not covered in the agreement,'' he said, adding that he did not know how extensive transportation would be covered in a trade pact.

Skinner also said he signed a memorandum of understanding Monday with his Mexican counterpart, Caso Lombardo, that clears up rules for U.S. charter and tour bus operations in Mexico. He said he expects the clarification to increase bus tours to Mexico.

#90338u1414 12/04/1990 ~United Press International

NAIROBI, KENYA (DEC. 4) UPI - In a historic vote Tuesday, 3,600 members of

Kenya's sole political party endorsed major changes in the east African nation's election system and agreed that expulsions from the party would stop.

Delegates from the Kenya African National Unionvoted at the end of a two-day meeting in favor of all the recommendations in a report on the party compiled by Vice-President George Saitoti.

On the basis of those recommendations they made no change to the constitutional one-party state that prevails in Kenya, but the vote, a first for KANU in the 27 years of Kenya''s post-independence history, sweeps away two aspects of the country's parliamentary electoral system widely criticized by government opponents as susceptible to vote fraud.

Kenyans vote in two rounds for their members of Parliament and the first round is open to party members alone. Until Tuesday, candidates were shortlisted by a process known as ''queue-voting'' in which voters stood in line behind the candidate of their choice.

The practice, under public fire for its lack of secrecy and for its abuse by bullying thugs hired by candidates, was abolished despite the fact that a large number of delegates spoke for its retention.

Along with it went a second rule that gave automatic election to anyone gaining 70 percent of votes at the ''queuing'' stage without having to submit to a second stage secret ballot.

President Daniel arap Moi, adressing delegates as they closed their deliberations in the capital Nairobi, said the government would work hard to make itself more accountable.

Speaking in Swahili, Kenya's national tongue, he said he had already set up a commission to investigate corruption, one of the greatest fears of the general public polled by Saitoti and a team of 16 KANU members in compiling their report.

The convention also endorsed an end to expulsions from KANU on the grounds that they were politically unfair in a constitutional one-party state. KANU plans to set up alternative disciplinary procedures for members who step out of line.

Kenya has had a turbulent year, with riots in February after the mysterious murder of Foreign Minister Robert Ouko, and again in July following a demonstration calling for multi-party democracy.

Two former cabinet ministers, Kenneth Matiba and Charles Rubia, both expelled from KANU under the old rules have been in detention for four months after lobbying hard for an end to the one-party state, instituted in 1982.

President Moi attacked foreign governments in his speech which he said were accusing him of running a dictatorial state. He said the convention showed Kenya was run by its people.

Delegates endorsed a motion supporting the government for breaking diplomatic relations with Norway last month because of the Scandinavian country''s alleged interference in Kenya''s internal affairs.

Norway protested over the jail treatment of a Kenyan dissident, previously resident in Norway, who had smuggled himself and a quantity of arms into Kenya.

CHICAGO (DEC. 4) UPI - Steady selling activity throughout the day pressured the grain market Tuesday on the Chicago Board of Trade, although soybeans rebounded during the closing minutes.

The grains were mostly lower in relatively quiet trading, while soybean complex futures were mixed.

Widespread selling in soybeans was attributed to profit-taking after sharp gains Monday. But a late recovery in soybean oil and meal from session lows carried over to the soybeans, triggering fairly active buying.

Limited activity on European markets also kept soybean prices on the defensive.

Losses in corn and wheat were limited by light deliveries of the December

contracts. News that Morocco was in the market for 360,000 tons of wheat provided underlying support for wheat futures.

Interior and Gulf basis levels improved slightly during the day on the continued lack of country movement.

At the close, corn was down 2 to up 1/4, soybeans up 2 1/4 to down 2, wheat off 2 1/2 to 3 1/2 and oats down 1 to 2 1/4.

NEW YORK (DEC. 4) UPI - Middle age, generally associated with increased security, has become a period of severe financial strain and lowered job, income and retirement savings prospects, a survey of family physicians, internists and psychiatrists reported Tuesday.

The survey by the American Board of Family Practice, headquartered in Lexington, Ky., said 68 percent of the 300 doctors interviewed by telephone by the Daniel Yankelovich survey organization last August agreed that their middle-aged patients are facing serious pressures, particularly a financial squeeze caused by family caretaking.

The doctors mentioned the strain associated with taking care of both adult children and aged parents as one of the major problems facing the middle aged in America.

Yankelovich President Madely Hochstein noted that two thirds of all Americans over age 45 have at least one living parent or older relative and 6 percent aged 45 to 64 have a dependent older relative living with them.

''These proportions will increase with rising life expectancy, placing greater emotional, financial and direct caretaking burdens on the middle years,'' Hochstein said.

According to the survey, 54 percent of the physicians surveyed believe it is likely that middle-aged people face lower job and income expections. The respondents mentioned skyrocketing health care costs as a continuing source of serious financial strain.

Fifty-nine percent of the physicians agreed that long-term health care should be the responsibility of federal, state or city government, and 69 percent said said catastrophic care should not be the burden of the aged or their children.

MIAMI (DEC. 4) UPI - Caribbean leaders, policy makers and businessmen gathered Tuesday at the 14th annual Miami Conference on the Caribbean to discuss developments in international trade and regional economic issues.

Organizers said about 1,800 people were expected to take part in the four-day conference, which is sponsored by the non-profit organization Caribbean Central American Action.

Honduran President Rafael Leonardo Callejas was scheduled to deliver the opening keynote address Tuesday night, but an organizer said the president's appearance was in doubt because of flooding in Honduras.

Other Caribbean leaders expected to attend this year's conference include Nicaraguan President Violeta Barrios de Chamorro, Panamanian Vice President Guillermo Ford, Gov. Rafael Hernandez Colon of Puerto Rico and Prime Minister Nicholas Brathwaite of Grenada.

The conference opened this year as trade negotiators from around the world met in Brussels to conclude the Uruguay Round of the General Agreement on Tariffs and Trade, or GATT.

Closer to home, President Bush toured South America promoting his ''Enterprise for the Americas'' initiative for economic cooperation in the hemisphere.

Organizers designated Friday as the conference's policy day and scheduled discussions on the Bush initiative and its implications for Caribbean nations.

Other topics on the agenda at this year's conference include the U.S. sugar program and the Caribbean Basin Economic Recovery Expansion Act enacted by the United States in August to replace the original Caribbean Basin Initiative.

Workshops and discussions on tourism, agriculture, manufacturing and regional debt also were featured as part of the four-day program. A trade exposition of Caribbean products and services was to run throughout the conference.

DHAKA (DEC. 4) UPI - President Hussein Muhammed Ershad, facing widespread disbelief in his offer to resign and still escalating public protest, Tuesday called a special session of Parliament for Saturday to nominate his replacement.

Ershad, speaking on nationwide television for the second straight night, said he wanted to resign immediately and urged opposition parties to be ready by Saturday's session to nominate a vice presidential candidate who would run the country until new elections.

The two major opposition alliances, the Awami League and the Bangladesh Nationalist Party, which had rejected Ershad's initial offer of resignation Monday night and organized new public protests Tuesday, said they welcomed Ershad's new statement.

''President Ershad deserves praise for making the right decision, and he should abide by it,'' said Khaleda Zia, leader of the centrist BNP, who called Ershad's announcement a ''victory of the people.''

Sheikh Hasina, leader of the left-wing Awami League, said the opposition would be ready by Saturday to nominate its vice presidential candidate.

Earlier Tuesday, 19 lawmakers in Ershad's ruling Jatiya Party resigned their Parliament seats and hundreds of thousands of people jammed the streets of Dhaka, calling for the president's immediate resignation.

The protests came on the first day of a nine-day strike previously scheduled by the opposition parties as part of their stepped up campaign over the past three months aimed at forcing out Ershad.

Ershad, who seized power from an elected government in 1982, won a five-year presidential term in the 1986 elections that were boycotted by the major opposition parties.

Ershad last Tuesday imposed emergency rule, suspended fundamental rights, banned political activities and imposed news censorship.

The movement against Ershad's government escalated Tuesday with bureaucrats, journalists, university teachers and state-run radio and television workers calling for the withdrawal of emergency rule and Ershad's resignation.

The Bangladesh Civil Service Cadre Service issued a circular appealing to its members not to obey government orders that violated the constitution. Similar appeals were issued by the teachers association and employees of state-run Bangladesh Radio and Television.

Virtually all shops and businesses were closed in compliance with the strike and the streets of the capital mostly deserted.

The opposition has organized anti-government rallies and strikes since October and in the past two weeks about 50 people have been killed, 1,500 injured and nearly 3,000 arrested.

Opposition leaders early Tuesday called Ershad's first offer to resign, made in a 15-minute nationally broadcast address Monday night, a ''cunning plot to deceive the people'' since it gave no specific date for his resignation.

Ershad said Monday he would step down 15 days before the date of filing for

presidential nominations as established by the opposition.

''The elections will be held completely free and fair,'' Ershad had told the nation of 115 million people, apparently bowing to opposition demands that he step down and let new elections be conducted by an interim government.

''I have invited former U.S. President Jimmy Carter to be an observer and also asked Britain to send observers'' to monitor the elections, Ershad said. ''Any number of foreign observers can come and watch the election.''

Hasina, leader of the Awami League, an eight-party left-wing alliance, said in a written statement Tuesday that Ershad's offer to resign was a ''ploy to buy time and bluff the people.

''Our movement to unseat his government will continue,'' Hasina said.

(DEC. 4) UPI - Safety experts report that installation of a sophisticated ground radar system might have helped avoid yesterday's airline collision in Detroit that claimed eight lives. But work on replacing the current system at Detroit Metropolitan Airport is NOT expected to begin until next year. It will replace an out-of-date system, allowing ground controllers to locate all planes either taxiing or waiting on runways.

Astronauts aboard the orbiting space shuttle Columbia have begun round-the-clock science observations after finally getting a 50-Million-dollar telescope-pointing system to work properly. And that means they can move ahead with the mission to view some of the most violent stars and galaxies in the universe. Columbia today passed within 33 miles of the Soviet Mir space station. But the close encounter went mostly UNnoticed by Columbia's crew as it hustled to get the mission back on schedule.

Eastern states are braced for what remains of a powerful snowstorm that marched through the Midwest yesterday, leaving snow, death and destruction in its wake. The Adams-Friendship area of Wisconsin was buried under 22 inches of snow and at least 15 deaths are reported throughout the region, many of them people who died trying to shovel snow from their property. Officials at the University of Iowa estimate damages at two-Million dollars after 10 inches of snow collapsed the plastic roof over the Hawkeye's indoor football practice

field in Iowa City.

The Consumers Policy Institue, a branch of Consumers Union, wants the government to take another look at the use of a synthetic hormone that makes cows give more milk. The consumer group wants to know if it is safe to drink milk from cows who are given the drug B-S-T. The request comes one day before two days of scheduled National Institutes of Health hearings on the subject. The Food and Drug Administration has yet to give approval for other than testing of the drug.

The New York Times says the head of New York public schools wants to allow distribution of condoms to high school students as a way to fight the spread of AIDS in teen-agers. The paper says students could obtain condoms even without parental consent under the plan by Schools Chancellor Joseph Fernandez. He is expected to suggest the plan to the Board of Eucation tomorrow. New York City is leading the nation in adolescent AIDS cases.

ORLANDO, Fla. (DEC. 4) UPI - The average price of regular gasoline sold nationwide rose last week, but not as much as some might have predicted, the American Automobile Association said Tuesday.

The average price of regular unleaded gasoline sold at self-service pumps rose 2.1 cents a gallon during a week in which federal gasoline taxes jumped 5 cents a gallon, AAA said. The tax took effect Saturday.

The latest surge brought the nationwide price to $1.387 a gallon, or 31.2 cents a gallon more than on Aug. 1, the day before Iraq seized Kuwait, the organization said.

AAA said its most recent gasoline price survey showed that the average retail price would have declined in the past week without the federal tax increase.

Instead, the average price rose in all regions of the country, AAA said.

The extra tax boosted the total federal levy to 14 cents a gallon.

#90338u1555 12/04/1990 ~United Press International
BUENOS AIRES, ARGENTINA (DEC. 4) UPI - Banks reopened, road blocks lifted and the Buenos Aires downtown airport went back into operation Tuesday one day after the government put down an 18-hour military revolt by dissident officers.

About 19 people - six civilians and 13 soldiers on both sides - died in day-long fighting Monday until the rebels surrendered their last stronghold, the army command building, just before dark.

A relative calm Tuesday was broken by an early morning bomb blast that damaged the facade of the Bank of Boston in downtown Buenos Aires, police said.

Police in La Plata, 35 miles south of Buenos Aires, said they deactivated a bomb in front of Lloyds Bank.

It is not known who placed either bomb.

Military sources said a handful of rebel soldiers in three armored vehicles who had eluded a loyalist attack at a tank factory north of Buenos Aires were captured Tuesday at a ranch on the pampas that surround the capital.

The Buenos Aires downtown airport, the Aeroparque, closed Monday to enable the government to fly loyalist troops to the capital, was reopened Tuesday, as were banks that had also been closed in the crisis.

Police roadblocks near the army command building, captured temporarily Monday by the rebels, were removed.

In fact, it would have been hard for an outsider to detect any outward sign of Monday's crisis in the downtown area except for an occasional army tank column on patrol, with soldiers wearing a white ribbon on their sleeves.

The white ribbons distinguished the loyaliss from the rebels, who respond to an ultrarightist, nationalist faction of the army that is demanding a change in the army command.

#90338u1565 12/04/1990 ~United Press International
NICOSIA, CYPRUS (DEC. 4) UPI - Refugees who recently fled Kuwait recounted Tuesday tales of rape, murder and hunger at the hands of the Iraqi occupation forces.

''If you are a Kuwaiti and you are caught trying to get out of the city, they

drag you out of your car and beat you up. I have seen it happen many times,'' said Mohamed Al Ansari, 34, an Egyptian doctor who worked at the Al Salmia Medical Center in Kuwait.

Ansari was one of four people who recently escaped the occupied emirate to speak at a news conference in Nicosia.

''Iraqis show no respect for sick people,'' he said. ''I saw them wrench Kuwaitis off life support machines and snatch babies from incubators in order to take away the equipment.

''There's killing, looting, rape, breaking into homes. There's nothing to eat. There's no medical care and there are enormous queues for petrol,'' he continued.

A middle aged Kuwaiti who identified himself only as Abdullah told in choked voice how one of his friends was murdered.

''He was doctor Ali, a medical officer in the army. He worked in one of the few hospitals still functioning. He was told that his father and family would be tortured and when he surrendered they tied his arms and legs to two jeeps and he was torn apart in front of his parents and his brother. It was a horrible sight.

''His parents were then shot dead. Friends who tried to bury the bodies were not allowed to do so,'' he said.

Refugees fleeing Kuwait have told similar tales of brutality by Iraqi troops, which invaded the emirate on Aug. 2.

#90338u1593 12/04/1990 ~United Press International

N'DJAMENA, CHAD (DEC. 4) UPI - Chad's new military ruler Iddriss Deby, appealing to ''sons of Chad to forgive and unify,'' declared himself president Tuesday, three days after chasing out the government of President Hissene Habre, a statement released by his entourage said.

Deby, Habre's former military commander who invaded the central African desert state Nov. 10, issued a decree declaring that the Executive Committee of his Libyan-backed Patriotic Salvation Movement had become the Council of State with powers of government and that he had become president of the Council.

In a message to the nation to be read on national Chadian radio, Deby described Habre's seven-year rule as a dictatorship under which ''people did not have the right to think. Mere reflection was interpreted as opposition and the perpetrators were persecuted to death.''

He accused Habre of stealing from state coffers and blaming him for the country's lack of development.

"This country has been bruised over many decades by the visions of the selfish setting one group against another, one region against all other regions.

''The MPS invites all the sons of Chad to forgive and unify, to put right all of our problems with a democratic voice,'' he said.

He went on to say ''military success should not let us believe that the war is over. We have to get rid of all the demons of the dictator,'' he said.

Deby promised to establish a democracy based on political pluralism. The new system would result in freedom of association and expression as well as press and religious liberty. The political police are to be disbanded after seven years under Habre, he said.

Government will be de-centralized and the economy will be developed so that all regions will benefit.

Both public and private sectors will be encouraged. French and Arabic are to remain the official languages but indigenous African languages will be encouraged, he said.

Soldiers and French Foreign Legionnaires patrolled the near-deserted sand-swept streets of Ndjamena Tuesday. Nearly 5,000 people fled to neighboring Cameroon over the week-end as the government of Habre faded away.

Members of Habre's Anakaza tribe said they will not return to the country. Habre fled with close aides, ministers and family members to Cameroon. It is not known if he has asked for political asylum but some diplomats suggested he may go on to Niger.

At the French military base at N'Djamena, French military doctors are treating wounded former troops of Habre and followers of Deby. French military personnel refuse to distinguish between them.

''They are all Chadians,'' one French military source said.

France was accused by a former Habre minister of plotting to overthrow the Habre government. Deby Tuesday also fired military commanders and top civil servants who served under his predecessor. On Monday he dissolved the National Assembly and suspended the constitution.

Deby said he would replace all military commanders as well as departmental prefects and ministers and civil servants.

In Paris, French Defense Minister Jean-Pierre Chevenement said 40 percent of the equipment used by rebels to take control of the country over the week-end was supplied by Libya.

Deby released some 450 Libyan prisoners captured by his deposed predecessor Hissene Habre.

Western diplomats said the new leader is evidently trying to set Chadian-Libyan relations on a new footing. The two countries have been at odds over the mineral-rich Aouzou Strip in northern Chad. In 1983 and again in 1986 France had to send its army to stop Libya from running over its southern neighbor.

On Monday Deby, who has promised free elections, dissolved the National Assembly and suspended the Chadian constitution.

A statement from Deby's Popular Salvation Movement justified the move by calling the institutions ''fictitious and inoperative'' and ''the abuses of a delinquent dictatorship.''

Chevenment said in a French television interview that 40 percent of the equipment used by the rebels was Libyan, contradicting statements by Deby, who claimed that his sophisticated military equipment was captured from the Chadian army.

''The regime of Hissen Habre fell much faster than we had expected,'' Chevenement said. "We did not allow Hissen Habre to fall. We simply gave orders that our Jaguar (combat planes) not bomb or shoot at Idriss Deby's men.''

#90338u1607 12/04/1990 ~United Press International

BOSTON (DEC. 4) UPI - The deeply troubled Bank of New England Corp. said Tuesday it had agreed to settle charges by the Securities and Exchange Commission that it had misled investors and the SEC last year about its financial problems.

"The issues that are being reviewed by the SEC relate to our financial disclosures in 1989," said James Dorsey, a company spokesman. "We have agreed to a resolution whereby the company would consent to an SEC enforcement proceeding," he said.

However, Dorsey declined to disclose specifics of the tentative agreement or what the SEC enforcement proceeding might do until it is approved by the agency's commissioners. A spokesman for the SEC, John Heine, declined to discuss the investigation except to say that no agreement had yet been reached by Tuesday.

The banking company's financial condition - based on its quarterly reports to stockholders and the SEC - deteriorated so rapidly in 1989 as to raise questions about whether management had withheld information as its enormous real estate troubles developed.

Despite reporting profits in the first three quarters last year, the company stunned the financial community with a staggering $1.2 billion loss in the last quarter of the year. For all of 1989, Bank of New England lost $1.1 billion. Also, nonperforming assets skyrocketed $2.25 billion in just the last quarter.

The banking company, then the region's second largest by virtue of more than $31 billion in assets, further disclosed it was seeking to sell some $6 billion in assets in a bid to raise its dangerously low capital levels. Since then, Bank of New England has sold off various profitable assets to shrink to about $23 billion and is still losing money.

"We have cooperated fully in this SEC investigation and we have been disussing a settlement of it with the SEC staff," Dorsey said. Dorsey took pains to

distance the banking company's current chairman and chief executive officer, Lawrence K. Fish, and other top executives from the presumed misdeeds of 1989.

The issues raised by the SEC "do not in any way involve matters during 1990 or have to do with the company's new management team," Dorsey said. "They are issues that relate to a different era and a different time for us."

Fish was hired in March to take over after the previous chairman, Walter J. Connolly, had been forced out and federal regulators imposed far-reaching restrictions on the company's operations.

Meanwhile, still pending are more than a dozen stockholder suits filed late last year that charge the corporation misled them and the public at-large about its financial condition.

#90338u1623 12/04/1990 ~United Press International
NEW YORK (DEC. 4) UPI - Two young men accused in the 1989 racial slaying of a black teenager by a baseball bat-wielding mob of white youths in Brooklyn were acquitted Tuesday of murder and manslaughter charges.

The panel deliberated just two hours before returning the verdict for Joseph Serrano and co-defendant James Patino.

Both young men were also cleared of rioting and menacing, but the jury found Serrano guilty of fourth-degree possession of a weapon - a baseball bat.

Serrano and Patino were accused of murder, manslaughter and other charges in the Aug. 23, 1989, shooting death of 16-year-old Yusuf Hawkins.

The black teen and three of his friends, who had gone to the neighborhood to look at a used car, were confronted by a white gang of bat-wielding youths who mistook them for another group rumored to be looking for trouble.

Serrano, 20, who faces up to a year in jail and $1,000 fine for the weapons possession conviction, said, ''I'm sorry for what happened to Yusuf Hawkins, but I had nothing to do with it.''

Said Patino, 25, ''I'm very happy about what happened.''

The Hawkins family was not present in the court when the verdict was returned, but both defense lawyers and their clients hugged each other after the acquittal was announced.

The case against Serrano and Patino was heard by one jury. Another panel was expected to begin deliberating murder, manslaughter and riots charges against John Vento, 21, another young man charged in the attack, late Tuesday or Wednesday.

The trial was the fourth against eight young men accused in the slaying of Hawkins, whose death inflamed racial tensions throughout the city and triggered demonstrations and protests, some of them violent.

The first two defendants in the case, Keith Mondello and convicted triggerman Joseph Fama, stood trial before different juries last spring.

Vento, who had initially agreed to aid the prosecution case but then reneged, was acquitted of an intentional murder charge last June 3, but was being retried on a second murder charge as well as other charges.

The prosecution's case was hurt last week when Justice Thaddeus Owens, who has presided over all of the trials, dismissed the most serious charge -

intentional murder - against Serrano and said he would set aside any ''depraved'' murder or manslaughter convictions against both of them.

Three more of the original eight Bensonhurst defendants have yet to stand trial, a case expected to be presented in January.

#90338u1662 12/04/1990 ~United Press International
(DEC. 4) UPI - President Bush told a crowd at the Montevideo airport in

Uruguay today that he'd like to see free trade among all countries in North, Central and South America. Bush will meet with Uruguay's president today to discuss a plan to lower some trade barriers and re-negotiate external debt. As the Bush motorcade rode through the streets of the capital city, the curious, supportive and the critical lined the streets. Some waved flags and at least one person held a sign that read ''Yankee go home.''

Bush is scheduled to move on to Argentina Thursday... a country recently shaken by fighting between the government and dissident troops. At least eight people died in yesterday's uprising a troops loyal to President Carlos Menem crushed a coup attempt, using artillery, fighter bombers and small arms fire. Dozens more were wounded. White House spokesman Marline Fitzwater says the upheaval appears timed to embarrass Menem in advance of the Bush visit.

The Justice Department says the F-B-I has found NO evidence to support recent reports that a federal drug informant may have smuggled the bomb aboard a Pan Am flight that exploded over Lockerbie, Scotland in 1988. the explosion killed 270 people. Two networks reported in October that Pan Am flights from Frankfurt, West Germany, had been used several times by an undercover D-E-A operation to fly informants and suitcases of heroin into Detroit. The flights were part of an elaborate sting operation to snare Middle East drug dealers. The reports said drug operatives may have UNcovered the sting operation and retaliated by slipping a bomb, disguised as a portable radio, into a D- E-A operative's suitcase.

A military official in Bonn says more than 18-hundred American soldiers deployed in Saudi Arabia have been treated in U-S military hospitals in Germany since the start of Operation Desert Shield. Air Force Colonel Earl Ferguson says the troops have suffered injuries and diseases including broken bones, ear and throat infections, and psychiatric disorders. He adds that he has seen a lot of cases of heat exhaustion and a few pregnancies.

A 25-year-old Seminole County, Florida, woman is asking an appeals panel to overturn a lower court's ruling that she gave cocaine to her UNborn baby through the umbilical cord. Jennifer Johnson became the first mother in Florida convicted under a law normally reserved for drug pushers. Now, more than one year after that conviction, her lawyers are asking the 5th District Court of Appeal to decide whether that conviction should stand. The American Civil Liberties Union calls her prosecution UNconstitutional.

Most people are back at work in New Madrid, Missouri, today after taking a long weekend because of a prediction that an earthquake would hit the town. Many of the out-of-town reporters and camera crews are leaving the area... even though the man who made the prediction said the chance for a ''big one'' continues until tomorrow. The volatile New Madrid Fault runs from Illinois to Arkansas and through another five states.

#90338u1682 12/04/1990 ~United Press International
MONTEVIDEO, URUQUAY (DEC. 4) UPI - President Bush took his South American tour to Uruguay Tuesday, urging support of his proposal for an economic trading zone in the Americas.

''This is an exciting time because we are entering a new era in Latin American relations,'' Bush said under bright sunny skies at the Carrasco Airport, 12 miles east of Montevideo.

''And that is why I thought it was so important to come talk face to face with the men and women who are going to lead this continent into the 21st century, to talk about key issues that concern all our nations,'' Bush said.

Bush said that during his one-day visit he planned to discuss with Uruguayan President Alberto Lacalle an effort to create a hemispheric economic network, unveiled in June, that includes lowering some trade barriers and renegotiating external debt.

''The ultimate aim is free trade for all the Americas,'' Bush said.

On a six-day trip to South America, Bush looked tanned and tired on his arrival at the airport following a one-day visit to Brasilia. At the airport, he received a 21-cannon salute from military troops in combat dress.

At a joint news conference with Lacalle, Bush said he does not believe Iraqi President Saddam Hussein ''has gotten the message'' of United Nations resolutions demanding the withdrawal of Iraqi forces from Kuwait.

Bush said he agreed with Defense Secretary Dick Cheney who has said that economic sanctions alone might not prompt an Iraqi withdrawl from Kuwait.

Bush also insisted that while the United States wants to see a resolution of the Palestian question, it is ''totally separate'' from the Persian Gulf crisis. Saddam has sought to link an Iraqi exit from Kuwait to an Israeli withdrawl from the occupied West Bank and Gaza Strip.

''I think people around the world know of our interest,'' he said, in solving the Middle East problem. But, he insisted, ''There will be no linkage, no linkage whatsoever, and in the talks we have, there will be no linkage.''

Later Wednesday, Bush was to fly to the resort of Punta del Este, 84 miles east of Montevideo, to dine with Lacalle and spend the night in a 32-room mansion. Bush was scheduled to fly to Argentina on Thursday, followed by visits to Chile and Venezuela.

Bush made a special point of urging a successful completion of the current round of world trade talks that began four years ago in Punta del Este and are said to be in danger of collapsing this week in Brussels.

With the trade talks threatened by divisions over agriculture subsidies, Bush said the participating nations must seize their final opportunity to find the political will to limit or reduce distortions to free trade.

In his welcoming address, Lacalle also touched on trade issues with the proposed hemishperic economic zone and in the negotiations of the General Agreement on Tariffs and Trade.

Nothing more important will happen for our country since the day of our independence (from Spain) than for us to enter into a trade association with Brazil, Argentina and Paraguay, Lacalle said.

Lacalle said that increasing economic ties with the United States is vital for his country's development, and said that Uruguayans share Bush's concern for the continuing GATT talks.

Uruguay, along with other neighboring Latin American nations, strongly supports the U.S. position to sharply reduce agriculture subsidies, which analysts argue cost developing nations millions of dollars each year in lost

trade.

Bush, riding in a special bullet-proof black limousine flown in four days before his Uruguay visit, and his motercade took a meandering route to the Liberty House, where Bush began a one-on-one meeting with Lacalle.

The curious, supportive and the critical lined the streets of downtown Montevideo waving flags and at one instance displaying a sign ''Yankee go home.''

The presidents are also likely to discuss Uruguay's recent acceptance as the newest Latin American country in the Brady Plan, which provides for renegotiating external debt.

Uruguayan negotiators have proposed three possible options for reducing its $6.9 billion external debt to a committee of 123 private creditor banks.

#90338u1711 12/04/1990 ~United Press International
SAN FRANCISCO (DEC. 4) UPI - New evidence bolsters the view that dinosaurs and many other life forms suddenly disappeared 65 million years ago after a huge comet or asteroid struck Earth, a leading scientist said Tuesday.

The report, presented at the annual meeting of the American Geophysical Union, was sure to rekindle debate on the controversial topic of how the ancient animals abruptly vanished.

More than 2,000 papers have been written on the topic since Nobel laureate Luis Alvarez and his son, Walter, first proposed their ''extraterrestial'' theory of dinosaur extinction in 1980.

In an overview of the latest findings, Walter Alvarez, a geology professor at the University of California at Berkeley, said research along an ancient sea floor in southern Spain showed a species of single- celled marine plankton, called foramnifera, suddenly became extinct at the end of the Cretaceous period of history.

Similarly, he said, University of Washington scientists have found many

species of mollusks died out precisely at the end of the Cretaceous period - about 65 million years ago.

And, new studies of dinosaur fossils in Montana has shown an extinction pattern ''consistent with a catastrophic extinction,'' rather than a gradual decline, Alvarez said.

Studies have shown as many as 75 percent of all life forms on Earth perished at that time, he said.

However, University of Colorado researchers recently reported the discovery of two sets of dinosaur fossils in Wyoming that they say are at odds the sudden extinction theory. Robert Bakker and his colleagues said the dinosaurs appear to have lived 1 million years after their species were thought to have died out.

''Every major extinction of dinosaurs occurred in a series of pulses, '' said Bakker, who argues the mass-catastrophe theory of dinosaur extinction ''is simply not true.''

But Alvarez told the 3,000 scientists attending the geology meeting that there is evidence that at least two large extraterrestrial objects struck what is now North America about the time the many life forms died 65 million years ago.

One crater, discovered in Iowa, dates to the end of the Cretaceous era. Crystals dating to the same period have been found a similar crater, 100 kilometers in diameter, on Mexico's Yucatan Peninsula.

Other scientists believe they have found evidence of a giant asteroid or comet striking Earth at two sites in the Caribbean Sea.

Scientists have calculated that an object with a diameter of 6 miles, falling at 12 miles per second, would have the impact of a 70 million megaton bomb.

Alvarez cited a recent University of Chicago study that indicates the impact of such a comet-like object would trigger winds up to 300 miles an hours, tidal waves that run for hours, increased global darkness withcold temporatures for months, and acid and toxic chemical rain for years to decades.

''At first, our critics challenged the impact theory by asking how a comet impact could wipe out as many species as the geological record shows,'' Alvarez said. ''Now they are asking how any species could survive.''

MIAMI (DEC. 4) UPI - A federal judge ruled Tuesday transcripts of the tapes of deposed Panamanian leader Manuel Noriega's jailhouse telephone

conversations belong to the public and not just Cable News Network, which obtained the tapes.

In dismissing the network's claim it had exclusive rights to the information, U.S. District Judge William Hoeveler said the public's right to know should not rest on the ''whims of CNN's programming needs.''

However, Hoeveler did delay release of the transcripts until Dec. 6 to give CNN time to appeal his order to the 11th Circuit U.S. Court of Appeals in Atlanta.

Several news organizations, including The Miami Herald and Gannett Satellite Information Network, asked Hoeveler last week to release the transcripts, which were made by the court while Hoeveler was trying to decide if broadcast of CNN's tapes would prohibit Noriega from obtaining a fair trial.

Hoeveler ruled last week that the broadcast of information contained in the tapes did not violate the deposed leader's rights.

Noriega is awaiting trial on drug-trafficking charges in the Metropolitan Correctional Center in Miami, where he has been held since his January arrival in Florida following the U.S. invasion of Panama.

CNN had argued that classifying the transcripts as court documents and therefore public records was analogous to turning over the notes of one reporter to competing news organizations.

''If this court's actions in this highly publicized matter are to be accorded any meaningful public scrutiny, then the public should have access to all of the contents of the transcripts which formed the basis for the court's ruling, and not simply those small portions which CNN chooses to air,'' Hoeveler wrote.

''The public's role as a check on the integrity of the judicial process should not rise or fall on the whims of CNN's programming needs. ''

Hoeveler noted his ruling came six days after he lifted the temporary restraining oder imposed last month on CNN's broadcast of the tapes.

''During this time, CNN has had more than ample opportunity to 'scoop' its competitors by airing the conversations in their entirety. Instead, CNN has, for reasons unknown, declined to broadcast the vast majority of the conversations in its possession ...

''Though the court respects CNN's right not to publish, it nonetheless declines to accord CNN such absolute and unfettered control over access to information which, in the court's discretion, should be made available for public review,'' he said.

A CNN reporter in Panama obtained seven tapes made by U.S. officials of Noriega's telephone calls from his jail cell to friends as well as to his attorney's office.

While the federal government notifies prisoners that it tapes their telephone conversations, taping of calls between prisoners and their attorneys is strictly prohibited as a violation of attorney-client privilege.

Lead defense attorney Frank Rubino asked Hoeveler to block broadcast of the tapes arguing that the broadcasts violated Noriega's right to a fair trial. That prompted Hoeveler to issue a temporary stay, which CNN violated by proceeding to broadcast a portion of Noriega's conversation with Rubino's office.

Though Hoeveler has found that the information in the tapes would not infringe on Noriega's right to a fair trial, he has not ruled on Rubino's request that CNN be declared in contempt of court for airing the tapes in violation of the temporary restraining order.

Rubino wants CNN to pay $300,000 in fines for each violation and has asked that the money be used to pay Noriega's attorneys, who say they have not been paid in more than a year because the federal government has frozen Noriega's bank accounts.

TEGUCIGALPA, HONDURAS (DEC. 4) UPI - Authorities have arrested 150 policemen in the past few months on charges of corruption and smuggling between Honduras and Guatemala, police said Tuesday.

Police Capt. Cesar Augusto Somoza said the massive purge of police, most of them stationed on the border with Guatemala, is because ''they commited numerous irregularities, including accepting bribes from contraband traffickers.''

All 150 policemen were given dishonorable discharges before being arrested, Somoza said.

The majority were stationed as guards on the eastern border with Guatemala, some 120 miles east of Tegucigalpa.

In recent months, Honduran Finance Ministry authorities have charged that vast quantities of contraband cattle have entered Guatemala, destabilizing the national meat market.

Somoza said the last round-up of policemen came after a cattle rancher told authorities that border police offered him guarantees and protection for the flow of contraband across the border in exchange for $2,000.

Somoza said the army's high command, which runs the police force, has formed a commission with the help of the country's bar association to wipe out corruption in the security forces.

#90338u1742 12/04/1990 ~United Press International

MIAMI (DEC. 4) UPI - A Hispanic neighborhood ravaged by hundreds of rioters returned nearly to normal Tuesday as residents and city workers cleaned up after the looting and burning sparked by the acquittal of six police officers in the beating death of a Puerto Rican drug dealer.

The smell of smoke from fires set in anger the night before lingered in the air as small groups of people watched fire crews working in gutted buildings and talked about the rioting and the jury verdict that led to the destruction in their neighborhood. Officials estimated damages at around $2.5 million

The city was taken by surprise by the violence that erupted about 6:30 p.m. Monday in the predominantly Puerto Rican Wynwood neighborhood north of downtown, said Mayor Xavier Suarez.

"I certainly didn't expect kids with hoods (to hide their identity)," he said. ''I've never seen that before. That's a new technique for me. We just have to keep learning and people have to understand that a court decision cannot lead to extreme violence and a sort of loss of total control as we saw last night."

There were no serious injuries in the rioting, which started hours after a federal jury cleared the Miami officers of conspiracy and other charges in the death of Leonardo Mercado, who lived just a few blocks from where the heaviest rioting occurred. Police said there were about 10 arrests.

Police following tips Tuesday went to homes in the neighborhood to recover stolen property, including computers and other office equipment. However, there were no more police on patrol than usual, said police spokesman Bobby Navarro.

''I would say things are normal - about as normal as you can get after a riot '' he said.

The Police Department was criticized for waiting about two hours before sending riot squads into the neighborhood to quell the disturbance. Chief Perry Anderson said his troops acted properly.

He emphasized that there were no deaths or serious injuries during the uprising and said the department would have been criticized for ''bashing teenagers'' if police had moved in sooner.

''We feel that we did the appropriate thing - the appropriate responses,'' Anderson said. ''We waited until we had adequate enough manpower to respond without jeopardizing any citizens and also, without jeopardizing any police officers.''

Police spokesman David Rivero said police would act faster if rioting broke out Tuesday night.

''They're going to be ready,'' he said. ''If there are any problems, they're going to be over in five minutes.''

Riot police clashed several times Monday night with the looters, some of them wearing masks fashioned from paper bags and T-shirts, and managed to bring the area under control by 11 p.m.

Patrick Gerrits, owner of a general contracting firm near Roberto Clemente Park - named after the deceased Puerto Rican baseball star - that his father built in 1948, had his building looted and destroyed by fire.

''All this land use to be ours. We gave it to the city to expand the park to try and help this community - the Puerto Rican community. Virtually, they've about ruined me.''

Gerrits said he was stunned by the violence.

''We just build buidings and we've been very comfortable here and we haven't been harassed ... this took us by surprise.''

For Miami residents, the disturbance was a chilling reminder of the three days of violence that rocked the city's predominantly black neighborhoods in January 1989.

Those riots erupted after an Hispanic police officer, William Lozano, shot and killed a black motorcyclist. Lozano was later convicted of manslaughter.

Scenes of angry black rioters in Miami made the world news several times in

the 1980s because of the deaths of black men at the hands of police.

Police initially kept a restrained presence Monday, staying out of the fray for at least two hours as rampaging youths set fire to parked cars, buildings and trash bins, tossed rocks and bottles and looted stores. Stray gunshots also could be heard.

About 200 police sealed off the riot area and field force teams began clearing the area about 8:30 p.m. It took them about 2 1/2 hours to bring the neighborhood under control.

#90338u1773 12/04/1990 ~United Press International

NEW YORK (DEC. 4) UPI - A Federal Reserve move to relax bank reserve requirements and a British television report that Iraq has advanced proposals to withdraw its forces from Kuwait combined to weaken the dollar Tuesday.

The Fed announced it will allow U.S. banks to earn interest on $13.6 billion held until now as non-interest earning depository institution reserves, a move analysts said would mostly give troubled banks some relief.

But currency traders said the New York market initially thought it detected a Fed credit easing signal - the central bank can use reserve requirements to change its monetary policy - and started selling dollars.

However, the greenback recovered somewhat when ''people had time to figure out what the Fed move meant,'' said Audrey McNiff, a Hongkong & Shanghai Banking Corp. vice president for corporate currency dealing.

Analysts saw no disguised Fed move to lower interest rates. McNiff added that better bank earnings could even be bullish for the dollar.

Later, there was a flurry of dollar-dumping on reports that British television said Iraq advanced proposals for its withdrawal from Kuwait - but the market then changed direction when it saw no confirmation of the reports forthcoming.

In late New York trading, the dollar was at 1.5015 German marks, down from 1.5140 marks Monday, and at 133.10 Japanese yen, down from 134.70.

The British pound strengthened to $1.9300 from $1.9175.

Other New York dollar rates: 1.2820 Swiss francs, off from 1.2930; 5. 0750 French francs, off from 5.1155; and 1,127 Italian lire, off from 1, 138.25.

National Westminster Bank corporate trader Hank Weiland said traders sold dollars ''instinctively'' when the Iraqi withdrawal report popped up on computer screens, pushing the unit down to 1.4960 marks.

''We thought there was going to be a panic. But once we realized what it was, it kicked back (up) to the 1.50 (mark) level, '' Weiland said.

The report had ''less of an effect than one would have thought it would have '' McNiff said, adding the muted response ''indicates the market is somewhat skeptical'' about the likelihood of a rapid resolution to the Persian Gulf crisis.

In Europe, the dollar mostly declined, weakening on the Fed easing signal

perceived in the move to lower bank reserve requirements and on trouble in global trade talks.

''The new (Fed) reserve requirements ... hurt it, especially against the German mark,'' said analyst Geoff Earnshaw of National Westminster. Players saw the move as boding further Fed interest rate cuts.

In addition, deadlock on key issues in the soon-to-be-concluded General Agreement on Trade and Tariffs talks hurt the dollar despite renewed strength on heightened Persian Gulf jitters, traders said.

The dollar slipped in both Frankfurt, to 1.5043 German marks vs. 1. 5062 Monday, and Zurich, to 1.2815 Swiss francs vs. 1.2880.

In London, the pound moved up to $1.9245 vs. $1.9205.

The dollar dropped in Brussels, to 31.05 Belgian francs from 31.21. But the U.S. unit ended firmer in Paris and Milan, at 5.0870 French francs vs. 5.0825 and at 1,130.50 Italian lire vs. 1,129.70, respectively.

Earlier in Tokyo, the dollar jumped against the yen in active trading Tuesday on concern over the Persian Gulf crisis, closing at 134.35 yen vs. Monday's close of 133.00 yen.

Investors kept buying the dollar in the belief that it will sustain the rise triggered by last Thursday's United Nations Security Council resolution authorizing the use of force against Iraq, Tokyo dealers said.

Participants frustrated with recently narrow trading ranges tested new dollar highs, said Sumitomo Bank currency manager Tetsuya Taura.

Taura reported strong year-end demand for the dollar among importers and oil companies. But insurance firms sold dollars to take profits to dress up balance sheets, momentarily pushing the dollar to an intraday low of 133.50 yen, he said.

In Zurich, gold closed lower at $377 an ounce vs. $381.50, while in London the precious metal fell to $377.75 from $380.75.

Silver in Zurich closed unchanged at $4.15 an ounce but moved up in London to $4.18 an ounce from $4.16.

Republic National Bank in New York closed cash gold at $377.25 an ounce, up from $375.50 Monday. The New York Commodity Exchange settled gold contracts at $378.90 an ounce, up from $376.60 the previous day.

Republic closed cash silver at $4.175 an ounce, up from $4.155. Comex silver closed at $4.151 an ounce, up from $4.138.

#90338u1782 12/04/1990 ~United Press International
NEW YORK (DEC. 4) UPI - A British television report that Iraq has outlined a proposal for withdrawl from Kuwait sent stock prices broadly higher in active trading Tuesday on the New York Stock Exchange.

The blue-chip Dow Jones industrial average, which rose 5.94 points Monday, surged 14.11 points to close at 2579.70.

Among broader market gauges, the New York Stock Exchange composite index gained 1.12 to 178.19 and Standard & Poor's 500-stock index gained 2.25 to 326.35. The price of an average NYSE share added 19 cents.

Advances outpaced declines 906-634 among the 1,990 issues crossing the NYSE tape. Volume amounted to 185,820,000 shares, compared with the 177,040,000 traded Monday.

Stocks opened lower, and while the broad market retained its gains throughout the day, a 22-point drop in the Dow industrials shortly before the close was wiped out by a late wave of computer driven buy orders for blue-chip stocks lifting the market higher on news of the British television report.

Market watchers said blue chip stocks, which came under some moderate selling pressure early from a combination of profit taking, generally lower overseas markets and Middle East worries, surged in the final minutes of trading on reports that Iraq had outlined a proposal for withdawl from Kuwait.

The U.S. State Department in Washington said it knew nothing about the British television report.

Market watchers said the buying enthusiam was dampened however by the sharp drop on the Tokyo Stock Exchange where the Nikkei Average plummeted 863.38 points to 21,862.61.

Analysts said the U.S. decision to send an additional 63,000 troops to the Persian Gulf region also weakened investor sentiment as the deployment undercut previous hopes for a peaceful solution to the crisis.

A decision by the Fed to reduce some bank reserve requirements on non-personal time deposits and net eurocurrency liabilities also helped to boost prices as several of the nation's leading banks gained sharply on the Fed's announcement.

Brad Wyatt, vice president of the investment managment group of Bankamerica in San Francisco said ''the Fed's action amounts to an easing of credit conditions because banks will be able to free up reserves for other lending activities.''

Both requirements, now at 3 percent, will be lowered to zero, ''over the coming weeks,'' the Fed said, and was the first change in the reserves since 1983.

Currently, banks must hold reserves equal to 12 percent of all their checking deposits and 3 percent of certain certificates of deposits with maturities of less than 18 months.

The Fed said the board has been reviewing these requirements for some time and that the current 3 percent requirement has ''placed depository institutions at a disadvantage relative to other providers of credit, spawning efforts to circumvent the requirement.''

The move, according to Wyatt ''is likely to be viewed as strong signal that the Fed wants banks to lend more money and is likely to ease credit.''

Wyatt said ''the move is also likely to boost bank earnings and their stock

prices, and should have a major impact on the market.''

Analysts said the move could also send a signal to banks to lower the prime rate, now at 10 percent.

The prime, a key commercial lending rate, has not changed since early January although the Fed has significantly lowered its funds rate. Analysts said this was because of heavy pressure on bank earnings.

Last week Fed Chairman Alan Greenspan told the House Banking Committee that the Fed was ''accelerating'' its evaluation of reducing reserve requirements, but he said then the Fed had not reached a conclusion on the matter.

For several months, concern that a credit crunch is harming the nation's economy has steadily mounted.

The Fed's move, analysts said, was seen as a sign of the Federal Reserve Board's escalating concern about the credit situation.

On the trading floor, First Chicago Corp. paced the actives, climbing 1 to 18 3/4. Citicorp followed gaining 1 1/2 to 14 3/8.

AT&T was the third, adding 1/8 to 30 1/4. The nation's most widely held stock plunged 2 Monday on news of an unsolicited $90-a-share bid for NCR.

NCR, which catapulted 24 3/4 Monday, added another 2 to 83 1/2.

In a strong banking sector, Chase Manhattan added 1/2 to 11 1/2, BankAmerica gained 1 1/2 to 24 1/2, J.P. Morgan gained 1 1/2 to 43 1/4, Chemical Banking added 1/2 to 12 1/2, Manufacturers Hanover gained 1 1/8 to 20 3/8 and Bankers Trust surged 2 3/8 to 41 3/8.

Among some of the blue chips, General Electric gained 5/8 to 55, Eastman Kodak slipped 1 1/2 to 41 3/8 and IBM ended unchnaged at 114 5/8.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 227,059,070 shares, compared with 211,462,410 shares traded in the previous session.

Prices ended mixed in moderate trading on the American Stock Exchange.

The Amex Market Value index added 0.04 to 302.64, but declines topped advances 295-273 among the 820 issues traded. The price of an Amex average share was unchanged. Composite volume totaled 15,638,150 shares vs. 18,103,550 traded Monday.

Continental Airlines Holdings led the Amex issues, easing 1/4 to 1 3/4. The airline filed for Chapter 11 bankruptcy protection for the second time in

seven years on Monday, citing a 125 percent jump in the cost of jet fuel as the reason for the move, which it said would allow it to restructure its $2.2 billion debt.

The National Association of Securities Dealers composite index surged 2.79 to 364.11 for its sixth consecutive gain.

LOS ANGELES (DEC. 4) UPI - Environmentalists called Tuesday for a boycott of Bumble Bee Seafoods over claims that the company has continued to buy tuna caught using methods that kill dolphins, despite a pledge to stop doing so.

''Bumble Bee has stung the American consumer with a PR campaign founded on deceit,'' said David Phillips, executive director of the San Francisco-based Earth Insland Institute.

Earth Island took out full-page newspaper advertisements Tuesday calling for the boycott and accusing Bumble Bee and its Thailand-based parent company, Unicord Inc., of sponsoring ''the slaughter of dolphins.''

The institute also held a news conference in Los Angeles where Brenda Killian, one of its researchers, alleged that the canner has bought ''thousands of tons'' of tuna in Thailand caught with giant deep-sea drift nets, which also catch dolphins.

''These drift nets catch everything in their path, including birds, sea turtles and dolphins,'' Killian said. ''They literally strip-mine the ocean.''

San Diego-based Bumble Bee, one of three major U.S. tuna canners that agreed in April to switch to buying tuna caught only in dolphin-safe ways, called the Earth Island accusations false.

''We believe we are being unjustly acccused and harassed by Earth Island,'' said Mark Koob, president of the canner.

The company also said it would pay for a representative of two other environmental groups - either Greenpeace or the Dolphin Coalition - to monitor fish processing in Thailand.

Koob also said that Earth Island representatives have never contacted him, but Killian said she had spoken to Koob on several occasions about violations of the dolphin-safe promise.

Killian said Koob told her that the problems may have been created because Unicord did not understanding the new policy because of the language difference.

Bumble Bee enjoys about 20 percent of the $1.5 billion-a-year U.S. tuna market trailing H.J. Heinz Co.'s StarKist Seafood, with about 33 percent, and Van Kamp Seafood Co.'s Chicken of the Sea brand, with about 21 percent.

Earth Island led an 18-month boycott against the three canners that ended last April after they pledged to change their buying policies.

Killian said that both StarKist and Chicken of the Sea have followed the ''dolphin-safe'' policies since then.

But unlike StarKist and Chicken of the Sea, Bumble Bee said in April that it would need six months to ''phase out'' existing contracts with fishers using methods that endanger dolphins. However, Bumble Bee began selling cans of tuna labeled ''dolphin safe'' in June, Koob admitted.

''We verified every can with the dolphin-safe labeling had been caught with those methods,'' Koob said.

But Earth Island said that practice misleads consumers into believing that Bumble Bee did not use the objectionable methods and, at the news conference Tuesday, the group presented Bumble Bee with a ''Pinocchio'' award.

Also appearing at the event were Scott Trimingham, president of the Sea Shepherd Conservation Society, and Patti Davis, duaghter of former President Ronald Reagan.

Tracy Romine, a representative of Greenpeace, said Tuesday that she could not comment on the Earth Island allegations, but noted that the determination of what is ''dolphin-safe'' tuna has been open to interpretation by canners.

''A number of companies have very arbitrary ideas what the policies mean, so we're suspicious of everyone on the verification front,'' Romine said.

She said that a federal tuna-can labeling law signed by President Bush last week with strong support from environmentalists will help clarify the issue when it goes into effect on April 28.

HYATTSVILLE, MD (DEC. 4) UPI - James Bias, the younger brother of the late University of Maryland basketball star Len Bias, was shot dead Tuesday after an argument at a jewelry store in suburban Washington, police said.

Bias, 20, died of two gunshot wounds in the lower back about 90 minutes after he was taken to the Leland Memorial Hospital emergency ward, a hospital spokeswoman said.

Prince George's County Police Sgt. Chuck Cooke said authorities were looking for two suspects, described as black males between the ages of 20 and 21. They were driving in a green Mercedes at the time of the shooting, police said.

''Other than a verbal disagreement, we don't have much in the way of a motive '' Cooke said.

Bias and a friend were in the jewelry store at Prince George's Plaza when one of the suspects apparently got into an argument with Bias. One of the men asked Bias to step outside to settle the argument, but he refused, Cooke said.

The suspects exited the store and Bias and a friend left the store a short time later. While Bias and his friend drove away from the store, one of the suspects fired a pistol from the Mercedes, shooting Bias twice in the back and injuring his friend with flying glass.

Police would not say what the argument was about.

Len Bias, the all-time leading basketball scorer at the University of Maryland and the 1986 Atlantic Coast Conference player of the year, died June 19, 1986, of cardiac arrest after snorting cocaine at a party. The 22-year-old Bias was picked in the first round of the NBA draft by the Boston Celtics.

James Bias, also a basketball player, was taken to Leland Memorial Hospital after the shooting by his friends in the car. The case was referred to the county coroner's office in Upper Marlboro.

Hospital officials confirmed that victim was the brother of Len Bias.

MANAGUA (DEC. 4) UPI - American businessman John Hull, who is accused of aiding drug and arms traffickers from his former ranch in Costa Rica, is living in Nicaragua with his daughter, a Sandinista newspaper said Tuesday.

Barricada, the official Sandinista daily, said Hull reacted nervously when reporters asked about his pending case with Costa Rican courts.

''There's nothing (to the case). They can't do anything,'' the newspaper

quoted Hull as saying.

For many years Hull lived on a Costa Rican ranch near the Nicaraguan border. The government of Costa Rica accused him of helping former Contra rebels smuggle drugs and arms from an airstrip on his ranch.

Hull also has been implicated in the Iran-Contra scandal by the Christic Institue, an independent research group that has filed charges against various U.S. officials in American courts.

The Christic Institute says Hull was a major player in the supply of arms and money to the Contras during Congress' ban on Contra financing. They also say he harbored and aided members of the CIA illegally supplying and training the Contras, who were trying to oust the Sandinista government of Nicaragua.

After arriving in Nicaragua several days ago, Hull and his daughter went to Juigalpa, about 65 miles northeast of Managua, Barricada said. Hull rented a house in the town and contacted Mayor Issac Deleo and Bishop Pablo Antonio Vega, the newspaper said.

Deleo said he helped Hull and his daughter settle in Nicaragua and that Hull is considering business deals involving cattle breeding.

Hull also has met with former Contra commanders Israel Galeano, Oscar Sovalbarro and Rodolfo Ampie, the paper said.

A spokesman for the Nicaraguan Interior Ministry said the department knew nothing about Hull's whereabouts.

LOS ANGELES (DEC. 4) UPI - Environmentalists called Tuesday for a boycott of Bumble Bee Seafoods over claims that the company has continued to buy tuna caught using methods that kill dolphins, despite a pledge to stop doing so.

''Bumble Bee has stung the American consumer with a PR campaign founded on deceit,'' said David Phillips, executive director of the San Francisco-based Earth Island Institute.

Earth Island took out full-page newspaper advertisements Tuesday calling for the boycott and accusing Bumble Bee and its Thailand-based parent company, Unicord Inc., of sponsoring ''the slaughter of dolphins. ''

The institute also held a news conference in Los Angeles where Brenda Killian, one of its researchers, alleged that the canner has bought ''thousands of tons'' of tuna in Thailand caught with giant deep-sea drift nets, which also catch dolphins.

''These drift nets catch everything in their path, including birds, sea turtles and dolphins,'' Killian said. ''They literally strip-mine the ocean.''

San Diego-based Bumble Bee, one of three major U.S. tuna canners that agreed in April to switch to buying tuna caught only in dolphin-safe ways, called the Earth Island accusations false.

''We believe we are being unjustly acccused and harassed by Earth Island,'' said Mark Koob, president of the canner.

The company also said it would pay for a representative of two other environmental groups - either Greenpeace or the Dolphin Coalition - to monitor fish processing in Thailand.

Koob also said that Earth Island representatives have never contacted him, but Killian said she had spoken to Koob on several occasions about violations of the dolphin-safe promise.

Killian said Koob told her that the problems may have been created because Unicord did not understanding the new policy because of the language difference.

Bumble Bee enjoys about 20 percent of the $1.5 billion-a-year U.S. tuna market trailing H.J. Heinz Co.'s StarKist Seafood, with about 33 percent, and Van Kamp Seafood Co.'s Chicken of the Sea brand, with about 21 percent.

Earth Island led an 18-month boycott against the three canners that ended last April after they pledged to change their buying policies.

Killian said that both StarKist and Chicken of the Sea have followed the ''dolphin-safe'' policies since then.

But unlike StarKist and Chicken of the Sea, Bumble Bee said in April that it would need six months to ''phase out'' existing contracts with fishers using methods that endanger dolphins. However, Bumble Bee began selling cans of tuna labeled ''dolphin safe'' in June, Koob admitted.

''We verified every can with the dolphin-safe labeling had been caught with those methods,'' Koob said.

But Earth Island said that practice misleads consumers into believing that Bumble Bee did not use the objectionable methods and, at the news conference Tuesday, the group presented Bumble Bee with a ''Pinocchio'' award.

Also appearing at the event were Scott Trimingham, president of the Sea Shepherd Conservation Society, and Patti Davis, daughter of former President Ronald Reagan.

Tracy Romine, a representative of Greenpeace, said Tuesday that she could not comment on the Earth Island allegations, but noted that the determination of what is ''dolphin-safe'' tuna has been open to interpretation by canners.

''A number of companies have very arbitrary ideas what the policies mean, so we're suspicious of everyone on the verification front,'' Romine said.

She said that a federal tuna-can labeling law signed by President Bush last week with strong support from environmentalists will help clarify the issue when it goes into effect on April 28.

#90338u1878 12/04/1990 ~United Press International

NEW YORK (DEC. 5) UPI - The world's fifth-largest commercial bank and a former First Boston Corp. executive Tuesday announced formation of an investment bank to advise on mergers and acquisitions, with an emphasis on international transactions.

The new bank, called Sanwa Duval, is being set up by Japan's Sanwa Bank Ltd. and Michael Duval, who helped structure First Boston's merger with Credit Suisse and was previously Mead Corp.'s chief strategic officer.

''Business is becoming more and more global,'' said Shuhei Sato, senior vice president of Sanwa's merchant banking group. ''We see huge opportunities for cross-border connections because business no longer stops at political boundaries.

Opportunities are ''readily apparent'' in the United States, the Asia-Pacific region and Europe, Sato said.

The new bank, to be jointly managed by Sato and Duval and to be based in New York, will take over the merger-and-acquisition business currently conducted by the merchant banking group of Sanwa's New York and Los Angeles offices.

Sanwa Duval said in a statement it will also stress restructuring with a view to achieving strategic business purposes as well as financial objectives.

''Investment bankers in the 1980s were more interested in shuffling assets than in strategic relationships,'' Michael Duval said in a statement.

''In the '80s, people wanted short-term financial gain; we think that the 1990s is going to be a return to era of doing business in pursuit of long-term strategic business objectives,'' he added in an interview.

''When you are doing deals for strategic business objectives, you have to be able to trust your adviser because you reveal long-term strategies. A lot of

the current (merchant bankers) have large pools of capital which they use for the purpose of acquiring companies. In essence, these funds are competing with their clients.''

By contrast, Sanwa Duval will act in a purely advisory capacity, Duval said, adding he expected many U.S. firms to take positions in companies of the Pacific Rim, including Japan, ''and vice versa.''

But he said he does not expect Eastern Europe to live up to the promise it may have had for U.S. investors because of the economic collapse of the Soviet Union and the need for those countries to spend large sums on public works. ''Central Europe is a great area for growth, but the fact of the matter is that they are going to be highly constrained by those factors,'' he said.

Duval added the area is more likely to attract investment from European Community countries, simply because of proximity.

As for investment possibilities in the EC, he said the region's companies are likely to ''be consumed with funding their own growth,'' so they may not be active investors elsewhere.

Looking to the Americas, he called the prospect of a free-trade zone throughout the region ''an incredibly powerful idea that has not even begun to be fully understood in this country.''

Since being set up in 1983, Sanwa's merchant banking group said its cross-border transactions have included the purchase of Wickes Cos.' Elco subsidiary by Kyocera Corp., the merger of AVX Corp. with Kyocera and the purchase of Black & Decker Corp.'s Arcotronics business by Nissei Electric.

Duval is recruiting ''a couple of dozen'' professionals who are ''interested in establishing long-term relationships and who want to build and grow companies, not tear them apart.''

Duval's career also includes 10 years working in the federal government, including serving as special counsel to President Ford in 1974.

He resigned from First Boston last July and began work on the new partnership. He became a managing director at First Boston in 1984 and was a member of the company's management committee.

Duval said his experience at Mead gave him an understanding of business strategy, unlike many of the individuals associated with the new firm's merchant banking competitors, whose backrounds are purely financial.

#90338u1947 12/04/1990 ~United Press International

WASHINGTON (DEC. 4) UPI - The executive and legislative branches of government squared off in federal court Tuesday over whether the president has the authority to send U.S. forces into harms way without congressional approval.

The hearing before U.S. District Judge Harold Greene was in response to a lawsuit filed by 54 Democratic congressmen challenging the constitutionality of Operation Desert Shield. The congressmen were seeking a court order blocking Bush from committing troops to an offensive war without first obtaining a declaration of war from Congress.

''We're talking about the threat of war in six weeks. We're not talking about some indefinite threat in the future,'' said Jules Lobel, a lawyer representing the congressmen. ''This court must act now before we get into a war.''

He was referring to a U.N. resolution passed last week that gave the United States authority after Jan. 15 to use military force to remove Iraq from Kuwait, which it invaded Aug. 2.

But Assistant Attorney General Stuart Gerson, representing the government, insisted that U.S. foreign and military policy is a political question not for courts to decide.

''Can this court define what a war is? he asked. ''There is a distinct definitional problem here and it's a matter to be worked out by '' and it's a matter to b

He also disputed contentions by the congressmen that war in the Middle East in imminent.

''There has been no decision made,'' Gerson said, adding that a Persian Gulf war ''is an open question.''

He also argued that Bush and the Congress ''are not at loggerheads,'' and that avenues still remain for Congress to step in to stop a potential war, such as

cutting off military funding.

After 70 minutes of arguments, Greene took the matter under advisement, giving no indication when he would issue a ruling. But at times during the hearing he appeared to be concerned about breaking new legal ground.

''No court has ever issued an injunction like the one you are asking for,'' Greene said at one point. But Lobel countered that ''there has never been a situation such as this.''

The suit centers on the war powers clause of the Constitution, which grants Congress authority ''to declare war.''

Lawyers representing the congressmen portrayed the suit as an opportunity for courts to clarify the role of Congress and the president in committing U.S. forces to hostile areas.

Tuesday's arguments were similar to those presented last month in the government's response to another lawsuit challenging the legality of Operation Desert Shield.

In that lawsuit, Army National Guard Sgt. Michael Ange, 26, attached to the 1,450th Transportation Unit at Fort Lee, Va., sought an emergency order blocking his deployment to the Persian Gulf.

Ange's lawsuit also focuses on the 1973 War Powers Act, which calls upon the president to notify Congress within 48 hours if U.S. troops are in an area of imminent hostilities, and requires him to withdraw troops within 60 days unless the action is approved by Congress. The act has been ignored by every president as unconstitutional.

A hearing Ange's lawsuit has been scheduled for Dec. 10 before U.S. District Judge Royce Lamberth.

The congressmen, led by Rep. Ron Dellums, D-Calif., who was present in the courtroom Tuesday, decided to avoid addressing the War Powers Act in their lawsuit, deeming it weak and ineffective. They instead focused on Article I, Section 8 of the Constitution, which grants Congress authority to declare war.

Congress has declared war only five times in U.S. history, with the most recent declaration coming 49 years ago following the Japanese bombing of Pearl Harbor.

#90338u1974 12/04/1990 ~United Press International

LONDON (DEC. 4) UPI - Iraqi President Saddam Hussein is willing to withdraw his troops from Kuwait to avoid war provided he is allowed to keep an oil

field captured during the invasion, it was reported Tuesday.

Sky Television News, a London-based satellite TV network, reported that Saddam will make the offer to Secretary of State James Baker when he visits Baghdad later this month in hopes of settling the crisis without going to war.

The report said the deal was discussed in New York after last Thursday's U.N. Security Council vote ordering Iraq out of Kuwait by Jan. 15 or face the threat of force from the U.S.-dominated multinational force that gathered in the Persian Gulf area after Iraq's Aug. 2 invasion of Kuwait.

The network said the U.S. reponse last week was negative. The State Department Tuesday said it had no comment on the report.

The network also said Saddam has met privately in recent weeks with ''senior international mediators'' to seek a peaceful settlement to the situation.

A ''source close to one of the mediators'' said that in return for a guarantee of no Western attack, Iraq would withdraw from Kuwait except for the Rumaila oil field, which straddles Kuwait and Iraq, and was Iraq's reason for invading Kuwait.

Iraq also would be willing to return the strategic islands of Bubiyan and Werba, provided it could discuss leasing them from the Kuwaitis, the source told Sky.

Saddam has indicated he would accept the restoration of the Kuwaiti royal family to power as part of the deal, Sky said.

Baghdad has dropped its demand that the Israeli-Palestinian issue be linked to any negotiations about its withdrawl from Kuwait, Sky quoted the source as saying.

Saddam's offer would allow Iraq to keep part of the spoils from its invasion, which the United States and other nations have said is unacceptable.

#90338u1977 12/04/1990 ~United Press International

TRENTON, N.J. (DEC. 4) UPI - A judge refused Tuesday to grant Allstate Insurance Co. an automatic 8.6 percent rate increase, which would have passed increased costs under New Jersey's new insurance law on to motorists.

Judge Paul Levy, sitting in Mercer County Superior Court, said the company's request should be heard by an administrative law judge.

Allstate filed for an increase in August, saying that a surtax and assessment to pay the losses of the Joint Underwriting Agency would cost it $22 million

in 1990. Insurance Commissioner Samuel Fortunato had made no determination on the increase in car insurance premiums, instead asking the company for additional information required under the Fair Auto Insurance Reform Act.

Deputy Attorney General Marilyn Silvia, who represented the Insurance Department, said Levy made no ruling on Allstate's argument that the FAIR act did not apply. The judge instead said the department could request more information from Allstate as part of the discovery process.

But she said Allstate lost its argument that Fortunato did not act in a timely manner on the rate increase request.

''All in all, the defeat is Allstate's,'' she said.

Allstate, one of the largest car insurors in New Jersey, has also challenged the constitutionality of the FAIR act. The company is awaiting a decision by the New Jersey Supreme Court.

The case is seen by the insurance industry as a key test of the Garden State's controversial insurance law.

Allstate, headquartered in Northbrook, Ill., is a subsidiary of Sears, Roebuck & Co.

#90338u1984 12/04/1990 ~United Press International

DETROIT (DEC. 4) UPI - General Motors Corp. said Tuesday it will demonstrate its Impact electric car on a closed track as part of its 196-car exhibit at the 1991 North American International Auto Show in Detroit next month.

GM President Lloyd E. Reuss, in outlining plans for the Jan. 12-20 event, said the Impact demonstration is a first for any auto show.

GM unveiled the Impact vehicle nearly a year ago in Los Angeles. Although no details have yet been announced concerning when or where it may be built, GM has said it is committed to producing the vehicle, which will be suited for high-pollution areas of the nation, like Los Angeles.

''In just two years, the North American International Auto Show has established itself as one of the world's best,'' Reuss said. ''Our 1991 exhibit plans, and those of other domestic and foreign automakers, should further increase its prominence.''

Reuss other GM highlights at the show will include:

-displays of nine new GM concept and special show vehicles and eight new production models, many for the first time.

-a corporate exhibit to highlight its technological capability to develop totally new vehicles for tomorrow's environment.

-a unique simulation program that lets showgoers feel as if they are actually road-testing GM cars and trucks.

-a display of its solar-powered vehicles, developed by University of Michigan, Western Washington University and the University of Maryland, that finished in the top three positions in the GM-sponsored 1990 Sunrayce USA.

#90338u2014 12/04/1990 ~United Press International

(DEC. 4) UPI - The chairman of Northwest Airlines planned to hold a news conference at this hour to discuss yesterday's fatal collision of a D-C-9 and a Boeing 727. Investigators say it'll be months before an official report is ready that can explain why the D-C-9 apparently was in the wrong place at the wrong time.

Sales of single-family home sales declined in October to an annual rate of 491-thousand... off 23 percent compared with the same time last year. The average sales price for a new single-family home sold in October was 157-thousand-500 dollars. Sales were off in all regions except the Northeast.

The American Automobile Association says the average price of regular gasoline rose more than two cents a gallon last week. The hike brings the average price of regular unleaded gasoline sold at self-service pumps to one-dollar 38 cents a gallon. That's about 31 cents higher than on August 1st, the day before Iraq invaded Kuwait.

The president of Bangladesh is calling a special session of Parliament for Saturday to nominate his replacement. President Hussein Muhammed Ershad seized power from an elected government in 1982, and won a five-year presidential term in 1986 elections boycotted by opposition parties.

The Soviet Parliament today quickly approved constitutional amendments which futher consolidate President Gorbachev's power. The package aligns government ministries under direct control of the president. It still must be passed by the larger Congress of Peoples' Deputies at a two-week session later this month.

El Salvador's army says rebels shot down a military airplane today... the fourth army aircraft to be crashed by recent guerrilla gunfire. An army spokesman said rebels used a Soviet-made surface-to-air missile to bring down the U-S-made A-C-47 aircraft, a cargo plane equipped with machine guns.

Middle age used to associated with increased security. But a survey of doctors

finds that 68 percent of those questioned feel their mid-aged patients are facing serious strain and pressures, especially a financial squeeze caused by taking care of adult children and ageing parents. The poll was conducted by the American Board of Family Practice, headquartered in Lexington, Kentucky.

LOS ANGELES (DEC. 4) UPI - Lockheed Corp. said Tuesday it has named Sherman N. Mullin, who has been heading the development of its Advanced Tactical Fighter YF-22 prototype, to succeed Ben R. Rich as president of Lockheed Advanced Development Co., also known as the ''Skunk Works.''

Mullin, 55, will continue to be a special adviser on the YF-22 program. The company is heading a team with Boeing and General Dynamics to build the next generation of supersonic fighters for the military. The Lockheed team is competing against Northrop Corp., which is teamed with McDonnell Douglas Corp. for the ATF contract, which mean as much as $100 billion in revenues.

The final award is expected to be made by the Air Force this spring following completion of testing of the four prototypes, two by each team.

Rich, 65, had worked for Lockheed for 40 years on such aircraft as the F-104 fighters, the U-2 and SR-71 reconnaissance planes and the F- 117A stealth fighter.

Mullin joined Lockheed in 1959 as an electronics field engineer and has played a major role in the P-3 and S-3 antisubmarine warfare aircraft programs.

Mullin disclosed Tuesday that the YF-22 prototypes has already flown for an hour, including 22 minutes on a single flight. He also said that both planes have reached top speeds in excess of Mach 1.5 and flown at altitudes of up to 50,000 feet.

The company also said one of the prototypes had successfully launched an AIM-9 missile as part of its flight testing.

In another development, Lockheed stock rose 75 cents to $31 a share Tuesday on the New York Stock Exchange. The advance came a day after the Lockheed board turned down a $1.6 billion plan by Texas investor Harold Simmons to take the aerospace giant private, saying it doubted Simmons can raise the money.

Simmons, who holds nearly 20 percent of the company's stock and has been trying to gain control of Lockheed for nearly two years.

MONTEVIDEO, URUGUAY (DEC. 4) UPI - President Bush acknowledged the stiff economic consequences suffered by the Third World because of the Persian Gulf crisis and vowed the political and military standoff ''is not going to on forever.''

''The economic burdens on these small countries and on the U.S. are heavy,'' said Bush during a newsconference during which he referred to economic downturns from skyrocketing oil prices caused by unrest in the Middle East.

Uruguay officials estimate the South American nation would lose roughly $100 million annually because of new oil price increases and $70 million in revenue from beef sales to Iraq.

''Despite the economic hardship inflicted on this country, (Uruguway's President Alberto Lacalle) has taken a leading role in the economic embargo of Iraq,'' Bush said.

''But as you heard (Federal Reserve Chairman) Alan Greenspan say the other day all I can do is make clear that there is not an oil shortage today and hopefully some of these speculators will look at that and see that it is true '' Bush said.

''I can make clear it is not going to go on forever,'' Bush said of the standoff with Iraq now in its fourth month.

Bush also said he did not believe that Saddam Hussein ''has gotten the message'' of the U.N. resolutions demanding the withdrawal of Iraqi forces from Kuwait.

Bush said that he agreed with Defense Secretary Dick Cheney who said he did not think sanctions alone will work against Iraq.

''I am convinced that Saddam Hussein has not gotten the message,'' Bush told reporters. ''I don't think Saddam Hussein understands'' the impact of the U.N. resolutions condemning his Aug. 2 invasion of Kuwait. ''I hope he gets the message.''

''You know,'' he added, ''I've not been the one who's convinced that sanctions alone will do the trick.''

During his one-day visit to Uruguay - the first by an American president in 27 years - Bush pressed for ''successful completition'' of the current round of world trade talks in Brussels, which are said to be on the verge of collapse because of divisions over agriculture subsidies.

Though Bush, along with most Latin American leaders, is in favor of extreme reductions in subsidies, he said he would be willing to negotiate an exact figure in government aid to farmers.

''We are not locked into a specific figure,'' Bush said. ''We are locked on the fact that all the categories have to be included and that is where our differences lie,'' he said.

Earlier in the day, Bush urged support of his proposal for an economic trading zone in the Americas.

''This is an exciting time because we are entering a new era in Latin American relations,'' Bush said at the Carrasco Airport, 12 miles east of Montevideo.

''The ultimate aim is free trade for all the Americas,'' Bush said.

On a six-day trip to South America, Bush looked tanned and tired upon his arrival in Uruguay following a one-day visit to Brasilia.

The warm reception that greeted Bush on his drive into the city turned cool after his speech to Urguway's Congress at the Legislative Palace where several hundred demonstators gathered to protest U.S. foreign policy.

Later Tuesday Bush flew to the resort of Punta del Este, 84 miles east of Montevideo, where he went for an early evening jog and swim. Bush dined with the Uruguayan president in a local restaurant, and was to spend the night in a 32-room mansion.

Bush was scheduled to fly to Argentina on Wednesday, followed by visits to Chile and Venezuela.

BRUSSELS (DEC. 4) UPI - European Community foreign ministers proposed Tuesday to send $2 billion in emergency food aid to the Soviet Union to help meet winter food needs, officials said.

The ministers reached an agreement in principle to send the aid, officials said, with a final decision to be made by EC leaders at their summit in Rome next week.

The decision, which follows several high-level EC-Soviet meetings in recent days, sends an important ''political signal'' to Soviet President Mikhail Gorbachev, said Belgian Foreign Minister Mark Eyskens.

Some countries, including Britain, had previously been skeptical of the need for emergency aid, saying evidence of potential famine in the Soviet Union was mixed. But they went along on Tuesday.

''We believe that where people are hungry and deprived of food, then food

should be supplied,'' said British Foreign Secretary Douglas Hurd, explaining his decision to go along with the assistance.

The EC foreign ministers are still concerned, however, over the Soviets'inefficient food distribution system.

''The question of how it is to be distributed so it reaches those in need is crucial,'' Hurd said.

Italian Foreign Minister Gianni De Michelis said the EC would call on Soviet authorities to ensure that food is distributed in big cities and that food not be diverted to the black market.

(DEC. 4) UPI - The wreckage of a topless D-C727 were towed off a runway at a Detroit airport today and into a Northwest Airlines hangar. Federal safety inspectors are working in the hangar trying to re-assemble the planes and reconstruct the events leading to yesterday's collision that killed eight people. The chairman of Minneapolis-based Northwest Airlines, Alfred Checci, told reporters in Detroit that ''words simply canNOT describe the grief'' he and his 45-thousand employees feel over the loss of life.

The Federal Reserve Board moved to ease the pressure on U-S banks today and, indirectly, on the economy itself. The Fed says it will let banks make use of certain funds they must now let the government hold as reserves. Analysts say the change mostly will help a banking industry whose profitability and lending capacity has been undercut by real estate and other loans gone sour. But it could give the economy a boost too... providing added incentive to lend to creditworthy borrowers.

Two young men accused in the 1989 Bensonhurst racial slaying of a black teen-ager were acquitted today of murder and manslaughter charges. The panel deliberated just two hours before returning the verdict for Joseph Serrano and co-defendant James Patino. But the jury found Serrano guilty of fourth-degree possession of a weapon... in this case, a baseball bat. Serrano who faces up to one year in jail and a one- thousand-dollar fine. The trial is the fourth against eight young men accused in the slaying which set off racial tensions and sparked sometimes violent demonstrations and protests.

The Food and Drug Administration says the ability of mammograms to detect breast cancer in the earliest, most treatable stages has improved significantly in the last five years. A government survey found that while 36 percent of mammography equipment used in 1985 provided sub- standard images, the rate declined to 13 percent by 1988. The F-D-A says the improved images were achieved with only a slight increase in radiation, well within safety guidelines.

The military is looking for a few good dogs. Owners of German or Belgian shepherds, retrievers and pointers who think their pet has the right stuff will get a chance to start a canine career with the military or Federal Aviation Administration. But the dogs will need to do more than fetch a stick. The government is conducting a nationwide search to enlist dogs in the war on drugs and fight against terrorism. The Defense Department's Military Working Dog Agency says tryouts start next week at Fort Monroe, Virginia.

#90338u2296 12/04/1990 ~United Press International

UNIONDALE, NY (DEC. 4) UPI - Greg Adams flipped an eight-foot wrist shot past New York goalkeeper Glenn Healy with 5:13 left in the third period Tuesday night to pace the Vancouver Canucks to a 4-2 victory over the Islanders.

Steve Bozek set up Adams on the rush for Vancouver which improved to 3-0-2 in its last five games. The Islanders dropped to 0-4-2 in its last six games.

Trevor Linden scored into an empty net for Vancouver with six seconds remaining to account for the final margin.

Gary Valk scored twice for the Canucks. He gave Vancouver a 1-0 lead, 1:18 into the game when he popped a rebound of a shot by Brian Bradley past Islander goalkeepr Glenn Healy.

New York scored twice in the first 5:06 of the second period to take a 2-1 lead. David Volek took a pass from Pat LaFontaine 46 seconds into the middle period and punched a six-footer past Vancouver goalie Kirk Mclean. Randy Wood started the play.

Wood put the Islanders ahead 2-1, putting the rebound of a shot from close in by defenseman Jeff Norton, past McLean. Norton rushed half the length of the ice, but was thwarted by Mclean's stick at the last instant.

Valk scored his second goal of the game and sixth of the season to tie the scorre 2-2 at 15:32, when he slid a six-foot backhander off the left post.

Bruins 5, Red Wings 4 (overtime)

DETROIT (DEC. 4) UPI - Randy Burridge scored his eighth goal of the season at 1:03 of the overtime period Tuesday night to give the Boston Bruins a 5-4 victory over the Detroit Red Wings.

Craig Janney had two goals and an assist for the Bruins, while rookie Sergei Fedorov had two goals and an assist for Detroit.

Detroit goalie Tim Cheveldae stopped Bob Sweeney's shot, but the rebound bounced to Burridge, who fired the puck into the net.

Steve Yzerman's first goal in eight games with 1:02 remaining in the third period pulled the Red Wings into a 4-4 tie. Yzerman pulled goalie Andy Moog out of the net and lifted the puck over the netminder while both players were laying on the ice.

Moog turned back 35 shots to raise his career record to 11-1 against Detroit, which lost for the first time in seven games.

Defenseman Allen Pedersen had given the Bruins a 4-3 lead with his first goal of the season at 11:55 of the third period. Pedersen, whose only goal in 68 games last season came against Detroit, fired Vladimir Ruzicka's rebound past Cheveldae.

Detroit tied the game on goals by defenseman Bobby Dollas and Fedorov 27 seconds apart in the third period. Dollas drilled a slap shot from 45 feet to cut Boston's lead to 3-2 at 7:59 and Fedorov knocked Brent Fedyk's rebound past Moog at 8:26.

Janney's second goal gave the Bruins a 3-1 lead at 6:21 of the second period. Garry Galley rang a shot off the goalpost and the rebound bounced to Janney, who put it in the open corner from the edge of the crease.

Janney's first goal at 1:54 of the second period came on a slap shot from between the faceoff circles.

Boston took a 1-0 lead at 3:03 of the first period on Bobby Carpenter's goal. Dave Poulin knocked Shawn Burr off the puck and it was picked up by Carpenter, who beat Cheveldae from the top of the faceoff circle.

Detroit tied the score at 13:29 of the first period on a strong individual effort by Fedorov, who outskated defenseman Ray Bourque, circled the net and beat Moog on the far side.

#90338u2438 12/04/1990 ~United Press International

(DEC. 4) UPI - British television is reporting that Iraq has advanced proposals for its withdrawal from Kuwait. So far, NO details on the proposals. Earlier today, the government of Saddam Hussein said it will allow all Soviet hostages detained in Iraq to leave beginning tomorrow. But Moscow says it won't change its support of a U-N resolution demanding that Iraq leave Kuwait by January 15th.

In a caucus of House Democrats today, lawmakers declared that they support the way President Bush is handling the Persian Gulf crisis. But they insisted that

Bush seek a declaration from Congress before launching any war.

A federal judge in Miami says transcripts of the tapes of deposed Panamanian leader Manuel Noriega's jailhouse telephone conversations belong to the public and not just Cable News Network. C-N-N had obtained the tapes and said it had exclusive rights to the information. But U-S District Judge William Hoeveler says the public's right to know should NOT rest on what he terms the ''whims of C-N-N's programming needs.'' The judge did delay release of the transcripts until Thursday to give C-N-N time to appeal.

Jurors in the Central Park jogger trial appear bogged down in their fifth day of deliberation today, asking the judge for a legal definition of ''reasonable doubt.'' The five-man, seven-woman jury is deciding the rape and attempted murder trial of 16-year-old Kevin Richardson and 18- year-old Kharey Wise. the pair is accused of being part of a gang of up to 30 youths that rampaged through the moonlit park, randomly beating and robbing joggers on April 19th, 1989.

Police say the younger brother of the late University of Maryland basketball star Len Bias was shot dead today after an apparent argument with another customer at a jewelry store in suburban Washington, D-C. A hospital spokeswoman says 20-year-old James Bias died of two gunshot wounds in the lower back about 90 minutes after he was taken to the emergency ward. Police say they are looking for two suspects seen driving a green Mercedes at the time of the shooting. Len Bias died in 1986 of cardiac arrest after snorting cocaine at a party.

There's new evidence supporting the theory that a huge comet or asteroid hit Earth 65-Million years ago and wiped out dinosaurs and other forms of life. The latest study was presented at the annual meeting of the American Geophysical Union in San Francisco. Geology professor Walter Alvarez of the University of California at Berkeley says research along an ancient sea floor in southern Spain found that a type of single-celled marine plankton suddenly became extinct at the end of the Cretaceous period. And other studies have shown as many as 75 percent of all life forms on Earth perished at that time.

The National Academy of Recording Arts and Sciences says it will NOT give 1989's best new artist Grammy Award to another artist or group. The academy last month revoked the award from the lip-syncing pop duo, Milli Vanilli. Academy President Michael Greene says the Grammy process ''does NOT and is not intended to produce a ranked result,'' and there is NO first runner-up, so the award will remain vacant.

#90338u2627 12/04/1990 ~United Press International

(DEC. 4) UPI - Reports from London say Iraqi President Saddam Hussein may be willing to withdraw his troops from Kuwait to avoid war if he can keep an oil

field captured during the invasion. The satellite T-V network Sky Television News reports that Saddam will make that offer to Secretary of State Baker when the U-S official visits Baghdad later this month. The report says the deal was discussed in New York last week after the U-N Security Council voted to authorize the use of force against Iraq if Baghdad doesn't get out of Kuwait by January 15th.

Congressmen squared off with the administration today over whether President Bush has the authority to send U-S forces into war without congressional approval. At a hearing before U-S District Judge Harold Greene, 54 Democratic congressmen challenged the constitutionality of Operation Desert Shield. They want a court order blocking Bush from committing troops to war against Iraq without first getting an o-k from Congress. But the administration insists U-S foreign and military policy is a political question NOT for the courts to decide.

Federal investigators are trying to piece together the clues from yesterday's collision of two Northwest Airlines jets on a foggy runway at Detroit Metropolitan Airport. Eight people were killed and 21 injured in the fiery crash. The chairman of Northwest visited some of those still hospitalized, and later broke down as he told reporters how crewmembers helped many passengers to safety.

Demonstrators protested U-S foreign policy outside the Legislative Palace in Montevideo... while inside, President Bush thanked the people of Uruguay for their help in the embargo against Iraq. The president vowed the uncertain situation in the Persian Gulf ''will NOT go on forever.'' But after Bush's speech, several leftist critics of Uruguayan President Alberto Lacalle walked out during the applause. Bush is the first U-S head of state in more than 27 years to visit Uruguay. He goes to Argentina tomorrow.

Deputy U-S Trade Representative Rufus Yerxa says world trade talks are ''very close to collapse.'' Yerxa blames a persistent deadlock in the General Agreement on Tariffs and Trade or GATT talks on agriculture subsidies between Europe and the United States. The talks sank into serious trouble after farm exporting nations, including the United States, rejected as inadequate a statistical analysis by the European Community of its farm proposal.

A new study released in Washington today says American teen-agers do voluntary charitable work at about the same rate as adults... despite their sometimes being stereotyped as selfish and self-centered. The findings by Independent Sector also said that between trips to the mall and the movies, 48 percent of teen-agers dug into their pockets to contribute money to good causes last year. The average contribution was 46 dollars.

#90338u3130 12/04/1990 ~United Press International

(DEC. 4) UPI - Iraqi President Saddam Hussein reportedly is willing to withdraw his troops from Kuwait to avoid war it he's allowed to keep an oil field captured during the invasion of Kuwait. Sky Television News, a London-based satellite T-V network, quotes sources as saying that in return for a guarantee of NO Western attack, Iraq would withdraw from Kuwait except for the Rumaila oil field. The oil field straddles Kuwait and Iraq and was Iraq's reason for invading Kuwait.

Radio transcripts reveal the pilot of a Northwest Airlines D-C-9 jet appeared to be lost when he guided his aircraft onto a fog-shrouded runway at Detroit's

airport. The transcripts indicate that air traffic controllers in the tower couldn't see the jet. .. and the pilot was NOT clear where he was. When the controller discovered the plane's location, he told the pilot to ''exit that runway immediately.'' Moments later, the wing of a Northwest Boeing 727 on a takeoff roll sheared the fuselage of the D-C-9, causing it to burst into flames. Eight people died and 21 were injured.

One of two suspects has surrendered to police in the fatal shooting of the younger brother of the late University of Maryland basketball star Len Bias. Prince George's County police say Jerry Tyler is expected to be charged with first degree murder. Tyler is one of two suspects seen driving away from the scene after 20-year-old James Bias was shot twice in the back following an argument at a jewelry store at Prince George's Plaza in suburban Washington. Len Bias died of cardiac arrest after snorting cocaine at a party in 1986 after being the top N-B-A draft choice of the Boston Celtics.

Environmentalists are calling for a boycott of Bumble Bee Seafoods. The San Francisco-based Earth Island Institute claims that Bumble Bee has continued to buy tuna caught using methods that kill dolphins, despite a pledge to stop doing so. Earth Island took out full-page newspaper advertisements today calling for the boycott and accusing Bumble Bee and its Thailand-based parent company, Unicord Incorporated, of sponsoring ''the slaughter of dolphins.'' San Diego-based Bumble Bee called the accusations false.

In South Africa, police today found the slaughtered bodies of seven more blacks in townships near Johannesburg. But authorities report there's been NO resumption of the factional fighting that left 71 dead. Both the African National Congress and the rival Zulu movement Inkatha are warning that the ferocious fighting threatens to undermine efforts to negotiate a power-sharing deal with the minority white government.

#90338x1226 12/04/1990 ~Comtex

NEW YORK (UPI) _ The Federal Reserve Board took some pressure off struggling U.S. commercial banks and, indirectly, the economy Tuesday by allowing banks to earn interest on certain funds held by the Fed until now as reserves.

The Fed said it would reduce to zero from the current 3 percent level reserve requirements on time deposits by non-personal customers and net Eurocurrency liabilities _ U.S. deposits deployed in overseas accounts.

Financial markets responded swiftly and positively. The stock market, whose Dow Jones Average of 30 industrial stocks, which had been slumping by nearly 18 points Tuesday, rallied to move ahead by almost two points.

The price of the benchmark 30-year Treasury bond increased by more than one point _ a $10 gain on every $1,000 bond _ and the yield, or market-determined interest rate on the long bond, fell to 8.34 percent from 8.36 percent.

The Fed said the policy shift, to be made ''over coming weeks,'' would return to bank control reserves of $11.7 billion held against time deposits and $1.9 billion of reserves obligations to foreign banking offices.

Depending on other Fed policies, the step could lower the key Federal funds interest rate, which reserve system banks charge each other on overnight

loans. Longer-term rates could also fall. So, the move could be viewed as part of the Fed's ongoing easing process.

The move could also send a signal to banks to lower the prime rate, now at 10 percent. The prime, a key commercial lending rate, has not changed since early January although the Fed has significantly lowered its funds rate. Analysts said this was because of heavy pressure on bank earnings.

In past reductions of reserve requirements, the Fed has taken other steps to neutralize the interest rate effects. Analysts said some of the impact of this step may be offset _ but only the Fed knows by how much.

The U.S. central bank said a review of requirements led it to conclude they ''placed depository institutions at a disadvantage relative to other providers of credit, spawning efforts to circumvent the requirement.''

The first alteration of reserve requirements since 1983, it was viewed as a message the Fed wants banks to relax currently tight lending policies for good credit risks to offset the current economic slowdown.

''The Board took action ... in response to mounting evidence that commercial banks have been tightening their standards of creditworthiness and the terms and conditions for many types of loans,'' the Fed said.

''While much of this tightening has been welcome from a safety and soundness standpoint, it has in recent months begun to exert a contractionary influence on the economy,'' the three-page Fed statement said.

''Lower reserve requirements at any given level of money market interest rates will reduce costs to depository institutions,'' it added, ''providing added incentive to lend to creditworthy borrowers, thus countering, to some extent, the recent tightening in credit terms.''

The change will be introduced over two Reserve System maintenance periods of two weeks each, beginning Dec. 13 and concluding Jan. 10. The Board noted that the phase-in would happen at a time of normally strong seasonal bank demand for a injection of central reserves.

Last week Fed Chairman Alan Greenspan told the House Banking Committee that the Fed was ''accelerating'' its evaluation of reducing reserve requirements, but he said then the Fed had not reached a conclusion on the matter.

Currently, banks must hold reserves equal to 12 percent of all their checking deposits and 3 percent of certain certificates of deposits with maturities of less than 18 months.

The Fed can alter the money supply in three ways. It does this most often by open market operations which soak up or release liquidity through the purchase

or sale of government securities, thereby raising or lowering the Fed funds rate. The key rate now stands at 7.50 percent.

Also, the Fed can change the discount rate, the rate the it charges on loans to financial institutions. The Fed last changed the discount rate in February 1989, boosting it to 7 percent from 6.5 percent.

Finally, the Fed can make adjustments to its reserve requirements, which is the most rarely used method of all.

#90338x1241 12/04/1990 ~Comtex

NEW YORK (DEC. 4) UPI - Any opera about the assassination of a tyrant in the land that is now Iraq is bound to have more than musical interest these days.

The revival of Giacomo Rossini's ''Semiramide'' at the Metropolitan Opera while Saddam Hussein claims the attention of the world is a coincidence, having been scheduled more than three years ago as a vehicle for mezzo-soprano Marilyn Horne, a Rossini specialist.

But no one can argue that the decision to bring ''Semiramide'' back to the Met after a 95-year absence was timely happenstance.

It deals with a Babylonian queen, usually known as Semiramis. This legendary predecessor of Hussein aided a lover in killing her husband, unwittingly chooses her long-lost son rather than the lover as her royal heir, and is killed in a fight between the lover and her son.

Spare yourself the intricacies of the plot. It is based on Voltaire's novel and is confused by the rivalry of three men for the hand of a royal princess who is a virtual cipher in the libretto Gaetano Rossi supplied Rossini in 1823.

This is the last opera the composer wrote for the Italian stage before moving on to London and Paris. More than four hours long, it was written in only five weeks and represents Rossini at the height of his fame. ''Semiramide'' is an opera to be savored for its exalted music as well as its pageantry.

It can be seen at the Met for seven more performances, the last scheduled for Dec. 29. It will be telecast nationally as a ''Metropolitan Opera Presents'' feature next fall.

James Conlon demonstrates his brilliance as an operatic conductor in his reading of Rossini's opulently orchestrated score, rich in musical impulse and dramatic dynamism, especially in its choral passages.

Conlon is particularly sensitive to the needs of his singers. He never rushes them or overrides their voices in performance of the difficult ''bel canto''

style that requires smooth coloratura production and a talent for vocal ornamentation.

To support Horne in one of the bel canto roles that helped shape the current Rossini revival in Europe and the United States, the Met has summoned to the cast two American singers who have made their reputations in Europe as well as veteran bass Samuel Ramey. It is a powerhouse ensemble that recalls the Met's ''golden age.''

Horne's voice may not be the juicy and powerful instrument that it was in former years, but she still sings sturdily and true, her ability for florid coloratura undiminished and her lower register still thrilling in its subterranean richness.

That she sings the role of Arsace, commander of the Assyrian Army and chosen of Semiramide, with little attempt to masculinize the role is beside the point.

The Met debutante who sings Semiramis, Lella Cuberli of Austin, Texas, by way of the operatic capitals of Europe, proves a soprano of medium size but lively voice, particularly beautiful in the high register.

She is svelte and statuesque and a polished actress, notably graceful in grand gestures worthy of her Met predecessor in the role, Dame Nelly Melba.

Another singer better known at La Scala of Milan than in his native America, tenor Christ Merritt from Oklahoma City is making his Met debut as Idreno, an Indian prince.

Merritt's big voice lies amazingly high and is capable of ravishing coloratura as well as falsetto effects, but he does not sing with much subtlety and is stolid as an actor in this cardboard role.

Another debutante, Korean soprano Young Ok Shin, sings Princess Azema prettily in the undeveloped role.

Ramey is, as usual, stalwart and vocally thrilling in the role of Semiramide's lover, Prince Assur, and John Cheek is serviceable in his singing as Oroe, the high priest.

Jeffrey Wells, who plays the ghost of Semiramide's murdered husband, sings as eerily as he can with the help of echo amplification.

John Copley's production cannot be faulted except for its static quality. He sometimes lines his singers up like so many soloists in an oratorio, bereft of emotional communication.

John Conklin's weathered sets of Babylonian temples, palaces and hanging gardens are impressive in their solidity yet move easily to allow creation of

new scenes.

HOLLYWOOD (DEC. 5) UPI - Moviegoers, lured in large part by the new hit ''Home Alone,'' spent $389.6 million on tickets in November, making it the second-highest month ever at the domestic box-office.

The monthly tally, augmented by strong showings from ''Three Men and a Little Lady,'' ''Rocky V,'' ''Dances With Wolves'' and ''Child's Play 2,'' was off about 5 percent from $411 million grossed last November, Daily Variety reported Tuesday.

The year-to-date box-office reached $4.45 billion through last weekend, about 2 percent behind last year's total of $4.53 billion at this juncture. in 1988, the total had hit $3.96 billion at this point.

At this pace, the year's box-office total will finish in the range of $4.90 billion to $4.95 billion.

For the weekend, which saw ''Home Alone'' top the box-office for the third consecutive time, the top 10 films drew $53 million, up 10 percent from the year-ago weekend.

For the week, ticket sales hit $128 million, off from the $135.4 million a year ago and far ahead of the 1988 same week total of $103.6 million.

AMSTERDAM, Netherlands (DEC. 5) BUSINESS WIRE - US Sprint and Cable and Wireless plc Wednesday signed an agreement with PTT Telecom Netherlands, the first continental European carrier to market Global Virtual Private Network service, a GLOBAL FON(sm) offering.

The GLOBAL FON(sm) brand of advanced telecommunications products and services is designed to meet the worldwide communications needs of today's multinational organizations.

PTT Telecom Netherlands joins two Canadian carriers, Teleglobe Canada Inc. and Unitel Communications Inc., who last week announced that they also will provide Global Virtual Private Network service in Canada. Negotiations are continuing with other major carriers including Telecom Ireland and International Digital Communications (IDC) of Japan.

Global Virtual Private Network service provides the efficiency, flexibility and reliability of the public network, coupled with the enhanced features normally associated with a private network.

The new service mirrors existing dialing plans, provides a high-speed data capability on demand, and delivers enhanced feature functionality, such as call back when free and calling line identification. These features, combined with an instantaneous international call set-up time, provide customers unequalled global service.

Teleglobe Canada Inc., a Memotec Company, is Canada's international telecommunications carrier reaching over 200 countries. Memotec Data Inc. is a corporation of international scope with assets of $1 billion and some 2,600 employees.

Unitel Communications Inc. is Canada's first national facilities-based telecommunications carrier and is owned jointly by Canadian Pacific Ltd and Rogers Communications Inc. Unitel employs more than 3,100 Canadians in its Eastern, Central and Western operating regions, and has more than 200 offices.

PTT Telecom Netherlands, a subsidiary of Royal PTT Nederland NV, is the privatized telecommunications operator in the Netherlands. PTT Telecom is the national supplier of a wide variety of telecommunications services, terminal equipment and value-added services.

The international program ranges from basic services to complete international company networks, including constituency, network management and value-added services. PTT Telecom employs 31,500 people. The company had gross revenues of 8,953 million Dutch guilders and an operating profit of 2,400 million Dutch guilders in 1989.

Cable & Wireless plc, based in London, is a publicly listed worldwide telecommunications company with 120 years of experience and operations in 48 countries around the world.

US Sprint is a unit of United Telecommunications Inc., a diversified international telecommunications company with $7.5 billion in revenues. US Sprint, with the United States' only all-digital, fiber-optic network,

provides a comprehensive array of global voice, data and video communications products and services.

GLOBAL FON is a servicemark of Cable and Wireless plc and US Sprint.

LAFAYETTE, CO (DEC. 5) BUSINESS WIRE - Aspen Ribbons Inc. (NASDAQ:ARIB) announced Wednesday that at its annual meeting of stockholders on Nov. 30, 1990, approval was given to change the name of the company to Aspen Imaging International Inc.

The change comes as a response to its changing product line.

''Our new corporate focus goes well beyond ribbons for computer printers,'' said Peter C. Williams, president and chief executive officer. ''We expect to become a major player in a variety of supply items for page or laser printers in the 1990's as well as continuing to manufacture and market our full line of ribbons.

''By changing our name, we are sending a signal to the marketplace, and in particular large distributors, that we are progressive in our new product development.''

The company also announced that its board of directors approved the repurchase of an additional 50,000 shares on the open market.

Aspen Imaging International is a leading designer, manufacturer and marketer of ribbon cartridges and laser printer cartridges for the computer printer industry.

APPLETON, WI (DEC. 5) BUSINESS WIRE - Peter M. Platten III, president and

chief executive officer of Valley Bancorporation (NASDAQ/NMS: VYBN), announced Wednesday that approval has been received from the Federal Reserve Board for the affiliation of the Exchange State Bank of La Crosse, Wis. Exchange State Bank shareholders have also approved the transaction. The transaction is expected to be consummated early in 1991.

Exchange State Bank had assets of approximately $54 million at Sept. 30. The Exchange State Bank of La Crosse (the largest city in La Crosse County), serves La Crosse and other communities in the surrounding western Wisconsin market.

Platten stated, "We are enthused about expanding Valley's presence in western Wisconsin. The affiliation of Exchange State Bank and the previously announced acquisition of the $101 million-asset Western Federal Savings and Loan Association, (with locations in Sparta, Mauston, Reedsburg, Tomah and Wisconsin Dells) will provide increased business opportunities due to a larger concentration of assets in this fast developing market. These acquisitions fit with Valley's philosophy of expanding in our existing markets to meet our goals relative to growth and profitability potential."

Platten added, "The bank will continue to be managed by its existing board of directors and officers who are personally acquainted with the people and the economy of La Crosse and its market.

Valley's operating philosophy has always been for its subsidiaries to retain the flexibility to conduct business in the style best suited for its own community which encourages an entrepreneurial spirit that is customer service and goal oriented. In addition, Valley supports community development and encourages broad community participation by all employees."

Aaron J. Hanson, president and CEO, recently announced his intent to retire. The bank's board of directors is now in the process of reviewing prospective applicants for the President's position, with assistance from Valley. Hanson will continue as a member of the bank board of directors.

Valley Bancorporation is the third largest bank holding company headquartered in Wisconsin. Valley, with assets of $3.3 billion, currently serves Wisconsin through more than 100 banking offices with additional financial service companies engaged in leasing, insurance, data processing, trust service, brokerage, and credit card servicing. The company's common stock is traded on the National Market System under the NASDAQ symbol VYBN.

LONGMONT, CO (DEC. 5) BUSINESS WIRE - PrairieTek Corp., inventor and manufacturer of 2.5 inch hard disk drives, announces the appointment of Scott Hudson as vice president of materials.

In this position, Hudson will be responsible for all corporate materials and procurement operations.

Prior to joining PrairieTek, Hudson was vice president corporate materials at Flextronics Corp. in Fremont, Calif., where he was responsible for overall management direction and accountability for corporate materials, procurement, MIS and logistics functions for the United States and Asia.

From 1985 until 1989, Hudson was vice president operations support for Unisys Corp. in Santa Clara, Calif., where he was responsible for the material functions of the peripheral group.

In addition, Hudson brings 14 years of international materials operations management experience with Storage Technology Corp. to PrairieTek. In this capacity he managed over $400 million in annual material purchases. Prior to Storage Technology, Hudson spent five years with IBM Corp. in various materials related postions.

According to Dave Riegel, chief executive officer of PrairieTek, ''We are fortunate to have Scott joining the PrairieTek management team. His outstanding experience and materials skills will be invaluable during this period of rapid growth and expansion for the company.''

Hudson is the latest appointment to PrairieTek's executive staff following on the heels of Ed Heacox, vice president manufacturing operations and Bill Mansfield, senior vice president of administration and finance and chief financial officer. He will report directly to Heacox.

AKRON, OH (DEC. 5) BUSINESS WIRE - Resource America Inc. (NASDAQ:REXI) (the ''company'') announced higher revenues and income from operations for the year ended Sept. 30, as follows:

	Year Ended Sept. 30	
	1990	1989
Revenues	$ 9,613,390	$ 7,983,615
Income from operations	2,303,851	1,937,437

Other gain (including sale of property)	46,036	292,805
Provision for income tax	700,000	580,000
Net income	1,649,887	1,650,242
	---	---
Stockholders' equity	23,823,025	22,628,228
Average shares	7,014,000	6,324,000
Net income per share	24 cents	26 cents

The company's improved performance from operations was primarily a result of continued growth in marketing activities, improvements in oil and gas production revenues, and expansion in related activities.

Increased tax provisions and reduced gain on sale of properties resulted in a slight drop in net income for the year ended Sept. 30, as compared to the prior year.

SUNNYVALE, CA (DEC. 5) BUSINESS WIRE - A new fax service makes it possible to forward professionally prepared faxes anywhere in the world, 24 hours a day and seven days per week, by simply making a telephone call.

Dialing either an 800 or a 900 number connects users of VIP-FAXX to a live operator, who transcribes messages onto specially designed terminals, and immediately relays them to their destination anywhere in the world. The service is available at any time of the day or night, and every day of the week, including holidays.

Users of VIP-FAXX have the option of sending copies to multiple sites, and to receive confirmation copies of their communications. A large database of fax numbers, including federal, state and local legislatures, as well as other special interest groups and leading enterprises, is available free of charge to users of the service.

Frequent users may also store with VIP-FAXX a library of their own fax numbers.

VIP-FAXX was recently incorporated in California, and is currently based in Sunnyvale. The telephone numbers for using the new service are: 900-VIP-FAXX (900-847-3299) and 800-SEND A FX (800-736-3239). The regular business number, also used by international callers outside the United States, is 408-745-7350. International faxes are charged at $9.95 each.

LOS ANGELES (DEC. 5) BUSINESS WIRE - Security Pacific Bank, N.A. Wednesday announced that it has agreed to sell $500 million in credit card participation certificates.

The issue is being underwritten by Goldman, Sachs & Co., Security Pacific Merchant Bank, Lehman Bros. and U.B.S. Securities Inc. The 8.85 percent certificates were priced at 99.625 to yield 8.863 percent and are rated AAA by Standard & Poors and AAA by Moody's.

The four-year certificates represented undivided interest in the Security Pacific Credit Card Trust 1990-A. The trust will include receivables generated by credit card accounts of Security Pacific Bank, N.A. Those accounts were originated primarily by Security Pacific National Bank's interstate affiliates in Arizona, Oregon, and Washington, and will be serviced by Security Pacific National Bank.

Payments of principal and interest with respect to the certificates are partially supported by a letter of credit provided by the Union Bank of Switzerland.

Security Pacific National Bank is the principal subsidiary of Security Pacific Corp., the fifth-largest bank holding company in the United States with assets of more than $88 billion.

#90339b0046 12/05/1990 ~Business Wire
SAN FRANCISCO (DEC. 5) BUSINESS WIRE - A new $47 million Class 1, six-inch wafer, sub-micron R&D and pilot manufacturing facility has been completed in Irvine, Calif., for microelectronics company Western Digital.

The LSI Fab II facility is considered by its San Francisco-based designers RIA Architects and Engineers to have one of the most advanced Class 1 cleanroom environments ever built.

Construction of the 224,000-square-foot facility, including the 16,000-square-foot Class 1 clean room, began in December 1987. The facility's other features include a 30,000-square-foot assembly room and an 18,000-square-foot test room. The remaining 160,000-square-feet of the facility is support space.

The Class 1 clean room is the most critical part of the facility. It is here

that the highly sophisticated six-inch diameter, silicon-based sub-micron wafers are manufactured. Manufacturing conditions must be as pure as possible to prevent minute particles of dust fouling up the delicate working components.

''Class 1 cleanrooms are so clean, they are more than a thousand times cleaner than a hospital surgical suite,'' said RIA President Roger Anderson.

For more than 30 years RIA has pioneered facility design for microelectronics, biotechnology, and space and defense technologies and is one of a select number of firms in the world able to design Class 1 clean rooms.

Anderson said the greatest challenge in developing the ''ultraclean'' Class 1 environment is to design a floor that provides optimum vibration control yet also reduces all chance of air turbulence.

Another unusual feature was RIA's decision by Western Digital to place the Class 1 room's process equipment through the bulkhead wall, with the equipment's maintenance parts in a service chase, thereby ensuring that only the operator parts would occupy the Class 1 cleanroom.

The new facility, which is located adjacent to Western Digital's new corporate headquarters at the company's Spectrum 4 development, consolidates functions previously spread in diverse locations and has been built to accommodate future innovation in manufacturing processes.

RIA was founded in 1952 as a partnership and incorporated under its present name in 1978. The multi-disciplinary firm has pioneered high-technology facility design for clients which include NEC, Fairchild, Honeywell, Hughes, Intel, Memorex, NCR and Xerox.

#90339b0053 12/05/1990 ~Business Wire

SARASOTA, FL (DEC. 5) BUSINESS WIRE - OMNI FILMS INTERNATIONAL INC. (NASDAQ:OFII) Wednesday announced record results for the 1990 fiscal year ended Sept. 30.

Revenues were $8,520,459, an increase of 185 percent from $2,984,850 for 1989. Net earnings reached $967,790, or 43 cents per share, compared to a loss of $379,259, or 17 cents per share, in 1989.

Commenting on the record year end results, Fred Hollingsworth III, president, stated: ''The time and resources invested in 1989 to increase our production capabilities paid off greatly with the best year in our company's history in 1990.

''Motion Master, our international award-winning motion simulator, made a major contribution in only its second year in our product line. International and domestic interest in our 70mm cinema systems, as evidenced by our record sales and backlog, is continuing to grow at a rapid pace.''

OMNI's total backlog/contract equipment sales and film leases exceeded $7.3 million after the first 60 days of the 1991 fiscal year. This is triple the backlog figure that existed after the first 60 days of the 1990 fiscal year.

OMNI intends to apply to the NASD during the month of December for inclusion on the National Market System. This will provide broader exposure and real time volume reporting for the stock.

OMNI FILMS INTERNATIONAL INC.
Operating Results

	1990	1989	Increase
Revenues	$8,520,459	$2,984,850	185 percent
Net Earnings	$ 967,970	$ (379,259)	--

CLEVELAND (DEC. 5) BUSINESS WIRE - First Union Real Estate Investments (NYSE:FUR) Wednesday announced that its Board of Trustees declared a 4 percent stock dividend in lieu of its customary fourth quarter cash dividend.

The stock dividend will be distributed Feb. 1, 1991, to shareholders of record Jan. 2, 1991.

Donald S. Schofield, chairman, president and chief executive officer, said, ''Because of the present liquidity crisis which has developed in the real estate industry, the Trust decided to conserve its cash and bank lines of credit at this time. ''Even though our present quarterly cash flow is approximately 37 cents per share, the Trustees felt we should be conservative

in our dividend policy until our industry begins to show signs of recovery.''

He further stated, ''The board expects to resume regular quarterly cash dividends of 25 cents in the first quarter of 1991.''

First Union Real Estate Investments is a self-administered equity real estate investment trust specializing in the ownership of regional enclosed shopping malls, downtown office buildings and multi-family complexes located throughout the United States. The Trust's shares are traded on the New York Stock Exchange, providing shareholders the opportunity to participate in real estate ownership while maintaining investment liquidity.

PASADENA, CA (DEC. 5) BUSINESS WIRE - Further to its news release dated Oct. 24, Conversion Industries Inc. has set Dec. 31 as the record date for the distribution to its shareholders of approximately 560,000 shares and approximately 1.4 million rights of Western Energy Management Inc., a less-than-majority-owned subsidiary of Conversion.

Western is a leader in the field of energy conservation dealing with municipalities and the private sector.

The Western distribution to record holders at Dec. 31 is estimated to be made in mid-January. A registration statement will be filed with the Securities and Exchange Commission. Any rights not exercised by Conversion shareholders will be exercised on a firm standby underwriting basis by a syndicate headed by Tamaron Securities Inc.

Shareholders of Conversion will receive one share of Western common stock for every five shares of Conversion capital stock and one right of Western for each two shares of Conversion capital stock.

Each right, which expires approximately 45 days from date of distribution, entitles the holder to acquire one share of Western for $3. The common stock and rights will trade separately, and it is anticipated trading will be on a national exchange.

Conversion Industries is an independent power producer and currently owns 52 percent of Calgary-based International Colin Energy Corp. (ToSE:KCN) and 55 percent of PEC Energy Corp. (VcSE:PEK).

These securities may not be sold nor may offers to buy be accepted prior to the time the registration statement becomes effective. This communication

shall not constitute an offer to buy nor shall there be any sale of these securities in any state in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such state.

#90339b0081 12/05/1990 ~Business Wire

CHICAGO (DEC. 5) BUSINESS WIRE - United Airlines Wednesday reported that its total scheduled revenue passenger miles (RPMs) increased 8.2 percent in November compared with November of 1989.

The airline's total scheduled RPMs were 5,881,383,000, compared with 5,434,960,000 in November of 1989.

The passenger load factor was 61.4 percent, a decrease of 3.6 points from 65.0 percent a year ago.

For November, domestic revenue passenger miles totaled 4,201,710,000, essentially unchanged from 4,200,966,000 accumulated in November a year ago. Pacific revenue passenger miles totaled 1,608,549,000, an increase of 30.4 percent from 1,233,994,000 a year ago. Atlantic revenue passenger miles totaled 71,124,000.

Total scheduled available seat miles (ASMs) were 9,582,364,000, up 14.5 percent from 8,367,438,000 a year ago.

Domestic ASMs were 7,059,437,000, an increase of 7.5 percent from 6,565,014,000 a year ago. Pacific ASMs totaled 2,396,141,000, up 32.9 percent from 1,802,424,000 a year ago. Atlantic ASMs totaled 126,786,000.

The airline flew 4,522,000 passengers in scheduled service in November, an increase of 4.3 percent from 4,335,000 flown a year earlier.

Total cargo ton miles for November were 130,162,000, up 16.5 percent from 111,692,000 a year ago.

Total RPMs, including charter flights for November, were 5,890,644,000, up 8.3 percent from 5,436,779,000 a year ago.

#90339b0093 12/05/1990 ~Business Wire

HOUSTON (DEC. 5) BUSINESS WIRE - Quanex Corp. (NYSE:NX), a leading manufacturer of specialty metal products, Wednesday announced net income of $9.1 million for the fourth quarter ended Oct. 31, 1990, a 45 percent increase from the same quarter of last year.

Fourth quarter earnings per primary common share (E.P.S.) were 68 cents, a 51 percent increase over last year. Operating earnings rose 36 percent to $19.4 million for the quarter. Quarterly comparisons were affected by the absence of the work stoppage at Michigan Seamless Tube in the fourth quarter of 1989.

Fiscal 1990 sales of $650 million set a new record for the company with most of the year-over-year increase due to the contribution of Nichols-Homeshield, acquired on August 1989.

Net income for the year was $28 million, a four percent decline from fiscal 1989. E.P.S. during fiscal 1990 was $2.03 which met the company's previously stated expectations that, in spite of two labor strikes and a weak national economy, E.P.S. would be in the same ''ballpark'' as the $2.11 E.P.S. earned in fiscal 1989.

Quanex is a technological leader in the manufacuture of steel, aluminum and titanium specialty metal products for transportation, capital equipment, home building and remodeling and energy processing markets.

Latest 12 Month Data: sales: $650.3 million, operating earnings: $57.2 million net income: $28 million, cash from operations: $55.5 million, primary earnings per share: $2.03, quarterly dividend rate:

10 cents per share (12 cents as of Dec. 31, 1990), book value per share: $12.33, long term debt/capitalization: 42 percent, return on shareholders' equity: 17.8 percent, common stock price range (52 week High & Low): $18-5/8 and $9-1/8.

#90339b0098 12/05/1990 ~Business Wire

JAMESTOWN, N.Y. (DEC. 5) BUSINESS WIRE - Frank T. Costanzo, chief executive officer of Electronic Technology Group Inc. (NASDAQ:ETEK; BSE:ETE) announced Wednesday at its annual meeting of shareholders, that its after-tax income for the first quarter ending Oct. 31, 1990, was $200,831 on revenues of $4,199,956 as contrasted with after-tax income of $49,963 on revenues of $1,384,359 for the comparative 1989 fiscal period.

Edmond L. Lonergan, president of Electronic Technology Group Inc. commented

that he was pleased with the results of the first quarter. Lonergan explained that the results reflected only 10 weeks of sales from the company's newest subsidiary, ACT II Printed Circuit Technology Inc.

Commenting upon the operating results, Curt B. Westrom, chief financial officer explained that the earnings per share for the current fiscal period was 10 cents based upon 2,096,000 outstanding shares as compared to 5 cents per share based upon 1,111,111 outstanding shares during the comparable 1989 period.

Electronic Technology Group Inc. is a manufacturer of high quality electronic assemblies for the medical, industrial controls, transportation and music industries. SAN DIEGO (DEC. 5) BUSINESS WIRE - ASDAR GROUP INC. (NASDAQ:ASDR), a Las Vegas-based holding company, Wednesday announced that it had entered into a letter of intent to acquire CBC Financial Corp. (CBC) of Newport Beach, Calif.

CBC owns 73 fully leased single-family housing units in Las Vegas and holds lease contracts on approximately 26 automobiles. In addition, CBC is in escrow to acquire approximately 1,250 rental units in Houston.

ASDAR's management has obtained compiled financial statements for CBC for the year ended July 31. These financial statements show CBC had total assets of approximately $4.5 million and net worth of approximately $1.9 million. The letter of intent is subject to a definitive agreement and arrangement of financing.

Tentative terms of the agreement are that ASDAR will exchange 17 million shares, approximately 35 percent of its common stock (on a fully diluted basis) for 100 percent of the stock of CBC. ASDAR shall also pay approximately $500,000 in cash and notes to the principal of CBC, Barton K. Maybie, upon completion of the transaction.

As a further term of the agreement, Barton K. Maybie shall become a director of ASDAR and shall receive a $2,500 per month consulting fee.

ASDAR's management has decided to rescind the acquisition of Unitex Inc. (Unitex). ASDAR management intends to cause the rescission of the acquisition of Unitex to occur simultaneously with the acquisition of CBC on or before

Dec. 31.

HOUSTON (DEC. 5) BUSINESS WIRE - DI Industries Inc. (ASE:DRL), Wednesday released the unaudited pro forma combined condensed statement of operations as filed with the Securities and Exchange Commission on Form 8-K, reflecting the purchase of substantially all of the assets of James E. Bigard Drilling Co.

Bigard is the largest drilling contractor in Michigan currently operating nine of the 27 active rigs in the state.

For the year ended March 31, 1990, unaudited pro forma combined revenues increased 46 percent from $32.5 million to $47.3 million, net income increased from a $954,000 loss to net income of $30,000 and net income per common share increased from a 3 cent loss to breakeven.

For the six months ended Sept. 30, 1990, unaudited pro forma combined revenues increased 32 percent from $22.6 million to $29.9 million, net income increased 52 percent from $984,000 to $1.5 million and net income per common share increased 33 percent from 3 cents per share to 4 cents per share. See the notes to unaudited pro forma combined condensed statement of operations.

The company purchased 12 drilling rigs from Bigard with capabilities to 18,000 feet. The purchase also included the assets of J.B. Tractor and Truck Co., with 26 trucks in its fleet, and A-1 Tool Co. The company is now operating under contract 75 percent of the rigs purchased from Bigard.

DI Industries Inc., provides on-shore contract drilling and well workover services to firms in the oil and gas industry, commercial drilling, oil and gas exploration and production and equipment repair and sales. The common stock of the company trades on the American Stock Exchange under the symbol DRL.

SEATTLE (DEC. 5) BUSINESS WIRE - The Cummings Group (TCG) and Tera Computer Co. Wednesday announced a cooperative venture to develop and commercialize the Tera NetIOS, a high performance input/output (I/O) subsystem for network computing environments. NetIOS enables high speed workstations, graphics

workstations and/or supercomputers to perform efficient, high speed I/O across a network.

Tera has given TCG a license to commercialize NetIOS and will be a minority partner of TCG. TCG will also develop I/O and networking subsystems for Tera's supercomputer systems.

NetIOS designer and TCG founder, Dan Cummings, describes the partnership as, "a great opportunity for both companies. Tera Computer will continue to develop supercomputer systems and TCG will focus on the high performance network computing environments in which supercomputers must reside."

NetIOS is designed to achieve sustained I/O rates in excess of 150 megabytes per second on each of the Tera supercomputer's 256 I/O processors. Performance improvements on workstations will depend on the specific application and system configuration. NetIOS consists of several software components which may be used together or separately.

TCG is a Washington corporation based on Vashon Island, Wash. The company develops, markets and supports turnkey network computing solutions through a combination of integration services and its own software products. NetIOS is expected to be available for Beta testing in late 1991 and release in early 1992.

Tera Computer Co., headquartered in Seattle, is a supercomputer company with the charter to develop and deliver the most powerful general purpose supercomputer systems available.

Currently in the development stage, Tera is designing a scalable shared memory system based on a proprietary parallel architecture that will allow the system to set new standards for computational performance and provide unsurpassed price/performance characteristics. Product availability is slated for late 1993.

SAN FRANCISCO (DEC. 5) BUSINESS WIRE - Barbara Z. Otto has been appointed executive vice president of BankAmerica Corp. and Bank of America, it was announced Wednesday.

Otto, 47, is director of the bank's Credit Examination Services Department with responsibility for the review of the credit management process and portfolio quality of each of the bank's lending units.

Otto joined Bank of America in mid-l986 as a senior vice president. Previously, she had been associated with Crocker National Bank in San Francisco for nine years, where she had advanced to senior vice president and manager of portfolio mangement information systems.

Otto also had 12 years of line and staff experience in the international and domestic operations of Citibank in New York, San Francisco, London and Buenos Aires.

A native of New York City, she is a magna cum laude graduate of Hunter College in New York and also attended the Graduate School of Arts and Sciences at New York University. Otto is a member of Phi Beta Kappa.

She is a member of the Metropolitan Club and the Professional Women's Network in San Francisco, and resides with her two children in Marin County, Calif.

Barbara Otto is the third woman to be appointed an executive vice president by Bank of America. Lisa Prescott, who heads the bank's Los Angeles-Gold Coast Region, was appointed an executive vice president in 1989 and Barbara Rambo, head of the bank's Eastern Region of the United States, was named an executive vice president last month.

#90339b0171 12/05/1990 ~Business Wire

FREMONT, CA (DEC. 5) BUSINESS WIRE - Everex Systems Inc. (NASDAQ/NMS:EVRX) announced Wednesday its financial results for the first quarter of its 1991 fiscal year which ends July 31.

Revenues for the quarter ended Oct. 31, 1990 were $104,803,000, an increase of 6.7 percent over the $98,205,000 for the like quarter last year. Earnings per share were 1 cent on 23,847,000 weighted average shares compared with 18 cents on 23,831,000 weighted average shares for the like quarter of the prior year.

The company had previously announced in mid-October that first quarter earnings could be significantly lower than in the like quarter of the previous year, due primarily to decreased demand resulting from difficult conditions in the U.S. personal computer market and in the general economy.

Gross margins were under pressure during the quarter due to lower than expected sales volume. Gross margin for the fiscal 1991 first quarter was 25.7 percent compared with 26.3 percent for the equivalent quarter in fiscal 1990.

Research and development and selling expenses increased by approximately 9.6 percent from the fourth quarter of fiscal 1990. Michael McCloskey, chief financial officer, stated, ''Everex has implemented company-wide cost containment programs and we expect overall costs to remain flat as a percent of revenue or to decrease as these programs take effect.''

Despite less than expected revenues, balance sheet performance was good.

Inventories increased by only 7.1 percent during the quarter to $86.3 million from $80.6 million at July 31, 1990, and receivables increased 3.1 percent from the previous quarter.

Cash decreased by $12.1 million to $11.8 million during the quarter and was used principally to fund the increase in inventory and receivables and to finance the acquistion of Integrated Office Systems Corp., a government systems integrator. At Oct. 31, 1990, Everex had no outstanding short-term bank obligations.

At the recent Fall COMDEX trade show, Everex introduced over a dozen new personal computer and peripheral products. Of particular note is the Tempo LX notebook personal computer, which has been met with very favorable demand.

Steve Hui, president and chief executive officer, said ''Market conditions continue to be sluggish, and we are cautious on the future outlook. However, we are on track to replace most of our existing product line over the next few months.

''Also, our European expansion and other new channel expansion plans are underway. We expect these product and distribution plans to provide growth in coming quarters even in a difficult sales environment.''

Everex Systems, with headquarters in Fremont, is a leading manufacturer of personal computers and peripheral and enhancement products for the personal computer marketplace. Founded in 1983, Everex markets its products worldwide through a network of value-added dealers and resellers.

#90339b0173 12/05/1990 ~Business Wire

SAN FRANCISCO (DEC. 5) BUSINESS WIRE - Catellus Development Corp., sponsor of the proposed new neighborhood at Mission Bay, announced Wednesday important changes to the development agreement that is scheduled to be reviewed and voted on by the Board of Supervisors. These changes:

- Reduced by 50 percent, to 2.4 million square feet from 4.8 million square feet, the size of Mission Bay's requested exemption from the City's annual limit on office space (Proposition M). The remaining 2.4 million square feet will be submitted to the city's annual office limitation review;

- Provide a specific start-date for building the first 500 units of housing within two years of required public approvals, with construction of homes expected to begin by late 1992;

- Insure that funds for affordable housing are generated totally through surplus tax revenues from Mission Bay;

- Specify in the development agreement that Mission Bay's office space will be used primarily for "back-office" needs.

"We listened carefully to what voters said on Nov. 6," said Vernon Schwartz, Catellus president and chief executive officer," and we want San Franciscans to know that we are committed both to starting and finishing Mission Bay.

"As part of this commitment, we are pleased to announce these changes in the proposed development agreement, as well as the fact that we hope to build our corporate headquarters as the first office building in Mission Bay. It is fitting that we are making these announcements on the first official day of trading Catellus' stock on the New York and Pacific Stock Exchanges."

"With these substantial and responsive changes in the proposed development agreement," added Jim Augustino, Catellus vice president and Mission Bay project director, "we hope to win approval of the agreement and continue building the base of support that resulted in nearly 100,000 San Franciscans - 600 votes short of a majority - voting for Mission Bay.

"We want to reach out and assure all San Francisco homeowners that Mission Bay will benefit the entire city, at no additional costs."

HOUSTON (DEC. 5) BUSINESS WIRE - Continental Airlines is demonstrating continued improvement in service quality and operational reliability according to statistics released today by the U.S. Department of Transportation.

"Continental's bankruptcy reorganization on Monday will in no way compromise our strong drive to improve service to our customers," a Continental spokesman said. "Our service quality projects continue uninterrupted, as do our operations and our total commitment to meeting the needs of air travelers."

On Tuesday, the second day of Continental's reorganization, the airline flew 98.1 percent of its scheduled mileage, which is within one-tenth of a percentage point of its regular daily goal. Once again, there were no cancellations attributable in any way to Continental's bankruptcy filing. Departures and arrivals within 60 minutes remained strong at 98 and 96 percent respectively.

"Calls into our reservations centers are within their normal range, indicating that consumers understand that Continental has a viable reorganization underway," the spokesman said. "Our load factor is hitting the target, and the no-show rate is running normal."

Due to a lack of activity, Continental closed a special operations center that it had established to deal with any unusual situations arising from its bankruptcy filing.

DOT statistics released today for the month of November showed that customer satisfaction with Continental, measured as a "complaint rate," was higher than for American, Eastern, Northwest, America West, Pan Am and TWA. For the month of October, Continental had the fifth best on-time performance among major airlines and the third lowest rate of mishandled baggage.

WATSONVILLE, CA (DEC. 5) BUSINESS WIRE - Granite Construction Inc. (NASDAQ/NMS: GCCO) announced Wednesday that it is the apparent low bidder on two new contracts and has been awarded a third, with a combined value of $60.5 million.

This week, Granite submitted the apparent low bid on a $29.3 million dam

project for the Brazos River Authority in Texas. The work entails construction of an earthfill dam, an intake tower, outlet works, a service spillway, an emergency spillway and related appurtenances to impound a reservoir that will provide additional water supplies for the city of Lubbock.

The project, located 65 miles southeast of Lubbock on the Brazos River, is slated to begin in February, and take approximately two and one-half years to complete.

Additionally, the company confirmed that it has been awarded a $12.8 million contract by the Texas Department of Highways and Public Transportation to widen a three mile section of Loop 289 in Lubbock.

The job involves construction of one additional lane in each direction, two new bridges and widening six existing briges. Construction is scheduled to start later in December and take about 28 months to complete.

Granite also recently submitted the apparent low bid on an $18.4 million freeway reconstruction project for the California Department of Transportation (Caltrans) in San Jose.

The project involves widening a two-mile segment of Highway 101 by adding two additional lanes from Trimble Road to Interstate 880 and a new eight-lane, cast-in-place concrete bridge at Brokaw Road.

The contract also calls for the widening of two existing structures at North First Street and Guadalupe Parkway from six to eight lanes. Caltrans is expected to award the contract later this month. Construction is scheduled to start in early spring and take about two and one-half years to complete.

Granite is a heavy civil contractor engaged in the construction of dams, highways, airports, tunnels and other infrastructure-related projects.

KIRKLAND, WA (DEC. 5) BUSINESS WIRE - In another step toward its goal of developing a seamless cellular network spanning North America, McCaw Cellular Communications Inc. Wednesday announced that non-wireline cellular service has been initiated in northwestern Mexico through Movitel del Noroeste, a partnership in which McCaw is the largest U.S. partner.

Mexico's Region 2, comprised of the states of Sinaloa and Sonora (one of nine government designated cellular service areas), has 5 million potential customers or ''pops.'' McCaw, the largest foreign partner, assisted in the

engineering for construction and will continue to provide operational and management strategy and assistance as the system develops.

John Stanton, McCaw vice chairman who oversees the company's international involvement, said: ''The opportunity for us to participate along with our partners in Movitel del Noroeste allows McCaw to be involved in the development of cellular on the non-wireline systems throughout Mexico by working closely with the other system operators. As we continue to connect our systems throughout the United States and to work closely with our colleagues in Canada, it is only natural that we tie in the Mexican cellular systems to deliver quality cellular calls throughout North America.''

Movitel del Noroeste, which has invested $7 million constructing the Northern Telecom system, is a partnership of six firms, TAMSA, Bachoco and Mazon of Mexico, and Contel, Cellular Trust Company of the West and McCaw of the United States. Formed in January 1990, McCaw owns 22 percent.

McCaw Cellular Communications Inc. (NASDAQ: MCAWA) is the nation's leading cellular telephone company, with ownership interests in over 100 markets across the country, representing 106 million potential customers or ''pops.'' Approximately 80 percent of the ''pops'' controlled by McCaw and LIN Broadcasting Corp. (NASDAQ: LINB), which is 52 percent owned by McCaw, are in the nation's 30 most populous markets and their contiguous service areas. McCaw Cellular operates major regional systems in California, Florida, Texas, the Pacific Northwest, the Midwest, the Rocky Mountain states and the Northeast, currently offering service primarily under the name Cellular One. LIN Broadcasting holds significant interests in cellular systems in New York, Los Angeles, Philadelphia, Dallas and Houston, and operates seven network-affiliated television stations. McCaw also is the nation's sixth largest paging service provider.

SAN JUAN CAPISTRANO, CA (DEC. 5) BUSINESS WIRE - Nichols Institute (ASE:LAB) announced Wednesday that it has reached an agreement in principle to merge with MPC Laboratory (MPC) located in Houston.

Consideration to be paid for the business and related covenants not to compete will consist of $12 million in cash. Consummation of the transaction is subject to the parties entering into a definitive agreement and satisfaction of a number of conditions.

MPC serves physicians, hospitals and clinics in south Texas and Louisiana. MPC's revenues are approximately $11.5 million on an annual basis.

Dr. Albert L. Nichols, chairman and president of Nichols Institute, said the merger will enhance the service capability of Nichols Institute in the Southwest. Nichols stated that the Institute is also looking forward to its new association with Memorial Pathology Consultants, P.A., which provides services to MPC and the medical community in the greater Houston area.

Nichols Institute provides esoteric diagnostic testing to clients nationwide in the fields of endocrinology, genetics, immunology, microbiology, molecular biology, oncology, serology, special chemistries, toxicology and virology.

It also has regional laboratories in California, the Pacific Northwest and in the Midwest which provide clinical testing to those markets. NIDA-certified substance abuse testing is also provided to

clients nationwide. Nichols Institute Diagnostics manufactures kits for the performance of medical diagnostic tests which are distributed worldwide.

EDISON, N.J. (DEC. 5) BUSINESS WIRE - Addressing an analyst meeting Wednesday morning, Richard Rose, president and chief executive officer of Dataflex Corp. (NASDAQ:DFLX), announced that estimated revenues and earnings for the third quarter ending Dec. 31 will substantially exceed analyst estimates.

Net income for the third fiscal quarter is expected to exceed $1.3 million compared with $669,000 in the 1989 period. The company expects earnings per share to be at least 39 cents, compared with analyst estimates of 33 cents. The company earned 27 cents per share in the prior year period. The expect growth in earnings per share should be achieved despite a 33% increase in the number of shares outstanding as a result of a public equity offering completed in Feb. 1990. Revenues for the fiscal third quarter should exceed $27 million vs. $21.6 million for the period ended Dec. 31, 1989. For the six months ended Sept. 30, 1990, Dataflex earned $1.6 million or 49 cents per share on revenues of $37.6 million.

Rose stated, ''Our excellent results are due to the successful implementation of a company-wide focus on building our service business.'' The widening in margins was evidenced in the first half of fiscal 1991 when Dataflex's gross margins increased by 27% to 16.9%.

Rose also added, ''We continue to focus on maintaining one of the lowest SG&A expense levels in the industry while building the profitable service and maintenance segment of our business.''

Commenting on fourth quarter and fiscal 1991 results Rose said, ''We expect the positive trends to continue into the fourth quarter resulting in substantial growth in revenues and earnings for fiscal 1991.'' Prior to this announcement, analyst estimates for the fourth quarter and fiscal 1991 are 35 cents and $1.15, respectively. Dataflex earned $1.00 per share for the fiscal year ended March 31, 1990.

Dataflex Corp. markets and services a wide selection of personal computers and computer peripheral equipment to end users. Its Mainsite program provides institutions with a full-time, on-site maintenance staff, including spare parts and replacement units. Current Mainsite installations range in size from 1,000 to over 10,000 pieces of equipment.

Note: Mainsite is a registered trademark of Dataflex.

HAUPPAUGE, NY (DEC. 5) BUSINESS WIRE - North Atlantic Industries, Inc. (NATL/NASDAQ) today announced the receipt of another order for its Navy Standard Teleprinter (NST) AN/UGC- 143A(V).

The order, which has a value in excess of $18 million, is the largest single order ever received by the Company. To date, orders received for NSTs total more than $52 million. North Atlantic received approval for full production of these teleprinters in late 1989. During the five-year contract period, which ends in June 1994, the Company expects the NST program to account for over $120 million in revenues.

The NST is the most technologically advanced teleprinter on the market. The unit has been fully approved by the Navy and is designed to function in any of four configurations. They include Receive Only (RO), Receive Only with bulk memory storage, Keyboard Send and Receive (KSR) and the sophisticated Automatic Send and Receive (ASR) version.

North Atlantic Industries designs, manufactures and markets computer, computer peripheral, communications and instrumentation products to government and aerospace industry customers. The Company is a leading supplier of TEMPEST printers, MIL-SPEC teleprinters and tape storage systems, as well as phase sensitive instruments.

SAN BRUNO, Calif. (DEC. 5) BUSINESS WIRE - Over the nine month period ended Sept. 30, 1990, 44,316 ounces of gold were produced from the Jolu and Silver City facilities, resulting in an after-tax, net cash flow from operations of $6,267,133, or 30 cents per share.

Revenues from the sale of gold and silver from the two facilities amounted to $17,457,030 - a decrease of $1,518,502 over the like period last year. The decrease is attributable to lower grades processed during the quarter as well

as to the lower market price of gold. Direct cash operating costs averaged $194 per ounce of gold during this period.

The company's decision to accelerate the write-off (depreciation) of the operating facility at Jolu in Saskatchewan has resulted in North Lily (NASDAQ:NLMC) showing a loss of $2,533,679 (12 cents per share) for the quarter. With no long-term debt, and $5,897,288 in working capital, North Lily is focusing on select mining properties in North America and Chile that can be placed into production within a short period of time.

SCOTTS VALLEY, CA (DEC. 5) BUSINESS WIRE - E-mu Systems, the pioneering American electronic musical instrument company, has closed a $2 million financing package with Matrix Partners of Menlo Park.

Notable for making instruments used by composers in movies such as ''Batman,'' ''Dick Tracy,'' ''The Hunt for Red October'' and by countless pop recording and touring artists, E-mu has grown substantially without benefit of venture funding.

Having achieved cult fame among top musicians for its high-quality digital sampling-based instruments, E-mu's popularity entered a dramatic new phase with the introduction of the $1,000 Proteus I ''pop band in a box'' in

mid-1989.

The Proteus went on to win Keyboard magazine's Technical Innovation of The Year award, as well as the Technical Excellence and Creativity award from Mix magazine.

Following that success, a complementary Proteus II was added to the line, containing an entire symphonic orchestra of CD-quality sampled instruments in a two-inch high rack-mounted box.

Joseph Rizzi, a principal in Matrix Partners, commented that E-mu's innovative applications of its proprietary custom VLSI technology was key to the musical instrument firm being included in their portfolio of emerging technology-oriented companies.

Regarding Matrix's role at E-mu, Rizzi stated that he and partner Rick Fluegel will gain seats on E-mu's board of directors and that their firm's investment is designed to fuel the next phase of E-mu's growth.

Charlie Askanas, president and chief executive officer of E-mu, commented that the financing will be an important asset in realizing E-mu's strategic goals. Moving from strategy to tactical planning, Askanas stated ''We seek to surpass customers' already high expectations of E-mu product quality.

''In essence, that means delighting them with everything we make -- a program we refer to as 'Total Quality'.'' Continuing this theme, Askanas stated, ''bringing Total Quality products quickly to market at a low cost will be absolutely key to our gaining and defending market share.''

LOS ANGELES (DEC. 5) BUSINESS WIRE - Winners Circle Inc. (NASDAQ:WNRS), a manufacturer of promotional apparel, has been accepted for listing on the Pacific Stock Exchange as of Nov. 28, 1990, according to Lester D. Abrams, Winner's president.

The stock will trade under the symbol WNR.

Abrams noted that the PSE listing should enhance the marketability of the company's shares, increase its visibility to the marketplace, make the company eligible for broader statistical coverage and make the shares marginable at certain price levels.

Winners Circle is a leading designer and manufacturer of sports apparel,

including jackets, sweatshirts and T-shirts featuring logos, slogans and other promotional messages. Prominent Winners customers include the Disney Companies Paramount Picture Corp., Motown Records, the Los Angeles Lakers, Warner Bros. BASF Corp. and a number of major ski companies.

CHERRY HILL, NJ (DEC. 4) BUSINESS WIRE - THE SCORE BOARD INC. (NASDAQ/NMS Symbol: BSBL) Wednesday announced record revenues and income for the third quarter and nine months ended October 31.

Sales for the third quarter ended October 31 increased 51 percent to $10,709,140 from $7,085,227 recorded for the same quarter in the previous year. Net income for the quarter ended October 31 increased 78 percent to $796,390, or 27 cents per share compared to net income of $447,946, or 16 cents per share for the same period a year ago.

Sales for the nine months ended October 31 increased 76 percent to $25,269,242 from $14,390,335 reported for the nine months ended October 31, 1989. Net income for the period increased 158 percent to $2,171,059, or 72 cents per share, compared to net income of $843,058, or 30 cents per share reported in the same period a year ago. Per share results for the three and nine month periods ended October 31 reflect a one time charge of $211,424, or 04 cents per share, as a result of costs incurred due to the company's decision to cancel a proposed public offering.

Per share results for the nine months ended October 31, 1989 reflect an extraordinary credit of $10,000, or less than 1 cent per share, resulting from the utilization of an operating loss carryforward.

THE SCORE BOARD INC. is one of the largest distributors of baseball cards and sports-related memorabilia. It also markets the Classic Major League Baseball trivia board game and World Wrestling Federation (WWF) trading cards through its wholly-owned subsidiary, Classic Games Inc.

SANTA ANA, CA (DEC. 5) BUSINESS WIRE - Gish Biomedical Inc. (NASDAQ:GISH), a developer and manufacturer of critical-care and surgical devices, announced Wednesday that anticipated sales for the second fiscal quarter which will end

Dec. 31, 1990, will be closer to $5 million rather than the $5.5 million projected by analysts.

The expected $5 million in sales would favorably compare with sales of $4.3 million for the same fiscal quarter last year. Projected earnings are expected to be approximately 12 cents per share, compared with 10 cents for the same three-month period last year.

Jack Brown, president and chief executive officer, stated that this slowdown in sales is attributed to Gish's distributors lowering their inventory levels. ''The open heart surgery caseload has not changed; however, our distributor ordering patterns have been affected by the general economic slowdown.''

Gish Biomedical designs and manufactures specialty devices used in open heart surgery, oncology, emergency care, obstetrics, ophthalmology and other specialized applications within the hospital.

Gish distributes its products through an international dealer network which sells directly to the hospital specialists. Gish maintains a competitive advantage through innovative product design, quality of manufacture and superior customer service.

SALT LAKE CITY (DEC. 5) BUSINESS WIRE - Dayna Communications Inc. Wednesday announced the availability of 10BASE-T support for its full line of DaynaPORT Ethernet adapters for Macintosh computers and for its EtherPrint connector for LocalTalk network printers.

The following product models are now available with RJ-45 connectors for connecting to 10BASE-T cable systems. Product Description DaynaPORT E/II-T Ethernet card for Macintosh II family DaynaPORT E/SE-T Ethernet card for Macintosh SE DaynaPORT E/30-T Ethernet card for Macintosh SE/30 EtherPrint-T Ethernet connector for LocalTalk printers

Versions of all products are still available with BNC connectors to support thin Ethernet and AUI ports to support thick Ethernet and other media through an external transceiver.

The DaynaPORT E/LC and E/si cards for the Macintosh LC and IIsi, due to ship in February 1991, will also be available with 10BASE-T connectors. These cards will also feature support for the 68882 Floating Point Math Coprocessor.

The DaynaPORT E/si card, originally announced on Oct. 17 as requiring the

Apple 030 Direct Slot adapter, will now be manufactured as a Processor Direct Slot (PDS) card which will not require a Direct Slot adapter.

The 10BASE-T versions of the DaynaPORT cards and EtherPrint are available immediately.

Dayna Communications Inc. is a privately held company that designs and manufactures a range of products to meet the connectivity needs of personal computer users.

NEW YORK (DEC. 5) BUSINESS WIRE - Information Management Technologies Corp. (''IMTECH'') 1/8NASDAQ:IMTKA (common), IMTKU (units), IMTKW (warrants)3/8 Wednesday announced that it has entered into a receivables-based business funding relationship with Access Capital, Inc., New York.

There is no preset limitation on the total amount Access Capital will provide to IMTECH, but it is based on the receivables generated by IMTECH. Access Capital will earn a service fee for capital provided, but will not receive any equity in IMTECH.

The Company and Access Capital have reached an agreement with IMTECH's present lender, State Street Bank of Boston, for a transitional period wherein remittances from receivables existing at the closing date are applied to repayment of the outstanding balance of the note with State Street until it is paid in full. IMTECH anticipates full repayment of the State Street loan by mid-January, 1991.

Pierce Lowrey, Chief Executive Officer of IMTECH commented, ''The arrangement with Access Capital will provide IMTECH with additional available cash funds that will assist in our continuing efforts to meet IMTECH's growth objectives.''

Miles M. Stuchin, President of Access Capital, noted, ''We are pleased to welcome IMTECH to the group of young, high-growth companies whose expansion needs are met by Access Capital.''

IMTECH provides on-site and off-site ''outsourcing'' of a wide range of back office services to companies in the services sector. These services include an optical data storage system -- Computer Output Information System (''COINS''), electronic publishing, fulfillment, printing, reproduction and general mail room operations. IMTECH's information facilities management (''IFM'') capabilities provide companies with the ability to contract out ancillary

services to reduce operating costs and improve productivity, thereby allowing management to focus on its primary corporate objectives.

LOS ANGELES (DEC. 5) BUSINESS WIRE - Hotel Investors Trust, a real estate investment trust, and Hotel Investors Corp., a hotel management company, whose shares are paired and trade together (NYSE:HOT), Wednesday announced that they had rejected the recent proposal by Park Plaza Inc. and EIE International Corp. for an alternative transaction to the previously agreed-to purchase of 27 hotels by Park Plaza from Hotel Investors at a price of approximately $152 million pursuant to the Asset Purchase Agreement dated as of May 9, 1990.

Under the proposed alternative transaction, Park Plaza would have purchased a portion of such hotels, while its affiliate Park Inns leased the balance of the hotels with an agreement for their future purchase by Park Inns.

Hotel Investors has notified Park Plaza and EIE that Hotel Investors intends to carry out its obligations under the Asset Purchase Agreement by seeking shareholder and stockholder approval of the 27-hotel sale at the Dec. 20 Special Meetings, and expects Park Plaza and EIE to either complete the purchase at the currently scheduled Jan. 10, 1991, closing or to agree to the immediate release of the $4 million plus interest currently in an escrowed deposit.

MILPITAS, CALIF. (DEC. 5) BUSINESS WIRE - Octel Communications (NASDAQ:OCTL) announced Wednesday that PacTel Cellular has purchased Octel Sierra voice processing platforms to provide cellular telephone answering and voice mail service to the greater Los Angeles area, the largest cellular telephone service market in North America.

PacTel introduced Message Manager cellular telephone answering and voice mail service to greater Los Angeles in October. Message Manager answers customers' cellular telephones, plays their personal greeting and takes messages when the telephone is unanswered, busy or out of the PacTel Cellular service area. Customers can retrieve messages at any time from any touch tone telephone using a personal security code.

In addition, Message Manager's voice mail option allows customers to send, forward and distribute voice mail messages to other individual customers or to designated groups which they establish, such as all of the employees on a sales staff.

Messages are stored in the Sierra voice processing platform at PacTel Cellular with no need for equipment attached to the customer's cellular phone.

''PacTel Message Manager is a powerful new tool for cellular users who want to increase their personal productivity,'' said Sally Pelmear, director of marketing for PacTel Cellular in Los Angeles. ''Because it answers and takes messages when the cellular phone is busy or out of the service area, important calls are never missed.

Octel Communications Corp. designs, manufactures and markets a full line of high-performance voice processing systems. Octel's Aspen product line is sold in the United States, Canada and overseas to small businesses and large multisite corporations.

PacTel Cellular is a subsidiary of Pacific Telesis Group, a worldwide diversified telecommunications corporation based in San Francisco.

BURBANK, Calif. (DEC. 5) BUSINESS WIRE - Matthews Studio Equipment Group (NASDAQ:MATT), through Hollywood Rental Co. Inc., its wholly owned subsidiary, has completed its purchase of eight combination tractor-trailer production vans equipped with 16 heavy duty generators, from Richman Equipment Corp. at the cost of $1.3 million.

Management stated that this latest acquisition will improve and expand Matthews' ability to service the production industry by providing vehicular support in addition to the already available popular lines of rental film and television production equipment.

Matthews' goal is to provide ''one stop shopping'' for film and television production professionals.

As the Matthews Studio Equipment Group enters its third decade, it has become the preeminent provider of services to the worldwide motion picture, television and media production industries by supplying the prefessional equipment, accessories, expendable supplies and other basic ''tools of the trade'' required to make a feature film or television production or broadcast through its manufacturing subsidiaries, rental and sales.

PERRY, Fla. (DEC. 5) BUSINESS WIRE - The board of directors of First Federal Savings Bank of Perry (NASDAQ:FPRY) has unanimously approved a plan providing for the reorganization of First Federal into a holding company structure in which it will become the subsidiary of a newly formed holding company to be known as First Financial Bancorp Inc.

Under the plan, the existing stockholders of First Federal will exchange their shares of First Federal common stock on a one-to-one basis for shares of common stock in the new holding company which will thereafter own all of the outstanding shares of First Federal. Consummation of the plan is subject to receipt of both OTS and First Federal stockholder approval.

The annual meeting of stockholders to consider the plan is scheduled to be held on Jan. 24, 1991.

LOS ANGELES (DEC. 5) BUSINESS WIRE - Maxicare Health Plans Inc. emerged from Chapter 11 protection Wednesday, successfully completing its reorganization in only 21 months.

Maxicare's recovery comes at an excellent time. The managed health care market is expected to increase significantly throughout the 1990s.

''Our company is viable because we focused on the basics of arranging for accessible quality health care at a reasonable cost,'' stated Peter J. Ratican chairman and chief executive officer of Maxicare.

Ratican pointed to the company's longstanding policy of contracting with quality-oriented medical providers, while having the flexibility to work with employers to shape the types of health care coverage they need for the 1990s.

That strategy has already paid off for Maxicare which has signed many new 1991 contracts including Bank of America, GTE, The Motion Picture Industry Health and Pension Plans, Price Waterhouse, Sears and Stanford University.

Ratican thanked the many people who helped achieve the goal of successfully restructuring the company. He especially recognized and thanked the efforts of Maxicare's employees. In particular, he singled out the accomplishments of Eugene L. Froelich, Maxicare's chief financial officer, as the chief architect of the company's financial restructuring.

Maxicare reported a profitable quarter in the third quarter ending Sept. 30, 1990. It was the first profitable quarter for the company in four years.

The Reorganization Plan was confirmed by the U.S. Bankruptcy Court in Santa Ana, Calif., on Aug. 31, 1990. Pursuant to the plan, creditors committees agreed to go effective with minimum cash of $75,150,000.

The payment of enrollee claims, administrative claims, convenience claims, secured and other priority claims will occur as soon as practicable under the plan. All other allowed claims will begin to receive cash and securities approximately 90 days from the effective date.

Maxicare Health Plans Inc. operates in seven states: California, Indiana, Illinois, Louisiana, North Carolina, South Carolina and Wisconsin.

HOUSTON (DEC. 5) BUSINESS WIRE - The Resolution Trust Corp. (RTC), under the auspices of its Gulf Consolidated Office has awarded an asset management contract to R&B Realty Group.

According to Freeman Lyle, vice president of R&B's Asset Management Co., the portfolio of assets of a combination of real estate owned and non-performing loans having a total value of approximately $167 million. The assets are located primarily in the state of Texas.

While this is R&B's first contract with the RTC, the firm continues to manage a substantial portfolio of assets throughout the country for the FDIC under contracts awarded by the FSLIC.

According to Lyle, the assets will be managed from R&B's Houston asset management office in the Westchase area. Currently, the firm, which has headquarters in Los Angeles, operates satellite offices in Chicago and Alexandria, Va., as well as regional and divisional management offices in 17 locations nationwide.

R&B Asset Management is a division of Los Angeles-based R&B Realty Group, a multifaceted real estate related organization managing a portfolio valued in excess of $3 billion coast to coast.

MOUNTAIN VIEW, Calif. (DEC. 5) BUSINESS WIRE - Matsushita Electric Industrial Co. Ltd. (MEI) plans to develop high-performance computer systems based on SPARC, a RISC microprocessor architecture designed by Sun Microsystems.

MEI has chosen SPARC as its RISC architecture and will use it in products for the UNIX systems and embedded controller markets.

MEI's new desktop and laptop SPARC systems will run Sun's UNIX operating system, its networking standard, ONC, and the intuitive OPEN LOOK graphical user interface. These computers will conform to SPARC Compliance Definition (SCD) 1.0 from SPARC International, assuring compatibility with SCD-compliant SPARC systems from other vendors.

The Japanese firm's SPARC computers will utilize MEI's expertise in multimedia technology. Meanwhile, the company's SPARC embedded controllers will be incorporated in its consumer electronics products, an area in which MEI leads the industry.

Besides SPARC, MEI plans to license from Sun its operating system, SunOS, JLE (Japanese Language Environment), a localized version of SunOS, OpenWindows (made up of OPEN LOOK, the X11/NeWS Window System and XView toolkit for designing OPEN LOOK applications) and ONC.

Other software to be licensed includes C and FORTRAN compilers and the SPARC Development Kit, which helps companies design SPARC systems quickly and easily through Sun's SPARCsim simulator and other tools.

MEI has also agreed to enter into a reseller contract valued at approximately

$150 million to purchase Sun SPARCstation products within three years. MEI will use the computers internally and will resell them through its distribution channels in Japan.

According to an MEI spokesperson, ''Matsushita considers SPARC/UNIX/OPEN LOOK/ONC a major part of our future direction in the computer marketplace. This platform will allow us to develop products quickly and be assured of a large and growing market with the largest installed base and application software offering of any RISC architecture.''

Matsushita Electric Industrial Co. Ltd. is one of the world's most comprehensive manufacturers of electric and electronic equipment and ranks as the leader in the consumer electronics market in Japan.

It manufactures products under the brand names of National, Panasonic, Quasar and Technics. This international corporation now encompasses approximately 200,000 employees, marketing its products in more than 160 countries.

Sun Microsystems Inc., a multi-national corporation, is the leading worldwide supplier of network-based distributed computing systems, including professional workstations, servers and UNIX operating system and productivity software.

MOUNTAIN VIEW, CA (DEC. 5) BUSINESS WIRE - Sun Microsystems Federal Inc. will supply powerful SPARC-based workstations to the Air Force Institute of Technology (AFIT) through a contract estimated to reach $7.4 million during the next two years.

AFIT, located at Wright Patterson Air Force Base in Ohio, is an educational institution for Air Force students at the graduate level. Sun workstations will support Air Force education and research conducted by faculty and students.

Under terms of the contract, Sun will include its standard UNIX operating system, SunOS and the OPEN LOOK graphical user interface with the SPARC systems to be purchased by AFIT. These systems include Sun's SPARCstation desktop computers and SPARCservers. Sun will also install and support its NFS distributed computing file system and other ONC products. Additionally, C and FORTRAN compilers will be shipped.

The combination of Sun's networking, along with its software and hardware platforms will enable AFIT to move to a ''workgroup computing'' model in which networks of people share resources using ''clients'' -- powerful desktop workstations -- linked to ''servers'' that manipulate information.

AFIT will utilize Sun workstations for document preparation, C and FORTRAN programming, and when combined with third-party engineering packages, for statistical analysis and fluid dynamics engineering.

Sun Microsystems Inc., headquartered in Mountain View, is a leading worldwide supplier of network-based distributed computing systems, including professional workstations, servers and UNIX operating system and productivity software.

#90339b0646 12/05/1990 ~Business Wire

LOS ANGELES (DEC. 5) BUSINESS WIRE - Coast Savings Financial Inc. (NYSE/PSE:CSA) announced Wednesday that its subsidiary, Coast Federal Bank, FSB, has not received any acceptable offers to purchase its Central Valley retail banking offices and has determined they will not be sold at this time.

The company also announced that it continues to evaluate the offers received for its San Diego offices, all of which are below its original expectation. Any sale of the San Diego offices will be subject to execution of a definitive agreement and regulatory approval and, in any event, will not be completed prior to year end.

As a result of this and other factors, the company expects that Coast Federal Bank, FSB, will fail to meet the Office of Thrift Supervision's (OTS) increased risk-adjusted capital requirement of 7.2 percent effective as of Dec. 31, 1990.

In addition, it is unlikely that Coast will be able to achieve compliance with the OTS pending higher leverage capital requirement which the company anticipates will become effective during 1991.

The company also announced that as a result of the findings of the recently completed joint OTS and FDIC examination of the bank, the bank will be required to enter into a Supervisory Agreement with the OTS.

Under terms of the proposed agreement, the bank will be required to file a capital compliance plan with the OTS within 60 days, refrain from increasing liabilities beyond a specified level and revise certain policies and

procedures.

In addition, Coast will be prohibited from declaring or paying any dividend, repurchasing any class of stock or redeeming any outstanding subordinated debt without prior approval from the OTS.

Coast Savings Financial is the holding company of Coast Federal Bank. With assets of over $10 billion, Coast is one of the nation's largest thrift institutions. Coast's primary emphasis is on residential real estate lending and retail banking provided through 120 retail banking offices and eight regional mortgage lending centers located throughout California.

SYRACUSE, NY (DEC. 5) BUSINESS WIRE - ONBANCorp Inc. (NASDAQ: ONBK) Wednesday reported that the board of directors approved a 40 percent increase in its quarterly cash dividend to 7 cents per quarter or 28 cents on an annualized basis.

The increased dividend of 7 cents per common share will be payable on Jan. 2, 1991 to shareholders of record as of Dec. 19, 1990. The dividend represents a 2 cent per share increase over the 5 cents per common share paid in each of the prior four quarters and is the third successive yearly increase in ONBANCorp dividends.

Robert J. Bennett, chairman, president and chief executive officer stated, ''The steady improvement in ONBANCorp's core profit performance during 1990, despite considerable dislocation in the general banking industry, has enabled our board of directors to increase the return to our shareholders.'' Bennett noted that ''the company's first nine months earnings of $11 million exceeded the entire prior year total for 1989 of $10.96 million.'' 1989 was a record year.

''We also take great pride that the November 1990 issue of U.S. Banker ranked ONBANCorp's performance 'best in New York State and 8th in the NATION' among the largest thrift banking institutions.''

ONBANCorp's upstate New York market area activities include community and business lending, mortgages, home equity lines of credit, education lending, consumer credit, and deposit accounts for consumers and businesses.

ONBANCorp, with $1.9 billion in assets, is the bank holding company for OnBank and is the only Syracuse headquartered banking company with assets exceeding $1 billion. OnBank operates out of 27 locations in upstate New York,

including seven specialized lending offices in the regional communities of Syracuse, Auburn, Rome, Utica, Rochester, Rockland, Poughkeepsie, Binghamton, Buffalo and Albany, and has insurance and investment operations.

CORONA, CA (DEC. 5) BUSINESS WIRE - Golden Cheese Company of California (GCCC), is the 13th fastest-growing privately held company in the United States among 500 such companies, according to Inc. Magazine's 500 list, which has been ranking companies for the past eight years.

''Since starting production of Real California cheeses over five years ago, Golden Cheese has continued to top its own production records as the world's largest fully integrated natural cheese plant,'' said David Wooten, president of GCCC.

In 1989, Golden Cheese produced over 80 million pounds of natural cheddar, monterey jack, pepper jack, colby, mozzarella, Golden Balance (a reduced-fat

cheese line) and Shreddar (part-skim cheese for shredding), representing 12 percent of all cheese consumed by Californians.

In 1990, Golden Cheese will make more than 90 million pounds of natural cheeses in all sizes and shapes, ranging from eight-ounce retail packages up to 40-pound bulk blocks. That amounts to enough cheese to cover three cheeseburgers a week for all 30 million Californians all year.

Golden Cheese also has an annual production of 2.5 million gallons of ethanol alcohol, 7 million pounds of whey protein powder, 3 million pounds of butter and 37 million pounds of animal feed supplements.

The company has received more than 20 gold medals at the Los Angeles County Fair for its exceptional cheese and has received awards of excellence for its newly developed Golden Balance reduced-fat cheese.

NEW YORK (DEC. 5) BUSINESS WIRE - Echelon Corp., a Palo Alto-based company, announced the availability of LONBUILDER, an easy-to-use developer's workbench that will help companies incorporate a new class of control technology into products ranging from light bulbs to factory robots.

The new technology, called LON (local operating network), makes possible a new generation of smart, low-cost products that communicate with one another. LONBUILDER, a critical part of Echelon's LONWORKS product line, is a completely integrated, easy-to-use hardware and software environment for developing LONs.

LONBUILDER uses an object-oriented development model to provide users with a straightforward and easy-to-use method of programming applications. LONBUILDER, which uses a standard IBM PC/AT or compatible computer, makes it possible to develop a range of systems from small control networks of several ''smart nodes'' with simple on-and-off commands to large networks with thousands of smart nodes communicating over multiple media, including electrical powerlines, radio waves, optical fiber, coaxial cable, infrared, and twisted pair.

LONBUILDER supports the NEURON C programming language, a powerful, high-level language designed by Echelon to manage the details of network communications and device interfaces. Neuron C is based on the familiar ANSI C language.

Echelon Corp. was founded in 1988 to develop a new technology for the creation of the next generation of ''smart'' products. Echelon is a privately held

company headquartered in Palo Alto, Calif.

The company has a subsidiary, Echelon Europe, Ltd., located in the United Kingdom, phone number 011 44 71 431 1600. LONWORKS, LONBUILDER, NEURON C, NEURON CHIP and LONTALK are trademarks of Echelon Corp. Echelon and NEURON are registered trademarks of Echelon Corp.

WALTHAM, MA (DEC. 5) BUSINESS WIRE - IPL Systems Inc. (NASDAQ:IPLSA) Wednesday announced agreement with Bull Worldwide Information Systems for domestic service of IPL products for IBM midrange systems.

Under the terms of the agreement, Bull will provide a range of support services to IPL's U.S. DASD and tape subsystems under its TotalCare Service program. These services include contracted on-site response options and installation service. Both warranty and out-of-warranty service are part of Bull's service program.

In addition, IPL's customers will be able to call Bull's National Response Center, toll free, 24 hours a day, seven days a week to request service.

''We are pleased to offer our existing and potential customers an expanded service and support capability which will be provided by a company which is a recognized leader in the high technology service marketplace,'' said Phillip Guerard, IPL's senior manager of customer support and services.

Guerard continued, ''Since the Bull agreement will bring an increased level of service coverage to our U.S. customers, IPL will now be able to distribute its products throughout the U.S. without geographic limitations. This creates marketing opportunities for both IPL and Bull.''

Richard Suech, Bull's vice president, customer services operations, agreed. ''We can help IPL increase its market share and provide a high quality of on-site service to help meet their customers' needs. At the same time, servicing IPL's customers will provide Bull a new base to expand its service business.''

In October, IPL Systems and Richard Besner & Associates Ltd., one of Canada's major computer maintenance firms, reached agreement for RBA to provide Canadian service of IPL products. IPL's overseas service and maintenance is

handled by a variety of distributors, providing broad coverage of the European market.

IPL Systems supports its customers around the world with an international network of distributors and service providers backed by its own 24 hour, seven days a week technical support organization.

IPL (NASDAQ:IPLSA) designs, manufactures, markets and services a broad range of DASD and tape subsystems, plus memory upgrades for IBM midrange computers. The company was founded in 1973.

STOCKHOLM, Sweden (DEC. 4) BUSINESS WIRE - Ericsson is creating a new company for mobile networks in the field of business communications: Ericsson Business Mobile Networks BV.

The company will be headquartered in the Netherlands, where development and production have already been established in this field. Colin Buckingham, currently president of Ericsson Radio Systems BV, has been named president of the new company.

The company will initially develop, and through Ericsson's sales companies, market cordless communications systems for businesses, organizations and network operators.

These cordless communications systems can be connected to practically all types of private branch exchanges (PBXs). Already in 1991, the system will be sold as an integrated part of Ericsson's own digital PBX, the MD110 and BusinessPhone BCS 150.

The total world market for cordless communications networks has been variously estimated at between $15-50 billion and a significant portion of all private network users are expected to use cordless telephones within a few years.

The components of the Ericsson Business Mobile Networks system include a private communications network, radio base stations, and small portable telephones.

This is the first system in the world, based on picocell technology offering full mobility and at the same time interference-free communication, automatic

search within the coverage area and voice quality that equals hard-wired telephone networks.

''It is our experience from cellular mobile telephony, combined with our advanced PBX technology that makes it possible for us, as the first supplier in the world, to offer cordless communications systems for businesses and organizations,'' commented Lars Ramqvist, Ericsson president and CEO.

Ericsson is an international leader in telecommunications recognized for its advanced systems and products for wired and mobile communications in public and private networks.

Ericsson ADRs are traded on NASDAQ under the symbol ERICY.

MEMPHIS, TN (DEC. 5) BUSINESS WIRE - Response Technologies Inc. (ASE:RTK) (NASDAQ/NMS:BITXP) Wednesday reported results for the second quarter and six month period ended Oct. 31, 1990.

The company reduced its loss for the three month period ended Oct. 31, 1990 by 82 percent to $449,000 (8 cents per share) from a loss of $2.57 million (50 cents per share) for the same period of the prior year.

Net revenue increased by 330 percent from $272,000 to $1.17 million between the two quarters ended Oct. 31, 1990 and total costs and expenses were reduced by 44 percent from $2.96 million to $1.65 million.

The loss for the six month period ended Oct. 31, 1990 was reduced by 84 percent to $839,000 (16 cents per share) from $5.32 million ($1.04 per share) for the same period last year. Net revenue increased by 97 percent from $1.19 million to $2.36 million between the two six month periods ended Oct. 31, 1990 and total costs and expenses were reduced by 52 percent from $6.86 million to $3.26 million.

''We believe that our recently announced recapitalization, along with the continuing reduction in the loss, bode well for the future of the company,'' said William H. West, M.D., president and chief executive officer.

''These financial results are being generated by four centers, two of which just opened this quarter. Our fifth center is currently under development in Clearwater, Fla., and we are in discussions concerning potential centers at four other sites,'' continued West.

Response Technologies owns and operates IMPACT Centers which provide private practicing oncologists with the resources necessary to deliver advanced cancer treatments on an outpatient basis, principally through licensed pharmacies, laboratories and blood banks. The company operates IMPACT Centers in Memphis, Tampa, Fla., and Hollywood, Fla., and Columbia, Mo.

The common stock of Response Technologies Inc. is traded on the American Stock Exchange under the symbol RTK and its preferred stock is traded on the NASDAQ/NMS under the symbol BITXP.

#90339b0677 12/05/1990 ~Business Wire

NEW YORK (DEC. 5) BUSINESS WIRE - A new class of control technology, introduced Wednesday, provides the first low-cost way to distribute intelligence and control across groups of products.

Tools and components announced by Echelon, a Palo Alto, Calif.-based company, will make possible a new generation of ''smart'' products that have greatly increased functionality, efficiency and convenience. Products in many industries will be affected.

Support for the new technology platform was announced jointly by Motorola and by Toshiba. Both companies will produce the low-cost multiprocessor NEURON CHIP that makes the new intelligent control networks possible.

The new technology makes it easy for manufacturers to create inexpensive, virtually invisible networks of intelligent control devices that can sense, communicate and cooperate.

There can be more than 32,000 sense and control nodes per system. Small networks can be placed inside individual products such as copiers, automobiles or lighting systems. Larger networks can create ''smart environments'' in homes, buildings and factories.

Called a ''local operating network'' -- or LON -- the new network adds intelligence, communication and control functions to familiar products. Nodes on the network are ''smart nodes'' that can have the ability to sense and monitor, count and tell time, manage switches and relays and respond to conditions reported from other smart nodes.

LONs also provide a platform for communication and cooperation among products. Even simple products, if they communicate, can be linked together to form networks of great flexibility and power. Products will be able to communicate

and interact through common media such as electrical powerlines in a building or home, radio waves, twisted pair, coaxial cable or optical fiber.

Echelon is supporting the new LON technology with LONWORKS, a line of tools and components. These include LONBUILDER, a developer's workbench that makes it easy for engineers and manufacturers to accelerate the devlivery of LONWORKS-based products to market.

The LONs themselves will be built from off-the-shelf interlocking parts, including a powerful multiprocessor NEURON CHIP for each network node and a family of LONWORKS transceivers that connect these ''smart nodes'' via common media.

The LON concept was originated by Markkula, who funded three years of research before bringing the technology concept to Oshman. Markkula interested Oshman with what Markkula described as a ''chip small enough to fit any type of product, smart enough to communicate and to control other devices, flexible enough to communicate over standard media and cheap enough that anybody could afford it.''

This became the blueprint for the multiprocessor NEURON CHIP, which is the heart of the LONWORKS product line.

In recent years microprocessors and microcontrollers have increased the amount of intelligence in products from automobiles to programmable thermostats and from dishwashers to factory robots.

By and large, these products are considered ''smart,'' but do not have the ability to communicate with one another. If these smart products do communicate in some type of network today, they usually do so through a master controller and not directly.

Echelon's LONWORKS puts both intelligence and communications into each product permitting direct communication and cooperation among products, creating a more responsive and interactive environment for users and enabling products and environments that can operate more efficiently.

AKRON, OH (DEC. 5) BUSINESS WIRE - Ohio Edison Co. Wednesday announced that it has filed an application with the Ohio Environmental Protection Agency for

a permit to install tire-combustion handling equipment at its Toronto Plant in Toronto, Ohio.

In late May, Ohio Edison conducted an EPA-approved test at the Toronto Plant to determine the effect of burning waste tires with coal on plant performance and emissions. The four-day test showed no reduction in the performance of the plant or its environmental systems.

The test was conducted at Toronto because one of its boilers is suited for the controlled combustion of tires. During the test, tires comprised up to 20 percent of the boiler's fuel.

Edison expects it could burn about three million waste tires annually as a low-cost fuel at the plant, recovering the energy equivalent of 170,000 barrels of oil from waste tires otherwise headed for landfills or tire piles.

With approvals of the Ohio and U.S. EPA, waste tire combustion could begin at the Toronto Plant as early as the first quarter of 1991.

GABORONE, BOTSWANA (DEC. 5) BUSINESS WIRE - The Government of the Republic of Botswana and Lazare Kaplan International Inc. (''LKI'') announced Wednesday that they have signed a long-term agreement for the establishment of a diamond cutting and polishing factory in Botswana.

C.M. Lekaukau, Permanent Secretary, Ministry of Mineral Resources and Water Affairs, signed on behalf of the Government and Leon Tempelsman, president of

LKI, on behalf of the company. Botswana is regarded today as the most important rough gem diamond producing country in the world. LKI is the largest cutter and polisher of gem diamonds the United States, and sells its diamonds and jewelry products through a worldwide distribution network.

The government will own 15 percent of the new company and will be represented on its board. The cutting and polishing factory, representing a major new investment by a U.S. company in Botswana, will be a state-of-the-art facility using both automated and manual equipment, managed by LKI and committed to train and employ Botswana workers, with an ultimate goal of at least 500 skilled employees. The supply of rough diamonds to LKI will be expanded in order to efficiently operate the new facility. LKI will market its output worldwide.

According to Maurice Tempelsman, chairman of LKI, the factory in Botswana is intended to cut and polish rough diamonds which are presently not processed in the company's facility in Puerto Rico. It will also expand the product line of LKI by offering polished diamonds in sizes and qualities not currently in production. He went on to say, ''The establishment of this facility emphasizes the company's commitment to play an important role in the economy of Botswana.''

Lazare Kaplan International Inc. (AMEX:LKI) sells its diamonds and jewelry products through a worldwide distribution network. The company is noted for its ideal cut diamonds which it markets internationally under the brand name, The Lazare Diamond.

INDIANAPOLIS (DEC. 5) BUSINESS WIRE - Basic American Medical Inc. (BAMI) announced it has acquired through a wholly-owned subsidiary, certain assets in Charlotte, N.C., used in the manufacture of acute and long-term care beds, pediatric hospital cribs and other products and sold under the name Simmons Health Care.

Brady R. Justice Jr., president of BAMI, stated, ''Simmons has long been recognized in the industry as a leading provider of quality health care products. This acquisition will enable us to enhance the breadth of our product line and expand into new markets.''

This acquisition will enable BAMI, a major provider of health care products to

the long-term care industry, to expand into the acute care bed and pediatric crib market as well as enhance BAMI's line of long-term care beds. BAMI will continue to market the Simmons' product line under the Simmons' name.

Basic American Medical Inc. owns and operates acute care hospitals. It also provides services and products to the health care market, such as outpatient surgery, comprehensive medical rehabilitation, pharmacy services, medical equipment and furniture manufacturing and distribution. The company's common shares are traded under the NASDAQ symbol BAMI.

MARLBORO, MA (DEC. 8) BUSINESS WIRE - The board of directors of Stratus Computer Inc. (NYSE:SRA) announced Wednesday the adoption of a Shareholder Rights Plan providing a dividend distribution of one right for each outstanding share of common stock of the company.

The distribution will be made to stockholders of record on Dec. 20, 1990.

Shareholder rights plans, which have been adopted by more than 1300 U.S. corporations, including many computer companies, are designed to deter coercive or unfair takeover tactics and to prevent an acquiror from gaining control of a company without offering a fair price to all of the company's stockholders. The Stratus Shareholder Rights Plan is not being implemented in response to any known plan to acquire the company.

Under the Rights Plan, the rights would, among other things, be exercisable only if: a person or group acquired 20 percent or more of the company's common stock; or announces a tender offer which would result in its ownership of 20 percent or more of the common stock of the company; or a person or group owning 15 percent or more of the common stock of the company is determined by the company's board of directors to be an adverse person, as defined in the Rights Plan.

In that event, all stockholders, other than the 20 percent acquiror or adverse person, could exercise their rights and purchase shares of common stock at a substantial discount.

Details of the Shareholder Rights Plan are outlined in a letter that will be mailed to Stratus stockholders shortly after the December 20 record date.

Stratus Computer Inc. is a leading supplier of fault-tolerant systems for critical online applications, such as online transaction processing and online data communications and telecommunications applications. The company, whose

headquarters are in Marlboro, Mass., U.S.A., has 13 international subsidiaries. Stratus Computer Inc. common stock is traded on the New York Stock Exchange and the Boston Stock Exchange under the trading symbol SRA.

#90339b0712 12/05/1990 ~Business Wire

LONDON (DEC. 5) BUSINESS WIRE - Bass plc preliminary announcement of the results for the year ended Sept. 30, 1990:

Highlights

Earnings per ordinary share up 18.2 percent to	109.6p
Turnover up 10.5 percent to	4461 million pounds
Trading profit up 28.0 percent to	673 million pounds
Pre-tax profit up 14.9 percent to	535 million pounds
Total dividend per ordinary share up	14.9 percent
Balance sheet gearing	47 percent

Comments By The Chairman Of Bass plc On The Results

Bass, the UK's largest brewer and the owner of Holiday Inn, the world's largest hotel brand, today announced pre-tax profits for the 52-week year to 30 September 1990, 14.9 percent ahead at 535 million pounds compared to 465 million pounds for the 53-week period reported in 1989.

Trading profit was 28.0 percent up at 673 million pounds (526 million pounds:1989) on turnover which advanced 10.5 percent to 4461 million pounds (4036 million pounds:1989). Earnings per share rose by 18.2 percent to 109.6p and balance sheet gearing of debt to equity has been reduced from its peak to 47 percent at the year-end.

The directors recommend a final dividend of 23.4p net per ordinary share, making a total dividend of 32.4p net per ordinary share for the year compared to 28.2p net per ordinary share in 1989 - an increase of 14.9 percent.

During the year there were three key strategic developments which will shape the business for the 1990s.

First, the purchase of the Holiday Inn Business in North America in February 1990 completed the company's ownership of the Holiday Inn brand worldwide. The board believes that Holiday Inn, with almost 320,000 rooms worldwide, will provide significant growth opportunities in the 1990s.

The initial results from the business are in line with expectations at the time of acquisition and reflect the strength of the Holiday Inn brand.

As a franchisor of hotels, Holiday Inn enjoys a relatively stable income stream secured in total room sales. In the ten months under Bass ownership, the business has been extensively restructured with the twin objectives of reducing costs and providing a clear focus for future profitable development.

The launch of a new limited feature product, Holiday Inn Express, at the Worldwide System Conference in October was very positively received by franchisees and will extend the brand into a key growth segment in North America.

The hotels and restaurants division, incorporating Holiday Inn Worldwide and Crest hotels for part of the year as well as Toby Restaurants, reported turnover up by 55.4 percent and operating profits increasing by 69.1 percent to 127 million pounds (75 million pounds:1989).

Bass Brewers achieved a 20.9 percent improvement in operating profit to 177 million pounds (146 million pounds:1989) on turnover up by 5.3 percent. Overall, market share improved with significant gains in the highly competitive take-home trade. Free on-trade sales were up over the year, but sales to the Bass pub estate fell below last year.

STAMFORD, CT (DEC. 5) BUSINESS WIRE - Champion International Corp. said Wednesday that although markets for most of its paper products remain healthy, it expects results for the fourth quarter to be down sharply from third quarter results of 59 cents per share and well below earlier expectations.

The company said this quarter's results will be significantly affected by higher taxes related to cash accumulated for an expansion project at its Brazilian subsidiary. The project has now been postponed indefinitely. Consequently, the company has begun to reduce these cash holdings through dividend payments to the parent company, which incur a related tax.

The company also cited the sharp deterioration in its U.S. and Canadian wood products manufacturing business and the worldwide slump in pulp prices as additional reasons for the lower earnings.

The company's U.S. and Canadian wood products business has been operating at a loss during the quarter, and the company has curtailed production at numerous facilities.

Champion is one of America's leading manufacturers of paper for business communications, commercial printing, publications and newspapers.

Headquartered in Stamford, the company owns or controls 6.4 million acres of timberlands in the United States and is also a major manufacturer of plywood and lumber.

RIVER GROVE, IL (DEC. 5) BUSINESS WIRE - Wilson Sporting Goods Co. Wednesday announced plans for the first nationwide program to help tennis players recycle their plastic tennis ball cans.

Wilson tennis ball cans are 100 percent recyclable and are partially made from recycled plastic.

As part of the multi-faceted program, Wilson will provide tennis clubs and specialty stores across the country with collection bins for tennis ball cans; arrange for recycling of cans used at the U.S. Open and other major Wilson-sponsored tournaments; and implement a public education campaign to tell consumers about plastic recycling.

Wilson will launch its recycling program in February. The program was developed in conjunction with the National Association for Plastic Container Recovery (NAPCOR), the country's leading authority on PET (Polyethylene Terephthalate) plastic recycling. NAPCOR helps communities nationwide implement recycling programs. Currently, more than 450 cities collect PET plastic containers through curbside recycling programs.

As part of the recycling program, Wilson sales reps will provide free recycling bins and ''how-to'' posters featuring tennis great Chris Evert to tennis clubs in ten test cities across the country. The reps also will put club pros in touch with the proper recycling authorities and procedures in their cities. The in-shop effort will be rolled out to clubs in the rest of the country over the next year, according to Baugh.

In 1991, Wilson will arrange for collection and recycling of appoximately 30,000 tennis ball cans from major tournaments where Wilson is the official ball, including the U.S. Open and the Lipton International Player's Championships. Getting The Word Out To 4 Million Consumers

In addition, 4 million Wilson Championship Tennis Ball cans will contain a ''stuffer'' with information to help educate players about the facts of PET plastic recycling -- and encourage them to get involved. Supporting NAPCOR's Efforts

NAPCOR implements intensive public education campaigns on PET recycling in major markets across the country when curbside recycling programs are launched. Wilson will support these efforts by working with NAPCOR to reach tennis players within these cities with the message that tennis ball cans are recyclable.

According to Baugh, support materials and further details on the program will be unveiled at the Super Show in Atlanta in February.

Wilson Sporting Goods Co., the largest sporting goods company in the U.S., is based in River Grove. The company designs, manufactures and distributes sporting goods throughout the world. Wilson is a market leader in apparel, footwear, golf, racket and team sports.

WATERLOO, ONTARIO (DEC. 5) BUSINESS WIRE - Vestronix Corp., after a review of its revenues by Peat Marwick Thorne, has submitted revised financial statements for the nine months ended July 31 to its shareholders.

Frank Casillas, chairman, president and chief executive officer of Vestronix Corp. stated, ''This is another step on the road to the complete cleansing of all past irregularities in the company, ensuring future ethical business practices and creating a respectable environment wherein Vestronix can operate as the premier supplier of 'C' code applications generator products and services.''

Casillas also stated that the new board of directors wished to retract certain information previously released by Vestronix Corp.

Two prior announcements are rescinded. Vestronix has no agreement with the Internal Revenue Service nor the Treasury Department of the United States Federal Government. Likewise, no agreements exist with Martin Marietta, Iscomp Computers nor Computer Resources Corp. The revised Financial Statements reflect the reversal of $522,000.00 of revenue related to these agreements.

Since Oct. 1, the management team at Vestronix has developed and is closely monitoring a conservative business plan. ''The excellent progress we have made is most encouraging and we are confident that the future will see Vestronix viewed as favourably by its shareholders as its products are by its customers'' said Casillas.

''Vestronix Corporation has undergone a period of tremendous difficulty, severely impacting its human and financial resources, a period that would have put most companies out of business.''

Casillas stated, ''The fact that we have survived and are stronger than before clearly demonstrates the resilience and confidence of our key people in themselves, the products and the future.''

WALLINGFORD, CONN. (DEC. 5) BUSINESS WIRE - LPL Technologies Inc. Wednesday announced that its subsidiaries Amphenol Corp. and Pyle National will increase prices on their connector product lines.

These increases, the first broad based price increases in several years, will be effective Jan. 1, 1991 and are designed to absorb some of the raw material, labor and service cost inflation which has been experienced by the connector industry.

Included in the price increases will be the Amphenol-Bendix military/aerospace series, the Pyle National firewall and industrial connectors, the RF/Coaxial lines, Spectra Strip cable and the Amphenol Information Technology products. Price increases will generally be in the three to six percent range, though certain special and low volume part numbers may be higher.

Commenting on the price increases, LPL voce president, Martin H. Loeffler, stated, ''Amphenol and Pyle have been very sucessful in becoming low cost producers for our major product lines. We have historically passed on the cost savings to our customers by avoiding price increases. However, any further absorption of cost increases in today's market can only come at the expense of research and development, service and quality. Cutting costs in these areas is not consistent with our goals and objectives and we believe such actions would not be in the best long term interests of our valued customers.''

LPL Technologies Inc. operates through its subsidiaries Times Fiber Communications Inc., Amphenol Corp., Amphenol Interconnect Products Corp. and Pyle National. These companies manufacture coaxial cable, principally for cable television applications, connectors, fiber optic systems and

interconnect systems for the electronic, communications and aerospace industries.

Their products are engineered and produced in the United States, Canada, Europe and the Far East and sold by its worldwide sales and marketing organization.

#90339b0775 12/05/1990 ~Business Wire

BEDFORD, MA (DEC. 5) BUSINESS WIRE - Computervision, a world leader in workstation and PC CAD/CAM software, is pleased to announce the addition of hidden line removal (HLR) and quick faceted shading capabilities to its Personal Designer micro-based CAD package.

The new capabilities, which become available with Personal Designer Revision 4.1, make it easier for engineers to conceptualize complex mechanical designs from the desktop.

''Our goal is to make Personal Designer the most complete mechanical CAD package in the micro marketplace,'' says Bob Cronin, product manager of the Personal Designer system. ''The HLR and faceted shading capabilities that we have added with Revision 4.1 will enable designers to more readily visualize complex mechanical parts in 3-D space.''

The ability to remove hidden lines from wire-frame representations, and to generate faceted shaded pictures early in the design stage, without consuming a lot of time, will lead to better product design. Engineers can now get a better visual estimation of their progress in seconds. They can instantly get a precise reading on part orientation, particularly by relying on the faceted shading capability.

With Personal Designer Revision 4.1 software, designers can generate hidden-line-removed images and faceted shaded pictures without leaving the design environment, so there is no interruption to the basic work flow. The images can be displayed at any time, plotted in full color, and saved independently of the main drawing.

With Revision 4.1, HLR and faceted shading can be applied to entire models, or to specified sections of models. The user can vary display parameters such as light intensity, background and surface color, the number of facets, contrast (edge highlighting), and the number and placement of light sources. The designer can look through the faceted shading to the underlying geometry using a unique XRAY window feature.

These new features take full advantage of Personal Designer's multi-view environment, which lets a user display up to 32 views of a part simultaneously. Using the new features, the user can display several hidden-line-removed images or faceted shaded pictures of a part simultaneously on the screen, each of which can show the part from a different orientation.

Additional enhancements in Personal Designer Revision 4.1 include a TIGA driver, which supports any graphics board that uses the Texas Instruments Graphics Architecture (TIGA) standard.

BEDFORD, MA (DEC. 5) BUSINESS WIRE - Computervision, a leader in workstation and PC CAD/CAM software, reports a number of major developments with its VersaCAD product line.

The company is pleased to announce a major new revision of VersaCAD/386 software, which runs on 80386 and 80486 MS-DOS personal computers, and VersaCAD Design software, which runs on 80286 MS-DOS personal computers. New features of Version 6.0 include:

- Attributes for attaching non-graphical information (such as price or material type) to any graphic object. Users can extract attribute information and pass it to a data base program for easy generation of bills of materials, estimates, and other reports.

- Associative linear dimensions, which dynamically link the object and its dimensions. If the user changes geometry, the system automatically updates the dimensions, and vice versa.

- 2-D construction planes for creating complex 3-D models.

- Drawing import feature that lets users import drawings from the VersaCAD 2-D module directly into the VersaCAD 3-D module.

- Direct file exchange between VersaCAD/386 or Versa/CAD Design software and VersaCAD/Macintosh Edition software. This is an extremely useful feature for companies that use VersaCAD software on both MS-DOS and Macintosh computers.

VersaCAD/386, Version 6.0 software, has a U.S. list price of $3,495. VersaCAD Design, Version 6.0 software has a U.S. list price of $2,995. Customer shipments are expected to begin before year's end.

The third major release of VersaCAD software for the Macintosh computer has begun shipping from Computervision headquarters in Bedford, Mass. Version 3.0 features include:

- Attributes for attaching non-graphic information (such as price of material type) to graphics, including library symbols. Users can search for attributes, generate reports from them, or output attribute data for use with other applications.

- Parallel line/arc/circle feature that lets users automatically create parallels simply by selecting existing line/arc/circles and specifying an offset.

- Drawing preview feature that displays a thumbnail sketch of the drawing in the File/Open dialog box before the user opens the file.

- Direct file exchange between Macintosh and MS-DOS-based VersaCAD packages.
- Support of the Apple 8(asterisk)24 Display Card.

VANCOUVER, BC (DEC. 5) BUSINESS WIRE - Galactic Resources Ltd. and Cornucopia Resources Ltd. announce completion of a $5 million increase in the term loan to the Ivanhoe Joint Venture.

The funds, to be used for the Ivanhoe Phase I gold mine, were obtained from the French American Banking Corporation by Galactic Resources Ltd. on behalf on the joint venture.

The additional $5 million is repayable in equal monthly installments commencing on Jan. 31, 1991 and continuing through Feb. 28, 1992. The mining claims in the Butte and Velvet zones located in the Hollister Deposit at the Ivanhoe Property have been added as additional security for the aggregate advances under the loan which, as of today's date, were $12.5 million.

The other provisions of the loan remain substantially the same.

Galactic Resources Ltd. produces gold at the Ridgeway Gold Mine in South Carolina with partner Kennecott Ridgeway Mining Company (an indirect subsidiary of The RTZ Corporation PLC) and its Ivanhoe Gold Mine in Nevada as well as its wholly-owned Summitville Mine in Colorado.

Galactic Resources Ltd. also has precious metal development projects in California, Canada, and the Philippines. Galactic Resources Ltd. trades on

the American, Toronto, and Montreal Stock Exchanges.

Cornucopia Resources Ltd. trades on the U.S. NASDAQ National Market System (CNPGF) and is listed on the Toronto and Vancouver Stock Exchanges (CNP.T, CNP.V).

ATLANTA (DEC. 5) BUSINESS WIRE - First Financial Management Corp. (NYSE:FFM) Wednesday announced that its wholly owned subsidiary, NaBANCO, has purchased the merchant credit card contracts of Southeast Bank of Florida.

Southeast has one of the 10 largest bank merchant credit card portfolios in the United States, providing MasterCard and VISA merchant services throughout

the state of Florida. The portfolio has annual credit card volume of approximately $2.7 billion, with a total customer base of 7,000 comprised of large national and regional customers and a broad base of traditional merchants.

NaBANCO also recently purchased the merchant credit card contracts of the Bank of New York. The Bank of New York is a major provider of VISA and MasterCard merchant services in New York state and especially in metropolitan New York City, with a portfolio of approximately $525 million in annual credit card volume. The Bank of New York has developed a strong group of around 5,000 traditional merchant credit card customers.

In making this announcement, Patrick H. Thomas, chairman, president and chief executive officer of FFMC, said, ''We are pleased with this expansion of our services in the two significant markets of Florida and New York. These 12,000 merchant customers will be a valuable addition to NaBANCO's national presence and will significantly enhance its leading position in the merchant credit card business. We welcome the relationship with these fine financial organizations and the opportunity to provide a wide array of bankcard products and services and to offer state-of-the-art merchant services.

FFMC is an information services company which offers a broad range of data processing and related services to a large and diverse customer base. The company provides products and services to financial institutions, retail merchants, governments and other industries.

It is a leader in financial institution processing, data imaging, micrographics, electronic data base services, debt collection, and health and pharmaceutical claims processing and is one of the largest merchant credit card processors in the country. FFMC also owns Georgia Federal Bank FSB, the largest savings institution and one of the largest retail banks based in Georgia, and its subsidiary, First Family Financial Services, a major regional consumer finance company.

Its common stock is currently traded on the NYSE under the symbol FFM. Its debentures are quoted through NASDAQ under the symbol FFMCG.

BURLINGTON, MA (DEC. 5) BUSINESS WIRE - Home mortgage rates dipped below nine percent Wednesday for the first time in almost a year, according to John J. Sousa Jr., president of Commonwealth Mortgage Co., New England's largest mortgage lender.

"The primary reasons for the decline are the worsening economy and the strong possibility of peace in the Middle East,"' said Sousa, who added that "I would expect to see the 30-year mortgage head down to the mid 8 percent range in the next six months."

The firm's 15-year mortgage is currently 8.99 percent, down from 9.25 percent, and the two-step mortgage is now 8.75 percent, down from 8.99 percent. The 30-year home mortgage has remained unchanged at 9.5 percent.

The three programs offer 60-day rate-locks and require three points. "In the past, nine percent has proven to be a psychological barrier, and I would expect that this still holds true for many home buyers," Sousa commented.

"While the economy is in tough shape and home prices have suffered over the past 12 months, the rate drop is good news for anyone in the market for a home especially first-time home buyers," said Sousa, noting that "the seven-year, two-step mortgage has gained greater market acceptance over the past year and is proving to be a good program for certain buyers and especially those who are refinancing adjustable-rate mortgages."

Commonwealth has 17 offices throughout New England, a mortgage portfolio of $4.6 billion, and is the largest home lender in New England according to industry sources.

TINTON FALLS, NJ (DEC. 5) BUSINESS WIRE - Concurrent Computer Corporation announced it had re-elected Daniel S. Gregory and Dean W. Freed to its board of directors at its Annual Meeting of Stockholders today. Under the company's by-laws, directors are elected to one of three classes, with one class elected each year to a three year term.

Mr. Freed assumed the position of chairman of the board in September 1990 and continues to serve as a director, a position he has held since January 1987. He is a director of EG&G, Inc., a diversified provider of scientific products and services and a trustee of Eastern Enterprises.

Mr. Gregory has been a director on Concurrent's board since its organization in 1981 and was chairman of its board of directors from 1983 to September 27, 1988. He is a general partner of Greylock Management Corporation and a director of Teradyne, Inc., New England Business Service, Inc., Genetics Institute, Inc. and several private companies.

In other actions, the stockholders ratified the appointment of Coopers & Lybrand as the company's independent auditors for its current fiscal year.

Concurrent Computer Corporation, headquartered in Tinton Falls, New Jersey, is the leading supplier of high-performance, real-time computer systems worldwide.

The company's products, marketed through the Commercial Markets, Simulation/Training and Real-Time Technical Systems Groups, provide real-time solutions to the financial, communications, public sector, technical, aerospace, and simulation markets. Its common stock (CCUR) is traded on the NASDAQ National Market System.

CHELSEA, MA (NOV. 20) BUSINESS WIRE - Original Italian Pasta Products Co. Inc. (NASDAQ:ORIG), the Chelsea, Mass. based manufacturer and wholesale distributor of pasta and other Italian food products under the Trios label, announced Wednesday that Schreiber Foods Inc. of Green Bay, Wisc., has suspended acquisition discussions with the company.

According to Schreiber, discussions have been suspended because pending litigation, which both parties had hoped could be resolved, is still unsettled. Additionally, Schreiber Foods had concerns about a license agreement to the company from Genevieve and Anthony Trios and was unable to reach accord over the future of the agreement.

Paul K. Stevens, president of the company, expressed his disappointment that the company may be unable to effect a transaction that he considered to be in the best interest of all stockholders. He said: ''We are continuing our efforts, and if we are able to resolve these matters quickly, we may be able to resume our discussions with Schreiber Foods. However, Schreiber has its own plans and agenda, and if there is a protracted delay, the opportunity might be lost.''

If the transaction with Schreiber Foods does not proceed, the company, as it has previously reported, must raise additional capital in order to continue to operate independently.

For additional information, please communicate with Mr. Stevens at (617) 884-5211.

ALBANY, NY (DEC. 5) BUSINESS WIRE - Home and City Savings Bank announced that earlier Wednesday Rose Associates I, L.P. notified the Bank of its intent to nominate nine persons for election as directors of the Bank at its 1991 Annual Meeting of Shareholders.

Rose Associates had previously submitted to the Bank a proposal to expand the size of the Bank's Board of Directors.

Richard A. Ahl, executive vice president and treasurer of Home and City, stated ''As previously announced, our advisors have engaged in extensive discussions with Rose regarding the terms of a definitive acquisition agreement with respect to Rose Associates' outstanding acquisition offer. In light of the progress that has been made, we believe that Rose Associates' latest actions are unnecessary. These latest actions lead us once again to question whether Rose Associates is sincere in its stated desire to enter into an acquisition agreement that is in the best interest of all of the Bank's shareholders.

Nevertheless, the Bank continues to be hopeful that its ongoing discussions with representatives of Rose Associates will be productive and may lead to consideration by the Board of a definitive acquisition agreement.''

REDWOOD SHORES, CA (DEC. 5) BUSINESS WIRE - Oracle Corporation Wednesday announced the appointment of George Paul Dreyer to president of Oracle Complex Systems Corporation (OCSC), the Arlington, Va.-based systems integration subsidiary of Oracle Corporation. Dreyer replaces Robert B. Laurence.

Dreyer will report to Lawrence J. Ellison, president and chief executive officer of Oracle Corporation.

Previously, Dreyer was vice president and general manager of commercial programs for OCSC and prior to that he served as vice president of OCSC's federal programs. Dreyer was a vice president with Falcon Systems, a Washingon-based systems integrator that Oracle acquired in 1988.

Oracle Corporation, headquartered in Redwood Shores, Calif., is the largest supplier of DBMS software and the third largest software and services company in the world.

Oracle develops and markets an integrated line of software products for database management, applications development, decision support and office automation, as well as families of financial and manufacturing applications packages. All Oracle products are available on PCs, minicomputers and mainframes, and ORACLE is the first and only database to run on supercomputers.

The company offers its products, along with related consulting, education and support services, in 92 countries around the world. Oracle is a publicly held corporation whose shares are traded on NASDAQ/NMS with the ticker symbol ORCL.

EQUITEX NAMES NEW ACCOUNTANTS AND REPORTS SEC FILING OF COMPLAINT

WASHINGTON (DEC. 5) COMTEX - The 8-K report filed at the SEC shows on Oct. 9, 1990, Weiss & Co., independent accountants for Equitex Inc.(TICKER: EQTX), resigned from that office.

On Nov. 21, 1990, Equitex states it engaged the firm of Carol A. Davis, certified public accountants, in that office.

For the previous two fiscal years, audits performed by those former auditors contained no adverse opinion or disclaimer of opinion nor were they modified as to uncertainty, audit scope, or accounting principles.

Additionally, Equitex reports the U.S. Securities and Exchange Commission (SEC) filed a civil complaint in the U.S. District Court for the District of Colorado against numerous persons, mainly in connection with the trading activities of Power Securities Corp.

The complaint names 22 defendants and eight causes of action, Equitex says, two of which are directed against Henry Fong, president and a director of

Equitex.

It also names Equitex as a nominal defendant.

Equitex further states that the SEC alleges that Fong participated with others in a market manipulation of Star Publications Inc. ("Star"), and that he violated certain sections of the Investment Co. Act of 1940 by effecting transactions in Star, which was a portfolio company of Equitex.

The complaint seeks a permanent injunction against Fong and an accounting and disgorgement of profits from trading in Star.

Equitex states that the company and Fong have filed an answer denying the alleged violations and intend to vigorously defend this matter.

#90339c0063 12/05/1990 ~Comtex

WASHINGTON (DEC. 5) COMTEX - The 8-K report filed at the SEC shows Calcap-G.B. Associates, a joint venture in which Talcon L.P.(TICKER: TLCN) holds a 50% interest, has reached an agreement to terminate a contract to purchase certain real property located in Holmdel, New Jersey.

Talcon reports the contract, entered in 1986, was the subject of litigation between Calcap and the property owner, with each alleging the other failed to comply with terms of the contract.

The termination agreement requires Calcap to forfeit a $200,000 deposit, but relieves the joint venture from any obligations it might have had under the purchase agreement.

Talcon also states that Calcap is anticipated to be dissolved and that the dissolution will result in a write-off of approximately $800,000 by Talcon in the fourth quarter of fiscal 1990.

#90339c0064 12/05/1990 ~Comtex

WASHINGTON (DEC. 5) COMTEX - The 8-K report filed at the SEC shows on Nov. 16 1990, Headquarters 8A, a partnership in which Digital Solutions Inc. (TICKER: DGSI) and an unaffiliated party are equal general partners, failed to make a mortgage payment of $45,000 due on that date.

The partnership, says Digital, is in arrears in the payment of interest and principal on the mortgage and the payment of real estate taxes.

The partnership was formed on Oct. 9, 1988 for the purpose of acquiring and leasing an office building located in Monroe Township, New Jersey.

The company also is in arrears regarding the payment of rent and joint venture liabilities of approximately $300,000, and is liable for $3.64 million in outstanding mortgage principal.

Talcon states the partnership is seeking to sell or lease the office building, but has been unsuccessful in doing so.

WASHINGTON (DEC. 5) COMTEX - The 8-K report filed at the SEC shows that pursuant to the filing for bankruptcy by Laventhol & Horwath on Nov. 21, 1990, Amerihost Properties Inc.(TICKER: HOST) was notified by Laventhol that Laventhol would be liquidating their firm and unable to audit Amerihost's financial statements for the year ending Dec. 31, 1990, and accordingly resigned from their engagement as Amerihost's accountant.

Amerihost states it is in the process of selecting another accountant.

SCHEDULE 14D9

SEC - AMENDMENT NUMBER: 3

ANNOUNCEMENT:

In a letter dated Dec. 4, 1990 to its shareholders, Justin Industries Inc. (TICKER: JSTN) announced its recommendation of unanimous rejection of the Sutherland/Rosenstein offer because Justin believes that this is not the time to sell the company. Pursuant to the merger agreement dated as of Aug. 21, 1990 among TLAI, the Company and Tony Lama, TLAI was merged with and into Tony Lama on Oct. 15, 1990, whereupon Tony Lama became a wholly owned subsidiary of the Company.

SCHEDULE 13D

SEC - AMENDMENT NUMBER: NONE

G.T. BOYD OWNS 40,000 SHARES (18.35%) OF WORLD CONTAINER CORP.(TICKER: WRLD).

ANNOUNCEMENT:

On Aug. 24, 1990 World Container Corp. entered into a loan arrangement with Harris Trust and Savings Bank under which World Container Corp. borrowed $400,000 and can borrow up to $600,000. As a condition to making the loan, the bank required additional security in the form of guarantees from the Russell Trust, Jerome Laitala Trust and G.T. Boyd, who is an issuer director. To induce G.T. Boyd to undertake the risk involved with securing a portion of the line of credit, World Container Corp. issued warrants to G.T. Boyd to purchase 333,333 common shares, exercisable for 5 years.

PURPOSE:

Investment.

#90339d0110 12/05/1990 ~French/German News Agency
PANAMA CITY (DEC. 5) - U.S. troops in combat gear surrounded Panama's police headquarters Wednesday after a former police chief who escaped from prison Tuesday took it over with about 100 followers.

As Panama braced for a general strike, Eduardo Herrera denied he was attempting to topple the government.

"I categorically deny wanting to organize a military rebellion," said Mr. Herrera, 47.

The strike was called by 68 (eds: correct) unions, the first such action against the U.S.-installed government of President Guillermo Endara.

Mr. Herrera told a group of journalists allowed to enter the central barracks of the Panamanian Public Force that he was concerned about the salaries,

working conditions and "dignity" of the Public Force police.

Mr. Endara early Wednesday criticized "the irresponsible attitude" of "certain members" of the police who had decided to join the 24-hour strike.

In a nationwide radio broadcast, the president urged workers to show up for their jobs, but advised families in the capital and its suburbs not to send their children to school.

Following the president's broadcast, Mr. Herrara said in a communique that Public Force officials would observe the strike because the police "believe the government does not respond fairly and positively to public demands."

The retired colonel said Deputy Interior Minister Ramon Lima had been allowed to leave the barracks, and would report back on the government's response to the concerns he had expressed.

Mr. Herrera said he had the backing of 600 Public Force followers who were ready to provide "the support of all the country's barracks."

Panamanian authorities for their part reported that the rest of the country remained "calm." They did not release details of how Mr. Herrera took over the barracks.

The U.S. Army units stationed at bases in Panama's canal zone were deployed outside the barracks, located in a suburb in the west of the capital, at the request of the Endara government.

As dozens of U.S. troops wearing combat gear surrounded the barracks, a U.S. military officer could be seein attempting to negotiate with a group of the mutineers.

In Washington, U.S. Defense Department spokesman Terence Meehan confirmed that U.S. troops were providing a "perimeter security cordon" around the headquarters.

#90339d0250 12/05/1990 ~French/German News Agency

PARIS (DEC. 5) - Elton John says he has conquered a drinking problem and now plans a complete rest from music to concentrate on his own life.

Speaking in Paris, the flamboyant rock superstar said: "I've stopped drinking -- I went into detox in America a while ago. Drinking used to make me angry, I could not face my own problems. I'm happy today just getting up in the morning."

He added: "I'm not going to do a tour for a year-and-a-half, it's time to have

a rest, I'm tired of the same old routine."

In the past two years, he has completely changed his life, selling off his art collection and Watford Football Club. He dates the transformation to his meeting with Ryan, a nine-year-old American haemophiliac who subsequently died of AIDS.

That made him realise how empty his own life was, he said. "The most difficult thing to say was, "I need help." I was too self-centered for that," he added.

"At 43, I've decided to live a different life. I got to the point where I wasn't doing anything for myself. I've only just started answering the phone myself again."

He said he decided to sell off his posessions when he looked around his house and discovered it resembled a warehouse. "There wasn't any room left for me," he said.

#90339d0400 12/05/1990 ~French/German News Agency

AYODHYA, INDIA (DEC. 5) - Thousands of Hindus have gathered here to resume an explosive crusade to replace a decrepit Moslem mosque with a temple, raising fears of another bloody showdown between police and the faithful.

Despite attempts by the organisers to limit their numbers, more than 10,000 zealots are already here and hundreds more are still entering the bustling riverside temple town in northern India.

The Hindu concentration has sparked fears of another repeat of the confrontation between temple activists and security forces that left 24 people dead on October 30 and November 2 in police gunfire.

But Hindu militants intent on building a temple for their Lord Rama at the 16th-century mosque site are unfazed.

"Our aim is to secure our right to build the temple at the disputed place," said Atma Chetan, a 65-year-old Hindu ascetic. "It is ours and should be given to us."

"We are determined, very determined," added Purushottam Narain Singh of the Vishwa Hindu Parishad (VHP, World Hindu Council), which is at forefront of the temple construction campaign.

Hindu militants say the mosque was built at the birthplace of Lord Rama, a divine symbol of good portrayed by mythology as an incarnation of the god Vishnu, after demolishing a Rama temple. Moslems do not accept the account.

The VHP and other militant groups have declared they will not relent until they are successful.

Efforts by the administration of Prime Minister Chandra Shekhar to head off the campaign have failed. However, two rounds of talks in New Delhi over the last week bringing Hindu and Moslem leaders together were seen as a positive development.

The authorities in this northern Indian town were keeping their fingers crossed for the rally Thursday despite assurances by the VHP that its cadres will remain disciplined.

"We sincerely and really hope that everything goes off peacefully," said a senior official of the paramilitary Central Reserve Police Force (CRPF), standing outside the heavily barricaded Moslem shrine.

MUNICH, Germany (DEC. 5) - Andre Agassi, the world number four, will miss the Grand Slam Cup, the richest tennis tournament ever staged, here next week.

Agassi, winner of the Masters in Frankfurt, has been ordered by doctors to rest for between three and six weeks after tearing a chest muscle during the American victory over Australia in the Davis Cup final in St Petersburg, Florida, last Sunday.

His place in the line-up will be taken by another American, Brad Gilbert.

World number two Boris Becker has already announced he will not take part in the six million dollar event.

ANKARA (DEC. 5) - Turkey will send two lorryloads of medicines to Iraq, it was disclosed here Wednesday.

Ihsan Saraclar, the deputy president of the Turkish Red Crescent Association, said the lorries would leave for Baghdad Thursday.

He said there were 112 different medicines in the aid package requested two weeks ago by visiting officials of the Iraqi Red Crescent.

There were no pain killers or any other medicine with battlefield application among those being sent, Saraclar noted, adding that the provision of aid did not breach the U.N. embargo against Iraq.

#90339d0510 12/05/1990 ~French/German News Agency
LONDON (DEC. 5) - The British side of an operation by Eurotunnel, responsible for completing the tunnel under the Channel, to raise 532 million pounds (about one billion dollars), has been subscribed to the extent of 84.3 per cent, the Morgan Grenfell bank said here on Wednesday.

The bank was responsible for the British side of the capital-raising operation which accounted for 42 per cent of the total.

The remaining 16 per cent was placed with mostly British financial institutions through the stock market here early on Wednesday at market prices, the bank said.

About 70.8 million shares were sold of 83.98 million on offer in Britain.

In France Banque Indosuez was responsible for placing 115.4 million shares, and was due to announce the outcome on December 14.

The level of subscription in Britain was higher than had been estimated. Some analysts had even warned that it would flop. They said that publicity surrounding the meeting of the French and British ends of the service tunnel on Saturday had been a major factor in encouraging the public to buy shares.

On Wednesday, Eurotunnel shares rose by 27 pence in London to 370 pence. Before the operation to raise capital was announced, they were at 435 pence.

#90339d0520 12/05/1990 ~French/German News Agency
PARIS (DEC. 5) - Cambodian resistance leader Prince Norodom Sihanouk appeared before a French court here Wednesday on libel charges filed by Cambodian Foreign Minister Hor Nam Hong.

The case arose from an interview with Prince Sihanouk published by the French paper, Journal du Dimanche, in which he accused the official of the Phnom Penh regime of having commanded a Khmer Rouge concentration camp.

Mr. Hor Nam Hong, who was also present to testify, is seeking 500,000 francs (100,000 dollars) in damages from Prince Sihanouk. The resistance leader has been in the French capital for some two weeks now trying to organize talks to break the stalemate in the Cambodian peace process.

Roger Therond and Remi Favret, the director and a journalist for the Journal where the interview appeared on July 23, 1989, are also being sued.

Mr. Hor Nam Hong told the court Wednesday that he had never directed any such

camp but that as a "former Sihanoukist", he himself was detained in a re-education camp for intellectuals from 1976 to 1978. He told the court he had been arbitrarily appointed in 1978 to head the camp "committee" responsible for handling food distribution, giving out work and organising political brain-washing sessions. "To refuse or ask questions would have been suicide," he said.

Prince Sihanouk had accused him of "responsibility for the death, following atrocious torture, of many former members of the anti-American resistance" - an apparent reference to royalist supporters who opposed the pro-U.S. Lon Nol regime ousted by the Khmer Rouge.

The trial, which continues Thursday, was given the go-ahead last July after the French court ruled that Prince Sihanouk, whose coalition has U.N. recognition, had no diplomatic immunity in the case.

The Phnom Penh regime is not recognized by the United Nations.

#90339d0740 12/05/1990 ~French/German News Agency

BAGHDAD (DEC. 5) - Iraq on Wednesday issued a stiff warning to Saudi Arabia, declaring that the kingdom's commander-in-chief would be held personally responsible for Saudi and Iraqi casualties in any attack on Baghdad.

The warning came as President Saddam Hussein chaired a meeting of the Iraq's supreme decision-making bodies, the Revolutionary Command Council and the Baath party leadership.

In a message to General Khaled bin Sultan, the Iraqi News Agency quoted Iraq's army chief of staff as saying his Saudi counterpart would be held accountable "for any loss of Iraqi or Saudi blood" in an attack on Iraq.

The Iraqi officer, who was not named, said he was responding to statements by Gen. Khaled that Saudi troops "were undergoing training to prepare for an attack on Iraq."

The Iraqi News Agency provided no details on the agenda of the party and command council meeting, the first since U.S. President George Bush proposed -- and President Hussein accepted -- a U.S.-Iraqi dialogue on the situation in the Gulf.

Mr. Hussein met here Tuesday with King Hussein of Jordan, Yemeni President Ali Salem al-Beid and Palestine Liberation Organization Chairman Yasser Arafat.

The four leaders hailed the prospect of U.S.-Iraqi contacts and called as well as for inter-Arab talks to secure a peaceful settlement to the Gulf crisis and other Middle East issues.

#90339d0920 12/05/1990 ~French/German News Agency
BRUSSELS (DEC. 4) - The president of the GATT ministerial conference told the European Community (EC) on Wednesday that it has until 12 noon (1100 GMT) Thursday to submit new agricultural proposals, his spokesman said.

Hector Gross Espiell's deadline had been communicated to several government ministers and the representative of the EC in the General Agreement on Tariffs and Trade (GATT) conference, spokesman David Woods said.

He added that consultations were still under way Wednesday in a bid to break a deadlock between the EC and its major trading partners over cuts in farm subsidies.

Mr. Gross Espiell did not say what the consequences of EC failure to meet the deadline would be, Mr. Woods said.

#90339d1110 12/05/1990 ~French/German News Agency
LONDON (DEC. 5) - Cuts in defence expenditure are likely to lead to loss of a third of a million jobs, union official John Wheatly said Wednesday.

Mr. Wheatly, an official of the Amalgamated Engineering Union (AEU), was speaking as unions met to discuss their response to British Aerospace's announcement Friday that it was to cut 5,000 jobs at military aircraft manufacturing plants in Kingston, near London, and Preston, in north-west England.

The trades unions involved in the defence industries estimate that at least a million jobs are dependent on military expenditure. Mr Wheatly said a third of those jobs are likely to disappear as a result of the post-cold-war "peace dividend".

As well as discussing the immediate response to the British Aerospace job losses, unions grouped in the Confederation of Shipbuilding and Engineering Unions will be seeking to develop their campaign for diversification of the defence industries into civilian manufacturing.

Peter Knox, European electronics analyst at Salomon Brothers in London, commented that, "the position is still very uncertain". In his view the full impact on employment of defence expenditure cuts will be difficult to gauge until there is greater clarity on the scale of defence cuts and on which areas of the defence industries they will fall.

THE HAGUE (DEC. 5) - The Netherlands will grant a loan of 93 million guilders (54.7 million dollars) to Turkey, Jordan and Egypt, the three countries most affected by international sanctions against Iraq, a Foreign Ministry spokesman said here on Wednesday.

He said the funds would be divided equally among the three countries, over a two-year period. Each country will receive 18.45 million guilders this year, and 12.55 million next year.

JERUSALEM (DEC. 5) - Israeli military authorities in the occupied territories may begin deporting suspected activists in the nearly three-year-old Palestinian uprising (intifada) in mid-December, the Israeli press reported Wednesday.

The reports said preparations for the controversial step had been largely completed. The most prominent Palestinian leaders were said to be excluded from the plan.

The Israeli government was awaiting a court decision that would speed up the normally protracted deportation procedure, the reports added.

Meanwhile, the banned Islamic fundamentalist organisation Hamas called for intensifying the armed struggle against Israel. To mark the intifada's third anniversary December 9, the group distributed fliers urging Palestinians to carry out attacks on Israelis.

''The enemy should not be allowed a moment's rest,'' the fliers said. ''Trained and armed suicide assassins should be smuggled as deep as possible into enemy territory.''

There have been 13 knife attacks on Jews on Israeli territory since October 8, when Israeli police shot at least 16 Arabs to death during unrest on Jerusalem's Temple Mount.

STOCKHOLM (DEC. 5) - The Gotlandsolja firm, a subsidiary of Swedish oil company Grauten Oils, has discovered oil five kms (three miles) from Baaticks, a locality in western Gotland Island in the Baltic Sea, Grauten said on Wednesday.

It lies about 170 kms southeast of Stockholm.

The announcement said two wells 288 meters deep have been drilled, and pump tests will soon indicate the output capacity.

PANAMA CITY (DEC. 5) - U.S. troops Wednesday captured a renegade former police chief who had led a rebellion by about 200 armed followers against the government of Panamanian President Guillermo Endara.

Former colonel Eduardo Herrera could be seen in television reports surrounded by U.S. soldiers after he attempted to lead his followers out of the central police headquarters here where he had been holed up since late Tuesday.

At least one Panamanian policeman was wounded by gunfire when Mr. Herrera was captured, the television report said.

The renegade policemen had marched out of the police barracks in the Panama City suburb of Curundu about an hour earlier but had been dispersed by U.S. troops surrounding the building and Mr. Herrera was able to flee.

#90339d1700 12/05/1990 ~French/German News Agency

LONDON (DEC. 5) - Saatchi and Saatchi, the British advertising and public relations group, reported on Wednesday a net loss of 98.2 million pounds (186 million dollars) for the financial year ending on September 30.

That compares with a loss of 58.5 million pounds (111 million dollars) for the previous financial year.

But pre-tax profit before extraordinary charges jumped by 63 per cent, to 35.6 million pounds, against 21.8 million for the previous financial year. The pre-tax profit exceeds analysts' forecasts, which called for 25 to 30 million pounds.

As had been anticipated, no dividend was declared. Saatchi said on September 7 that it would be unable to pay any dividends for the latest financial year to holders of ordinary and preferred shares.

Chairman Maurice Saatchi warned that 1991 would be a "difficult year," but said the group was now well positioned to benefit from any recovery of the advertising market. He noted that the group's agencies had managed to preserve their market shares.

The extraordinary losses, amounting to 76.9 million pounds, are due to the restructuring costs that the group incurred during the financial year, and

particularly to the sale of several consulting firms.

A provision of 23 million pounds was set aside to offset losses on the property market.

Saatchi is trying to get back to good financial health by shedding secondary activities and concentrating on advertising, advertising space-buying, direct marketing and public relations.

#90339d1740 12/05/1990 ~French/German News Agency

VIENNA (DEC 5) - The Czechoslovak market economy will get a real start as of January 1 thanks to a four-phase privatization process, Czechoslovak Privatization Minister Tomas Jezek said Wednesday.

Speaking in Eisenstadt, southeastern Austria, he said the first phase of privatization of government-owned property would entail redistribution of property nationalized at the end of the 1950s, already in progress under a law promulgated last November 1.

He said in this connection that "A year ago, nobody (in Czechoslovakia) would have talked about privatization. We thought we could find a third way, between communism and capitalism. Those illusions are dead."

The second phase, which he called "little privatization," will be based on public auctions of restaurants, stores and various service businesses, selected by a special committee in each of the country's 75 districts.

At the first round of such auctions, prices may fall by up to 50 percent from the initial price estimate, and on the second round by an additional 20 per cent, he said.

Foreigners may take part in the sales, as long as they pay 50 percent of the initial price. Receipts from "little privatization" will be used for making loans to companies.

The third phase will be "major privatization," to be discussed in parliament in the next few days. Mr. Jezek said the central aspect of that phase will be the possibility open to any citizen to acquire 1,000 "investment points," which will enable him to buy shares in the big firms to be privatized.

Due to the low level of private saving in Czechoslovakia, foreign investors will be able to take part. The minister said that he thought that foreign capital would account for the entire sale of a large number of big companies. "Without foreign capital, the Czechoslovak economy cannot be put on its feet," he commented.

The fourth phase will consist in the establishment of some joint ventures, and that phase has actually already started, he said.

Privatization of agriculture will be carried out slowly, the minister said. "It's a relatively prosperous sector. Unlike the Soviet Union, we have no problems of production or supply in the food field."

Part of government-owned undertakings will not be privatized: the railways, telecommunications and energy.

#90339d1830 12/05/1990 ~French/German News Agency

San Salvador (DEC. 5) - An escalation in fighting between the army and anti-government rebels has claimed 100 dead and wounded over the past two days, according to statements by the two sides Wednesday.

On November 19, rebels of the leftist Farabundo Marti Liberation Front (Fmln) launched an offensive aimed at forcing the government of Salvadoran President Alfredo Cristiani to resume peace talks.

Meanwhile, the fate of the seven crew members aboard an air force Ac-47 transport plane that the rebels downed with a rocket Tuesday remained uncertain.

Eyewitnesses said the seven had bailed out with parachutes.

#90339d1850 12/05/1990 ~French/German News Agency

WASHINGTON (DEC 5) - The World Bank has approved a 114.3-million-dollar loan to China, the first non-humanitarian credit since the bloody Chinese Army crackdown on pro-democracy militants 18 months ago, the Bank announced here Wednesday.

It said its board of governors gave its green light at a meeting Tuesday for the loan package aimed at financing technological improvement of China's rural sector.

The package includes a 50-million-dollar, 20-year loan from the World Bank and a 64.3 million-dollar 35-year credit from the International Development Association, the World Bank's soft loan affiliate.

Until now the bank's policy in the wake of the June 1989 crushing of the pro-democracy movement in Beijing's Tiananmen Square had been to approve only loans designed to meet humanitarian needs.

In fiscal 1990 which ended last May 30, the bank extended loans totalling 590

million dollars to China and since June 1, it has lent 275 million dollars.

Before the June 1989 crackdown, China had been receiving World Bank loans totalling more than two billion dollars annually.

There had been speculation prior to Tuesday's meeting of bank governors that the United States would oppose the loan package to signal its displeasure with Beijing's human rights record.

But Washington, which controls less than 20 per cent of the Bank's capital and would therefore have been unable to block the loan, raised no objection.

The bank's decision came less than a week after President George Bush met for the first time since the Tiananmen Square crackdown with Chinese Foreign Minister Qian Qichen.

That meeting came a day after China abstained in a U.N. Security Council vote authorizing the use of force to dislodge Iraqi troops from Kuwait.

#90339d1890 12/05/1990 ~French/German News Agency

BUENOS AIRES (DEC. 5) - President George Bush is considering lifting trade restrictions on U.S. exports to the Soviet Union for up to a year, a White House spokesman said Wednesday.

White House spokesman Roman Popadiuk said Mr. Bush was examining several trade recommendations, among them a one-year suspension of the Jackson-Vanik amendment which conditions all U.S. aide to the Soviet Union on adoption by Moscow of more liberal emigration policies.

No decision has yet been taken, Mr. Popadiuk said here in Argentina where he is accompanying the U.S. president on his third stop of his five-nation tour of South America that ends Saturday.

U.S.-Soviet trade policy has come under reconsideration as Moscow faces increasingly grave economic difficulties and as Germany offers massive assistance to the Soviets to prevent shortages as winter approaches.

Asked last week about liberalizing U.S. trade policy toward the Soviet Union, Mr. Bush said the Soviet parliament had not yet acted to adopt more liberal emigration policies.

But he also said he would take into consideration the large number of Soviet Jews that have been permitted to emigrate and American grain producers who want the United States to grant the Soviet Union loans for purchasing U.S. grain.

#90339d1920 12/05/1990 ~French/German News Agency
BRUSSELS (DEC 5) - The chairman of the stalled world trade summit on Wednesday gave the European Community (EC) until mid-day Thursday to improve its offer on farm subsidies, but EC negotiators immediately rejected the move.

The "ultimatum" was issued by Hector Gros Espiell, Uruguayan chairman of the 107-nation conference organized by the General Agreement on Tariffs and Trade (GATT) to conclude the Uruguay Round talks, GATT spokesman David Woods told reporters.

"The Uruguay Round is at present dead in the water," Australian trade negotiations minister Neal Blewett said. "It has very little chance of survival," he told a news conference.

Ambassador Tran Van Thinh, a key EC negotiator, said he was not aware of any ultimatum. If there was one, the answer was "negative", he said.

The Community refused to be placed "in the dock," he added.

Asked whether a deal on agriculture remained possible, he replied: "On condition the Community is not alone" in moving.

EC farm commissioner Ray MacSharry said "we cannot accept that the EC has to give on all fronts."

Another ranking EC official said the Community would not accept isolating agriculture from the other 14 areas being negotiated in the Uruguay Round, the biggest-ever efforts to free up world trade and extend GATT disciplines to new areas.

Mr MacSharry also stressed that agriculture was only one of the issues facing ministers here, adding that it was wrong to consider it as "the" issue.

He said there had been "no movement" on several issues, including services, textiles and trade-related investment measures.

Mr. Woods said Mr Gros Espiell made it clear to ministers of EC countries that the community must make a new offer on reducing subsidies to farmers, an issue which has blocked the GATT talks.

But he added that the conference chairman had not spelt out the consequences if the deadline were missed.

#90339d1970 12/05/1990 ~French/German News Agency
PARIS (DEC. 5) - The Paris Bourse made a moderate gain on Wednesday, even

though hesitation on Wall Street at the latter's opening checked operators' enthusiasm here late in the session, analysts said.

The CAC-40 stock price index followed up its slight 0.10 per cent gain on Tuesday with an advance of 0.84 per cent on Wednesday, after opening 0.89 per cent higher.

Analysts said that despite worries about interest rates, including possible higher rates in Germany, the Bourse was helped by the existence of substantial available cash for market investments. For the last few days, managers of "Sicav" mutual funds have been buying to use what they regard as excessive cash on hand.

Eurotunnel was again the center of attention, with 6.3 million shares changing hands on Wednesday after 7.7 million on Tuesday. The shares rose by 4.7 per cent here on Wednesday, to 35.85 francs, and by 27 pence in London to 370 pence.

In addition, Thomson-CSF rose by 5.1 per cent on the day on 588,000 shares,

CCMC jumped by 20 per cent, MMB 8.8, and Generale Occidentale 8.5 per cent. BIP lost 5.8 per cent, GTM Entrepose 4.4, and Geophysique 3.2 per cent.

#90339d2010 12/05/1990 ~French/German News Agency

ABU DHABI (DEC 5) - United Arab Emirates (Uae) President Sheikh Zayed bin Sultan al-Nahyan said Wednesday he was confident that Kuwait would eventually be liberated from Iraqi occupation.

''Kuwait will regain freedom as it was before the treacherous Iraqi occupation because the Kuwaiti cause is a crucial issue for the international community.

''This cause is based on the principle of not allowing the aggressor to benefit from his aggression and to safeguard stability in the region,'' he said.

Sheikh Zayed made his remarks during a meeting here with a delegation of the Kuwaiti People's Congress.

A general Kuwaiti congress, representing a wide spectrum of Kuwaiti society, was held in the Saudi Red Sea port city of Jeddah in October under Kuwait's exiled Emir, Sheikh Jaber al-Ahmed al-Sabah.

Zayed reiterated the Uae's stance calling for a total Iraqi withdrawal from Kuwait and the return of the legitimate government led by Sheikh Jaber.

#90339d3150 12/05/1990 ~French/German News Agency
MOSCOW (DEC. 5) - Russian Federation President Boris Yeltsin on Wednesday warned the Soviet army against attempting a coup.

Mr. Yeltsin, speaking at the Dzerzhinski military academy in Moscow said a coup would "lead the country to a catastrophe," even "civil war."

"Soldiers cannot play an important role in the state, but I am categorically opposed to the idea of solving the crisis through force, by relying on the army," Mr. Yeltsin said.

His speech for the academy's 170th anniversary was reported by the unofficial Interfax news agency.

"The army cannot solve economic problems and today this is the main issue", he said, adding that if a coup did take place it would "deprive us of our last chance of finding a positive outcome, our last chance of avoiding a civil war."

He also said that "if one brought the army into our unstable society, the confrontation would get worse, which would lead our country to catastrophe."

"The army is not united...we are aware of the differences (among soldiers). The army could split into opposing group and the current peaceful political struggle could become armed," Mr. Yeltsin said.

"In the knowledge that our country is a nuclear power, this hypothesis would be a threat not only for our country, but for the whole world," he added.

He said he backed the idea of a "total reform" of the army and noted that "the best reform project cannot only be worked out by the Ministry of Defence."

"It is in our best interest to have an efficient military policy, stable peace security for the country and a high quality army," he added.

Stressing that Russia was preparing a series of measures to provide social protection for soldiers during the difficult period introducing a market economy, Mr. Yeltsin said committees would be set up by next February in Russian cities and regions to look into soldiers' rights and complaints.

#90339d3200 12/05/1990 ~French/German News Agency

QUETTA, Pakistan (DEC. 5) - Pakistan's nuclear program is entirely peaceful, army chief General Aslam Beg said here Wednesday, "thanking" those who would have the world believe the country already had nuclear weapons.

"Thanks to those who have made the world believe that we have a military nuclear capability, that we have the components of a nuclear bomb stacked away in safe places ready to be assembled at short notice, and that we have developed" a delivery system, Gen. Beg told army officers here.

"We are grateful to them for building such an image since it deters aggression against Pakistan," the Associated Press of Pakistan quoted him as saying.

Washington suspended some 600 million dollars of economic and military assistance to Pakistan when U.S. President George Bush failed to certify to Congress -- as required by law -- that Islamabad did not have and was not planning to build nuclear weapons.

U.S. Deputy Secretary of State for South Asia, Teresita Schaeffer, is due here for talks on the issue this week to be followed by a senior official from the Pentagon.

#90339d3290 12/05/1990 ~French/German News Agency

WASHINGTON (DEC. 5) - Secretary of State James Baker Wednesday reaffirmed during Senate hearings on the Gulf crisis that the United States would support Israel if it were attacked by Iraq.

"If there is an unprovoked attack against Israel, there would be an appropriate response from the United States," Mr. Baker told the Senate Foreign Relations Committee.

He said he had no reason to believe under the current circumstances that Israel was inclined to provoke Iraq.

Mr. Baker said that such support would not destroy the international coalition against Iraq and would be understood by the United States' Arab allies given the Gulf crisis.

"I think this would be understood by our allies," Mr. Baker said.

#90339d3320 12/05/1990 ~French/German News Agency

PARIS (DEC. 5) - Iranian Foreign Minister Ali Akbar Velayati held more than one hour of talks with his French counterpart Roland Dumas here Wednesday focusing on the Gulf crisis and bilateral relations, French officials said.

Mr. Velayati arrived here Wednesday for a three-day official visit which France hopes will mark an important step in normalizing relations between the two nations. It is the first to France by an Iranian foreign minister since the fall of the Shah in 1979.

Mr. Velayati and Mr. Dumas discussed the crisis sparked by the August 2 Iraqi invasion of Kuwait on Wednesday as well as bilateral and cultural relations, French officials said. The two ministers will have two other rounds of talks Thursday and Friday.

Mr. Velayati is to meet President Francois Mitterrand Thursday. Talks will also be held with Prime Minister Michel Rocard and Finance Minister Pierre Beregovoy.

Analysts noted that Iranian respect of U.N. sanctions against Iraq has contributed to softening the international community's dealings with the republic.

Most notably, the 12-nation European Community in October ended the sanctions it had imposed after the late Iranian spiritual leader Ayatollah Ruhollah Khomeini called for the death of British writer Salman Rushdie in February last year.

Official Teheran Radio said Iran and France both agreed on the need for a peaceful solution and for regional states to assume responsibility for security in the region.

But it said France had "shown itself in favour of the idea of making concessions to Iraq against its withdrawal from Kuwait, while Iran has repeatedly affirmed it cannot accept any geographic change in the region."

Mr. Velayati is also expected to discuss bilateral issues, notably economic and trade relations between France and Iran.

Diplomatic sources in Teheran said a long-standing financial dispute between the two countries would figure prominently in the discussions, as well as plans to boost economic cooperation.

The dispute centers on the reimbursement of outstanding debt and interest on a

billion dollar loan made by Iran to France before the 1979 revolution and on Iran's compensation to French companies for broken contracts. But the issue is so complex that it needs a political settlement, diplomatic sources said.

-30- 2542
#90339d3410 12/05/1990 ~French/German News Agency
PARIS (DEC. 5) - French President Francois Mitterrand met German Chancellor Helmut Kohl Wednesday for talks preceding next week's European Community summit in Rome.

The two held two hours of discussions during dinner at the Elyee Palace to go over details of the proposed European monetary and political union, an issue which will be discussed next week at inter-governmental conferences.

Kohl and Mitterrand meet regularly to discuss their joint positions before important decisions are taken by the European Community.

Asked if the current negotiations on the General Agreement on Tariffs and Trade (Gatt) were discussed, Kohl said: ''We talked about everything.''

#90339d3680 12/05/1990 ~French/German News Agency
ON BOARD THE RAINBOW WARRIOR (DEC. 5) - The Greenpeace environmentalist group rejected Wednesday as too limited a proposed meeting with French officials on Moruroa atoll, France's nuclear test site in the South Pacific.

President of Greenpeace France Alain Connan, speaking by radio, told the captain of a French frigate shadowing Rainbow Warrior II as it reached the atoll's 12-mile exclusion zone that the offered meeting was unacceptable and showed that Paris was not portraying an image of openness in the region.

A Greenpeace letter to the French Defence Ministry, conveyed Wednesday to the captain of the Lieutenant de Vaisseau Lavallee frigate, said its proposal to set up a mission under the atomic energy commission was unlikely to cast much light on the effects of nuclear testing on the atoll.

He was responding to a defence ministry letter Tuesday which offered Greenpeace officials a day-trip to Moruroa to examine "the state of the test site and of the environment."

The defence ministry said those in charge of the site would "answer all scientific queries," while the meeting would "demonstrate the willingness of the government to be open and engage in dialogue."

The invitation was a serious, realistic first step and a "pre-requisite for discussions and exchanges of view between organisations such as yours and the

testing authorities."

It also said that because of considerations of sovereignty, the Rainbow Warrior II itself would have to remain outside territorial waters and that any of its crew would be taken to the atoll by government vessels.

Meanwhile, Rainbow Warrior II continued its sampling programme outside the 12-mile zone, under constant surveillance from three French navy ships and a helicopter.

The ship later headed out to sea to gather comparative samples.

Greenpeace officials said no test results were yet available.

-30- 2100

#90339d3810 12/05/1990 ~French/German News Agency

WASHINGTON (DEC. 5) - The United States and Soviet Union have come closer to signing a nuclear arms pact as negotiators cleared away three stumbling blocks officials said.

Negotiators have agreed to limit Soviet Backfire bombers outside the treaty, allow joint U.S.-British nuclear programs to continue and restrict the modernized Soviet SS-18 missiles so they cannot carry a payload larger than the earlier version of the SS-18.

One official, who asked not to be named, did not say how many Backfire bombers would be permitted.

But Mr. Bush has put on hold his plans to travel to Moscow until negotiators attempt to agree on how weapons systems are inspected and interpretation of missile data.

Under the pact, Soviet and U.S. arsenals are to be cut by 30 percent and hundreds of warheads are to be scrapped.

Both sides are to meet Friday in Washington to discuss technical matters. On Monday, Secretary of State James A. Baker and Soviet Foreign Minister Eduard Shevardnadze will meet in Houston, Texas.

Several stumbling blocks remain in the talks before the Strategic Arms Reduction Treaty (START) will be completed. One official said the remaining disagreements were significant enough to block the agreement, but another said they were "not enough for anyone to fall on their sword over."

-30- 1526

#90339d4240 12/05/1990 ~French/German News Agency

WASHINGTON (DEC. 5) - Secretary of State James Baker Wednesday expressed deep pessimism that sanctions alone could force Iraq to pull its troops out of Kuwait but failed to sway Democrats on the Senate Foreign Relations Committee.

Forcefully defending the administration's strategy to force Iraqi President Saddam Hussein to relinquish Kuwait, Mr. Baker warned that: "If (force) must be used, it will be used suddenly, massively and decisively."

"Nobody can tell you that sanctions alone will force Saddam Hussein out of Kuwait...I am personally very pessimistic that they will. This pessimism, I would also share with you, is shared by our recent intelligence estimates," he said.

President George Bush, who is currently visiting Argentina, made the same point, saying, "I've not been one who's been convinced that sanctions alone will bring him (Mr. Hussein) to his senses."

The secretary of state argued that postponing indefinitely a military showdown with Iraq would harm U.S. interests and would only help Mr. Hussein succeed in his bid to wipe Kuwait off the map.

Mr. Baker's comments came just as the State Department announced that Iraq accepted Mr. Bush's offer of high-level talks on the Gulf crisis, although no dates have been set yet.

Mr. Bush proposed Friday that Iraqi Foreign Minister Tareq Aziz visit Washington some time this month and that Mr. Baker subsequently travel to Baghdad in an eleventh-hour bid to avert a Gulf war.

The president made the announcement a day after the U.N. Security Council approved the use of force against Iraq if it did not withdraw its forces from Kuwait by January 15.

"Waiting not only gives Saddam time to break the sanctions, but it imposes costs on us ... As we wait, Saddam will continue torturing Kuwait, killing it as a nation. He will continue to fortify Kuwait, to build chemical and and biological weapons and to acquire a nuclear weapons capability," Mr. Baker said.

But Democratic members of the Senate Foreign Relations Committee contended that the draconian economic sanctions imposed by the U.N. should be given more time to work, a view echoed by seven former defense secretaries and former top military leaders.

#90339d4320 12/05/1990 ~French/German News Agency

AJACCIO, France (DEC. 6) - Nine Impressionist paintings valued at 20 million dollars and including Claude Monet's "Impression Soleil Levant", stolen from Paris's Marmottan Museum in October 1985, were recovered Tuesday in southern Corsica, police said late Wednesday.

Seven persons were arrested and were to be transferred to Paris after the paintings were found in a Porto-Vecchio villa belonging to 30-year-old Dona Comiti, Corsican police said without revealing further details.

Besides "Impression Soleil Levant", valued at a conservative four million dollars and the painting that gave its name to the Impressionist school, four other Monets, two Renoirs, a Berthe Morisot and a Naruse were stolen from the Marmottan Museum on October 27, 1985.

The paintings were removed in broad daylight by five armed men as some 40 visitors looked on. The alarm system was turned off during the day.

The theft took less than 10 minutes and a museum official said at the time: "These men were connoisseurs. They knew just what they were looking for."

The four other Monets were "Camille Monet et sa cousine sur la plage a Trouville", "Portrait de Jean Monet", "Portrait de Poly, pecheur de Belle-Isle" and "Champ de tulipes en Hollande".

The paintings by Auguste Renoir were "Baigneuses" and "Portrait de Monet". Also recovered were "Jeune fille au bal" by Berthe Morisot and "Portrait de Monet" by Naruse.

NEW YORK, UNITED NATIONS, (DEC 5) - U.N. Secretary General Javier Perez de

Cuellar Wednesday urged the international community to send aid to 350,000 Liberians without food, water or medicine because of that nation's civil war.

Mr. Perez de Cuellar asked for 13.8 million dollars in urgent humanitarian aid just for Liberians living in the capital, in addition to the 11.8 million dollars in food, medical and equipment to purify water the United Nations is preparing to send.

The secretary general stressed that the year-old civil war had turned 500,000 Liberians into refugees while another 1.5 million people had fled their homes but remained inside the country.

He said 120,000 children were affected.

The nation's infrastructure has been completely destroyed, the secretary general added in a written statement.

Children as well as adults are suffering from protein and vitamin deficiencies as well as malaria, respiratory problems and diarrhea, Mr. Perez de Cuellar said.

#90339d4490 12/05/1990 ~French/German News Agency

BOGOTA (DEC. 5) - Colombia's drug traffickers Wednesday accused Medellin police of killing at least 300 people and called on family members of the alleged victims to demand stiff punishment for the authorities.

In a statement sent to the media, the extraditables, the armed wing of the Medellin cocaine cartel, claimed the lieutenant of the elite police force,

Nestor Eduardo Porras, had given evidence to a judge about the killings.

The statement said Lt. Porras alleged Medellin police officials "participated in the killings of at least 300 people," but the statement did not say when they murders were carried out.

The extraditables also said the lieutenant implicated the chief of the Investigative Judicial Police, Colonel Oscar Pelaez, and Colonel Lino Pinzon Naranjo, in the alleged murders as well as in tortures and disappearances.

Drug traffickers have repeatedly targeted Col. Pelaez for alleged human rights violations.

In their statement, the extraditables called on the families of those whom had allegedly been killed by police to stick together and demand severe punishment for the offenders.

The Attorney General's Office is investigating an allegation made two days ago by the Ochoa Vasquez family -- which has been linked repeatedly to drug trafficking -- implicating Col. Pelaez in the deaths of a family member and a family chauffeur.

The extraditables recently said they would surrender if the government made guarantees regarding their safety and legal status.

NEW YORK, (DEC 5) - International Business Machines (IBM) announced Wednesday it was transferring the headquarters of its global communications business from New York to the London suburbs.

The announcement marks the first time the company, the world's largest computer firm, will headquarter a division outside the United States, IBM spokesman Peter Thonis said.

The decision was made as part of IBM's strategy to become more international and acknowledge the importance of European communications equipment, Mr. Thonis said.

Some 120 people will be moved when the section is transferred to the London suburbs in the third quarter of 1991, IBM said.

SAN SALVADOR (DEC. 5) - Salvadoran rebels declared a unilateral ceasefire in the capital Wednesday to allow family celebrations for Christmas and the New Year.

In a statement sent to local media, the high command of the Farabundo Marti National Liberation Front said the ceasefire was limited because "the high command of the government army has not agreed to a truce."

For the Christmas holidays, the ceasefire is to start the morning of December 24 and end on the evening of December 25. The truce will begin again the morning of December 31 and end the evening on January 1.

BUENOS AIRES (DEC. 5) - Argentina and the United States signed an agreement Wednesday to refinance Buenos Aires' debt with the U.S. Agency for International Development and the U.S. Export Import Bank.

The 265 million dollar accord will re-open Argentina's access to the Ex-Im Bank's lines of medium and long-term credit, which were shut down two years ago.

Ex-Im loans are generally meant to be used to import capital goods.

Signing the accord were U.S. Treasury Secretary Nicholas Brady, who travelled to Argentina with President George Bush, and Argentine Economy Minister Antonio Gonzalez.

The agreement is equal to the capital and interest which was to have been paid between July 1988 and March 1991, said Argentine officials.

PERTH, AUSTRALIA (DEC. 6) - The former head of the Bond Corp., Alan Bond, was charged by Western Australian police here on Thursday under the Securities Code.

Mr. Bond, 52, was released on bail after being charged with one count of inducing another to deal in securities.

Mr. Bond, a business magnate who achieved world fame in 1983 when he brought the America's Cup to Western Australia, arrived at police headquarters here just before 9 a.m. local time and was released on bail about an hour later.

Bail was set at 100,000 Australian (77,000 U.S.) dollars, with a similar surety.

The charge relates to an aspect of the 1987 rescue of Rothwells merchant bank, which subsequently collapsed.

The charge alleges Mr. Bond dishonestly concealed a material fact from another Perth businesman, Brian Coppin.

Mr. Bond was expected to appear in the Central Lawcourts here on Friday.

AUCKLAND, NEW ZEALAND (DEC. 6) - A series of strikes which could bring chaos to New Zealand's domestic air network later this month were still on Thursday, but efforts to prevent them were under way.

Maintenance engineers, baggage handlers and aircraft refuellers could stop some or all flights over seven days this month -- December 10-12, 14, and 17-19.

Although unrelated, the planned strikes are over various aspects of new wage contracts.

Employers Association advocate Marau Russell said Thursday there had been no developments that would avoid the strikes, but added that talks were continuing.

An advocate for maintenance engineers and baggage handlers with Air New Zealand and its subsidiaries, Rex Jones, said a work stoppage and secret ballot were still planned for December 14 on whether to have their strike.

He had been hoping employers would come back and negotiate.

Air New Zealand public relations officer Cameron Hill said Thursday there were still "some substantial issues to be resolved" over this dispute. However the company hoped for further discussions over the next few days.

TAIPEI (DEC. 6) - Taiwan's exports rose 10.7 per cent and imports 6.2 per cent in November over a year earlier, the Directorate General of Budget, Accounting and Statistics said Thursday.

Exports in November amounted to 6.09 billion U.S. dollars, while imports in the month totalled 4.75 billion dollars, registering a surplus of 1.34 billion dollars, an impressive 30.4 per cent advance over November of last year, the government agency said.

The country's foreign trade in the first 11 months of this year grew seven per cent to 116.68 billion dollars -- including 61.76 billion dollars of exports, a 1.5 per cent rise, and 49.92 billion dollars of imports, a 3.8 per cent growth, it said.

Total trade surplus for the export-oriented island in the January-November

period was still down 7.4 per cent over the same period of last year to 11.84 billion dollars, it added.

The trade surplus with the United States, Taiwan's largest trading partner, plunged 22.9 per cent to 8.61 billion dollars in the period amid efforts by Taipei to reduce the trade gap which hit 12 billion dollars last year, it said.

The U.S. took a 30.3 per cent share of Taiwan's overall exports in the first 11 months, followed by Hong Kong with 14.7 per cent, the agency said.

The long-standing trade deficit with Japan, Taiwan's biggest supplier, surged 10 per cent to 7.02 billion dollars in the same period.

Japan sold 14.64 billion dollars worth of products to Taiwan, accounting for 29.3 per cent of total imports, it said.

#90339d5130 12/05/1990 ~French/German News Agency

BRISBANE, AUSTRALIA (DEC. 6) - The former head of the failed Australian property group Hooker Corp., George Herscu, was found guilty Thursday of two corruption charges.

A District Court jury here returned the verdict following a four-week trial during which Mr. Herscu, 62, had pleaded not guilty to making a 100,000 Australian dollars (76,600 U.S.) corrupt payment in 1983 to then Queensland minister Russ Hinze.

Defence lawyer Kerry Copley asked for the sentencing to be adjourned until Friday.

Mr. Herscu had said in his defence he paid the money to Mr. Hinze for the purchase of race horses.

He said he had wanted Mr. Hinze, whom he regarded as a race horse authority, to buy him two yearlings and had allowed Mr. Hinze to use the money as a loan until the horses were bought.

The prosecution had told the court the money was paid to Mr. Hinze as a reward and to encourage his assistance with political favours.

Lawyer Robert Mulholland told the court that Mr. Herscu had wanted the city council to change restrictions on vehicle and pedestrian access to a southside shopping centre owned by one of his companies.

The court heard that no race horses were ever bought and the money was repaid, with interest calculated at 15 per cent, five years later in December 1988.

Mr. Hooker, which had assets in the United States, went into liquidation in July 1989, owing more than 1.9 billion dollars (1.46 billion U.S.) to 45 local and foreign banks.

HANOI (DEC. 5) - Vietnam, faced with an imminent shortfall in its supply of cheap Soviet oil, is hoping Western or Japanese firms will help it build a billion dollar refinery to meet its domestic needs, industry sources here say.

The project was first proposed by the Soviet Union, Vietnam's ally and main supplier of aid, which is now itself in such an economic mess that it wants hard currency for all future payments from erstwhile friends.

Initial work has already begun at the site between Ho Chi Minh City, the economic powerhouse of the south, and Vung Tau, adjacent to Vietnam's sole offshore oil field at Bac Ho.

The aim of the project is first to fill Vietnam's current need of three million tonnes of gasoline a year, but with total output projected to reach five million tonnes, the refinery could also earn much needed foreign exchange to shore up the country's virtually bankrupt economy.

Western sources here say the World Bank has already rejected the project, saying there are enough refineries in southeast Asia and suggesting that Vietnam have its oil refined in Thailand.

Industry sources said three firms - the Anglo-Dutch giant Shell, Total of France and the Japanese trading house Nissho Iwai - were in the running for the project.

The Soviet Union supplied Vietnam with about 90 percent of its oil until April when it began cutting back shipments; it announced last month that its total oil exports would be halved in 1991.

The Soviet Union probably shipped only 60 percent to 70 percent of Vietnam's oil requirements in the first six months of this year, industry sources said.

Petrol prices here have risen some 300 percent in the last six months and there are frequent shortages in Ho Chi Minh City.

Vietnam is expected to produce between 2.2 million and 2.5 million tonnes - or 50,000 barrels per day (bpd) - this year, with nearly all exported to Japan, Hong Kong and Singapore.

The authorities say production should reach 60,000 bpd next year.

TOKYO (DEC. 5) - Japanese telecommunications giant Nippon Telegraph and Telephone Corp. (NTT) said Wednesday it had developed the world's smallest and lightest portable telephone.

The new phone, measuring 150 cubic centimetres (nine cubic inches) and weighing 230 grams (eight ounces), is about a third of the size of existing NTT models and has already undergone trial production, the company said.

An NTT spokesman said it would be marketed in Japan from early next year at between 180,000 yen and 200,000 yen (1,385 dollars and 1,540 dollars).

#90339d8910 12/05/1990 ~French/German News Agency
CANBERRA (DEC. 5) - Iraq is to release seven Australian hostages, a spokesman for Australian Foreign Minister Gareth Evans said Wednesday.

"We understand that's the case through our diplomats in Baghdad," the spokesman said.

"It's our understanding that the names will be announced by the hostages themselves in Baghdad," he said.

But a spokesman for the foreign affairs department was more cautious about the release of the hostages, among 30 Australian hostages being held throughout Iraq and occupied Kuwait.

"Something is about to happen it seems," he said. "We are not in a position to say anything until it's absolutly clear."

The Australian Associated Press (AAP) reported that Australia's ambassador to Iraq, Peter Lloyd, has confirmed that seven hostages would be released.

A representative of Iraq's national assembly told the two private Australian envoys - Tom Uren, a former federal minister, and Edward Obeid of the Australian Arab organistion - of the decision, AAP quoted hostage spokesman Bruce Watkins as saying.

The decision was expected to be "rubber stamped" later in the day, he said.

#90339d8930 12/05/1990 ~French/German News Agency
MELBOURNE, Australia (DEC. 5) - Car maker Ford Australia will sack almost 600 white collar workers within 48 hours, a company spokesman said Wednesday.

Mike Jarvis, Ford's general manager public affairs, said the loss of 571 jobs in Australia's three eastern states was part of the company's 1.2 billion dollar (930 million U.S.) restructuring plan announced in April.

It was only partly in reaction to slumping car sales which was causing a huge stockpile of unsold vehicles to pile up, he said.

Ford, one of five large car companies operating in Australia, captured about 20 per cent of vehicle sales in October to make it the second biggest seller behind Toyota.

In 1989 Ford's net profit slipped 1.6 per cent to 124.1 million dollars (96 million U.S.) despite being the market leader.

Ford employs about 13,000 workers throughout Australia.

#90339d8980 12/05/1990 ~French/German News Agency

SINGAPORE (DEC. 5) - Chemical Bank inaugurated its new regional headquarters here Wednesday, saying economics dictated a move from Hong Kong rather than fears about the British colony's future under Chinese rule.

Officials of the New York-based bank told a news conference that its Singapore centre would manage Chemical's foreign exchange and other activities for all of Asia except Japan.

The original 70-strong staff here will be boosted to 100 within five months, including 35 foreign exchange dealers, and the bank's financial services group has launched an on-line centre for funds transfers.

David Taylor, managing director in charge of Chemical's global securities and foreign exchange dealings, said the bank is "committing significant corporate resources to the expansion of our treasury and trading activities in Asia."

He said Singapore was chosen as a regional headquarters because of its international profile, good communications infrastructure, skilled work pool, and "a supportive regulatory and governmental structure."

Bank officials denied the headquarters move from Hong Kong was prompted by concern about the territory's prospects after 1997 when sovereignty reverts to Beijing under an accord with Britain signed six years ago.

They said they saw no reason to keep open two foreign-exchange dealing rooms and their rent here was three times less than in Hong Kong. Overall, they said, the move will save Chemical about three million U.S. dollars a year.

#90339d9000 12/05/1990 ~French/German News Agency

CANNES, France (DEC. 5) - Japan will experience a tourism and leisure boom by the end of the century, experts have told a symposium on the "empire of rising leisure" here.

Japan has earmarked 25,000 billion yen (about 200 billion dollars) for investment in about 830 new tourist resorts during the next 10 years, the Tokyo Leisure Center research director Atsuki Onaga told the fifth international forum for leisure equipment.

This would double the country's capacity to cope with tourism, he said.

At the beginning of the next century 20 per cent of Japanese land would be reserved for different leisure activities, and particularly for golf which has acquired almost religious status for many Japanese.

Three years after the introduction of the resort law intended to encourage Japanese to make use of their holiday entitlements, the leisure business is in the grip of frenetic activity.

Nearly all of the 47 prefectoral administrative districts have launched studies to develop leisure zones with a view to obtaining state approval, and 24 of them have already won overall permission to go ahead.

The French-Japanese Creat K consultancy is advising on development of the coastline. One of the company's experts, Fumiko Kaneko, said that "most big Japanese companies, even if they have nothing to do with this sector, do not want to be left out of the leisure market".

The Nissan car manufacturing group has decided to take an interest.

The director of the Nissan Construction subsidiary Michio Suzuki has contacted the local authority of Higashino, a group of villages straggling across 19 islands by the sea in the area of Hiroshima.

His idea is to develop a resort which would link health care with industry based on products processed from seaweed.

Mrs. Kaneko said that the treatment of people by sea-water and seaweed "is an area in which demand will not be long in developing in Japan, and for which the best response would be co-ordination between French and Japanese groups with special expertise".

MANILA (DEC. 5) - The Philippines will impose a seven per cent levy on all imports in order to shrink its growing budget deficit, Finance Secretary Jesus Estanislao said here Wednesday.

President Corazon Aquino had earlier signed an order imposing a five per cent levy on imports to take effect on December 11 but Mr. Estanislao said she would soon issue another order raising the levy by two more points.

The levy is part of a series of measures including tax reform and a 25 billion peso (892.8 million dollar) cut in the budget to control the deficit and pave the way for an approval of a 700 million dollar credit program with the International Monetary Fund (IMF.)

#90339d9170 12/05/1990 ~French/German News Agency

TEHERAN (DEC. 5) - Iran dismissed a U.N. draft resolution on alleged human rights abuse in the country as "insufficient" and said investigation of any irregularities should be based on Islamic values, the IRNA news agency reported Wednesday.

Late Tuesday a United Nations commission that oversees human rights matters urged Iran to rectify what it said were violations in a proposal to be submitted to the General Assembly for final approval.

The call came after U.N. special representative Galindo Pohl released a critical report on human rights in Iran following a week-long visit to the country in October.

An Iranian foreign ministry spokesman, cited by IRNA, said the commission had to take into consideration the "legal and ideological framework of the Islamic Republic."

"This point must be clarified to all the defenders of human rights: the Islamic Republic of Iran, under no conditions, will quit legal regulations and laws of Islam and that the human rights issue can be investigated in Iran only if it is aloof from political motives and is with understanding of these values," the spokesman said.

He stressed that Iran considered the draft resolution "insufficient because of the inevitable influence" of the Pohl report.

The spokesman charged that the special representative's report "provided the United States with an opportunity to exploit the situation and efforts were made to approve a strongly-worded resolution against Iran."

The U.N. draft resolution was crafted by 19 countries, most of them Western nations.

The London-based human rights monitoring organisation Amnesty International on Wednesday called on Iran to end to more than a decade of human rights abuses

In a statement, it accused the Iranian Government of "relentless and ruthless violations of the most basic human rights, including the execution of more than 5,000 people in the last three years".

In the organisation's view, "virtually nothing has changed" since its last report three years ago, despite the end of the Iran-Iraq war and the death of Ayatollah Ruhollah Khomeini.

#90339d9290 12/05/1990 ~French/German News Agency

LONDON (DEC. 5) - Afghanistan President Najibullah held secret talks with mujahedeen guerrilla leaders last month in Geneva where he presented a plan for a transitional government that could end the country's 12-year civil war, The Independent reported Wednesday.

Mr. Najibullah, 42, "reached an understanding" with the leaders of five of the seven guerrilla factions that have continued fighting to topple his government since the pullout in 1988 of 130,000 Soviet troops supporting him, the daily reported.

"This war has no winner," Mr. Najibullah said in an interview with The Independent.

He said he had tabled a plan to form a new "transitional council" with representation from the guerrilla factions and his own administration that would aim to enforce a cease-fire and steer the country towards democratic elections to be held under United Nations supervision.

"One way or another, almost all of them are in favour of this transitional council," Mr. Najibullah said, adding that the powers of the new council would exceed those of his own government.

The article stated that Gulbuddin Hekmatyar and another hardline Moslem guerrilla leader had been opposed to Mr. Najibullah's plan.

Mr. Hekmatyar's 5,000-strong faction had said it would capture Kabul this winter but had so far confined itself to firing rockets blindly at the capital from behind the mountains outside Kabul, the article stated.

The Independent said that Mr. Najibullah was thought recently to have met an envoy of the exiled Afghan king, Zahir Shah, in Geneva but said the president dismissed suggestions that he should step down in favor of the deposed monarch.

"I'm still young, I have my energy," Mr. Najibullah said.

#90339d9360 12/05/1990 ~French/German News Agency

TOKYO (DEC. 5) - Asia is poised to overtake the United States as Japan's biggest export market this year due to the slowdown in the U.S. economy and strong demand in Southeast Asia, according to a Japanese trade group.

The Japan Foreign Trade Council, grouping major trading firms, said a recent survey showed that exports were likey to grow 4.9 per cent to 287 billion dollars in the current fiscal year ending in March. Exports were also likely to grow at the same rate the following year, reaching 301 billion dollars.

But it also noted that exports to non-communist Asian nations - mainly the Association of Southeast Asian Nations (ASEAN) and newly-industrialised South Korea, Taiwan, Hong Kong and Singapore - were particularly brisk.

The council noted strong demand for items such as office equipment and industrial machinery among the ASEAN countries (Indonesia, Thailand, the Philippines, Malaysia, Singapore and Brunei). Demand for consumer electronic equipment is meanwhile strong throughout East Asia, it added.

"Due to strong growth in ASEAN countries and a recession in the United States, (non-communist Asian nations) are likely to replace the United States as the top export market," the council said in its foreacast for fiscal 1991.

Japanese exports to non-communist Asian nations rose 7.2 per cent from a year earlier to 41.2 billion dollars in the six months to September, the first half of the current fiscal year. Exports to the United States grew at a slower pace of 5.5 per cent, reaching 47.1 billion dollars, in the same period.

The Asian nations, mainly ASEAN and the newly-industrialised economies, accounted for 30 per cent of all exports while the United States absorbed 34 per cent, according to figures compiled by Japan's Finance Ministry.

Japanese exports to the Asia-Pacific region overall - including China and Australia - already exceed those to the United States. In the six months to September, the country's exports to China amounted to 4.1 billion dollars while those to Australia came to four billion dollars.

#90339d9370 12/05/1990 ~French/German News Agency

NUREMBERG, Germany (DEC. 5) - Unemployment in former East Germany rose by a sharp 8.8 per cent in November, to affect 592,200 people, but fell back slightly in former West Germany, the Federal Office of Labour reported Wednesday.

The figures, which came only three days after Chancellor Helmut Kohl's election victory, highlighted the widening economic gap between the two sides of the country, analysts said.

A further 52,400 east Germans registered as unemployed in November, bringing the local unemployment rate to 6.7 per cent, an increase of 0.6 of a percentage point over October, it said.

Another 70,100 were placed on short-time work, which is often a prelude to unemployment as ailing state firms are privatised or liquidated, the office said. It brought the total on short time to 1,773,900.

In the west of the country, 2,300 people found jobs, bringing the total to 1,685,100 persons, or 5.8 per cent of the workforce. In the past year, more than a quarter of a million people in west Germany have found work, as the economy has boomed from unification by providing goods and services for the east of the country.

In the united Germany, total unemployment stands at 2.274 million, plus 1.773 million on short-time working, in a population of around 78 million.

TOKYO (DEC. 5) - Japan's Sony Corp. has been overwhelmed by the initial response to its new digital audio tape (DAT) walkman but is not planning to raise production for the time being, a company spokesman said Wednesday.

"Our distributors have asked us to increase production as they've been forced to draw up waiting lists due to a lack of supplies to meet consumer demand," the spokesman said. "But initial crazes and the current period for end-of-year bonuses are always favourable."

He added that it was still too early to increase production of the new walkman which were launched early last month in Japan and currently sell over the counter for around 100,000 yen (770 dollars) each. Initial output is for 10,000 a month.

The new walkman, which provides high-quality sound similar to compact-disc (CD) players, is to be launched in overseas markets next year.

#90339e0022 12/05/1990 ~Latin America New Agency

Athens (DEC. 5) EFE - Hundreds of thousands of Greek transport and bank workers stayed away from their jobs Wednesday at the start of a 48-hour strike in protest over a government bill aimed at limiting labor stoppages, trade

union sources said.

The strike hit mail deliveries, train services and caused delays in flights of the state-owned airline Olympic Airways. Bank, electricity and water services were maintained by skeleton staffs, the sources added.

Government officials have not yet indicated the extent of the labor action but authorities, reacting to reports that buses had disappeared from the streets, lifted an order allowing only 50 per cent of private vehicles into the center of Athens.

Traffic jams and high pollution were reported in the capital Wednesday morning.

The strike was called by the Greek General Confederation of Labor (GSEE), the country's main trade union organization, after the conservative government of Prime Minister Constantine Mitsotakis presented a draft law which permits the dismissal of employees judged to have taken part in +illegal or abusive strikes+.

The bill, which was being debated in parliament Wednesday and was due to be voted Saturday, also envisages the recruiting of personel to keep essential services functioning during stoppages.

The Association of Public Employees, representing 1.5 million civil servants, teachers, transport, hospital and post office workers, has called on its members to join the strike Thursday for 24 hours.

Since Mitsotakis took office in April there have been seven general stikes in protest over the government's economic plans and its three-year austerity program.

Trade Unions claim that government attempts to reduce the Social Security dlrs six billion deficit is eroding gains made by Greek workers in the last 15 years.

#90339e0044 12/05/1990 ~Latin America New Agency

MOSCOW (DEC. 5) EFE - Russian Federation President Boris Yeltsin warned Wednesday that a greater political role for the Soviet military could lead the country into civil war, Radio Moscow's Interfax service said.

Speaking at a Moscow military academy, Yeltsin said the military was incapable of solving the country's problems, and it should not be involved in the internal affairs of the country.

"The Army cannot solve economic problems, which at the moment are our number one priority. On the contrary, such a role would deprive us of our chance to

save the country from civil war."

Yeltsin's comments came after the removal over the weekend of Interior Minister Vadim Bakatin, who had been accused of allowing Communist Party control of the police to slip.

Bakatin was replaced by Boris Pugo, former KGB boss in the breakaway Baltic republic of Latvia, and his deputy was named as Gen. Boris Gromov, who headed the Soviet forces in Afghanistan.

Referring to the problems afflicting the Armed Forces, Yeltsin said the only solution was major reform.

#90339m0001 12/05/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (DEC. 5) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

IN THE NEWS:

The NIKKEI average rose 331.11, or 1.5%, overnight in turbulent trading with the gains coming mostly in blue chip stocks. ... Stocks were barely moving in midday trading in London with the FTSE up 1.3 points. ... The dollar is mixed in early morning trading. ... The COMMERCE DEPARTMENT says new home sales dropped 3.5% from September to October. ... Car and truck sales from Nov. 21-30 were 24.8% below the same period last year, dragging full-month sales figures 5.2% below last November. ... The FEDERAL RESERVE removes a rule requiring banks to hold as reserves 3% of some corporate certificates of deposit. ... PRUDENTIAL-BACHE SECURITIES INC. is closing its takeover-stock trading unit. ... Saudi Arabia's largest refinery was damaged by fire yesterday, cutting its output nearly in half, from 530,000 to 300,000 barrels a day, according to "Investor's Daily."

WHAT'S AHEAD:

Factory orders for October are scheduled for release at 10 am EST and are expected to show an increase of 2% to 2.5%. ... NCR directors are scheduled to

meet today to discuss AT&T's latest buyout offer of 90 a share. ... CHILD WORLD is expected to launch a price war to salvage its Christmas selling season and says it will stop paying its old bills for six weeks to conserve cash to buy toys for Christmas. ... COCA-COLA and PEPSICO plan next year to introduce beverage bottles that are made with recycled plastic.

FROM THE BULLS:

"There is an excellent opportunity for long-term investment in United States stocks," says MAKOTO HIRANUMA, a senior analyst at NOMURA SECURITIES INTERNATIONAL. "The typical company in the United States should grow faster than their Japanese counterparts during the 1990s." The report that he worked on for Nomura also concludes that much of the American market is extremely undervalued. Hiranuma says much of the undervaluing is a result of Middle East concerns. "After the Mid-east crisis ends, there is nothing to stop the market from reaching its value." (WSJ, 12/5)

FROM THE BEARS:

"We've come to the end of a short-term rally [of the] past four to six weeks," says BOB NUROCK, publisher of "Bob Nurock's Advisory." He calls the Fed move yesterday "significant," but says a further cut in rates is necessary to solve the credit crunch. ("Investor's Daily", 12/5)

STOCK MARKET:

MONTE GORDON at DREYFUS CORP. says the news-driven nature of the current market has a message for investors: "Don't try to outsmart this market in the near-term. Take it from a long-term point of view and when it comes down and you get a buying opportunity, grab it because these things will work their way out. (CNBC "Market Wrap- Up", 12/4)

"I think you can forget everything in the market today except the 40- point reversal," says ALFRED G. GOLDMAN, director of technical research at A. G. EDWARDS & CO. "The market has shown us it has discounted war but has not discounted peace." (WSJ, 12/5)

PAINEWEBBER emerging-growth stock analyst MARY FARRELL says the recent surge in OTC stocks is being augmented by the illiquidity of the stocks, or the lack of ability to buy and sell them easily. "We would have to see much higher volume before you could call this a return to outperformance" by small stocks. She says that with the U.S.'s economic downturn apparently deepening she expects to see more bad earnings news from smaller companies for the fourth quarter. Many stocks, she says, could drop as sharply as they have recently risen. (WSJ, 12/5)

"What we're seeing is that things still aren't strong, but they're not dreadful," says RICK MARTIN of PRUDENTIAL-BACHE SECURITIES INC. "Stocks had

gotten to the point where they practically were discounting World War III." ("Investor's Daily", 12/5)

"Those with a long-term investment horizon should stick with their plan," says GEORGE COLLINS, president and chief executive officer at T. ROWE PRICE, in the company's annual outlook. ("USA Today", 12/5)

"The markets had a little difficulty assessing what the reduction in reserve requirements for banks meant," says HUGH JOHNSON, chief investment officer at FIRST ALBANY CORP. "When the Fed squelched the view that it wasn't changing monetary policy, investors assumed that their concerns about the economy's health and direction were justified." (WSJ, 12/5)

The weak economy and seasonal downturn "were reflected in [technology] stocks and then some," according to PETER LABE, president of SIMPSON, LABE & CO. But he adds, "perhaps things were not as bad as our worst fears." ("Investor's Daily", 12/5)

STOCK TIPS:

"Most of the energy services stocks are currently below their pre- invasion price levels," says DAVID NEISSER, portfolio manager for FIDELITY SELECT ENERGY SERVICES FUND. He says drilling "looks much more attractive than it did several years ago," and that will bring business to these suppliers. McDERMOTT INTERNATIONAL, TIDEWATER, WEATHERFORD INTERNATIONAL, VARCO INTERNATIONAL, SMITH INTERNATIONAL, DANIEL INDUSTRIES and BAKER-HUGHES are among those stocks that should benefit from the trend, according to Neisser. ("Nightly Business Report", 12/4)

MAKOTO HIRANUMA, a senior analyst at NOMURA SECURITIES INTERNATIONAL, expects COMPAQ COMPUTER, TOYS R US, WAL-MART and PROCTER & GAMBLE to experience strong growth over the coming years. (NYT, 12/5)

"Business stinks and SEARS is not alone," says EDWARD WELLER of MONTGOMERY SECURITIES. "But Sears is having more trouble than others because of internal problems and its heavy exposure to durable goods. Big-ticket items are moving very slowly." His recommendation on the stock: "Sell, sell, sell." However, WAYNE HOOD at PRUDENTIAL-BACHE rates the stock a hold because of what he considers a safe 7.7% annual dividend yield. ("USA Today", 12/5)

For the third time in a row stocks picked by a random throw of the darts faired better than stocks carefully chosen by professionals in a monthly contest held by "The Wall Street Journal." Contestants picking stocks for the next six months hope to restore confidence in the professionals. ALAN BOND, equity portfolio manager at W.R. LAZARD & CO. picks U.S. SURGICAL CORP. which has a new line of laparoscopic devices used in surgical procedures. This new line and the companies already dominate position in surgical staples should keep earnings growing at a red-hot pace, according to Bond. LAWRENCE CISNEROS

president of SAN JUAN ASSET MANAGEMENT INC. recommends C.R. BARD INC. which also makes health-care products, particularly those used in cardiovascular surgery and urology. "It's out of favor; that's our philosophy," says Mr. Cisneros who estimates earnings will grow to 85 cents a share in 1990 and to $1.15 a share in 1991. By the middle of the year he says the stock could rise to $21 to $22 a share from its current $17 price. CHARLES BRANDES, president of BRANDES INVESTMENT MANAGEMENT INC. in San Diego, favors shares in the Dutch company AKZO because it is "awfully cheap." He says to hold the stock for "two to five years." ROBERT FREEDMAN, chief investment officer for stock funds at JOHN HANCOCK MUTUAL FUNDS, is the final contestant. He picks EMPLOYEE BENEFIT PLANS INC., a small firm that administers health plans. He says, "It's not a cheap stock, but it's growing very dramatically. ... It's a niche company that doesn't have a whole lot of competition." (WSJ, 12/5)

LOUIS EHRENKRANTZ of LADENBURG, THALMANN & CO. INC. writes in his "Morning Hotline" for Dec. 5 that he continues to recommend LAIDLAW "which has experienced 30% annual compounded growth for the past 17 years." He also recommends MEDICAL TECHNOLOGY SYSTEMS which should extend its recent earnings record to a 30% gain for the year "on a 65% gain in revenues." Both companies are recession proof, according to Ehrenkrantz. (MCS Sources, 12/5)

GRUNTAL & CO. recommends stock in DONALDSON CO., a Minneapolis-based maker of air cleaners, exhaust products and specializes filters. The brokerage says the company's earnings are expected to rise 24% to 29% now that a rebuilding program is nearly completed. It notes that the company began a 1 million share buy back program in October. ("USA Today", 12/5)

#90339m0002 12/05/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (DEC. 5) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

The prospect of peace in the Middle East has "taken a lot of luster off the dollar," says JOHN KREY, international economist at McCARTHY, CRISANTI & MAFFEI in New York. (WSJ, 12/5)

Fundamentals in the currency market mean the dollar will trend lower. "The overall trend is still intact. We haven't seen the worst for the dollar," says LOU RAPPAPORT, chief dealer at SOCIETE GENERALE in New York. (WSJ, 12/5)

"The Fed still needs to lower rates a good deal," says BRIAN FABBRI of MIDLAND MONTAGU. "I think they'll begin to do so following their next FOMC meeting, later on this month." (FNN "Marketwrap", 12/4)

The reduction of reserve requirements "sets the stage for actually cutting rates," according to CHARLES LIEBERMAN of MANUFACTURERS HANOVER. Lieberman also sees the move as a demonstration of the Fed's willingness to support the banking system. BOSTON CO.'s ALLEN SINAI agrees, saying "It's a sign the Fed isn't going to let the banks go down the drain." ("Investor's Daily", 12/5)

LEONARD SANTOW at GRIGGS & SANTOW says the relaxation of bank reserve requirements yesterday by the Fed tells him that "they're going to take the [federal] funds rate down to 7 1/4% in the next couple of weeks and then probably 7% in January. That's all part of this overall situation." (CNBC "Market Wrap-Up", 12/4)

"I thought the move [by the Fed] was a sensible step," says MICHAEL BOSKIN, chairman of the president's COUNCIL OF ECONOMIC ADVISERS. "It was a positive move," says COMMERCE UNDERSECRETARY MICHAEL DARBY. "There have been concerns about bank profitability and this should help. It lowers reserve requirements on banks, which act largely as a tax on banks." ("The Washington Post", 12/5)

"Whether they [banks] will be a little more bolder in their lending, I don't know, but they are sure more profitable and somewhat safer institutions today, particularly if they don't get more easy on their lending," says BILL WOLMAN, chief economist at "BusinessWeek" and "CNBC." The Fed's action "was an important move to shore up the banking system. ... It was a very significant move and it will have some effect. ... It reduces the depth of the recession and speeds recovery -- maybe not by a huge amount, but it does it and it's a harbinger of things to come. ... Today was a very bullish day in the cosmic scheme of things." (CNBC "Market Wrap-Up", 12/4)

Reducing banks' reserve requirements is "a very well-timed and appropriate response," says LYLE GRAMLEY, a former Fed governor and chief economist for the MORTGAGE BANKERS ASSOCIATION. "It sends a message to the banks that the Fed would encourage more lending." (WSJ, 12/5)

Banks are "going to now see wider profit margins between their cost of funds and their rates on loans they grant to borrowers," says MICHAEL MORAN, chief economist at DAIWA SECURITIES. "The profit margins, however, are not going to be much wider. It's going to be some widening out, but it's not going to be the dawning of a new day. It's not going to be an entirely different picture faced by commercial banks. Because of that, I would think the effect is not going to be altogether that large." (CNBC "Market Wrap-Up", 12/5)

While most economists today are predicting that long-term rates will drop, GERT von der LINDE, chief economist at DONALDSON, LUFKIN & JENRETTE, says Fed easing combined with a rising consumer price index will "spread fear of inflation - pushing the dollar down even further. I think you will see people selling long bonds - triggering a sharp upward spike in long-term rates." (WSJ, 12/5)

THE ECONOMY:

GERT von der LINDE, chief economist at DONALDSON, LUFKIN & JENRETTE, is one of the few souls who says the economy is already in "a really steep recession." He says inflation has abated only for those who don't "eat, drive or heat their homes." His boldest claim is that the recession began in mid-1989, a fact that he says will proven by future government revisions of GNP growth. The tough downturn will continue for most of 1991. (WSJ, 12/5)

"The classic ingredients of a severe recession are missing," says PAUL BOLTZ, chief economist at T. ROWE PRICE. He notes that inventories are not critically overstocked, the dollar is weak and the Fed is not tightening. ("USA Today", 12/5)

"It's probably still too early to tell if the downturn will be long enough to classify as a recession," says COUNCIL OF ECONOMIC ADVISORS chairman MICHAEL BOSKIN. (FNN "Marketwrap", 12/4)

"The economy was still growing through the third quarter, although slowly," says LYNN REASER of FIRST INTERSTATE BANCORP. "October marked a major downshift in the economy." ("Investor's Daily", 12/5)

"Lowering the reserve requirements can ... stimulate the economy and give us a better shot at a rapid upturn in 1991," says MARTIN FELDSTEIN, former chairman of the COUNCIL OF ECONOMIC ADVISORS. In fact, with such a change, "we may avoid recession altogether," says Feldstein. (FNN "Marketwrap", 12/4)

"Economic growth here is slowing much faster than assumed just a few weeks ago " says RANDELL MOORE, executive editor of "Blue Chip Economic Forecasts." "With job cuts cutting such a wide swath through the economy, people don't think they're safe any longer," says CYNTHIA LATTA at DRI/McGRAW HILL. "That's what's holding home sales down." ("USA Today", 12/5)

#90339p0086 12/05/1990 ~PR Newswire

LOS ANGELES (DEC. 5) PR NEWSWIRE - Maxicare Health Plans Inc. emerged from Chapter 11 protection today, successfully completing its reorganization in only 21 months.

Maxicare's recovery comes at an excellent time. The managed health care market is expected to increase significantly throughout the 1990s.

"Our company is viable because we focused on the basics of arranging for accessible quality health care at a reasonable cost," stated Peter J. Ratican, chairman and chief executive officer of Maxicare. He pointed to the company's long-standing policy of contracting with quality-oriented medical providers, while having the flexibility to work with employers to shape the types of

health care coverage they need for the 1990s.

That strategy has already paid off for Maxicare which has signed many new 1991 contracts including Bank of America, GTE, The Motion Picture Industry Health and Pension Plans, Price Waterhouse, Sears and Stanford University.

"Maxicare is proving its flexibility in a rapidly changing market. More and more employers are becoming frustrated with the rapidly growing cost of health care and want traditional insurance product along with managed health care. Maxicare understands that and will provide those products in 1991 and beyond," emphasized Ratican.

Ratican thanked the many people who helped achieve the goal of successfully restructuring the company. He especially recognized and thanked the efforts of Maxicare's employees. In particular, he singled out the accomplishments of Eugene L. Froelich, Maxicare's chief financial officer as the chief architect of the company's financial restructuring.

"Like all successful businesses, we have been diligent about watching our expenses. In spite of the fact the company was in a downsizing environment, we were still able to achieve a reduction of company overhead to less than 12 percent in the third quarter. We also have kept our medical loss ratio at 85 percent, which is in line with industry standards" said Froelich.

Maxicare reported a profitable quarter in the third quarter ending Sept. 30, 1990. It was the first profitable quarter for the company in four years.

The Reorganization Plan was confirmed by the United States Bankruptcy Court in Santa Ana, Calif., on Aug. 31, 1990. Pursuant to the plan, creditors committees agreed to go effective with minimum cash of $75,150,000.

The payment of enrollee claims, administrative claims, convenience claims, secured and other priority claims will occur as soon as practicable under the plan. All other allowed claims will begin to receive cash and securities approximately 90 days from the effective date.

Maxicare Health Plans Inc. operates in seven states (California, Indiana, Illinois, Louisiana, North Carolina, South Carolina, and Wisconsin).

#90339p0090 12/05/1990 ~PR Newswire

MONTEREY, CA (DEC. 5) PR NEWSWIRE - Digital Research Inc. announced a joint agreement with IBM in that Digital Research will continue to supply operating system and network software to IBM.

FlexOS was first released in 1985 and has an installed base of more than 400,000 users in numerous applications. A full-function operating system, FlexOS' modular architecture helps keep system size down, reduces cost of ownership and allows the developer to reconfigure the system with minimal downtime. Its real-time kernel and protected mode operation give FlexOS applications reliability advantages over platforms such as DOS, OS/2(TM) and UNIX(R).

The FlexNET(R) extension provides application transparent access to remote resources and virtual circuit services for reliable peer-to-peer communication.

Other networks supported by Digital Research with FlexNET include NETBIOS on ARCNET and TCP/IP on Ethernet. The new release of FlexNET allows a FlexOS node to use multiple networks simultaneously.

Complementary products to the FlexOS environment marketed by Digital Research are the X/GEM(R) graphics extension and FlexVIEW(TM) source level debugger. X/GEM gives developers multitasking graphics with the advantages of high-level windowing and device management function to produce graphics applications quickly and with a common user interface. FlexVIEW is a multiwindow debugger for programs written in C. FlexVIEW allows the programmer to watch the code as it executes, interact to control program operation, and locate bugs quickly and efficiently. FlexVIEW also supports multitasking and remote debugging which dramatically reduces the effort and time required to debug embedded applications.

FlexOS, FlexNET and X/GEM are available to application and system devleopers in self-hosted packages which run on standard PCs and PS/2s(TM). Development kits include loadable system software, DOS and UNIX-like utilities for file and code management, linker and librarian with shared run-time library and overlay support, POSIX library, and FlexVIEW debugger. Digital Research also supplies a C compiler. Third party products available for FlexOS include database management systems, editors, communications software and EPOS applications

Based in Monterey, Digital Research is a pioneering developer of premium operating system, development tools and graphics applications for a variety of platforms. The company has offices in the United Kingdom, Germany, France, Japan and the Pacific Rim.

#90339p0107 12/05/1990 ~PR Newswire

BASKING RIDGE, N.J. (DEC. 5) PR NEWSWIRE - AT&T's Communications and Computer Products (C&CP) facility at Little Rock, Arkansas, has totally eliminated

emissions of chlorofluorocarbons (CFCs) from its manufacturing processes at the plant, the company announced today.

From its CFC emissions of some 330,000 pounds in 1988, the C&CP facility has since reduced CFC emissions to zero.

CFCs are man-made compounds typically used for refrigeration, and in industry as solvents and cleaning agents.

"We're proud to be AT&T's first domestic factory to become CFC-free," said Larry S. Fetherman, AT&T's general manager at the C&CP facility. "When it became clear that CFCs were harmful, we immediately began to engineer them out of our processes, cutting our use more than in half the first year, and now eliminating them completely."

Fetherman credits a combination of engineering changes and technology advances for the elimination of CFCs at the plant.

"Our engineers eliminated the use of cleaning solvents from manufacturing processes where CFCs had been heavily used and introduced CFC-free substitutes for specialized operations," said Fetherman. "They also introduced new technologies that altered the plant's plating and soldering operations."

In addition, a computerized chemical tracking system was established to more quickly and accurately pinpoint and monitor all CFCs used in the plant's manufacturing operations.

An international treaty known as the Montreal Protocol has mandated that industry worldwide cut CFC production in half by year-end 1998 because of the destructive impact CFCs are having on the earth's stratospheric ozone layer. This original mandate has since been made more stringent, now requiring complete CFC phaseout by the year 2000.

AT&T pledged to cut CFC emissions at its manufacturing locations in half by year-end 1998 and to totally phase out their use by 1994, America's first electronics manufacturer to set such an aggressive target.

In addition to its pledge to reduce its own CFC use, AT&T will not accept from suppliers any packaging or packing materials manufactured using CFCs. AT&T is also requesting its components and equipment suppliers to phase out their use of CFCs on products the company purchases as soon as possible, but no later than 1994.

#90339p0109 12/05/1990 ~PR Newswire

CARSON, Calif (DEC. 5) PR NEWSWIRE - Infiniti Division of Nissan Motor Corp. in U.S.A. received an early Christmas present this month, capturing Popular Mechanics' 1991 Design & Engineering Award in the automotive category for its Q45 performance luxury sedan with Full-Active Suspension (FAS).

The award, established this year, recognizes excellence in design and engineering of new products in 19 categories, including automotive engineering home building/remodeling, equipment design, science, technology, aerospace, electronics and photography. Entries are solicited through an open nomination process and judged by the magazine's editors.

"The Infiniti Q45 with FAS represents breakthrough technology that we felt compelled to recognize," said Joe Oldham, editor of Popular Mechanics. "It is the first production care in the world to offer FAS, and the ride may be the smoothest available."

FAS provides a constant supply of energy to stabilize vehicle motion. It uses a sophisticated pump and hydraulic system which is controlled by two computers to provide a combination of smooth ride and excellent handling. The system replaces the car's normal shock absorbers and controls brake dive, acceleration squat, body roll and car leveling.

Infiniti adds Popular Mechanics' recognition to several other awards from the past year. Recent kudos include the Q45 with FAS being names to Road & Track's "10 Best Cars in the World" list (Nov. 1990) and Ward's Auto World's selection of the Q45 as best car in the world (June 1990). Recognition also came from the 1991 J.D. Power & Associates Sales Satisfaction Survey, where Infiniti placed second overall, just two points behind established leader Mercedes-Benz.

The Q45 model with FAS has a manufacturers' suggested retail price (MSRP) of $43,000. The base model Q45, offered at a MSRP of $39,000, is available with a touring package including Super HICAS four-wheel steering ($2,500), or Traction Control ($1,500).

Rounding out the 1991 Infiniti line is the new G20 entry-level mid-size luxury sedan, the M30 Luxury Sports Coupe and the new M30 Luxury Sports Convertible.

For more information about the 1991 Infiniti line, or for the nearest Infiniti dealership, consumers can call 1-800-522-0990.

#90339p0111 12/05/1990 ~PR Newswire

ORANGE, CALIF. (DEC. 5) PR NEWSWIRE - VTN Corp. (NASDAQ: VTNC) today announced its 15th profitable quarter in a row. Earnings for its second

quarter ending Nov. 30, 1990, were $918,044 vs. $748,728 for the same quarter last year. Earnings per share for the quarter were $.07 vs. $.05 per share for the same quarter of last year. Revenues were $3,050,000 vs. $3,107,000 for the same quarter last year.

For the six months, VTN earned $930,592 vs. $1,308,000 for the first six months last year. Earnings were down due to a very weak first quarter; VTN has had to cut expenses to match the general economic difficulties in the domestic real estate marketplace. Revenues for the six months were $5,106,000 vs. $6,030,000 last year.

Daniel C. Montano, chairman of VTN, stated, "VTN made the necessary adjustments to cost to assure profitability from domestic operations. Now that VTN has signed its agreement with the Government of Senegal to develop a Master Planned Resort/Retirement Community on a 100,000-acre parcel of land, the second half of the fiscal year for VTN should be excellent. VTN earnings for the next three years should increase substantially."

VTN has offices in Orange, Los Angeles, San Diego, and Carlsbad, Calif.; Miami; Boston; Manila, Philippines, and soon to be opened Dakar, Senegal.

LAFOX, ILL. (DEC. 5) PR NEWSWIRE - Richardson Electronics, Ltd. (NASDAQ-NMS: RELL) announced today that it has entered into an administrative agreement with the U.S. Defense Logistics Agency (DLA). As a result, the DLA has lifted its suspension of the company's National Electronics Division from engaging in government contracting and government-approved subcontracting effective immediately.

The agreement provides that Richardson will reorganize its government business operations, will continue the implementation of its Ethics Code of Conduct and establish educational programs for its employees. The company has also agreed for a period of three years, to make certain of its books, records and other documents available to the DLA upon request, to file periodic reports with DLA and to report any suspected violations of federal law by employees to DLA.

The DLA will notify appropriate government agencies that the suspension of the national Electronics Division of Richardson Electronics has been removed.

Richardson Electronics, Ltd. is an international distributor and manufacturer of electron tubes and power semiconductors with 21 offices worldwide.

WEST LONG BRANCH, NJ (DEC. 5) PR NEWSWIRE - The creation of a Product Engineering group as a third service business of Electronic Associates, Inc. (NYSE: EA) was announced today by the company. EAI's other service businesses are contract manufacturing and field service. The appointment of Jack Budelman as general manager of product engineering was announced by Robert G. Finney, EAI president and chief executive officer.

Product Engineering will provide a wide range of design and engineering services to private industry and government agencies, Budelman said. "EAI is superbly equipped for private industry as well as government agencies," said Budelman. The product engineering group also will provide test design and producibility engineering services, he said.

"We have been doing this type of work for government agencies for more than 45 years," said Finney. "Now we will use that base of expertise to expand our design and engineering services business in the private sector."

In addition to its new business pursuits, Product Engineering will support EAI products currently in the field and supply products on a custom basis for existing simulation computers customers. Support will include hardware and software.

Budelman was president of Utilcom, Inc., a data systems consulting firm based in West Long Branch, for five years. He previously served more than 20 years with EAI in program management, systems engineering management, and customers services engineering. Budelman is a resident of Freehold.

EAI serves users and producers of electronic products and systems. In contract manufacturing, EAI provides manufacturing services for products designed and

marketed by customers. In field services, the company provides independent maintenance of electronic equipment.

CONTACT: Jack Budelman, general manager of product engineering of Electronic Associates, 201-229-1100 ext. 350.

WASHINGTON (DEC. 5) PR NEWSWIRE - MCI Communications Corporation (NASDAQ-NMS: MCIC) today announced it has adopted policies to help safeguard consumers against fraud and abuses in the offering of 900 service programs.

900 service is a caller-paid long distance service that allows consumers and businesses to access information over the telephone.

These policies will allow MCI to identify and prevent misleading, fraudulent or deceptive 900 information programs and to protect consumers who may be susceptible to such activities. The company has established the policies in advance of offering nationwide commercial availability of MCI 900 Service on Jan. 1.

Key among the consumer safeguards are: pre-screening of programs and the advertising that support them to identify fraudulent or deceptive practices; strict guidelines governing the types of programs for which MCI will provide billing services; and an enhanced consumer complaint monitoring and tracking system.

MCI also pledged it would advocate consumer safeguards before regulatory and public policy bodies to require: call blocking of information programs if the call charges to consumers exceed required price cap-per-call levels; and general availability of mechanisms that allow call blocking from home telephones to 900 numbers at no charge, including the ability to block calls to selected 900 numbers, such as those designated for adults.

To assist with consumer complaints, MCI will track and record consumer complaints by information provider and name of program, as well as the type of complaint -- such as deceptive sales tactics or program content. Based on its review of complaints, MCI will take appropriate action, including immediate termination or suspension of billing services for the program.

The company said it has advised 900 program providers who use the MCI service of these consumer policies and has distributed copies of its billing service agreements outlining information programs and practices for which it will refuse or terminate these services. While these new policies go into effect on Jan. 1, the company has already begun enforcing its program guidelines.

LAGUNA NIGUEL, CALIF. (DEC. 5) PR NEWSWIRE - Optimumcare Corp. (NASDAQ: OPMC) which operates psychiatric care and chemical dependency programs nationwide, announced today a net loss of $148,446 or $.03 per share for the three-month period ended Sept. 30, 1990, compared with a loss of $157,673 or $.03 per share for the same period last year.

Revenues for the period increased seven percent to $323,408 from $301,443 for the previous year's third quarter. Edward A. Johnson, OptimumCare's president indicated that net revenues were higher due to the increased number of operational programs. OptimumCare currently operates six programs at four separate facilities throughout the country, including two new programs established during the past quarter. Program expenses for the quarter also increased due to the start-up of these new units.

"We have gone through a maturing phase over the past year in which we reduced corporate staff and stepped up our marketing efforts. Those efforts have produced two new programs during the past quarter while reducing our general and administrative expenses by 36 percent. The majority of the loss shown for the quarter is related to a one-time $87,000 reserve against one account receivable," said Johnson.

Revenues for the nine-month period ended Sept. 30, 1990, were $969,891 compared with $1,175,391 for the same period last year. OptimumCare reported a net loss of $437,423 or $.09 per share for the period versus a loss of $185,218 or $.03 per share for the same period last year.

"We remain committed to our goal of profitability," said Johnson. "Most of our programs that have been in operation for a year or more are at or near full occupancy and we are pleased with the growth of our newer programs. We are continuing our aggressive marketing and development efforts while strengthening existing programs with enhanced services."

OptimumCare Corp. establishes and markets in-patient programs for the treatment of psychiatric disorders and chemical dependencies at host health care facilities.

BRIDGEWATER, N.J. (DEC. 5) PR NEWSWIRE - The board of directors of National Starch and Chemical Company has elected James A. Kennedy, 53, president and chief executive officer effective Jan. 1, 1991.

Kennedy succeeds Nicholas G. Marotta, 61, who has been CEO since May 1985 and will continue as a member of the National Starch board of directors.

Kennedy, currently executive vice president and chief operating officer, joined National in 1962 and has held various positions in marketing, mergers and acquisitions, and international management. He was elected to the board of directors in 1985.

He is a graduate of Holy Cross College with an AB degree in economics and of Columbia University's Graduate School of Business with an MBA degree in finance and marketing. He has also served as a lecturer and guest speaker on various business subjects at Notre Dame University, New York University, Wake Forest University's Babcock School of Management, and the American Management Association.

Kennedy also serves as a director of Unilever United States, Inc., the National Association of Manufacturers, and the Corn Refiners Association.

National Starch and Chemical is a Unilever company with 1989 sales in excess of $1.5 billion. National is a worldwide manufacturer of specialty starches, adhesives and specialty chemicals and is recognized as a leader in technologies based on natural and synthetic polymer chemistry. Major industries around the world that make use of these products and technologies include the paper, food, packaging, corrugating, textile, furniture, construction, water treatment, oil well drilling, micro-circuitry, electronics pharmaceutical, cosmetics, appliance and transportation equipment industries.

CLEVELAND (DEC. 5) PR NEWSWIRE - The board of the British Petroleum Company p.l.c. intends to appoint James H. Ross as a managing director, effective April 8, 1991.

Ross, currently president and chief executive officer of BP America Inc., will become chairman and CEO of BP America and assume corporate responsibility for BP's activities in the Western Hemisphere, including the U.S., Canada, Mexico, Central and South America.

In addition, he will be responsible for BP's activities in Africa and the BP Group's corporate health, safety and environmental policies. He will continue to be based at BP America's headquarters in Cleveland.

Robert B. Horton, BP's chairman and CEO, said that the board's intention to appoint Ross to the BP board with responsibility for the Western Hemisphere reaffirms the importance of the U.S. in the future success of the company's four main businesses.

James Ross, 52, became president and CEO of BP America in March 1988, following a distinguished career at BP which began in 1959. In Cleveland, Ross is active in neighborhood development, educational reform, and support for the Cleveland Orchestra. He is married with three children and lives in Gates Mills, Ohio.

HOUSTON (DEC. 5) PR NEWSWIRE - Pride Petroleum Services, Inc. (NASDAQ: PRDE) President and Chief Executive Officer, Ray H. Tolson, today announced that the company has completed the asset purchase of Valley Hyperclean, Inc., Bakersfield, Calif. Although terms of the transaction were not disclosed, Tolson said the purchase was made for cash and that related annual revenues are approximately $2.0 million.

Valley Hyperclean is an oilfield service firm which specializes in well bore cleaning and production enhancement. The company operates five hyperclean units and 33 filtration units. Valley Hyperclean's services expand Pride's well workover capabilities in the important California market where Pride is the largest well servicing contractor. The management and crews of Valley Hyperclean have joined the Pride organization.

Pride Petroleum Services, Inc., headquartered in Houston, is one of the largest well servicing contractors in the United States. The company currently operates 409 rigs from locations in East and West Texas, along the Texas/Louisiana Gulf Coast, in California and New Mexico.

ROWAYTON, CT (DEC. 5) PR NEWSWIRE - Baldwin Technology Company, Inc. (AMEX: BLD) announced today that it has expanded its Stock Repurchase Program. The company has been authorized to repurchase additional shares of its Class A common stock at an aggregate purchase price not to exceed $1.5 million. To date, the company has spent a total of $1.8 million under the original program.

The company believes that the current market price of its Class A common stock makes it an attractive investment at this time. Dean Witter Reynolds will continue to act as the company's agent for the repurchase.

Baldwin Technology Company, Inc. is a leading multinational manufacturer of material handling, accessory, control and prepress equipment for the printing industry. For its first quarter ended Sept. 30, 1990, the company had net sales of approximately $47.9 million and net income of approximately $1.5 million. On Nov. 30, 1990, the company had 14,723,597 and 1,994,000 shares outstanding of its Class A and Class B common stock, respectively.

RALEIGH, NC (DEC. 5) PR NEWSWIRE - The Board of Directors of Firstcorp, Inc. (FCR) announced that Firstcorp has (i) on December 4, 1990 filed an application in the United States District Court for the Eastern District of North Carolina for a Temporary Restraining Order in its favor against the Office of Thrift Supervision (OTS) and (ii) this morning filed for protection under Chapter 11 of the United States Bankruptcy Code in response to a Temporary Order to Cease and Desist issued on Friday night, November 30, 1990 by the OTS.

The OTS order directs FCR immediately (i) to transfer its ownership interest in First Federal of Durham (FFD) to a subsidiary of First Federal of Raleigh (FFR), (ii) to cancel the capital note receivable from FFR and (iii) not to transfer, pledge or encumber any of its assets without OTS approval.

Prior to receiving the OTS Order, Company officials had been advised by officials of Wachovia Bank and Trust Company, NA, Trustee for FCR's 8 1/4 percent Convertible Subordinated Debentures due 2005 (Bonds), of its intention

to notify FCR of acceleration of the principal amount of the Bonds. On Monday December 3, 1990 the Company did in fact receive a Notice of Acceleration from Wachovia. The Company has been in default on the Bonds since June 30, 1990 when it failed to make the quarterly interest payment due.

Willard Ross, Acting President of FCR, said, "FCR found itself in a dilemma with competing obligations to the OTS and Bondholders. The Board regrets being forced to file for reorganization under Chapter 11; however, it was of the view that an independent third party was necessary to resolve the dilemma."

FCR's filing does not affect the operations of its subsidiary savings and loans. Mr. Ross said, "It's business as usual in our offices, and, of course, deposit accounts continue to be insured to $100,000."

Firstcorp is the parent Company of 1st Federal of Raleigh, 1st Federal of Durham and 1st Security of Pinehurst. Firstcorp's subsidiaries operate twenty-two full service offices in four counties in North Carolina which include the Research Triangle and Sandhills areas.

OAK BROOK, ILL. (DEC. 5) PR NEWSWIRE - Official Airline Guides, the travel information company that maintains the schedules and processes fares of airlines worldwide, reported it processed 14.1 million domestic and international fare changes in November, setting a cumulative year total of 107.5 million changes. OAG's database contained 5.4 million domestic and 4.5 million international air fares in November.

The air fares were combined in November into 164,739 direct flight schedules which are listed in OAG's flight guides and Electronic Edition. OAG published more than 79,299 North American and 85,440 worldwide direct flight schedules. There were 343,543 changes made to flight schedules in November.

The activity at OAG in November is reflected in fares and schedules for December.

While the overall fare change activity in November is down, domestic changes remained high. The domestic fare changes were affected by a recent tax increase and fare wars, and continue to change at rates five times the pre-Kuwait activity.

Official Airline Guides provides computer tapes reflecting combined schedules to airlines, and also integrates air fares into schedule information. OAG is a Maxwell Macmillan Group Company.

HOUSTON (DEC. 5) PR NEWSWIRE - Golden Oil Company (NASDAQ: GOCO) and Cobb Resources Corporation (NASDAQ: COBB) announced today that Golden and Cobb have entered into a definitive agreement and plan of merger and an option for Golden to acquire additional shares of Cobb common stock.

The merger and the related transactions were unanimously approved by the boards of directors of both Cobb (with the Golden-designated directors abstaining) and Golden. In the merger each outstanding share of Cobb common stock not owned by Golden will be converted into 0.68 of a share of Golden common stock. This exchange ratio is subject to upward adjustment in the event of consummation of a sale of Cobb's mining properties for cash or cash equivalents in excess of $350,000 prior to the consummation of the merger. The merger is designed to provide for a tax-free exchange for the Cobb shareholders. In connection with their approval of the transaction, the board of directors of Cobb received from the independent investment banking firm of Boettcher & Company, a division of Kemper Securities Group, Inc., a written opinion confirming the fairness of the transaction, from a financial point of view, to the shareholders of Cobb.

The members of the Cobb board of directors have agreed to vote their own shares in favor of the merger and to recommend that the Cobb shareholders approve the merger. The shareholders of Cobb will be asked to approve the transaction at a meeting of shareholders pursuant to a proxy statement to be filed with the Securities and Exchange Commission in the near future.

Cobb and Golden also announced the acquisition by Golden of an option to acquire up to 1,250,000 additional shares of common stock of Cobb in exchange for producing oil and gas properties of Golden at a price based on independently determined reserve values. Prior to the grant of this option, Golden beneficially owned 2,208,359 shares, or 32.8 percent of Cobb's common stock.

DEERFIELD BEACH, FLA. (DEC. 5) PR NEWSWIRE - The board of directors of Devcon International Corp. (NASDAQ: DEVC) yesterday declared a quarterly cash dividend of five cents per share payable January 18, 1991, to shareholders of record on Dec. 21, 1990.

Donald L. Smith Jr., chairman and president of the heavy construction and concrete and related materials company, said, "This board action reflects the company's healthy cash flow and brings the indicated annual payout to 20 cents per share." In 1990, Devcon initiated cash dividends and paid a total of 15 cents per share.

Approximately 4,296,000 common shares are currently outstanding. Devcon operates ready-mix concrete, aggregate, concrete block and bulk cement facilities; dredges harbors; builds golf courses and performs other heavy construction work in the Caribbean. Principal operations are on St. Thomas and St. Croix in the U.S. Virgin Islands, on the independent island nations of Antigua and Dominica, on St. Maarten, Netherlands Antilles, and on Tortola, British Virgin Islands. In Florida, where the company is headquartered, Devcon constructs golf courses and prepares sites for shopping malls, residential developments and industrial parks.

#90339p0140 12/05/1990 ~PR Newswire

ATLANTA (DEC. 5) PR NEWSWIRE - Eastern Airlines today announced it will begin service to Minneapolis/St. Paul and San Antonio from Atlanta on Jan. 31, 1991. The carrier said it will operate three daily round trip flights between each of the cities, as well as a fourth flight from San Antonio to New York's LaGuardia Airport, via Houston.

"These cities are strong business markets," said David B. Kunstler, senior vice president-planning. "With the current emphasis on our new first class service and Corporate Rates, these markets are logical additions to our Atlanta hub."

Eastern will offer an introductory fare of $99 each way, based upon round trip purchase, for travel between the new cities and points east of the Mississippi River, from Jan. 31 through Feb. 28. A seven day advance purchase and Saturday night stay are required. All Eastern tickets are fully refundable with no penalty for change.

Also effective Jan. 31, Eastern will expand its service between Atlanta and Houston, Dallas/Fort Worth, Savannah, Indianapolis and Charlotte with an additional daily round trip flight in each market.

The carrier also said it will suspend service to Roanoke, Va. on Jan. 31. The airline began service to Roanoke earlier this year as part of a five-city Atlanta feeder expansion which included Houston's Hobby Airport, Dallas/Fort Worth, Harrisburg and Islip. "Traffic in Roanoke simply hasn't lived up to expectations. We ended up battling four-for-five with our new service -- and that's reasonable in any league," remarked Kunstler. Eastern reports the other four cities have met or exceeded passenger boarding projections.

Eastern will operate the new service with DC-9 aircraft. The carrier currently operates approximately 800 daily flights to some 80 cities.

#90339p0143 12/05/1990 ~PR Newswire

PITTSBURGH (DEC. 5) PR NEWSWIRE - With the largest circulation of any Pittsburgh business publication, Allegheny Business News (ABN) is planning to grow even bigger with a program of changes that include staff, editorial, and re-designed look, according to new publisher Holly Hicks-Opperman.

Hicks-Opperman, former publisher of the Pittsburgh Business Times, also announced a new advertising campaign designed to get the news out. "'You Need to Know What's In Here' is our new slogan spawned from our mission to strive to put people into our reporting of smart small and mid-sized businesses,"

says Hicks-Opperman. "And we will break a multi-media ad campaign for the first time beginning in January 1991 that should make this evident," she added.

But while ABN feels strongly about positioning itself in the business community and creating broader awareness, the paper has first made some significant modifications in its product and operations. Most dramatic, the paper will introduce a new look as it goes from a monthly to a bi-weekly publication in March 1991.

ABN also continues its move toward an in-house written publication as editor Scott Robertson recently brought Andrew Wilson on board as a full-time staff reporter, to be followed by another full-time reporter in January.

"The paper exists to serve the information needs of our audience...and we will do this by providing the reader both useful soft news like Business Book Bestsellers and Book Review which will debut this month in ABN, as well as the hard news we all need," says Robertson.

Allegheny Business News already boasts the largest ABC audited circulation (27,500) of any business publication in Pittsburgh and is now conducting its first readership survey designed to provide a better idea of who exactly is reading the paper.

Top-level management in small to mid-sized businesses with the authority to purchase business-to-business products are targeted for the research which will begin in January with final results available in late March.

This research, the beefing-up of editorial, the future new look and frequency of issue, aggressive promotions, all led by a new publisher at the helm, have Allegheny Business News banking that readers need to know what's in here, according to a spokesman.

Allegheny Business News is published by Associated Business Publications Inc., with headquarter offices at 471 Lincoln Ave., Pittsburgh, Pa. 15202.

CONTACT: Holly Hicks-Opperman, publisher of Allegheny Business News, (412) 734-2300.

#90339p0155 12/05/1990 ~PR Newswire

LINDEN, N.J. (DEC. 5) PR NEWSWIRE - Shortly after British and French workmen toasted each other last week 130 feet below the seabed of the English Channel and almost 14 miles from the Dover coastline, the employees of a high-technology company from Linden, N.J. -- General Magnaplate Corporation (NASDAQ: GMCC) -- did the same. The toasts marked the successful Anglo-French linkup of the two sections of the awesome $15 billion English Channel Tunnel -- the "Chunnel" as it is called. General Magnaplate shared in the glory because without its highly sophisticated treatments of surfaces on many parts on the two gigantic laser-guided boring machines, the feat might not have been possible.

The 27 foot high boring machines, built by the Robbins Company of Kent, Wash. are continually subjected to high concentrations of corrosive salt air, mist and spray. These would ordinarily corrode the steel machines in short order. Robbins knew that conventional protective metal coatings such as chrome and cadmium plating would not do the job. So Robbins turned to General Magnaplate.

The company applied a specialized NEDOX synergistic coating to the parts, a coating that combines the advantages of autocatalytic plating with the controlled infusion of low-friction polymers and custom- tailored dry lubricants. The coating, applied to over 375 parts of each boring machine, not only protects the steel against the corrosive attack of sea water and salt spray, but also hardens the steel to fight abrasive wear while providing a permanent dry-lubricated surface. A NEDOX coating as thin as .001" shows little or no corrosion after 14 continuous months of exposure to salt water and salt spray. It cannot chip, peel, or be rubbed off. And its dry-lubricated surface also aids in maintenance, facilitating disassembly and reassembly of the borers' complex components.

"This is exactly the kind of surface enhancement challenge we like to tackle," says Dr. Charles P. Covino, CEO of General Magnaplate. "It's the kind of major project that helps us grow at a pace we like to see. And it's also an example of our major mission improving the performance and lifespan of metal parts while using a minimum of critically scarce strategic metals to do it. Among other advantages, our processes conserve supplies of scarce strategic minerals for those applications where no viable substitutes have yet been developed. Whether in outer space (for which we developed these coatings) or below the earth, or anywhere on its surface -- domestically or internationally -- that's

what we're striving to do."

"We cut our teeth on the metallurgical challenges of the American space program," says Covino, founder and chairman of the 38-year-old surface enhancement company that has contributed specialized metallurgical coatings to every NASA program to date.

With seven operating units in the United States and Canada and six offshore licensees applying General Magnaplate surface enhancement processes, the challenge of helping to execute the first dry-land linkup of Britain and the Continent since the Ice Age was a natural extension of the company's efforts. "Our focus today is literally worldwide. Once we'd conquered outer space it was only natural to challenge a part of Europe's inner space," says Covino.

In this case, "inner space" meant tunneling through 65' to 100' thick chalk marl beds for 10 miles from France and 14 miles from England -- the longest continuous drives ever accomplished by tunneling machines. The project is also the largest privately financed construction project ever undertaken. And it is a job where Covino knew his coatings would perform.

General Magnaplate recently announced its financial results for fiscal 1990 showing, among other things, that its gross revenues reached a record level of $10.3 million, a 6.2 percent increase over the previous year.

WYOMISSING, PA (DEC. 5) PR NEWSWIRE - VF Corporation (NYSE: VFC) and Health-tex Inc. today announced that an agreement in principle has been reached whereby VF will acquire substantially all of the operating assets of Health-tex and will continue such operations. A spokesperson for the parties stated the intent was to conclude the negotiations quickly and close the transaction as soon as possible, but not later than the end of the year.

Health-tex is one of the leading manufacturers and marketers of high quality, moderately-priced children's apparel sold through leading department and specialty stores nationwide under the Health-tex and Brittania brand name.

VF Corporation is the world's largest publicly owned apparel company and is a leader in the jeanswear, sportswear/activewear, intimate apparel and occupational apparel markets. Its principal brands are Lee, Wrangler, Rustler Girbaud, Bassett-Walker, Jantzen, JanSport, Vanity Fair, Vassarette, Modern Globe, Red Kap and Big Ben.

BURLINGTON, NC (DEC. 5) PR NEWSWIRE - Environmental Diagnostics, Inc. (NASDAQ: EDIT EDITW) reported today that it has received pre-market clearance from the U.S. Food and Drug Administration for its EZ-Screen: Barbiturates test for detection of the use of barbiturates.

The EZ-Screen: Barbiturates test is an easy-to-use, on-site screening test that detects barbiturates or their metabolites in urine. The company will market this test along with its EZ-Screen drugs of abuse tests for cannabinoids (marijuana), cocaine (crack) and opiates (heroin) which are already being sold both domestically and internationally.

James D. Skinner, EDI President and Chief Executive Officer, said, "Environmental Diagnostics continues to reinforce its position as a major

supplier of on-site drugs of abuse tests. The company has now received FDA clearance for EZ-Screen tests for four of the most commonly abused substances. EDI will shortly be submitting an application to the FDA for the EZ-Screen: Amphetamines test thus providing the company with a product line that meets the needs of most law enforcement agencies."

Environmental Diagnostics, Inc. develops and manufactures human clinical, drugs of abuse and agricultural diagnostics specifically designed for on-site testing by non-technical personnel.

The company's Conventional Biodiagnostic Products are used by government agencies, researchers, clinical testing laboratories, and other companies for clinical and veterinary testing. The company's EZ-Screen products provide the accuracy of laboratory results in minutes.

JACKSON, MI (DEC. 5) PR NEWSWIRE - After launching an environmental initiative one year ago at its key electric generating plants, Consumers Power Company employees, working with several conservation organizations, have created a biological field station, planted walleye fingerlings, helped raise Sichuan pheasants, built bat and birdhouses, and constructed nature trails.

"Consumers Power employees can look back with pride on the substantial progress made in enhancing the environment and creating wildlife habitat at our generating plants," said Gordon L. Heins, the utility's senior vice president of energy supply. "This initiative has produced specific results and has furthered Consumers Power's ongoing relationship with conservation organizations," said Heins.

The utility has worked with The Nature Conservancy, local school systems, local Boy Scout and Girl Scout troops, the Michigan Wildlife Habitat Foundation and other state and national conservation organizations to implement the program. The following environmental accomplishments were achieved by the utility's employees in the past year:

J.H. CAMPBELL PLANT, PIGEON LAKE, WEST OF GRAND RAPIDS:

- Creation of a Biological Field Station encompassing 175 acres, in partnership with Hope College, the Holland Audubon Society and the West Michigan Wetlands Foundation. Dedicated as an educational preserve, the area includes upland and lowland forests and adjoining wetlands.

- In cooperation with The Nature Conservancy, a national land- enrollment environmental organization, a 110-acre ecologically rich barrier dune has been

included in the Michigan Natural Areas Registry.

- Wood duck and bluebird boxes, a bat house, and osprey nesting platforms were installed.

B.C. COBB PLANT, MUSKEGON:

- Completion of a 200-nest-box project for wood ducks on the utility's right-of-way adjacent to the plant. Assisting with the project were the Michigan Wildlife Habitat Foundation, the Lakeshore Chapter of Michigan Duck Hunters Association, St. Charles High School and Saginaw Valley Waterfowlers.

- 30 bluebird houses were installed with the Muskegon High School Conservation Club.

- Planting of trees and shrubs to enhance Muskegon's Veteran Park. D.E. Karn-J. C. Weadock Plant, near Bay City:

- Construction of an educational River's End Nature Trail, with consultation provided by several Saginaw Bay-area environmental groups, including the Chippewa Nature Center, Garber High School and local Boy Scout and Girl Scout troops.

- Planted more than 5,000 walleye fingerlings as part of first-year operation of a rearing pond, developed with the Saginaw Bay Walleye Club and the Michigan Department of Natural Resources.

LANSING, MICH. (DEC. 5) PR NEWSWIRE - Richard A. Lund, president of Cade Industries (NASDAQ-NMS: CADE), announced today that its Lansing- based subsidiary, Auto-Air has been awarded contracts for engine test equipment totaling $2.1 million from three worldwide aerospace companies.

-- MDS Aero Support Services of Ottawa, Canada, has placed an order of $1.0 million for the manufacture of engine test equipment. The end user will be Royal Air Moroc in Casablanca, Morocco. This will enable Royal Air to test General Electric CFM56-3C, Pratt & Whitney 2037 and Allison T56 engines in a new facility being erected in Morocco.

-- General Electric Company, Evandale, Ohio, has ordered new test equipment for the CFM56-3 engine. The order, valued at $0.5 million, will be shipped to Thai International Airlines in Bangkok, Thailand. This is the second order in recent months for shipment to Thailand.

-- Pratt & Whitney Aircraft, East Hartford, Conn., has placed an order for test bellmouth assemblies for use on the PW4000 Growth engines. This order, valued at $0.6 million, covers six units for shipment in mid-1991. This is the largest test bellmouth ever produced by Auto Air. The engine will be used in Airbus A330 and Boeing 777 aircraft.

In announcing these contracts, Lund said, "This further establishes Cade's ongoing growth and strength in aerospace advanced composite technology, both domestically and in international markets."

Cade Industries plays a major worldwide role in design, development and manufacture of high-technology composite components for the aerospace and air transport industries.

BASKING RIDGE, NJ (DEC. 5) PR NEWSWIRE - AT&T (NYSE: T) will offer special low rates on direct-dialed calls to 177 countries Dec. 8 and 9.

Special rates apply on calls to almost all parts of the world from all parts of the United States.

"AT&T completed more international calls this year than any other and we wanted to thank people for using AT&T," said Frank Ianna, AT&T vice president international marketing.

Throughout the two-day weekend, AT&T's economy rate will apply to calls to

every country that can be dialed directly. The economy rate is the lowest rate offered to callers who are not part of a calling plan, such as the AT&T Reach Out(R) World plan.

The special weekend rates apply for calls from all parts of the United States, including Puerto Rico and the Virgin Islands.

AT&T's extension of direct-dial service to 10 additional countries in November makes this the most extensive international calling offer in the company's history.

In the past year, AT&T offered discount calling to all direct-dialed countries on Valentine's Day and for a two-day celebration of the reopening of Ellis Island in September.

AT&T has offered similar discounts on calls to France for Bastille Day, to the United Kingdom on Remembrance Day, to Canada on Canadian Thanksgiving, to the Philippines on Philippines Independence Day, to Mexico on Mexican Independence Day, to Australia on Australia Day, to Korea for Chusok, to Japan for Keiro No Hi, to Hong Kong and Taiwan for the Mid-Autumn festival, to Italy for Columbus Day, and to Ireland on St. Patrick's Day.

Reach Out World plan subscribers will continue to receive their current plan prices during the promotion.

WESTBURY, NY (DEC. 5) PR NEWSWIRE - General DataComm Industries, Inc. (NYSE: GDC) and American Telephone & Telegraph (AT&T) (NYSE: T) today announced that they have been selected by Westbury, N.Y.-based LEX Electronics to update and enhance its private data communications network.

LEX is purchasing digital transmission equipment from General DataComm, and is obtaining digital transmission services from AT&T. In addition, LEX will purchase GDC's training and program management services.

The new system, which was designed jointly by GDC, AT&T and LEX, will connect LEX's 56 offices nationwide with its Westbury headquarters. Data such as order processing, inventory status and customer service information will be transmitted more quickly and reliably over the new network.

"This network will provide outstanding assistance to our sales and support functions, resulting in superior service to our customers," said Dennis Turner director of corporate telecommunications for LEX. "It will also provide flexibility for continuous improvements as technology and tariffs change, and allow us a platform from which global business opportunities can be established."

According to Turner, the LEX network will support GDC multiplexers at the Westbury hub and at 11 regional sites. The regional locations will be connected to LEX's remote offices by digital data sets with dial restoral.

The entire network will be controlled by MegaView, GDC's centralized network management system, and will offer a high degree of reliability. For disaster recovery capability, AT&T is providing digital access over a high-speed circuit, whereby all locations and remote offices can be switched to a standby multiplexer at a designated recovery site.

"We are certainly very pleased," said Ross A. Belson, president and chief operating officer of General DataComm, "that our expertise at network design, and our outstanding networking products and services, are helping LEX realize its business goals while creating a strong and flexible network that generates a closer partnership between LEX and its customers."

"Giving LEX the network support and design expertise that will enable them to provide excellent service for their customers is AT&T's objective in creating these systems," said AT&T sales vice president, H. David Bearden.

General DataComm is a leading provider of systems, solutions, equipment and services for information networks worldwide. In its fiscal year ended Sept. 30 1990, the company reported revenues of $202 million.

DANBURY, CT (DEC. 5) PR NEWSWIRE - Huels A.G. of Marl, Federal Republic of Germany, has selected the Unipol PE process for use in its planned new 120,000 tons-per-year polyethylene plant. Scheduled for completion in 1993, the plant will produce a full range of high-density polyethylene products.

Announcement of the selection of the Union Carbide (NYSE: UK) process was made jointly today by Dr. Hans K. Felger, president of Huels Thermoplast Division, and Roger B. Staub, president of the Polyolefins Division of Union Carbide Chemicals and Plastics Company Inc.

Felger said, "We chose the Unipol process for our new polyethylene project because this process offers, besides attractive economics, the capability to produce both our established, successful product range as well as new specialty resins for the markets of the future."

This marks Huels' second Unipol process license, the company having earlier selected the Union Carbide/Shell Oil (USA) Unipol PP process for use in its new polypropylene plant currently under construction at Gelsenkirchen-Scholven.

"Huels' choice of the Unipol process for polyethylene is particularly gratifying to us because Huels, in its confidence in our technology, is prepared to base its entire polyolefins strategic direction on Unipol," Staub said.

A member of the VEBA group, Huels is Germany's fifth largest chemical company. It ranks among the most important suppliers of chemical base materials, detergent raw materials, fine chemicals, solvents, paint and lacquer raw materials, plastics, plasticizers, and synthetic rubbers. It has polyethylene manufacturing facilities at Scholven, Federal Republic of Germany.

Huels becomes the 34th licensee of the Unipol PE process and boosts total Unipol process licensee announced capacity in operation or under construction to nearly 5.8 million tons annually worldwide.

MONTREAL (DEC. 5) PR NEWSWIRE - The Seagram Company Ltd. (NYSE: VO) today reported that net income for the third quarter ended Oct. 31, 1990, was $189 million, or $2.01 per share, compared with $170 million, or $1.77 per share, in the previous year.

Operating income for the 1990 quarter was $190 million, an increase of 15.2 percent from $165 million in the comparable 1989 quarter. Sales for the third quarter rose 9.2 percent to $1.5 billion from $1.4 billion in the 1989 quarter.

For the nine months, Seagram net income was $581 million, or $6.16 per share, compared with $565 million, or $5.84 per share, in the 1989 period. Operating income for the nine-month period advanced 16 percent to $499 million from $430 million a year earlier. Sales for the nine months grew 7.8 percent to $4.2 billion from $3.9 billion last year.

Net income, operating income and sales figures are all records for their respective periods.

Edgar Bronfman Jr., president and chief operating officer, said: "Several factors contributed to Seagram's third-quarter performance. Seagram International produced strong sales growth, aided by currency translations, and registered operating income advances with Seagram Europe and Seagram Global Markets Group showing particular strength. Tropicana's operating income benefited from lower orange juice costs."

The Seagram Company Ltd. is a leading producer and marketer of distilled spirits, wines, coolers, fruit juices and soft drinks. The company's brands include Chivas Regal and The Glenlivet Scotch Whiskies, Crown Royal and Seagram's V.O. Canadian Whiskies, Seagram's 7 Crown Blended Whiskey, Seagram's Extra Dry Gin, Martell Cognacs, Mumm and Perrier-Jouet Champagnes, Sandeman Ports and Sherries, Barton & Guestier (B&G) Wines, Sterling Vineyards Wines, Seagram's Coolers, Tropicana Pure Premium Orange Juice and Tropicana Twisters.

#90339p0186 12/05/1990 ~PR Newswire

BOSTON (DEC. 5) PR NEWSWIRE - An environmental group today publicized the merits of a Raytheon Company (NYSE: RTN) effort to eliminate during 1992 its use of two chemicals that destroy the ozone layer. Raytheon described its plan at a press conference held with MASSPIRG, six months after MASSPIRG had called upon Raytheon to set a 1993 deadline for phasing out ozone-destroying chemicals.

"Raytheon's plan shows that where top management has the will, there's a way to stop using chemicals that endanger the ozone layer and public health," said Hillel Gray, toxics policy analyst at MASSPIRG. "Moreover, factory workers and neighbors can breathe easier because Raytheon is rejecting the use of chlorinated substitutes that may pose cancer risks."

"We are on a fast track to find an environmentally safe way to produce advanced electronic equipment," said Jack Pasquariello, Raytheon vice president of manufacturing and environmental quality. "Eliminating ozone depleters is one important element in a comprehensive companywide pollution prevention program."

Continued destruction of the earth's ozone layer, according to the EPA, may sharply increase rates of skin cancer death and eye disease, and damage crops and marine life. MASSPIRG had ranked Raytheon as the largest source in Massachusetts in 1989 of ozone-destroying CFC-113 and methyl chloroform, based on corporate reporting under the federal Community Right-to-Know law.

"We've reduced emissions of these two chemicals by more than 40 percent since 1987 and are now pushing hard to eliminate them completely," said Pasquariello. "We want to be first in product innovation, not ozone depletion."

The goal of Raytheon's new business plan is to eliminate during 1992 both CFC-113 and methyl chloroform from its printed circuit board operations in five states. Raytheon uses the chemicals to clean about 750,000 printed circuit boards annually. A task force of 36 engineers will identify the one or two best prospects for substitution and set up an internal test site by early 1991.

WASHINGTON (DEC. 5) PR NEWSWIRE - The Federal National Mortgage Association's (Fannie Mae) (NYSE: FNM) Office of Housing Policy Research today announced that it has published its first issue of the Journal of Housing Research.

"The journal is designed to provide an outlet for theoretical and empirical research on a broad range of housing issues, including housing policy, home mortgage finance, and international housing finance," said Jim Carr, Fannie Mae's vice president for housing policy research. The first issue features a special series of eight articles titled "Mortgage Markets in the Year 2000."

Issues include how major demographic and economic trends will affect growth in mortgage originations, the likely composition of mortgage instruments in the year 2000, and the potential for growth in the use of pass-through securities.

Also included in the Journal of Housing Research are two announcements: a call for papers on the topic of homeownership affordability; and, a request for proposals for a comparative analysis of housing finance arrangements in both Europe and the United States.

The Journal of Housing Research is the second of two new housing journals being published by the Office of Housing Policy Research. The first journal, Housing Policy Debate was released earlier this Fall. Future issues of the Journal of Housing Research will emphasize theoretical models, empirical applications, and statistical analysis which will complement the policy

research presented in Housing Policy Debate.

The Office of Housing Policy Research was created to provide thoughtful and insightful literature on a broad range of housing issues. The office is aided in its work by an independent advisory board consisting of many of the nation's premier housing policy and housing finance experts.

Fannie Mae, the USA's Housing Partner, is a congressionally chartered, shareholder-owned company and the nation's largest investor in home mortgages.

MCLEAN, VA (DEC. 5) PR NEWSWIRE - PRC Inc. (formerly Planning Research Corporation and Advanced Technology, Inc.), a subsidiary of The Black and Decker Corporation (NYSE: BDK), announced today that Bob Laurence has been appointed president of its commercial and international operations.

The new commercial group will be responsible for leading PRC's expansion into the fast-growing commercial and international systems and services markets. PRC's Commercial Systems Group will consolidate the company's existing commercial businesses, which will generate $150 million in sales this year.

Laurence was formerly president and founder of Oracle Complex Systems Corporation, the systems integration subsidiary of Oracle Systems Corporation. During his 2-1/2 years with Oracle Complex Systems Corporation, the business grew from a start-up to a well-respected member of the systems integration community. Oracle Complex Systems Corporation is active in all of the federal commercial and international markets for information systems. Prior to founding Oracle Complex Systems, he was president of Systemhouse Federal Systems.

Laurence is also an active member of Adapso, the software and systems integration services trade association, where he was recently elected vice chairman of the board. He was active in the formation of Adapso's systems integration division.

In his new role at PRC, Laurence will report to Gary Kennedy, president and chief executive officer of PRC Inc. Kennedy was named president and CEO on Nov. 29, 1990, having formerly served as president of Oracle USA.

PRC is currently among the largest systems integration companies in the world, according to market research firm G2 Research. PRC's technology base, skills and 8,400 people worldwide give it a strong position to service medium and large corporations through a variety of information technology applications such as document imaging systems, application development, facilities

management, networking and data base integration.

PRC employs about 8,400 employees and generates annual revenues of approximately $700 million.

#90339p0190 12/05/1990 ~PR Newswire

BOISE, IDAHO (DEC. 5) PR NEWSWIRE - Boise Cascade Corp. (NYSE: BCC) today announced that it has begun making marketable paper on a new world-class paper machine at its pulp and paper mill in International Falls, Minn.

The new 345-inch-trim machine, the centerpiece of the mill's $535 million modernization and expansion project, is designed to be the largest and fastest uncoated white paper machine in the world. Stretching nearly two football fields in length, it's capable of producing more than 860 tons of uncoated white paper a day, more than doubling the mill's previous production capacity.

"The successful start-up of this new machine is a major milestone in Boise Cascade's efforts to achieve two of the five high-priority objectives we spelled out in our Blueprint for the '90s strategy," said John B. Fery, Boise Cascade chairman of the board and chief executive officer. "The two objectives are to focus our growth on our white paper business and to invest capital to achieve world-class status in our pulp and paper facilities."

The project has brought significant environmental improvements as well. These environmental benefits are best illustrated by the start-up in October of the project's new $50 million bleach plant. The technology used in the new bleach plant substantially reduces the use of chlorine, traditionally used in the bleaching process to whiten paper and give it other characteristics demanded by customers.

This reduced use of chlorine will help further reduce the minuscule amounts of dioxin the mill discharges, an amount which has already been reduced to less than one-hundredth of an ounce per year. The technology used in the new bleach plant reduces the formation of chloroform by approximately 90 percent and reduces air emissions of chlorine and chlorine dioxide by over 90 percent.

Boise Cascade Corp. is an integrated forest products company headquartered in Boise, Idaho, with operations located primarily in the United States and Canada. The company manufactures and distributes paper and paper products, office products, and building products and owns and manages timberland to support these operations.

HOUSTON (DEC. 5) PR NEWSWIRE - The Western Company of North America (NYSE: WSN) announced today, that it will make several key organization changes in its pressure pumping business. In announcing the new reporting relationships and promotions, to become effective Jan. 1, 1991, Chairman and CEO Sheldon Erikson said, "Such moves will further strengthen our operation to assure continuing responsiveness to the needs of our customers in the rapidly growing areas of the company's pressure pumping business."

Steve English, currently vice president and western division manager based in Dallas, will move to Houston to fill the newly created position of vice president, operations, reporting to Erikson. Forrest Duff vice president, northern division, and Bob Adams vice president, southern division, will report to English. Randal Jones, who is currently district manager in Midland will replace English as vice president of the western division, and will also report to English.

Jay Merritt, western division sales vice president in Midland, will move to Houston to become vice president, sales, for Western Petroleum Services and will report to Gene Hodge, the WPS vice president of sales and marketing. Also, Bill Lehner, sales vice president of the southern division, and Bill Fagan, northern division sales vice president, will report to Merritt. Rick Hayley, sales manager in Midland, becomes vice president, sales, for the western division replacing Merritt and will also report to Merritt.

Western Petroleum Services' current director of manufacturing, Dalton Thomas, will assume the additional responsibility for purchasing and distribution reporting directly to Erikson.

The Western Company of North America is an oilfield service company providing pressure pumping services through Western Petroleum Services and Western Petroleum Services International Company and contract drilling services worldwide through Western Oceanic, Inc. Pressure pumping principally involves the acidizing, fracturing and cementing of oil and gas wells. Offshore contract drilling services are provided with a fleet of 13 mobile rigs.

#90339p0200 12/05/1990 ~PR Newswire

NEW YORK (DEC. 5) PR NEWSWIRE - Pan American World Airways today reported that scheduled passenger traffic last month was down 6.1 percent compared with the same month a year ago, from 2.075 billion revenue passenger miles to 1.949

billion.

Load factor increased 1.3 points, from 57.7 percent last year to 59 percent this year, with available seat miles down 8.2 percent, from 3.594 billion to 3.301 billion.

Traffic statistics include Pan American World Airways' operations only, and do not include the Pan Am Shuttle or Pan Am Express flights. The 1989 statistics have been restated to exclude November traffic operated in the Internal German Service, which was transferred to Lufthansa at the end of October this year.

Latin American RPMs increased 16.9 percent, ASMs were up 7.3 percent, and load factor increased 5.3 points, from 59.3 percent, to 64.6 percent.

In U.S. domestic markets, RPMs were down 11.7 percent, ASMs were down 15.5 percent, and load factor increased 2.5 points, from 56.5 percent to 59.0 percent.

Atlantic RPMs were down 12 percent, ASMs were down 10.1 percent, and load factor decreased 1.2 points, from 57.8 percent to 56.6 percent.

Scheduled freight ton miles were down 22.7 percent, from 63.1 million to 48.8 million.

Year to Date For the first 11 months of the year, scheduled passenger traffic was up 7.7 percent, from 26.451 billion RPMs to 28.499 billion. Scheduled capacity was up 4.4 percent, from 41.468 billion to 43.294 billion. Load factor, at 65.8 percent, was up 2 points from 63.8 percent last year.

Scheduled freight ton miles were down 2.8 percent, from 672.1 million to 653.1 million.

SEATTLE (DEC. 5) PR NEWSWIRE - Barry Ackerley, chairman and chief executive officer of Ackerley Communications Inc. (AMEX: AK), announced today that the company will withdraw its application for a National Hockey League (NHL) expansion team. However, the company will still make a presentation on behalf of the city of Seattle at the National Hockey League meeting scheduled to take place this morning in Palm Beach, Fla.

The company will withdraw the application because no ownership group has stepped forward to demonstrate the financial wherewithal to meet the requirements of the NHL. A franchise fee of $50 million has been set by the NHL, with a $5 million down payment due in December. Mr. Ackerley had agreed

to be a minority owner in the expansion team if it would help the city of Seattle to be awarded such a franchise.

"Because no ownership group has materialized, we have no choice but to withdraw our application," said Bill Lear, senior vice president of The First National Bank of Chicago, who was retained by Ackerley Communications Inc. to put together an investment group and who will formally withdraw the application at the NHL meeting.

Mr. Ackerley also stated that Bill Ackerley, executive in charge of the New Seattle Arena, will represent the city of Seattle at the NHL meeting. "We want the league to know that Seattle will be a viable contender for future expansions. We're ready to embrace the NHL and we have a facility that can accommodate them, but the reality of having a team is just not going to happen as soon as we had hoped given the lack of a viable ownership group," said Bill Ackerley. The second round of NHL expansion will tentatively take place in 1993-1994.

Ackerley Communications is building a state-of-the-art, privately financed $100 million arena in Seattle which would house the Seattle Supersonics, and would be used primarily for sports and family events, as well as concerts. The building is being designed to accommodate hockey. Ground breaking is scheduled to take place in the fall of 1991.

MINNEAPOLIS (DEC. 5) PR NEWSWIRE - Brookfield Development Inc. and RETA Minneapolis Inc. and RETA Chicago Inc. are pleased to announce the selection of The Hahn Company to manage Gaviidae Common and Chicago Place. The Hahn Company will perform all leasing, marketing and property management functions concerning these urban-based shopping complexes. The appointment is effective Jan. 1, 1991.

Gaviidae Common is a five-level, 123,000-square-foot project anchored by Saks Fifth Avenue. Chicago Place is an eight-level, 170,000-square-foot project also anchored by Saks Fifth Avenue.

The second phase of Gaviidae Common, now under construction, will also be included under this management agreement in the near future. This project, currently named 555 Nicollet, includes approximately 40 specialty shop locations and the new Neiman Marcus store and is scheduled for completion in August of 1991.

The Hahn Company is a subsidiary of Trizec Corporation Ltd. which is an affiliate of Carena Developments Limited of Toronto, Canada. Brookfield

Development Inc. is managed by Carena Developments Limited.

The Hahn Company owns and/or manages 52 centers in 17 states nationwide, totalling more than 38 million square feet. The Hahn Company has developed and operates such award-winning properties as the internationally renowned Horton Plaza in downtown San Diego.

Employees currently working on these properties will become employees of The Hahn Company, assuring that the high level of professional service already established at the centers will continue.

Carena Developments Limited is a major diversified real estate development company with $13.6 billion of assets, comprised largely of rental properties concentrated in major urban centers in the United States and Canada. Carena's assets are held directly and through its major affiliates which include Trizec Corporation, Bramalea Limited, Coscan Development Corporation and Consolidated Carma Corporation.

The properties located in Brookfield's Midwest/Mountain Region include: the under-construction Dain Bosworth Plaza and 555 Nicollet, IDS Center, Minneapolis City Center, the Marquette Hotel, Gaviidae Common, Dain Tower and Thorpe Building in Minneapolis; St. Paul Center, Meritor Tower and North Central Life Tower in St. Paul, Minn.; Chicago Place and Quaker Tower in Chicago; Republic Plaza and The World Trade Center (Bank Western and Dekalb Energy Tower) in Denver.

#90339p0213 12/05/1990 ~PR Newswire

HARRISBURG, PA (DEC. 5) PR NEWSWIRE - Harsco Corp. (NYSE: HSC) announced today that its BMY-Combat Systems Division (BMY-CSD), York, Pa., has been awarded a $6.3 million contract by the U.S. Army to provide Integrated Logistics Support (ILS) for the M109 A6 Howitzer Improvement Program (HIP).

In September of this year, Harsco won the HIP contract itself which entails the major modernization of 44 M109 howitzers; deliveries are to begin in mid-1992. Total value of that contract is $74 million; a follow-on contract for additional units is anticipated next year.

Operational readiness and maintenance of complex combat systems relies heavily upon the ILS function. Consisting of various elements to include precisely detailed manuals and supply data, the function is critical to the deployability of combat equipment, such as the new M109 A6 upgrade. Award of the ILS contract is a reflection of Harsco's commitment to HIP and BMY-CSD's thorough knowledge of both the program itself and the M109 howitzer. The

division has produced the howitzer since 1974. The newly awarded ILS responsibility is to be carried on concurrently with HIP production and is expected to be completed by mid- 1992.

Harsco Corp. is a diversified, international, industrial company headquartered in Camp Hill, Pa. The company's 12 divisions provide products and services for defense, industrial, commercial and construction applications from more than 270 facilities in 32 states and 14 countries.

COLUMBIA, MD. (DEC. 5) PR NEWSWIRE - Essex Corporation (NASDAQ-NMS: ESEX) announced today the appointment of Jeffrey R. Lapides as vice president, commercial products.

Dr. Lapides has both a management and scientific background. He held a variety of positions including president at Alleco, Inc., formerly a national commercial services firm. He also held the position of president of its largest subsidiary, Service America, a national food service firm, prior to its divestiture. After leaving Alleco, Dr. Lapides was involved in educational publishing ventures.

Dr. Lapides received his bachelor of arts degree from Clark University and his master of science degree and doctorate degree in physics from the University of Maryland at College Park. He has held research positions both at NASA's Goddard Space Flight Center and the National Institutes of Health.

Essex has recently created a Commercial Products Division to advance its commercial efforts in publishing, psychological testing, systems integration, and optical computing. Essex Corporation provides training, support services and information systems to government and industry and manufactures digital-optical systems and processors.

FRESNO, Calif (DEC. 5) PR NEWSWIRE - Gottschalks Inc. (NYSE: GOT) announced that November 1990 sales increased 41.7 percent to $34.1 million from $24.0 million for the prior November. Same store sales for the November period increased 25.1 percent. For the 43-week 1990 period to date, total sales increased 27.3 percent to $213.4 million from $167.6 million for the year earlier 43-week period. Same store sales on a year-to-date basis increased

12.5 percent over the prior year.

"Our strong November sales gains were fueled both by a change in a promotional event and by the continued economic strength in our market areas," stated Robert Lawson, Gottschalks' Chief Financial Officer. "The change in promotional event to November from December resulted from a change in the retail calendar and increased November sales by approximately $4.5 million. Without the event change, total November sales would have increased 23 percent with same store sales increasing 10.6 percent."

Joe Levy, Gottschalks' chairman and chief executive officer stated, "The strong double digit increase in same store sales is particularly pleasing since we were against same store sales increases of 10 percent from last November. These sales results certainly provide a strong basis for our optimism that the 1990 Christmas selling season will be very successful for Gottschalks," added Levy.

Sales results are summarized as follows:

	Dec. 1, 1990	Nov. 25, 1989	Total increase (percent)	Same store sales increase (percent)
Sales, four weeks ended	$ 34,081	$24,045	41.7	25.1
Sales, 43 weeks ended	$213,372	$167,621	27.3	12.5

Gottschalks is a regional department store chain, currently operating 22 department stores and 34 specialty apparel stores in the Central Valley and Central Coast areas of California. Gottschalks offers moderately to upper moderately priced brand-name fashion merchandise, and is in its 86th year of continuous family management.

SOUTHFIELD, MI (DEC. 5) PR NEWSWIRE - Lear Seating Corporation's sales for the first five months of its 1991 fiscal year totaled a record $449.5 million, an increase of 13 percent over the first five months of fiscal 1990, according to Kenneth L. Way, chairman.

Sales for the five-month period a year ago totaled $398.6 million. Lear also disclosed that its new Swedish subsidiary, Lear Seating Sweden, AB, will supply all of SAAB's finished seating requirements starting in January, 1991.

Richard G. Williams, managing director of Lear Sweden, said the new Lear

Facility at Trollhattan, SAAB's home plant, will produce 500 car sets of seats daily for an annual output of 100,000 cars. Williams also is vice president of Lear's European "Just In Time" delivery operations for major car manufacturers. He said Lear is staffed to support continued growth in Europe.

Lear, headquartered in Southfield, is the largest independent seating supplier with 32 facilities worldwide and over 10,500 employees. Sales in its fiscal year ending June 30 were $1,068,000,000.

FORT WAYNE, IND. (DEC. 5) PR NEWSWIRE - Thomas C. Griffith, chairman and chief executive officer of Lincoln Foodservice Products, Inc. (NASDAQ: LINN) announced today that in accordance with his previous agreement with Lincoln's board, he will be retiring from his position with the company at the end of 1990. He will, however, continue to be a member of the board of directors.

"I had a specific set of goals when I assumed my responsibilities 18 months ago," said Griffith. "I believe I have achieved my goals and feel confident that the company is on the right track and under the right leadership going forward."

William A. Thomas, currently president and chief operating officer of Lincoln, has been elected by Lincoln's board of directors to succeed Griffith as chairman and CEO and retain the title of president.

"Tom Griffith has made substantial contributions as our chairman and as a director of Lincoln. We are gratified that we will still have his counsel and guidance as a board member," said Thomas.

Thomas has been with Lincoln Foodservice for 18 years. He was named a director in 1988 and named president and COO in May 1989 and prior to that served as executive vice president, Operations. Thomas joined Lincoln in November 1972 as manager of Manufacturing and was named vice president - Manufacturing in April 1973. In April 1984, his responsibilities were expanded to include Human Resources. Thomas was first employed by Alcoa in 1953 and served in various managerial capacities including industrial engineering and plant management from 1953 to 1972.

Lincoln Foodservice Products, Inc. designs, manufactures, and markets commercial institutional foodservice cooking equipment and utensils. The company, which produces Impinger(R) conveyor ovens, Steam'r Oven(R) combi-cookers, WearEver(R) and Centurion(R) foodservice utensils, Redco(R) food slicers, cutters, and wedgers, Galley(R) food serving equipment, and

Fresh-O-Matic(R) food warmers, markets its products internationally through its own sales force and a network of 1,500 distributors worldwide.

#90339p0229 12/05/1990 ~PR Newswire

DULUTH, GA. (DEC. 5) PR NEWSWIRE - Wegener Corp. (NASDAQ-NMS: WGNR) today announced a net loss of $(2,649,000) or $(0.36) per share for the year ended Aug. 31, 1990, compared to earnings of $1,146,000 or $0.15 per share for the year ended Sept. 1, 1989.

For the three months ended Aug. 31, 1990, net loss was $(1,533,000), or $(0.21) per share compared to $(63,000), or $(0.01) per share for the three months ended Sept. 1, 1989. The results for the three and 12 months ended Aug. 31, 1990, include pre-tax charges of $777,000 and $1,837,000 respectively related to provisions for inventory rework and obsolescence, warranty, and bad debt expense. In addition, based upon the Company's performance in fiscal 1990 and the expectation of lower revenues at Wegener Communications Inc. (WCI) in fiscal 1991, a restructuring charge of $500,000 was accrued in WCI's fourth quarter of fiscal 1990. This action is designed to lower the Company's operating and overhead costs.

Revenues were $27,609,000 for the year ended Aug. 31, 1990, compared to

$30,422,000 for the year ended Sept. 1, 1989. Revenues were $6,252,000 for the three months ended Aug. 31, 1990, compared to $6,296,000 for the three months ended Sept. 1, 1989. The Company has two wholly owned subsidiaries, Wegener Communications Inc. and Telecrafter Services Corp. (TSC). WCI's revenues for the three and 12 month periods ended Aug. 31, 1990, were $4,622,000 and $20,255,000 compared to $3,309,000 and $18,209,000 for the three and 12 month periods ended Sept. 1, 1989. TSC's revenues for the three and 12 month periods ended Aug. 31, 1990, were $1,630,000 and $7,354,000 compared to $2,987,000 and $12,213,000 for the three and 12 month periods ended Sept. 1, 1989. The Company's and TSC's revenue decreases for the year ended Aug. 31, 1990, are due primarily to the economic slowdown that is being experienced in the cable television industry. This slowdown, which has been caused by uncertainty over the regulation of rates and by tightening in the credit markets, is expected to continue at least through the first half of fiscal 1991.

The increase in the Company's net loss for the fourth quarter and the year ended Aug. 31, 1990, was caused by several factors. WCI continued to experience low margins on its DBS products. During the fourth quarter and year ended Aug. 31, 1990, the inventory reserve was increased by $185,000 and $435,000, the warranty reserve was increased by $250,000 and $370,000, the reserve for bad debts was increased by $80,000 and $445,000, and the corporate notes receivable reserve was increased by $238,000 and $528,000, respectively. Also, during the fourth quarter, the Company accrued the aforementioned restructuring charge of $500,000. TSC's gross margin percentage has improved in fiscal 1990 compared to fiscal 1989; however, operating profit dropped considerably due to the sharp decrease in revenues. The high manufacturing costs associated with WCI's DBS products and the slowdown in TSC's service business is expected to continue to impact the revenues and earnings of the Company in fiscal 1991. Primary factors in determining the future growth and profitability of the Company will be the volume of new orders, lowering of operating and overhead costs, as well as the successful implementation of the Total Quality Commitment and Just In Time manufacturing programs.

During the fourth quarter, WCI continued deliveries of the recently introduced Series 1800 Addressable Video Receivers to Sportscom. This product has been well received in the marketplace. Sportscom controls the distribution of its seven sports networks to local cable television systems. The addressability of WCI's video receivers allows Sportscom to honor event blackouts and to manage program distribution on a system by system basis.

WCI will begin delivery of the newest addition to its DBS product line, the Series 1900 DBS Audio Receiver, in the third quarter of fiscal 1991. The Series 1900 is a second generation satellite receiver incorporating the performance and many of the features of the Series 1800 Receiver at a reduced cost.

The international demand for WCI products is growing rapidly. This increased

demand is due to the changing European business climate as well as the direct broadcast industry which has standardized on WCI audio distribution technology. This standardization creates continuous requirements for WCI transmission equipment for transmit sites and also stimulates WCI's licensing program. Well-known consumer electronics manufacturers such as NEC, Toshiba and Sanyo participate in the licensing program whereby they incorporate WCI audio processing circuitry in their European direct satellite broadcast receivers.

Wegener Corp., through its wholly owned subsidiaries, designs and manufactures equipment for the business broadcast, data communications and broadcast radio and television industries. It is also a major supplier of both products and services to the cable television industry.

ST. PAUL, MN (DEC. 5) PR NEWSWIRE - Dwight D. Opperman, president and CEO of the West Publishing Company, and Dr. Roger K. Summit, president and CEO of Dialog Information Services, Inc. have announced a new way to access information from Dialog.

Beginning in early 1991, a new transparent interface designed by the two companies will enable WestLaw subscribers to locate individual Dialog databases through the WestLaw directory and access these databases using familiar WestLaw logic and commands.

According to Opperman, "In recent years, law firms, corporate legal departments, and other users of computer-assisted legal research have found it increasingly important to access news, business, technical, and other information in addition to traditional legal research.

Accessing these materials through Dialog, the world's largest source of online information, will enable legal professionals to increase their efficiency and service to their clients."

WestLaw subscribers will need to know only familiar WestLaw commands to search Dialog. They will even be able to use West's EZ ACCESS, a menu-driven approach that will help them select the right Dialog database and to formulate a query that will run in both WestLaw and Dialog databases.

"This alliance will make us an even more formidable force in the CALR (computer-assisted legal research) market than we are today," commented Dr. Summit. "WestLaw subscribers will now be able to use a single, powerful research system to access the world's largest collection of online information in conjunction with their legal research on WestLaw."

Under the new arrangement, over 140 Dialog databases will be available on WestLaw in early 1991. These files will contain business and financial data, scientific and technical material, intellectual property registration data, and general news and information. Additional Dialog databases will be added monthly.

The existing gateway between WestLaw and Dialog, available since 1987, will be maintained. Through this gateway, all 380 Dialog databases can be accessed using Dialog search language. West Publishing Company is the nation's premier publisher of legal information and supplier of WestLaw.

CONTACT: Dorothy Molstad of West Publishing, (612) 228-2475; or Kathie Mulvey of Dialog Information Services, (415) 858-3711.

#90339p0241 12/05/1990 ~PR Newswire

CORAL GABLES, FLA. (DEC. 5) PR NEWSWIRE - BankUnited Savings Bank, (NASDAQ-NMS: BKUN), a publicly owned financial institution serving both coasts of Florida, has reported the highest net earnings in its history and other record results for fiscal 1990.

BankUnited reported net earnings of $803,404 ($.65 per share) on total income of $20,515,748 for its fiscal year ended Sept. 30, 1990, a 22 percent gain over its net earings of $657,664 ($.62 per share) on total income of $16,255,356 for fiscal 1989.

For the three months ended Sept. 30, 1990, BankUnited reported net earnings of $228,957 ($.17 per share) on total income of $5,434,955, compared to net earnings of $83,375 ($.06 per share) on total income of $4,739,681 for the same quarter of 1989.

The fiscal 1990 results established several records for BankUnited. In addition to the 22 percent increase in net earnings, net interest income rose 50 percent to $4.2 million, total assets rose 10 percent to $220 million, deposits rose 16 percent to $189 million, loan portfolio rose 15 percent to $162 million, and stockholders' equity rose 28 percent to $12.6 million.

In announcing the annual earnings, Alfred R. Camner, chairman and president of BankUnited, stated, "Our capital ratios are far in excess of the regulatory requirements, and will support important growth in the years ahead. Our tangible capital is 5.7 percent vs. 1.5 percent required; our core capital is 5.7 percent vs. 3 percent required; and our risk-based capital is 13.9 percent vs. 6.4 percent required.

"However, our most important achievement may not be in our latest financial numbers. It was our decision to focus on private banking as BankUnited's niche in the highly specialized delivery of banking services to professional, executive and small business customers. We made a commitment to provide a more personal relationship to our customers which led to establishing and staffing a private banking division.

"As for the financials, our management team is elated by the results we are reporting today. We achieved significant gains in all important areas, and our delinquent loans are substantially below the industry average. We opened our seventh branch banking office in Delray Beach and moved our corporate headquarters and new private banking division to more elaborate quarters in Coral Gables."

BankUnited operates seven banking offices in Florida: Bonita Springs, Venice and Bradenton on the west coast; and Coral Gables, Tamarac, Coral Springs and Delray Beach on the east coast. It is a publicly owned financial institution traded on the NASDAQ national market system under the symbol BKUNA.

ENGLEWOOD, CO (DEC. 5) PR NEWSWIRE - RE/MAX International, Inc., the residential real estate firm here, has recently sold a franchise in Fargo, N.D. and is now represented in all 50 states, as well as in each of Canada's provinces, today announced Dave Liniger, co-founder, chairman, and chief

executive officer of RE/MAX.

"We are delighted by this development," said Liniger. "Our real estate network can now service the needs of all Americans and Canadians - whatever their respective state or province. And service from RE/MAX is second to none.

"We anticipate that, no later than the end of 1991, RE/MAX will become king of the hill, overtaking Century 21, our main competitor. And that's a position that our dedication and quality of service will never permit us to abandon."

As a result of the Fargo franchise, RE/MAX expects to have at least 32,000 sales associates by the end of 1991. This represents an increase of almost 4,000 over the current figure of 27,660.

RE/MAX - the nation's second largest residential real estate firm, and the largest in Canada - provides a variety of services, including relocation, insurance, referral, and asset management. The firm was founded by Dave and Gail Liniger in 1973.

MINNEAPOLIS (DEC. 5) PR NEWSWIRE - Alliant Techsystems Inc. (NYSE: ATK) today announced that it has received a contract for the fabrication, loading and testing of a variety of Explosively Formed Penetrator (EFP) Warheads. Over a three-year period, the contract has a potential value of $14.5 million. Contract work will be done at Alliant Techsystems' test facilities in Elk River, Minn.

The contract, awarded by the U.S. Army Research, Development and Engineering Center (ARDEC), has as its objective the successful demonstration of new EFP concepts to be incorporated in future anti- armor munitions. Alliant Techsystems' work will include design and fabrication of parts from various materials, explosive loading and extensive testing for the collection of engineering data.

Alliant Techsystems supplies high-quality precision armament, ordnance, marine and information storage systems to the U.S. government and allies. In 1989, the company had revenues of $1.3 billion and net income of $42 million. Headquartered in Minnesota, Alliant Techsystems employs 7,800 people.

CULVER CITY, CALIF. (DEC. 5) PR NEWSWIRE - Advancing its position as a complete publishing systems supplier, Information International Inc. (NASDAQ: IINT) (triple-I) has announced its PostScript Interpreter, which processes images in Adobe Systems' PostScript page description language, now supports the Open Prepress Interface (OPI) specification. This product enhancement provides triple-I customers with an automated, seamless integration of high-resolution graphics and bendays, both black and white and color, into pages constructed on a Macintosh or PC/PC clone based front-end system.

OPI provides an optimized link to high-resolution halftones and bendays, which combines the strengths of computer publishing and triple-I's advanced prepress technology. OPI processing is available to any front-end layout program, such as Aldus PageMaker or Quark Xpress, which generates Adobe Red Book-compliant PostScript files and supports the OPI standard.

During publication production, a grayscale TIFF image for screen display is generated from the high-resolution triple-I electronic photo image. The image may be captured by triple-I's InfoSCAN Laser Scanner or Infoscan CCD Scanner. Alternatively, triple-I's GRAFIX Connection may be used to generate the appropriate electronic image from a range of industry-standard illustration formats, such as DDES or Scitex Handshake. During PostScript file processing using OPI, the low-resolution grayscale TIFF images are automatically replaced by their corresponding fully compensated high-resolution triple-I halftones.

Information International Inc. designs, manufactures, markets, and services computer-based systems that automate prepress production in newspaper, magazine, technical, financial, directory, and catalog publishing.

PostScript is a registered trademark of Adobe Systems Inc. Macintosh is a registered trademark of Apple Computer. Aldus PageMaker is a registered trademark of Aldus Corp. Quark Xpress is a registered of Quark Inc.

DALLAS, (DEC. 5) PR NEWSWIRE - Southwest Airlines Co. (NYSE: LUV) announced today that its November 1990 traffic increased 8.9 percent to 816.2 million revenue passenger miles (RPMs) from the 1989 level of 749.5 million RPMs. Available seat miles (ASMs) increased 11.7 percent to 1,389.7 million from the November 1989 level of 1,243.8 million. The load factor for the month was 58.7 percent, down 1.6 points from last year's load factor of 60.3 percent.

For the first 11 months of 1990, Southwest flew 9,205.9 million RPMs, compared with 8,577.8 million RPMs recorded for the same period in 1989, an increase of 7.3 percent. Available seat miles increased 10.8 percent to 15,050.5 million

from the 1989 year-to-date level of 13,585.1 million. The 1990 year-to-date load factor was 61.2 percent, compared to 63.1 percent for the same period last year, a decrease of 3.1 points.

Herbert D. Kelleher, chairman, president and chief executive officer of Southwest Airlines Co. stated, "Our November traffic results were generally in line with our expectations. The modest drop in load factor of 1.6 points to 58.7 percent was expected due to the softening domestic economy and large increase in aircraft capacity that has occurred in the industry during fourth quarter 1990.

"At present, bookings for December 1990 travel are soft, as compared to last year, and our traffic outlook is more pessimistic than it was for October and November."

JACKSONVILLE, FL. (DEC. 5) PR NEWSWIRE - Florida Rock Industries, Inc. (AMEX: FRK) today announced the board of directors declared the regular semiannual dividend. It also announced its results for the fourth quarter and year ended Sept. 30, 1990.

The board of directors declared the semiannual dividend of $.25 per share, payable on Jan. 2, 1991 to stockholders of record on Dec. 19, 1990.

Fiscal 1990 was a difficult year for Florida Rock Industries, Inc. as weak construction markets resulted in lower sales and profits.

FOURTH QUARTER RESULTS Sales and gross profit decreased to $93,152,000 from $106,239,000 and to $14,814,000 from $20,998,000, respectively, from the same period last year. Net income decreased to $3,900,000 from $7,219,000 for the same period last year. Earnings per share were $.42, down from $.78 last year.

The sales decrease was primarily attributable to weak construction markets. Profit and profit margins declined both as a result of lower sales and plant write offs due to certain plant closings in the fourth quarter.

FULL YEAR RESULTS Sales for fiscal 1990 were $390,546,000 down 7 percent from $420,447,000 in fiscal 1989. The decrease in sales was due to weakening construction markets throughout the year and the erosion of selling prices in some markets due to competitive pressures.

Gross profit declined 15 percent to $65,771,000 from $77,523,000 as profit margins were lower due to lower volumes and selling prices, under absorbed

fixed costs, termination expenses from staff reductions, plant write-offs due to certain plant closings in the fourth quarter, and increased insurance expense.

Income before income taxes was down 28 percent to $25,093,000 from $34,913,000. Net income was $17,100,000 or $1.86 per share, which was a 27 percent decrease from fiscal 1989's net income of $23,302,000 or $2.53 per share.

Florida Rock Industries, Inc. is a Southeastern construction materials company concentrating in construction aggregates and concrete products.

#90339p0259 12/05/1990 ~PR Newswire

CHICAGO (DEC. 5) PR NEWSWIRE - The board of directors of Telephone and Data Systems, Inc. (AMEX: TDS) has declared a fourth quarter dividend of $0.07 per share on outstanding Common and Series A Common shares.

This dividend is an increase of 7.7 percent over the fourth quarter 1989 dividend. The dividend is payable Dec. 28, 1990, to shareholders of record on Dec. 14, 1990.

LeRoy T. Carlson, TDS chairman, stated, "Your dividend reflects the excellent operating performance of our telephone, cellular and paging segments and continuing growth in earnings from telephone operations."

TDS's wholly owned subsidiary, TDS Telecommunications Corporation ("TDS Telecom") has experienced exceptional growth in customers, revenues and earnings during the first nine months of 1990.

At Sept. 30, 1990, TDS Telecom served more than 277,000 access lines in 27 states, including four telephone company acquisitions completed this year. TDS Telecom's revenues increased 16.2 percent on an 8.0 percent increase in access lines while operating income rose 28.9 percent to $46.4 million for the first nine months of 1990.

United States Cellular Corporation (AMEX: USM) is TDS's 86.1 percent owned cellular telephone subsidiary. At Sept. 30, 1990, USM and TDS own or have the right to own 12.2 million population equivalents in 77 MSAs and 69 RSAs.

At that date, cellular systems owned and managed by USM served approximately 60,800 cellular telephones of which 48,700 are included in USM's consolidated revenues and expenses.

USM's revenues increased 62.7 percent on a 60.7 percent increase in consolidated cellular telephones while its operating loss improved 47.6 percent to $5.7 million during the first nine months of 1990.

American Paging, Inc. ("API"), TDS's wholly owned subsidiary operates 30 paging systems in 17 states and the District of Columbia. API has added 30,800 pagers to its customer base during 1990, increasing the number of pagers it serves to approximately 192,400.

API's revenues increased 19.3 percent on a 24.2 percent increase in pagers served while its operating loss improved 16.5 percent to $4.5 million during the first nine months of 1990.

TDS is a diversified Chicago-based communications service company with established local telephone operations and developing cellular telephone and radio paging operations. TDS builds value for its shareowners by providing excellent communications services in attractive, closely related segments of the telecommunications industry.

LOS ANGELES (DEC. 5) PR NEWSWIRE - Occidental Petroleum Corporation (NYSE: OXY) announced today that its wholly owned subsidiary, Damascus Petroleum Limited, and Syrian Petroleum Company, the Syrian national oil company, have signed a production sharing agreement for the 1.7 million acre Al-Nabk Block located in southwestern Syria. The Al-Nabk Block lies immediately to the north of the 2.8 million acre Bosra Block acquired by an Occidental group in 1988.

Occidental, with a 100 percent interest, will conduct a 1,000 kilometer seismic program and drill four wells within the first three years.

In announcing the award, Dr. Armand Hammer, chairman and chief executive officer, said, "This block has excellent potential for major reserves. Discoveries to the north of our block in a similar geologic setting have been made and we look forward to being successful."

CHICAGO (DEC. 5) PR NEWSWIRE - Morton International (NYSE: MII), the world leader in the fast-growing market for automotive air bags, recently celebrated the production of its three millionth air bag inflator. At a press conference in New York City today, survivors of major auto collisions told dramatic stories of how air bags saved their lives.

Morton International Chairman Charles Locke stated, "By the end of this decade the lives saved by air bag technology will number in the thousands."

Sales of air bag inflators by Morton International have climbed 400 percent over the last two years, and company officers projected sales to reach $1

billion by 1995. Morton International manufactures inflators and assembles modules at three facilities in northern Utah.

Carole Sullivan, survivor of a collision on the Garden State Parkway in a rental car, recounts how she was part of a four-car pile-up: "I was driving a little over the speed limit - but you know the Garden State - it was with the flow of traffic, when I noticed that the man in front of me had hit the car in front of him. My reaction was to brake, but going at the speed limit that I was, there was no time to stop the impact."

She continues, "A lot of it becomes a blur at this point. After I hit him, a second later there was a second impact from a commercial van that hit me from behind. It turned my car 90 degrees, so I was now in the other lane and my side had been hit as well. The door was jammed on the driver's side. Luckily, my window was open and I climbed out.

One of the bystanders came over and said I was lucky to have an air bag. I had no idea I had an air bag - but it was out and saved me from injury. Three people in the accident were seriously hurt, but I didn't have a scratch. I never realized the importance of an air bag!"

Roger Richman, who has had long experience driving stunt cars for movies and TV, emphasized his confidence in air bags and his concern that all consumers become more aware of how they really can save lives.

Earlier this year, Richman made the first TV commercial for a Chrysler air bag-equipped car. Wearing no helmet or protective clothing and strapped in with a standard seatbelt, Richman drove a Plymouth Acclaim head-first into an immovable wall of bolted steel plate. The car's air bag system inflated on contact with the wall, and Richman walked away from the wrecked car with a smile.

This was a dramatic experience even for a veteran of high speed movie chases and fiery car crashes. "I'm convinced that every car should have an air bag. This will save many, many lives and make driving our highways and streets a much safer experience."

#90339p0277 12/05/1990 ~PR Newswire

CHICAGO (DEC. 5) PR NEWSWIRE - Searle announced today it is making available $10 million for competitive research grants to expand current understanding of the role of prostaglandins in arthritis.

Named the "Arthritis & Prostaglandins Research Challenge," the program will

award grants of varying amounts to researchers at North American medical centers selected by an outside expert review committee.

The competitive submissions will focus on potential activities of prostaglandins in relation to the etiology and management of arthritis and related rheumatic diseases.

"In recent years, scientists have shown that prostaglandins effect immunomodulation, renal function, cartilage integrity, anti-inflammatory activity and analgesia," said Joseph T. Curti, M.D., president of Searle North American Operations.

"Our objective for this research collaboration is to explore and enhance our understanding of prostaglandins in the development and treatment of arthritis as well as other diseases," explained Curti.

Grant awardees will be selected in a competitive application process by a review committee, consisting of 25 recognized experts in the field from the United States and Canada.

"This newly formed grants program represents an important funding resource that should enhance the basic science in this area and could result in some positive applications to clinical medicine," said Robert B. Zurier, M.D., professor of medicine and chief of rheumatology at the University of Pennsylvania. "This grants program comes at a crucial time when financial resources for medical research are generally decreasing," added Zurier.

Individuals with doctoral degrees, including M.D., D.O., and Ph.D., at any non-profit institution in the United States and Canada may apply for research grants under this program. The committee's selection of award recipients will be based upon the merit of the proposal as to both study design and potential contribution to the current body of knowledge.

The deadline for receipt of grant proposals is Feb. 15, 1991. The amount of individual grant awards will be determined by the review committee. Grants will be awarded for a period of up to two years and will commence on April 30, 1991. No more than one grant will be awarded to any single principal investigator.

Searle has been a leader in prostaglandin research since 1965. Searle is a research-based pharmaceutical company that develops, manufactures and markets prescription pharmaceutical products worldwide. It is a wholly owned subsidiary of Monsanto Company (NYSE: MTC).

#90339p0279 12/05/1990 ~PR Newswire
HIGHTSTOWN, NJ (DEC. 5) PR NEWSWIRE - A new polymeric integrated optics device, which represents a major breakthrough in the field of broadband optical communications, has been developed by a team from the Applied Sciences group at PA Consulting Group's Technology division in the U.K., the company announced today. It is thought to be only the second device of its type in the world and is one of the basic enabling devices for use in the emerging photonics industry.

The device, known as a Mach Zehnder Interferometer, has been designed and built for AKZO, the Dutch chemicals group, and will enable the company to supply large bandwidth optical switches for use in advanced optical communications systems. AKZO developed the material known as a "nonlinear optical polymer" needed for use in this type of active device.

The interferometer controls the light signal of a communications laser diode and enables information to be transmitted at a greater data rate along fiber optic cables than currently possible. Its potential applications include but are not limited to voice, data and video transmission.

Although there are existing nonlinear optical components on the market, their commercial potential is limited because of difficulties in mass production. Key advantages of the newer polymeric nonlinear optical materials include: the potential for mass production via proven fabrication techniques; low dielectric constants, which enable very large operating bandwidths; large nonlinear optical coefficients and corresponding compatibility with low-voltage microelectronics.

The development of the polymeric integrated optics device is one of the first attempts to commercialize research into polymeric nonlinear optical materials.

Most of the work to date has been limited to materials characterization rather than device applications. The new device is now in an early prototype stage and could reach the market in two or three years.

PA Consulting Group is a leading international management and technology consulting firm. #90339p0281 12/05/1990 ~PR Newswire

PORTLAND, OR. (DEC. 5) PR NEWSWIRE - Fred Meyer Inc. (NASDAQ: MEYR) announced today results for its 1990 third quarter (12 weeks) and 40 weeks ended Nov. 10 1990.

Net sales for the 1990 third quarter rose 7.5 percent to $541.9 million compared to the $503.9 million reported in the third quarter of last year. Comparable store sales increased 0.4 percent for the quarter.

Income from operations for the 1990 third quarter was $8.9 million, a 12 percent increase over the $7.9 million reported in the prior year's third quarter.

Net income increased 7.4 percent to $3.2 million in the third quarter of 1990, compared to $3 million reported in 1989's third quarter. Net earnings per

share were 13 cents for the third quarter of 1990 based on 24,342,000 shares outstanding, compared to 12 cents for the prior year's quarter based on 24,827,000 shares outstanding.

Net sales for the first 40 weeks of 1990 rose 12.1 percent to $1.81 billion versus the $1.61 billion reported for the first 40 weeks of 1989. Comparable store sales for the same 40 weeks increased 5.4 percent.

Income from operations for the first 40 weeks of 1990 was $41 million, a 14.1 percent increase over the $35.9 million reported in the prior year.

Net income increased 11.2 percent to $18 million during the first 40 weeks of 1990, compared to $16.2 million reported during the comparable period in 1989. Net earnings per share were 73 cents for the first 40 weeks of 1990 based on 24,524,000 shares outstanding, compared to 65 cents for the prior year's first 40 weeks based on 24,832,000 shares outstanding.

Frederick M. Stevens, chairman of the board and chief executive officer, said, "A softening economy was evident in our third quarter sales results. The softness in sales was felt across both the food and nonfood segments of our business, but to a greater extent in the discretionary categories of nonfood sales such as jewelry, photo-electronics, and certain sections of apparel. The slower than anticipated sales affected the increased costs of operations, partially resulting from our new store and remodel program. One additional new store was opened in this year's third quarter. Other costs included those related to the completion of the new cash register rollouts and higher depreciation and rents as a percent of sales. The increase in expenses were offset by improved gross margins.

"The gross margin improvement over last year's third quarter was partially due to lower markdowns associated with better control of nonfood inventories, and to a lesser extent completion of food department remodels. In addition, the company's warehouse expenses were significantly lower than the prior year, when heavy inventories and problems with the main distribution center's nonfood computer systems resulted in excessive merchandise storage and handling costs. The 1989 gross margin was also negatively affected by not taking inventories at the end of the 1989 second quarter due to labor disputes. On a 40 week reported basis the increase in the LIFO inventory accounting charge represents approximately 5 cents per share reduction in earnings in comparison with the LIFO charge taken in 1989's comparable 40 week period.

"Interest expense in the third quarter increased as a result of higher borrowings resulting from the company's accelerated new store growth, management information systems development and remodeling schedule, offset in part by improved inventory control.

"During the third quarter we opened a multidepartment store in Bremerton,

Wash., and replacement store in Puyallup, Wash. Since the third quarter end a multidepartment store has been opened in Bend, Ore. For 1991 we plan on opening three to five new stores; continuing our commitment to management information systems development; and completing two or three major remodels," Stevens said.

Fred Meyer Inc, headquartered in Portland, Ore., is a leading regional retailer of a wide range of general merchandise, food, apparel, fine jewelry and home improvement products. The company currently operates 122 stores, including 94 large multidepartment stores in Oregon, Washington, Utah, Idaho, Alaska, Montana and California.

JAMESTOWN, NY (DEC. 5) PR NEWSWIRE - Frank T. Costanzo, chief executive officer of Electronic Technology Group, Inc. (NASDAQ: ETEK, BSE: ETE) announced today at its annual meeting of shareholders, that its after-tax income for the first quarter ending Oct. 31, 1990 was $200,831 on revenues of $4,199,956 as contrasted with after-tax income of $49,963 on revenues of $1,384,359 for the comparative 1989 fiscal period.

Edmond L. Lonergan, president of Electronic Technology Group Inc. commented that he was pleased with the results of the first quarter. Lonergan explained that the results reflected only 10 weeks of sales from the company's newest subsidiary, ACT II Printed Circuit Technology Inc.

Commenting upon the operating results, Curt B. Westrom, chief financial officer explained that the earnings per share for the current fiscal period was 10 cents based upon 2,096,000 outstanding shares as compared to 5 cents per share based upon 1,111,111 outstanding shares during the comparable 1989 period.

Electronic Technology Group Inc. is a manufacturer of high quality electronic assemblies for the medical, industrial controls, transportation and music industries. The company owns and operates EJE Research Corp. of Buffalo, N.Y. Moog Music Manufacturing of Jamestown, N.Y., Liberty Engineering Inc. of Waltham, Mass. and ACT II Printed Circuits Inc. of Tempe, Ariz.

DETROIT (DEC. 5) PR NEWSWIRE - The pending retirement of W. Blair Thompson following a career of more than 45 years in the design and production of automotive components for General Motors was announced today by Robert C. Stempel, chairman of GM.

Thompson will retire Jan. 1, 1991, following four years as vice president and group executive in charge of the Automotive Components Group.

"Blair's personal leadership during this extremely competitive period of restructuring," Stempel said, "brought our component and vehicle groups together and helped develop GM's diverse parts business into a world-class resource for our GM customers -- and for other manufacturers from around the world. The quality objectives and the systems we needed are in place. His dedication," Stempel added, "rejuvenated GM's component operations and elevated them into a respected leadership position among the world's automakers."

A native of Petoskey, Mich., Thompson, 62, joined GM's Saginaw Steering Gear Division (now Saginaw Division) in 1945 while an industrial engineering student at the former General Motors Institute. He held a variety of engineering positions at Saginaw before being selected to attend MIT as a Sloan Fellow. He earned a master of science degree in industrial management there in 1960, and returned to Saginaw where he was elevated to chief engineer in 1966.

In 1974 he moved to Dayton, Ohio, and was promoted to general manager of the Delco Products Division. He served there until 1981 when he was named general manager of GM's Packard Electric Division. The following year he returned to Saginaw as general manager of the Saginaw Division.

In connection with the restructuring of GM's North American operations in the mid-80s, Thompson was promoted to vice president and executive in charge of the Mechanical Components Group in 1984, and held that post until 1987 when he was promoted to head the newly created Automotive Components Group.

During his career Thompson was active with the Boy Scouts of America and the United Negro College Fund. He still holds patents on a number of inventions involving automotive components developed during his service with the Saginaw Division.

Upon the retirement of Thompson, the operations previously managed by him will report directly to William E. Hoglund, executive vice president of GM in charge of the Automotive Components Group, Power Products and Defense Operations Group and Service Parts Operations.

NEW YORK (DEC. 5) PR NEWSWIRE - Lancer Industries Inc. announced today the initial closing of the Joseph Littlejohn & Levy Fund, L.P. with committed capital of $180 million from eight major U.S. tax-exempt institutions as limited partners.

Beacon Hill Financial Corporation acted as the fund's exclusive placement agent. The fund seeks long-term capital appreciation by acquiring controlling equity interests in troubled companies in transactions designed to implement the restructuring, recapitalization and operational turnaround of such entities.

The individuals involved in the fund's management are Peter A. Joseph, Angus C. Littlejohn and Paul S. Levy, each of whom is an experienced participant in the restructuring, recapitalization and operational turnaround arena and a senior executive of Lancer. Lancer has made an investment in the fund and will benefit from the fund's carried interest.

PHILADELPHIA, (DEC. 5) PR NEWSWIRE - Golden Cat Corp., of South Bend, Ind., maker of the Tidy Cat and Kitty Litter brands of litter, is transferring its national advertising account to Weightman Advertising, John Goodchild, agency president, announced today.

Golden Cat, which acquired the assets of Edward Lowe Industries last month, is replacing its Chicago-based agency with Weightman, Philadelphia's largest independently owned advertising agency, explained Goodchild.

"I'm delighted that Golden Cat has confidence in our ability to build national brands," said Goodchild. "We're proud of our track record and proud to be associated with such a fine company and outstanding product line."

Golden Cat's Tidy Cat and Kitty Litter brands account for about one- third of the litter market with sales in excess of $400 million, added Goodchild.

John A. Creel, executive vice president of sales and marketing, said the choice of Weightman is consistent with the company's goal of growing the business through a "clearly defined, highly compelling advertising effort."

"Weightman knows product positioning, consumer attitudes, and our industry. We're looking forward to a long and profitable relationship," he added.

Weightgman is a full-service agency with billing in excess of $115 million. Its other national accounts include Mannington Mills, Wampler-Longacre, ALPO Petfoods, Scott Paper and the Hershey Pasta Group.

SAN FRANCISCO (DEC. 5) PR NEWSWIRE - Phoenix Network (NASDAQ: PHXN), a San Francisco-based national telecommunications company has named James R. Miller, Executive Vice President and General Counsel. Miller 41, will serve on the company's executive committee and has been elected to the board of directors.

Before joining the company, he was a managing partner of Parkhill Partners which was responsible for the design and development of the Metropolis project an office, hotel and commercial center which will encompass over 2,500,000 square feet of commercial space in downtown Los Angeles. Prior to that Miller had engaged in the practice of law in Los Angeles, including serving as a managing partner of Bushkin, Gaimes and Gains. Before that Miller was the Regional Counsel for the Los Angeles Regional Office of the United States Securities and Exchange Commission.

Commenting on the addition of Miller to the company, Thomas H. Bell, chairman and CEO said, "The desire of our company to attract executives of Mr. Miller's caliber is representative of our commitment to stay at the forefront of services and profitability in an industry growing as rapidly as long distance telecommunications." Miller added, "The management of Phoenix Network has a clear commitment to innovation and value for their customers. As a result, in the first six months of this fiscal year, Phoenix's monthly revenues grew over 180 percent from $465,000 to $1,300,000. It is very exciting to be a part of this dynamic growth opportunity."

Phoenix Network is a long distance telecommunications network manager and trades over the counter under the symbol PHXN.

CHICAGO, (DEC. 5) PR NEWSWIRE - Peoples Energy Corporation (NYSE: PGL) today named a new chairman and a new president and announced other changes that pave

the way for an orderly transition within its executive ranks.

Richard E. Terry, 53, was elected chairman and chief executive officer of Peoples Energy and its subsidiaries, including its principal operating units, Peoples Gas and North Shore Gas. He is an attorney and has been employed by the company for 18 years.

J. Bruce Hasch, 52, moves up to succeed Terry as president and chief operating officer of the companies. He is an engineer and has held several operating and administrative posts during his 30-year career.

Terry, in heading the company, replaces Eugene A. Tracy, who has served as chief executive since 1981 and will remain with Peoples Energy for another year as a director and as chairman of the board's executive committee. Tracy, 63, requested that directors appoint a new management team at this time in order to effect an orderly succession before he takes early retirement in 1991.

The company also announced that Michael S. Reeves, an executive vice president has been nominated for election to the company's board, which will be enlarged to 13 members during the interim year that Tracy remains on the board. Reeves is 55 and has worked for the company since 1956.

Peoples Energy is a public utility holding company for the two natural gas distribution companies that serve nearly a million customers in Chicago and 54 north suburban communities. Its assets and sales revenues annually are well in excess of $1 billion, and its stock is listed on major U.S. exchanges.

NEW YORK (DEC. 5) PR NEWSWIRE - Goldman, Sachs & Co., as lead manager of the underwriting group, announced today the public offering of $300 million of 9.60 percent bonds of The Korea Development Bank due Dec. 1, 2000, priced at 99.90 percent, plus accrued interest from Dec. 1, 1990, to yield 9.615 percent.

Interest on the bonds is payable on June 1 and Dec. 1 of each year, commencing June 1, 1991. The bonds will be payable in full at, and not be redeemable prior to, maturity. The bonds will be issued only in registered form in denominations of $5,000 and integral multiples thereof. Each bond will be represented by a global security registered in the name of a nominee of The Depository Trust Company, as depositary.

The Korea Development Bank was established in 1954, as a governmental financial institution pursuant to the Development Bank Act. The primary purpose of the bank is to furnish and administer funds, in conformity with the industrial policies of the Korean Government, for the financing of major

industrial projects in order to expedite industrial development and expansion of the economy of the Republic of Korea. All of the bank's outstanding capital is owned by the government of the Republic of Korea.

A copy of the prospectus can be obtained from the Prospectus Department of Goldman, Sachs & Co., 85 Broad St., New York, N.Y., 10004.

NEW YORK (DEC. 5) PR NEWSWIRE - The Israel Land Development Company Limited announced today that it has initiated an American Depositary Receipt Program (ADR) with the Bank of New York as Depositary Bank. The ADRs will trade under the ticker "ILDCY" and will be quoted on the National Association of Security Dealers Automated Quotation/National Market System. Each ADR will represent three ordinary shares. Kidder, Peabody & Co., Incorporated is acting as the company's financial advisor in the United States and is one of the market makers. Bear, Stearns & Co. Inc.; Smith New Court, Carl Marks Inc. and Troster Singer are currently other market makers. Additional market makers most likely will include Merrill Lynch, Pierce, Fenner & Smith Incorporated and Oscar Gruss & Co. Incorporated.

The company is engaged in four main business activities: real estate development, management and ownership of hotels, management and ownership of income properties and the development and management of full service retirement homes. The company is one of the major real estate and hotel corporations in Israel and one of the more active publicly held land

developers in Israel.

The company was founded in 1909 by the World Zionist Organization and served as one of the principal vehicles for the acquisition of land for the Jewish people in Israel. Since a change in control of the company in 1988, the company has aggressively developed land located throughout Israel including in the central sections of the largest cities. Additionally, the company is currently contemplating becoming involved in providing housing for the new wave of Russian immigrants. The company's ordinary shares have traded on the Tel Aviv Stock Exchange since 1953.

SAN DIEGO (DEC. 5) PR NEWSWIRE - Western Financial Corp., a San Diego broker-dealer and investment banking firm, has entered into an agreement to acquire the Mutual Fund Retirement Accounts of GAF Financial and Insurance Services (GAFFIS), a subsidiary of Great American Bank (NYSE: GTA).

The transfer of accounts is expected to be completed in January 1991. Approximately 4,100 accounts are involved in the transaction. Terms of the purchase were not disclosed.

Howard B. Levenson, chairman of Western Financial Corp., stated that, "GAFFIS and Great American Bank are noted for their excellence in customer relations and we plan to offer our new clients the same high level of quality service to which they have become accustomed."

Separately, it was announced that GAF Financial and Insurance Services President Charles W. Muse will join Western Financial Corp. as senior vice president.

Muse is widely known within the San Diego financial community and serves the local chapter of the International Association for Financial Planning as president-elect.

He also teaches at San Diego State University in the Department of Finance and is the first vice president of The Bank Securities Association.

Muse stated that, "In choosing to associate with the dedicated professionals at Western Financial Corp., I am confident of an alliance with a tradition of quality service. I look forward to applying my experience to the new challenges with this respected firm."

Western Financial Corp. is a full-service broker-dealer headquartered in San Diego since it was established in 1971. Its customers consist of retail, as well as institutional clients.

DENVER (DEC. 5) PR NEWSWIRE - Gold King Consolidated Inc. (GKC) announced it has reached a settlement with its mining contractor on the Adelaide Crown open pit mine in Humboldt County, Nev. The settlement between Target Construction Inc. of Reno, Nev. and Gold King Nevada Inc., a wholly owned subsidiary of GKC will allow for the mine to recommence mining and crushing operations within a few weeks. Mining operations at the mine were suspended recently as a result of a dispute over terms of the contract between Gold King and Target.

Under the terms of the settlement, Gold King received adjustments on certain outstanding invoices. In addition, the settlement included price reductions to Gold King for future services under the contract. Target will remain the primary mining contractor on the project.

The Adelaide Crown mine is located in Northern Nevada on the "Getchell Structure," which hosts the Pinson, Prebble, Getchell and Rabbit Creek mines. The Adelaide Crown mine poured its first gold and silver dore on June 18, 1990. During the quarter ended Sept. 30, 1990, the property produced approximately 2,800 equivalent ounces of gold.

DEARBORN, MI (DEC. 5) PR NEWSWIRE - The following statements may be attributed to John P. King, Parts and Service Engineering Office manager, Ford Parts and Service Division:

Ford Motor Company (NYSE: F) is asking owners of about 20,000 1988-90 F-Super Duty light trucks with 7.5-liter engines to return to their dealerships to have a new electronic engine control (EEC IV) processor installed at no charge.

Some trucks have experienced a lack of power, especially when operated in areas with high temperatures or while pulling heavy loads. The new EEC IV processor will correct this lack of power while providing improved performance and fuel economy. On some earlier vehicles, new thermostats also will be installed.

The company will contact all owners by mail and will cover all costs of parts and labor. Of the vehicles affected, 19,396 are located in the United States, 1,151 in Canada and 276 in export locations.

Ford also announced an update of another recall. The company previously announced that it is recalling about 55,000 1990 and 1991 model year cars to locate and recover about 133 air bag modules that had been identified by the module supplier, TRW Vehicle Safety Systems, Inc., as being potentially defective.

Ford later was informed by TRW that further review of its records had shown that the number of potentially defective modules shipped to Ford was about 3,000.

Although many of these additional modules are expected to be contained in the 55,000 vehicles originally identified, after review of the latest shipping and production information provided by TRW, Ford has determined that about 111,000 additional vehicles should be included in the recall.

Affected vehicles are 1990 Taurus, Sable, Continental, Tempo and Topaz and 1990-91 Crown Victoria and Grand Marquis models. Owners of the additional vehicles affected will receive letters asking them to return the vehicles to their dealers for inspection.

LOUISVILLE, KY (DEC. 5) PR NEWSWIRE - The Board of Directors of LG&E Energy Corp. (NYSE: LGE) today declared a quarterly dividend on the common stock of 71 cents a share. The dividend is payable January 15, 1991 to stockholders of

record on December 31, 1990.

In other business, the Board of Directors adopted a Shareholder Rights Plan designed to protect shareholders' interest in the event that the company is confronted with an unfair or inadequate acquisition proposal.

The company emphasized that the plan was not adopted in response to any specific attempt to acquire control of the company, and that it is not aware of any such attempt. However, given today's takeover environment, the Board considered the measure a prudent business decision that will assist the Board in protecting the interests of all LG&E Energy Corp.'s shareholders.

Roger W. Hale, Chairman and Chief Executive Officer of the company, stated, "The plan is designed to protect the company and its shareholders against unsolicited attempts to acquire control of the company on terms the Board believes are unfair or inadequate. This plan provides a valuable means of maximizing the value of each shareholder's equity investment in the company without foreclosing a fair acquisition bid for the company, should one be made."

The Board declared a dividend distribution of one "right" for each share of LG&E Energy Corp. common stock. Each right entitles the holder to purchase from the company one one-hundredth of a share of new preferred stock of the company under certain circumstances.

The rights may be exercised if a person or group announces its intention to acquire or acquires 20 percent or more of the company's common stock. Under certain circumstances, the holders of the rights will be entitled to purchase either shares of common stock of LG&E Energy Corp. or the common stock of the acquiror at some percent of the market value.

Unless earlier redeemed or exchanged, the rights will expire in ten years. Details of the rights distribution will be mailed to common shareholders. The rights distribution is not taxable to shareholders.

LG&E Energy Corp. is an energy-based holding company whose subsidiary, Louisville Gas and Electric Company, is an electric and gas utility serving Louisville and the surrounding territory in Kentucky.

IRVINE, CA (DEC. 5) PR NEWSWIRE - Western Digital Corp. (AMEX: WDC) today announced the appointment of David W. Murphy as senior vice president and chief financial officer, effective immediately.

At Western Digital, Murphy will be responsible for all of the company's financial activities on a worldwide basis, reporting to Roger W. Johnson, chairman, president and chief executive officer. Murphy replaces A.J. Moyer, who resigned from the position earlier this year.

Murphy comes to Western Digital after serving as senior vice president, chief financial officer and treasurer of AT&T Paradyne, a $650 million international data communications manufacturing unit of AT&T Corp. He joined Paradyne Corp. in 1988 as vice president of finance and administration, prior to the company's acquisition by AT&T in 1989.

Before joining Paradyne, Murphy spent seven years in a variety of financial management positions with IBM Corp., including his last assignment there as controller and chief financial officer of IBM's Display Systems business unit.

A native of Syracuse, N.Y., Murphy earned a master of business administration degree in finance and accounting from Syracuse University and a bachelor of arts degree in the social sciences from State University of New York in Stony Brook.

Western Digital Corp., headquartered in Irvine, is a multinational company that designs, develops, manufactures and markets semiconductors, subsystems and intelligent disk drives to original equipment manufacturers and resellers which serve the microcomputer industry. The company's storage products unit produces intelligent drives and controllers; while its microcomputer products unit provides communications, imaging and systems logic products.

#90339p0340 12/05/1990 ~PR Newswire

WASHINGTON (DEC. 5) PR NEWSWIRE - The Department of Transportation today tentatively chose Pan American World Airways to provide new air service between Miami and Cancun, Mexico. American Airlines was tentatively awarded backup authority for the same route.

An April 1990 agreement between the United States and Mexico allows an additional airline to fly between Miami and Cancun. Eastern Air Lines currently serves this market.

The department's tentative decision, issued by Deputy Assistant Secretary for Policy and International Affairs Patrick V. Murphy Jr., said the selection of Pan Am would enhance competition in the U.S.- Cancun market by adding a new carrier to this service. American, the only other applicant for the route, already serves Cancun and Cozumel, another city on the Yucatan peninsula, from Dallas/Ft. Worth and Raleigh/Durham, N.C.

DOT added that awarding Pan Am the route would provide competition with other carriers serving Cancun from the same originating city via other gateways. For example, Pan Am would serve New York-Cancun travelers through its Miami gateway to compete with American's New York- Raleigh/Durham-Cancun service. Since more U.S.-Cancun traffic originates in New York than in any other city, Pan Am would be offering new competitive service to a substantial number of U.S.-Cancun passengers.

Interested parties were directed to show cause why this tentative decision should not be made final. Comments and objections are due within 10 days.

OLYMPIA, WA (DEC. 5) PR NEWSWIRE - AT&T announced today it has added a new discount calling option in Washington for businesses using the AT&T AT&T Pro(sm) Wats interstate calling program.

Starting Nov. 16, Pro Wats customers are able to sign up without charge for AT&T Pro(sm) Wats Washington. The new program gives firms volume discounts on outgoing calls within Washington, without the expense of a separate Wats phone line. Pro Wats users make discounted long distance calls over their regular phone line by dialing "9" before the long distance number they are calling.

Pro Wats Washington callers are billed for an initial 30- second period, then billed at six-second increments for the remainder of the call. A single rate is charged for calls to any point in Washington, and daytime calls may be discounted up to 21 percent, depending on call volumes. Evening, night and weekend calls cost even less.

More information is available from the AT&T customer service office at 1-800-222-0400.

HOUSTON (DEC. 5) PR NEWSWIRE - Quanex Corp. (NYSE: NX), a leading manufacturer of specialty metal products, today announced that it will exchange newly issued 9-1/8 percent Convertible Subordinated Debentures (debentures), for its curently outstanding 1,380,000 shares of 9-1/8 percent Depositary Convertible Exchangeable Preferred Shares (depositary preferred shares) issued Sept. 26, 1988. The exchange will be effective Dec. 31, 1990, at a rate of $25 principal amount of debentures for each depositary preferred share in accordance with the terms of the depositary preferred shares.

The depositary preferred shares are listed on the New York Stock Exchange and Quanex intends to apply for a similar listing of the debentures. The depositary preferred shares are, and the debentures will be convertible into shares of common stock at a conversion price of $16.90 per share.

Carl E. Pfeiffer, chairman and chief executive officer, said, "This exchange benefits our shareholders by substituting the tax deductible coupon payment of the interest on the debentures for the non-deductible 9-1/8 percent depositary preferred dividends. In short, the depositary preferred shares and the debentures have the same 9-1/8 percent rate, but now it is deductible to Quanex in the form of interest on the debentures. From the date of exchange, the earnings of Quanex are expected to be approximately 10 cents per primary common share higher, on an annualized basis, than they otherwise would be. We

took this action to enhance Quanex's earnings and cash flow for our shareholders."

The debentures will pay interest semiannually on March 31 and Sept. 30 commencing March 31, 1991 and are redeemable in whole or in part, under certain conditions. Annual sinking fund payments of $2,588,000 begin on Sept. 30, 1998. The debentures will be subordinate to all senior indebtedness of Quanex.

Quanex is a technological leader in the manufacture of steel, aluminum and titanium specialty metal products for transportation, capital equipment, home building and remodeling and energy processing markets.

Latest 12 Month Data: sales: $650.3 million, operating earnings: $57.2 million, net income: $28 million, cash from operations: $55.5 million, primary earnings per share: $2.03, quarterly dividend rate: 10 cents per share (12 cents as of Dec. 31, 1990), book value per share: $12.33, return on shareholders' equity: 17.8 percent, common stock price range (52 week High/Low) $18-5/8 and $9-1/8.

CINCINNATI, (DEC. 5) PR NEWSWIRE - Chiquita Brands International, Inc. ("Chiquita") (NYSE: CQB) announced today that it has filed an amendment to a registration statement for a public offering by Chiquita to increase the number of shares offered from 2.6 million to 3 million newly issued shares of its common stock. Chiquita continues to grant to the underwriters an option to increase the size of the offering by 15 percent to cover over-allotments.

The net proceeds to be received by Chiquita will be available for general corporate purposes, including acquisitions of and investments in food-related businesses and capital expenditures.

American Financial Corporation ("AFC") beneficially owns, either directly or through its subsidiaries, approximately 61 percent of Chiquita's shares. If all shares from the offering are sold to the public (without giving effect to the over-allotment option), AFC's beneficial ownership would be approximately 57 percent of Chiquita's shares.

Chiquita is a leading international marketer, processor and producer of quality fresh and prepared food products. Revenues in 1989 were $3.8 billion. In recent years, Chiquita has capitalized on its Chiquita(R) and other premium brand names by building on its worldwide leadership position in the marketing, distribution and sourcing of bananas; by expanding its quality fresh fruit and vegetable operations; and by further developing its business

in value-added prepared foods.

A registration statement relating to these securities has been filed with the Securities and Exchange Commission but has not yet become effective. These securities may not be sold nor may offers to buy be accepted prior to the time the registration statement becomes effective. This communication shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of these securities in any state in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such state. Copies of the prospectus for the offering may be obtained from any of the representatives of the underwriters named above.

SAN DIEGO (DEC. 5) PR NEWSWIRE - The Price Company (NASDAQ: PCLB) announced today that Giles Bateman, executive vice president and chief financial officer and a founder of the company, intends to leave the company on or before December 1991, in order to pursue other personal goals.

"It has been an exciting fifteen years with the company," said Bateman, "and we have accomplished more than any of us thought possible at the beginning. I am committed to ensuring an orderly transition over the next year.

"In that regard, we have initiated the process of identifying people who have demonstrated the ability to assume specific areas of my responsibilities. My decision to leave The Price Company has crystallized over a period of time, and reflects my desire to pursue some personal goals."

Robert Price, president, said, "We have accepted Giles' decision with regret, but with true appreciation for his service. We also appreciate his giving us a full year's notice so that we can ensure an orderly transition."

Bateman, a nominee for re-election as a director at the company's annual meeting on Jan. 17, 1991, intends to continue as a director and as vice chairman throughout the term for which he is being elected. The Price Company operates 64 Price Clubs in the United States and Canada.

VIENNA, VA (DEC. 5) PR NEWSWIRE - EER Systems Corporation has acquired Space

Services Inc. of America (SSI), the Houston-based firm that was an early starter in the entrepreneurial commericial space launch industry. "The acquisition marks our entry in the commericial launch business," said Dr. Jai N. Gupta, the company's president. "It is consistent with our plans to offer small satellite on-orbit capability to the private sector as well as to the government."

The purchase includes SSI's existing launch services contracts, current proposals, and the Starfire and Conestoga vehicle designs. The Starfire is sub-orbital while the Conestoga is an extremely flexible multi-booster orbital system. The Conestoga can be configured in several ways depending on the size of the payload. Launch costs can therefore be directly related to satellite size and weight.

Over the past eleven years, EER has become a leader in providing a broad range of engineering services specializing in aerospace flight systems, training systems, and information systems. The company's clients include NASA, FAA, and DoD. The acquisition expands its aerospace flight hardware capabilities into the launch systems business and permits it to offer an end-to-end package from design and development to orbit and operation.

SSI accomplished the first privately financed and operated launch of a rocket to orbital insertion conditions in September 1982. In March 1989, they launched the first payload licensed by the Department of Transportation's Office of Commercial Space from White Sands Missile Range, N.M., for a consortium led by the University of Alabama in Huntsville.

SSI was the first company to obtain an agreement with the government for use of government facilities in support of commercial space activities. It obtained the first license for multiple launches and has conducted two of the four launches licensed. It is actively competing for a number of government and commercial programs currently in the evaluation and selection cycle.

SSI will become an operating division under EER Systems' Aerospace Systems Group. Former astronaut "Deke" Slayton, SSI's president, will head the new division.

Moffette Tharpe, group vice president, stated that "the division will offer the user community a relatively low-cost, fast turnaround means of putting small and medium sized satellites into orbit. The simplicity of the Conestoga design adds to its reliability and dependability. We plan for the Conestoga to become the vehicle of choice in its class for both the government and private sector."

COLUMBUS, GA (DEC. 5) PR NEWSWIRE - Synovus Financial Corp. (NYSE: SNV) today announced that it has signed a letter of intent to acquire CB Bancshares Inc.

Terms of the acquisition are not being disclosed. CB Bancshares Inc. is the holding company of the $52 million-asset The Citizens Bank, Fort Valley, Ga., with offices in Fort Valley and Byron, and the $34 million-asset The Citizens Bank of Cochran, Cochran, Ga.

Consummation of the acquisition is subject to execution of definitive agreements and the prior approval of CB Bancshares Inc.'s shareholders, the Georgia Banking Department and the Federal Reserve Board. The acquisition is expected to be completed in mid-1991.

Commenting on the announcement, James H. Blanchard, chairman of the board of Synovus Financial Corp., stated, "We are excited about this opportunity to further expand our presence in middle Georgia and to assist the fine people in Peach and Bleckley counties in responding to their growing financial needs."

Cleon E. Moore, president of CB Bancshares Inc., stated: "This is an exciting day for us because we are joining one of Georgia's best known and finest banking organizations. We have known Synovus's people for years and believe that this affiliation will be of great value to our customers, employees, shareholders and the communities of Fort Valley, Cochran and Byron."

SNV is a $2.8 billion-asset, multi-financial services company based in Columbus, Ga. SNV is composed of 14 Georgia, four Florida and two Alabama banking affiliates, a majority-owned, publicly traded bankcard data processing company, Total System Services Inc. (NYSE: TSS), and a broker/dealer company, Synovus Securities Inc.

NEW YORK (DEC. 5) PR NEWSWIRE - S. Parker Gilbert, outgoing chairman of Morgan Stanley Group Inc., has been elected a member of the board of directors of ITT Corporation effective Jan. 15, 1991, Rand V. Araskog, chairman and chief executive announced today.

"Mr. Gilbert's experience in international banking and financial markets will be a significant contribution to the counsel we receive from our board," Araskog said.

Gilbert, 57, joined Morgan Stanley in 1960 and was elected a partner of the

firm in 1969. He has been a managing director since the firm was incorporated in 1970 and a member of the firm's Management Committee, the executive group managing the firm's affairs, since the group was formed in 1974. He was elected president in 1983 and chairman in 1984. Gilbert has announced that he will retire from Morgan Stanley effective Dec. 31, 1990.

Gilbert earned a B.A. degree from Yale University in 1956 and subsequently served in the U.S. Army until 1959.

Gilbert also serves as vice chairman of the St. Luke's/Roosevelt Hospital Center board of trustees; president, board of trustees, the Pierpont Morgan Alfred P. Sloan Foundation; director, Josiah H. Macy, Jr. Foundation. He serves as a director of the New York Stock Exchange, Morgan Stanley Group Inc. and Burlington Resources Inc.

Gilbert, a native New Yorker, lives with his family in New York City. The election of Gilbert to the ITT Board will increase the number of members from 13 to 14.

#90339p0375 12/05/1990 ~PR Newswire

COSTA MESA, CA (DEC. 5) PR NEWSWIRE - Today Parker Automotive Corp. (NASDAQ: PKRA) announced the resignation of Michael E. Parker, the founder and a major shareholder of the company, from the board of directors. Mr. Parker had served as chairman of the board and chief executive officer of the company since its inception in 1987, but he had resigned from the chief executive position on Nov. 26.

In a prepared statement to the board, Mr. Parker stated that the resignation was "not of (his) own free will," but was intended to allow the company "the chance of a future."

In announcing his resignation, the board of directors expressed confidence in the management of the company and in the prospects for the success of the company's products. Under the new chief executive, the company has streamlined operations which includes some layoffs, and sought sources of expanded financing, since commitments for bank financing were disrupted when Parker Automotive was placed in receivership as part of an action related to Parker North American, another company founded by Mr. Parker. The receivership was lifted on Monday, Nov. 26, 1990. The new chief executive officer appeared before the judge (who imposed, then vacated, the order originally) yesterday and received the judge's assurance that he would not reappoint a receiver, provided that the terms of the negotiatied settlement were observed. Those terms included Michael E. Parker's resignation as chief executive officer.

Separately, the company stated that there have been a great many short sellers active in the company's stock, and that may account for the drop in the quoted price of its shares.

ORLANDO, FL (DEC. 5) PR NEWSWIRE - Delta Air Lines (NYSE: DAL) has announced the addition of Orlando as its newest domestic and international flight attendant domicile, beginning June 1.

"Delta is extremely pleased to have chosen Orlando as the site for its 14th flight attendant domicile," said Chuck Foster, Delta's district director of marketing. "In the first year, we anticipate 500 flight attendants will be domiciled at the Orlando base. Delta presently has 850 personnel who call Orlando home."

Delta has more than 64,000 personnel of which 14,000 are flight attendants. Present flight attendant domiciles include Atlanta, Boston, Cincinnati, Chicago, Dallas/Ft. Worth, Houston, Los Angeles, Miami/Ft. Lauderdale, New Orleans, New York, Salt Lake City, Seattle/Tacoma, and Portland, Ore.

Foster added: "Delta is the official Airline of Walt Disney World. We are committed to the expansion of our Orlando hub operation. Delta's beautiful new Flight Center, additional domestic and international flights including new service to Tokyo beginning in early 1991, and now a flight attendant domicile are all examples of that commitment."

Delta is a major world airline, operating over 2,400 flights daily. Its fleet of 438 aircraft serves 177 cities around the world. It has for the last 16 consecutive years led the industry in passenger satisfaction among the nine largest domestic airlines according to the records of the Department of Transportation.

CINCINNATI (DEC. 5) PR NEWSWIRE - Scripps Howard Productions and Walter K. Gilbride & Associates today announced plans to produce and distribute topical news features designed to provide high-quality content that can set a television news show apart from its competitors.

The joint venture's initial projects for first-run syndication will include:

- "Kiplinger's Personal Finance and Tax Service," personal money and tax reports from the editors and staff of the Kiplinger organization, publishers of the Kiplinger newsletters and "Changing Times."

- "Celebrity Profiles," with Reba Merrill and Associates, insightful candid moments with the best-known names in the world of entertainment.

- "The Environment and You," focusing on the ever-changing and threatened environment, paying particular attention to how it impacts mankind, nature and the endangered wildlife.

"Stations are telling us they need specific features that can help provide the critical difference in positioning their news programs apart from their competitors. We believe these features, both in subject and quality, can respond to that need," said Alan Perris, president of Scripps Howard Productions.

"These services will give news departments a high-profile, competitive edge that will enable them to hold and attract new viewers while the sales departments can develop a new source of income through sponsorship," said Walter K. Gilbride, president of Walter K. Gilbride & Associates.

Walter K. Gilbride & Associates is a television syndication, marketing and sales consulting firm headquartered in Lexington, Mass.

Scripps Howard Productions, a subsidiary of the E.W. Scripps Company (NASDAQ: EWSCA), is involved in the development, production and marketing of programming for all segments of the television industry.

FORT LAUDERDALE, FLA. (DEC. 5) PR NEWSWIRE - National Bancard Corporation (NaBANCO), a wholly owned subsidiary of First Financial Management Corporation (NYSE: FFM) (FFMC), today announced that it has purchased the merchant credit card contracts of Southeast Bank, N.A. Southeast has one of the 10 largest merchant credit card portfolios in the U.S., providing Visa and MasterCard merchant services nationally with a strong concentration in Florida.

The portfolio has annual merchant credit card volume of approximately $2.7 billion, a total customer base of 7,000, with a mix of large national and regional customers plus a broad base of traditional merchants. In addition, the 232 branch network of Southeast Bank will continue to offer merchant bankcard services in conjunction with this transaction.

NaBANCO also recently purchased the merchant credit card contracts of the Bank of New York (NYSE: BK). The Bank of New York is a major provider of Visa and MasterCard merchant services in the Northeast, especially in the metropolitan New York area, with a portfolio of approximately $525 million in annual credit card volume. The Bank of New York has developed a strong base of approximately 5,000 traditional merchants.

The Bank of New York's 252 branches will also continue to offer merchant bankcard services.

In making this announcement, Paul R. Garcia, president and chief executive officer of NaBANCO said, "We are very pleased with this expansion of our services in the strategically important markets of Florida and New York.

These 12,000 merchant customers will be a valuable addition to NaBANCO's national presence and will significantly enhance our leading position in the merchant credit card business. We welcome the relationship with these fine financial organizations and look forward to serving their ongoing merchant bankcard needs."

NaBANCO is a wholly owned subsidiary of First Financial Management Corporation. FFMC is an information services company which offers a broad range of data processing and related services to a large and diverse customer base. Its common stock is currently traded on the NYSE under the symbol FFM. Its debentures are quoted through NASDAQ under the symbol FFMCG.

#90339p0393 12/05/1990 ~PR Newswire

JACKSONVILLE, FLA. (DEC. 5) PR NEWSWIRE - FRP Properties, Inc. (NASDAQ: FRPP) announced today improved fourth quarter and full year results.

FOURTH QUARTER RESULTS Revenues increased 41 percent to $10,859,000 from $7,722,000 and gross profit increased 43 percent to $2,056,000 from $1,434,000. Net income increased 53 percent to $475,000 from $310,000. Correspondingly, earnings per share increased to $.11 per share from $.07 per share.

Revenues and gross profit increased in both the Transportation and Real Estate segments. The increase in Transportation is due primarily to the Mabbett acquisition in October of 1989.

FISCAL 1990 RESULTS Revenues for fiscal 1990 were $41,624,000, up 29 percent from $32,376,000 in fiscal 1989. Gross profit increased 26 percent to $9,212,000 from $7,310,000. Income before an accounting change increased 3 percent to $2,175,000 from $2,120,000 in fiscal 1989. Earnings per share before an accounting change increased 4 percent to $.49 from $.47 last year.

Transportation revenues increased 32 percent over 1989 primarily as a result of the Mabbett acquisition. Real estate revenues increased 15 percent principally due to higher rental income from development projects and royalties. Gross profit increased in 1990 due to the Mabbett acquisition and the increased revenues and margins in the real estate activities.

In accordance with Financial Accounting Standards Board's Statement No. 96, effective Oct. 1, 1988 the company changed its method of accounting for deferred income taxes. The cumulative effect from prior years of this change

was to decrease net income in the first quarter of fiscal 1989 by $690,000 or $.15 per share. Consequently, net income for 1990 increased 52 percent to $2,175,000 ($.49 per share) from $1,430,000 ($.32 per share) for last year.

FRP Properties, Inc. is engaged in the transportation and real estate businesses. Its subsidiary, Florida Rock & Tank Lines, Inc., is a southeastern transportation company concentrating in the hauling by motor carrier of liquid and dry bulk commodities as well as construction aggregates. The company's real estate subsidiaries own revenue producing and investment properties and are engaged in real estate management and property development activities.

ST. PAUL, MINN. (DEC. 5) PR NEWSWIRE - H.B. Fuller Company (NASDAQ: FULL) announced today that earnings for its fourth quarter ended Nov. 30, 1990, appear to be substantially above those of fourth quarter 1989.

A large portion of the increase is from non-recurring insurance adjustment payments relating to property damage sustained in fires earlier this year at facilities in Austria and Spain and a slight tax benefit which reduces the extraordinary loss relating to looting early in the year in Panama.

Final fourth-quarter and full-year sales and earnings totals are due to be announced by the company on Jan. 10, 1991.

H.B. Fuller Company is a worldwide manufacturer and marketer of specialty chemical products, including adhesives, sealants, coatings, paints, waxes and sanitation chemicals, with Fiscal 1989 sales of $753 million.

TAMPA, FL. (DEC. 5) PR NEWSWIRE - Blevins Concession Supply Company, Inc. announces the acquisition of the assets of Korn Za Poppin' of Florida, Inc. on Nov. 19, 1990. The acquisition will expand the company's present operations in Tampa and South Florida.

Korn Za Poppin', which becomes a division of Blevins, specializes in prepopped popcorn and the manufacture of popcorn warmers to service the hospitality industry. Two tons of raw popcorn per month are used in its operation.

Korn Za Poppin' was started in 1974, in Tampa, by Tim Curtin, who will remain as vice president. Curtin and his partner, Ron Diner, grew the company to its present 750 customers in central and southern Florida.

Blevins supplies concession items such as candy, popcorn and related equipment snack foods, paper products and janitorial supplies to theaters and retailers. The acquisition of Korn Za Poppin' will expand Blevins' customer base to include prepopped popcorn accounts.

Blevins' majority owner is Blackburn & Co., a Tampa investment firm.

PITTSBURGH (DEC. 5) PR NEWSWIRE - Paul E. Lego, chairman of Westinghouse Electric Corp. (NYSE: WX), today announced the appointment of two new executive vice presidents and the creation of a new Environmental Systems Group.

The executive vice presidents are: -- Anthony A. Massaro Jr., 46, who will head the new Environmental Systems Group. He most recently was vice president and general manager of the Industries and Environmental Services Business Unit.

-- Warren H. Hollinshead, 54, who becomes executive vice president, Finance. Formerly vice president and deputy, Finance, he succeeds Harry F. Murray, 60, who retired after a 39-year Westinghouse career.

In related changes, Gary M. Clark, 55, executive vice president, Industries, assumes expanded responsibilities with the title executive vice president, Industries and Corporate Resources, and Maurice C. Sardi, 55, executive vice president, Commercial and Corporate Resources, becomes chairman of The Knoll Group, which consolidates Westinghouse's expanded office furniture operations.

In addition to the Industries Group, Clark assumes responsibility for Westinghouse Communities, the corporation's Florida-based land development organization; the Science and Technology Center; Government Affairs; and Corporate Services.

The Environmental Systems Group includes Westinghouse units involved in the handling and remediation of toxic, hazardous and low-level nuclear waste; waste-to-energy systems; and management of Department of Energy nuclear facilities.

"Westinghouse is one of the nation's foremost companies in the environmental business. The formation of the Environmental Systems Group will enable Westinghouse to focus a powerful range of capabilities on one of the most attractive worldwide growth industries of the 1990s," Lego said.

NEW YORK (DEC. 5) PR NEWSWIRE - The Daily News today commenced four civil suits against eight individuals seeking damages for the unlawful interference with distribution of the newspaper through assault, battery, theft and vandalism. The suits, brought in State Supreme Court, seek actual and punitive damages in excess of $100,000 from each defendant.

In one of the suits, the News alleges that a New York Times truck driver slammed his vehicle into the back of a Daily News truck on Nov. 3 on

Manhattan's West Side. The suit further alleges that the defendant subsequently assaulted the News driver, who had to be treated at a hospital for severe injuries. The defendant was arrested.

A second suit names four individuals who are accused of attacking News hawkers with baseball bats and crowbars. One of the News hawkers was struck across the back with a baseball bat, the suit alleges. The defendants in that suit were arrested by New York City Police.

A third suit alleges that a single defendant, along with approximately six unidentified people, illegally harassed and intimidated an independent contractor of the News who was responsible for delivering the paper. That same defendant, who is accused of threatening and assaulting another News independent contractor, was arrested.

In the fourth suit, two defendants are accused of attacking two News employees. Employees of the News were injured in that incident, the suit alleges.

"We are not going to let people use violence and intimidation to prevent the newspaper from getting into the hands of our readers," said News Publisher James Hoge. "If they try, they will be brought to justice and forced to pay for any damage they cause."

The News earlier brought three similar civil actions against 11 other individuals for unlawful interference with the business of delivering the News.

#90339p0410 12/05/1990 ~PR Newswire

ARLINGTON, VA (DEC. 5) PR NEWSWIRE - USAir Express carrier Henson Aviation, Inc., has become the nation's first regional airline to receive a Federal Aviation Administration aircraft certification for TCAS -- Traffic Alert and Collision Avoidance System, a high-technology device designed to insure proper separation between aircraft in flight.

The first USAir Express aircraft to be equipped and certified by FAA is a Henson Boeing DASH-8, 37-passenger prop-jet aircraft. The aircraft is equipped with a TCAS system manufactured by Honeywell, Inc. FAA certification was received in late November by Henson, a wholly-owned subsidiary of USAir Group, Inc. (NYSE: U).

"USAir Express takes great pride in becoming an industry leader in the TCAS program," said John F. Leonard, president and CEO of Henson Aviation, Inc. Leonard noted that "TCAS will provide an added margin of safety, complementing the air traffic control system and pilots' visual standards for maintaining

proper separation in the air."

TCAS allows pilots to track nearby aircraft on a radar display in the cockpit. When another aircraft comes within a "protected" zone around the TCAS-equipped airplane, the intruder's symbol on the display changes color and shape and a computerized voice warns the crew of nearby traffic. If necessary TCAS will announce the required maneuver such as "climb, climb, climb."

In May 1990, USAir became the nation's first major carrier to receive FAA certification for TCAS in a Boeing 737-400 jet. USAir has since installed dozens of the units in its jets and expects to have about one-fifth of its entire jet fleet equipped with the units by the end of the year.

Henson Aviation provides service as USAir Express to 40 cities in: Connecticut New York, Pennsylvania, Maryland, West Virginia, Virginia, Kentucky, North Carolina, South Carolina, Alabama, Florida and the Bahamas. Henson is based in Salisbury, Md.

#90339p0414 12/05/1990 ~PR Newswire

THE WOODLANDS, TEXAS (DEC. 5) PR NEWSWIRE - Mitchell Energy & Development Corp. (AMEX: MND) today reported third-quarter earnings of $17.9 million, or 38 cents per share, up sharply from the $6.6 million, or 14 cents per share, earned in the same period of the prior year.

Also today, the board of directors increased the regular quarterly cash dividend rate 25 percent to 10 cents from 8 cents per share "in recognition of the company's improved performance and prospects," and declared a dividend at the new rate payable Dec. 28, 1990, to stockholders of record at the close of business on Dec. 20, 1990. The former rate had been in effect since last December.

Revenues for the third quarter, which ended Oct. 31, amounted to $214.1 million, compared with the year-earlier $152 million.

For the first nine months of the current fiscal year, the company earned $29.7 million, or 63 cents per share, on revenues of $534.8 million. Earnings in the comparable prior-year period amounted to $19.2 million, or 41 cents per share, on revenues of $458.7 million.

Chairman and President George P. Mitchell attributed the third-quarter earnings upturn principally to higher prices and volumes in the company's gas processing segment, which produces ethane, propane and other natural gas liquids. The company's weighted average price per barrel for gas liquids rose

to $18.27 in the third quarter from a depressed $9.45 in the same period last year. Its average daily gas liquids production rose to 37,500 barrels from 33,900 barrels.

Improved operating earnings in the gas gathering and transmission segment also contributed to the quarterly gain, Mitchell noted. The improvement resulted from higher gas throughput volumes and from margins that were up from the depressed level of the prior-year period.

Although its third-quarter natural gas volume was ahead of the prior-year period's, the company continued to curtail its gas sales in light of the depressed prices available on the spot market. Oil sales volumes and prices rose during the quarter.

Real Estate Division operating earnings for the third quarter were reduced by a $5 million pretax write-down on some of the company's resort properties. Demand for these second-home properties remains soft, Mitchell said, even though sales of primary homes and lots are at or near record levels in The Woodlands, the master-planned community the company is developing in the northern Houston metro area.

Mitchell Energy & Development is a large independent energy company with real estate interests. Its shares are listed on the American and Pacific exchanges.

#90339p0420 12/05/1990 ~PR Newswire

HOUSTON (DEC. 5) PR NEWSWIRE - Shell Oil Co. announced today projected capital and exploratory expenditures of $3.3 billion for 1991, up more than $400 million over 1990's estimated spending.

"Shell's 1991 spending plans reflect our commitment to maintaining a steady

course through a volatile and uncertain business climate," said Shell Oil President and Chief Executive Officer Frank H. Richardson.

"Our investment program is an extension of strategies in place for some time and has not been materially impacted by the recent run-up in oil prices," Richardson said.

About $2 billion, or 60 percent of total 1991 spending has been earmarked predominantly for exploration and development of domestic oil and gas, with about half of E&P spending planned for the Gulf of Mexico. The $200 million E&P increase over 1990 spending mainly reflects construction and development of Shell's deepwater Auger project in the Gulf of Mexico. Development of the previously announced $1.3 billion Auger project includes installation of a tension leg platform in a world-record water depth of 2,860 feet.

Looking ahead, the Company expects during 1991 to reverse its production decline of the past few years, as both oil and natural gas production are forecasted to increase.

Additional 1991 planned capital expenditures include about $800 million in Shell's oil products business and approximately $280 million for use in the company's chemical business.

For 1990, the company said expenditures should total about $2.8 billion, including about $1.8 billion for exploration and production, about $640 million for oil products, and about $240 million for chemical products. Total capital and exploratory expenditures were $2.4 billion in 1989, and $3.3 billion in 1988.

EXTON, PA. (DEC. 5) PR NEWSWIRE - Intelligent Electronics Inc. (NASDAQ-NMS: INEL), the world's largest chain of microcomputer dealers in terms of revenue and locations, today announced that all final contingencies to its agreement to accelerate the integration of Connecting Point of America Inc. have been satisfied.

Richard D. Sanford, Intelligent Electronic's chairman and chief executive officer, said early integration of the chain is possible because CPA achieved the operating results which afford the maximum payment under the 1989 agreement, providing for the acquisition of CPA.

"We focused on completing the integration as soon as possible," Sanford explained, "because the operating efficiencies we achieve will enhance our

mission of providing world-class, second-to-none service to our customers."

The agreement for Intelligent Electronics to purchase CPA was announced in May 1989. In September 1990, the agreement was amended, subject to the satisfaction of final contingencies, to allow Intelligent Electronics to proceed with an early integration of the subsidiary's operations. The final payment of the remaining $18 million of purchase price, which had been contingent upon CPA's operating results through March 31, 1991, is now certain as all contingencies have been satisfied. Payment will be made in the first half of 1991.

With the CPA chain, the Intelligent Electronics network is composed of approximately 1,000 stores also including Entre Computer Centers and Todays Computers Business Centers. Intelligent's centers serve small and mid-sized businesses in more than 500 market regions throughout all 50 states, plus Canada and Guam.

Intelligent is known for its consistent, high-growth performance and, as announced in its year-end earnings release Dec. 3, has completed 28 consecutive quarters of record revenues and profitability. To accommodate its growth, the company recently put into place five divisions: Franchise, International, Corporate Services, Company Center and Distribution Services. CPA's headquarters, located in Denver, serve as the site for Intelligent's Franchise Division.

CHICAGO (DEC. 5) PR NEWSWIRE - The board of trustees of the Chicago Dock and Canal Trust (NASDAQ: DOCKS) declared a dividend of $.07 per share payable on March 1, 1991, to shareholders of record as of Feb. 15, 1991.

This dividend compares to $.06 per share for the same period last year. The Chicago Dock and Canal Trust is a real estate investment trust engaged primarily in the business of acquiring and holding real estate and interests in real estate for investment. The trust, formed in 1962, is successor to the Chicago Dock and Canal Company, founded in 1857 by Chicago's first mayor, William Ogden. The trust's assets include ownership of a major interest in the Equitable Building and a substantial portion of the land at Cityfront Center, a major mixed-use development, both in Chicago. The trust also owns Kipling Plaza (a 90,000-square-foot shopping center in suburban Denver), Lincoln Garden (a 73,000-square-foot office complex in Tampa, Fla.), Waterplace Park (a 107,000-square-foot office complex in Indianapolis), and One Michigan Avenue (a 144,000-square-foot office building in Lansing, Mich.).

PORT HURON, MICH. (DEC. 5) PR NEWSWIRE - Southeastern Michigan Gas Enterprises, Inc. (NASDAQ: SMGS) reported that its Southeastern Michigan Gas Company subsidiary received an MPSC order in its Gas Cost Recovery Reconciliation cases approving a settlement agreement of the 90/10 rule issue.

Today (Wednesday, Dec. 5), the Michigan Public Service Commission (MPSC) issued an order involving Case Nos. U-8632-R, U-8953-R and U-9282-R approving a settlement agreement regarding the 90/10 refund issue. The settlement agreement allows Southeastern to refund $1,442,626, which includes interest through mid-December, to its customers in the billing month of December 1990. Because Southeastern recorded a $900,000 provision in June 1990 for possible 90/10 refunds, this settlement will necessitate only a further provision of $542,626 in 1990.

The total amount at issue in these three cases, including interest through mid-December, was approximately $2,600,000. In addition to the monetary settlement, Southeastern has agreed with the MPSC staff to make revenue from most transportation customers subject to the 90/10 rule. The 90/10 rule provides for refunds to customers of 90 percent of certain revenue received

from some customer classes above a base level of revenue.

The company is pleased that it was able to settle the 90/10 issue with the MPSC staff and commission without a long, drawn out legal battle.

Southeastern Michigan Gas Company serves natural gas to approximately 80,000 customers in Michigan.

Enterprises is the parent company of six wholly owned subsidiaries: Southeastern Michigan Gas Company (Port Huron); Battle Creek Gas Company (Battle Creek, Mich.); Michigan Gas Company (Three Rivers, Mich.); Southeastern Development Company (Port Huron); Southeastern Financial Services Inc. (Port Huron); and SEMCO Energy Services, Inc. (Port Huron).

ST. LOUIS (DEC. 5) PR NEWSWIRE - MCI Communications Corp. (NASDAQ: MCIC) and A.G. Edwards & Sons Inc. today announced a five-year, $27 million agreement under which MCI will provide virtually all long-distance telecommunications services for the St. Louis-based brokerage firm and its 428 offices in 48 states.

Under terms of the competitive award, MCI will supply A.G. Edwards with:

-- Vnet virtual network long-distance services for domestic and international calling that include a variety of customer-tailored network management and routing software features. Vnet features the most advanced customer control system in telecommunications today and will link A.G. Edwards' branches in their own nationwide network.

-- Toll-free 800 service for A.G. Edwards' offices nationwide. -- Customized telephone credit cards with the firm's name imprinted on each card.

"We are pleased and confident that our partnership with MCI will enable us to maintain and enhance our long-standing tradition of providing quality service to our customers," Charles Zurfluh, vice president of branch operations of A.G. Edwards & Sons, said.

A.G. Edwards & Sons is the sixth-largest brokerage firm in the United States and is the largest one with headquarters outside New York. The firm provides its customers with a full range of financial products and services as well as investment banking services.

"MCI is proud to solidify our partnership with A.G. Edwards, one of the most

respected financial service institutions in the country," Bert C. Roberts Jr., president and chief operating officer of MCI Communications Corp., said "This agreement further underscores MCI's commitment to providing the financial community with the full array of telecommunications solutions for today's global economy."

MCI is the second-largest long-distance provider in the nation, employing advanced fiber optics, digital microwave and satellite technologies in its extensive catalogue of products. The company supplies businesses, residences and government agencies with a host of worldwide voice, data and messaging services.

#90339p0432 12/05/1990 ~PR Newswire

MCLEAN, VA. (DEC. 5) PR NEWSWIRE - Vie de France Corporation (NASDAQ-NMS: VDEF) today announced several moves intended to reduce its operating losses.

Richard M. Tolbert, president, stated that the company has decided to permanently close a minimum of 12 under-performing restaurants. In addition to the closings, it is anticipated that five other restaurants will be sold. Agreements have been finalized for the sale of two Orange County, Calif., operations with a development agreement for two additional franchise units. Tentative agreements are in place for the sale of three additional restaurants. The closings and sale of restaurants reduces by nearly one-third the number of company-owned locations and is part of the company's announced strategy to have company-owned stores in the core areas of Washington and Chicago only. A charge against earnings of $4.5 million will be booked in the second quarter to reflect the write off of assets and other closing costs.

He further stated that in addition to these measures, a significant profit improvement program is being implemented in the wholesale bakery and restaurant operations, which includes manpower reductions, a hiring freeze, a salary and wage freeze, salary cuts for top management and selective price increases.

Tolbert reported that the impacts of these actions will improve the profits of the entire company by significantly reducing its exposure in restaurants, improving further its bakery operations and covering the startup of its Culinary Division sous vide operation which is moving quickly toward breakeven.

In commenting on the restaurant closures, Tolbert said the company is still committed to the restaurant business because the restaurants are major outlets for the company's baked goods and are very important in promoting the Vie de France trademark. The company's expressed strategy has been to grow through franchising, and soon there will be several franchise locations in operation.

Two Vie de France franchises owned by Marriott Corporation recently opened in the Phoenix Airport utilizing the "Express Cafe" concept, which is expected to be the company's major franchise vehicle of the future.

#90339p0437 12/05/1990 ~PR Newswire

FORT WORTH, TX (DEC. 5) PR NEWSWIRE - In response to shareholder and media inquiries regarding the results of the Sutherland/Rosenstein offer to purchase some (but not all) shares of Justin Industries Inc. (NASDAQ: JSTN), the company announced today that as of Nov. 20, 1990, the previously scheduled expiration date of the Sutherland/Rosenstein offer, owners of 65 percent of the outstanding shares (and nearly 75 percent of the shares not owned by the Sutherland/Rosenstein group) have rejected the Sutherland/Rosenstein offer.

The board of directors of Justin (the board) recommended unanimously and in the strongest possible terms that all Justin shareholders reject the Sutherland/Rosenstein offer.

The board believes that now is not the time to consider a sale of Justin and it is gratified by continuing shareholder support for its views, as reflected by the continuing failure of the Sutherland/Rosenstein offer despite several extensions.

The board has observed that the Sutherland/Rosenstein offer is not an all cash offer for all shares. In the board's view, the offer is hostile, not fully financed, dependent on junk bonds, two-tiered and coercive.

Wholly apart from the need for financing, the offer is highly conditional, including a requirement that owners of two-thirds of the outstanding shares tender. Since nearly two-thirds of the outstanding shares have rejected the offer, it is clear that the offer is far short of its required minimum. Moreover, directors and executive officers of Justin own or control 23 percent of the common stock, and no director or executive officer intends to tender any shares. An additional 16 percent of the company's shares is held for the benefit of the company's employees.

John Justin, chairman, president and chief executive officer of Justin, concluded the announcement by stating that the "board is committed to building further values in Justin and will continue taking all appropriate steps to protect shareholder interests."

Justin Industries includes Justin Boot Co. and Nocona Boot Co. -- makers of famed Justin(R) and Nocona(R) footwear and now the Tony Lama(R) brand; Acme Brick Co. -- the top domestically owned U.S. manufacturer of face brick; Ceramic Cooling Tower Co. -- designer/builder of cooling systems for utility

and commercial users, manufacturers of Permalite(R), Ultralite(R), and Unilite(R) cooling towers plus Tradewinds(R) evaporative air coolers for residential and commercial needs; Featherlite Building Products Corp. -- leading Southwest producer of concrete masonry products; and Northland Publishing Co. -- publisher of fine books focused on the art and history of the American West.

#90339p0443 12/05/1990 ~PR Newswire

HUNTINGTON BEACH, Calif. (DEC. 5) PR NEWSWIRE - On Nov. 14 McDonnell Douglas Space Systems Co. finalized a medium expendable launch vehicle services contract with NASA to supply Delta II launch services for a five-year period.

Patterned after commercial contracts, the $140.6 million contract comes under NASA's Mixed Fleet Program and includes three scientific missions, launch pad modifications at Vandenberg Air Force Base, Calif., and pre-priced options for 12 additional launches. Because of the 30-month lead time for a launch, exercise of an option at the end of the five-year period would extend the contract through mid- 1998.

"We see this as a logical step in the development of the Delta program," said Donald Tutwiler, McDonnell Douglas (NYSE: MD) director of NASA/SDIO and Commercial Programs, Delta Launch Vehicle Division. "In the past we provided

NASA with the hardware. This is a commercial approach with McDonnell Douglas also supplying launch services."

The contract calls for the launch of the first satellite, Geotail, to be aboard a 6925 configuration of the Delta II rocket. The next two, Wind and Polar, will be launched on 7925 vehicles with 10-foot fairings. The 7925 is the most powerful version of the current Delta II family and features graphite epoxy solid motors.

The Geotail and Wind satellites are scheduled to be launched from Cape Canaveral Air Force Station, Fla., in July 1992 and December 1992, respectively. Polar will be launched from Air Force Base, Calif., in June 1993.

McDonnell Douglas had been under a letter contract since Nov. 7, 1989 to support the launch of the three payloads.

#90339p0445 12/05/1990 ~PR Newswire

NORCROSS, GA (DEC. 5) PR NEWSWIRE - Stockholder Systems Inc. (SSI), a NYNEX company, announced today the acquisition of the software, software licenses and consulting contracts of Baseline Inc., an Atlanta-based software development and programming services company.

Baseline's current customers are now customers of SSI. The newly acquired software for report distribution, optical disk archival and retrieval will be added to SSI's recently created Distributed Systems Division which is involved with emerging PC LAN and optical disk technology. Terms of the acquisition were not disclosed. In a related development, Ward Phillips, president of Baseline, has joined SSI as a vice president of development in the Distributed Systems Division.

The report distribution system includes software which downloads reports or data from IBM mainframe computers to an IBM PC or IBM PC LAN server and archives the reports or data on optical disk devices connected to the PC or LAN server. The software then enables users to browse the information on screen, print on laser printers, upload for printing on mainframe printers, manage forms capture and display as well as provide FAX communications for all PC users connected to the LAN. The system employs widely available Write Only Read Many (WORM) optical storage technology.

"We set up the Distributed Systems Division to acquire and develop value-added software offerings for our current customers, as well as to allow us to move into some non-financial markets with niche products," said Larry A. Dean,

president of SSI. "The products in this acquisition fit perfectly within that strategy because they are compatible with our mainframe computer software and our customers have expressed interest in finding alternatives to traditional paper and microfiche reports."

According to Paul Thornburg, president of this new division: "This is a very important area for many of SSI's current customers. Corporate MIS managers are always searching for ways to improve service and reduce cost. We believe optical disk technology can be used effectively to accomplish both objectives. And the fact that this system is Local Area Network-based makes it exceptionally cost competitive."

Founded in 1971, SSI designs, markets and supports a line of financial application software for IBM and IBM-compatible computers. SSI has over 1,200 customers who use SSI's software for check processing, securityholder recordkeeping, electronic funds transfer, cash management, lease accounting, loan origination, safe box accounting, report distribution, loan recovery, loan servicing and secondary marketing. SSI is a member of the NYNEX (NYSE: NYN) family of companies.

#90339p0456 12/05/1990 ~PR Newswire

ST. LOUIS (DEC. 5) PR NEWSWIRE - McDonnell Douglas (NYSE: MD) has entered into an agreement with The Prudential Insurance Co. of America to purchase group annuity contracts that will provide benefits to about 21,600 retired participants in the company's hourly retirement income plans and to about 1,100 retired participants in the company's salaried retirement income plan.

The current purchase is intended to strengthen the benefit security under McDonnell Douglas' retirement programs. Retirees affected by this action now have their benefits guaranteed by one of the oldest, largest and financially strongest insurance companies in the United States. This action also increased the ratio of plan assets to liabilities for remaining participants.

McDonnell Douglas announced on Sept. 10 that it had entered into a similar arrangement with Metropolitan Life Insurance Co. to purchase of a group annuity contract to provide benefits to about 14,200 retired participants in the company's salaried retirement income plan.

As a result of these two transactions, McDonnell Douglas' results for 1990 will include after-tax gains of approximately $370 million or $9.66 per share in 1990.

Third quarter results included a $234 million after-tax gain or $6.11 per share, and the fourth quarter results will include an after-tax gain of approximately $136 million or $3.55 per share.

These gains represent a portion of the excess of the market value of the plans' assets over the projected benefit obligations. No plan assets will revert to McDonnell Douglas and no cash will be received by the company as a result of these transactions.

The purchase of these annuity contracts in no way alters the benefits due affected retirees or the manner in which the payments are made. These actions affect the majority of participants who terminated employment prior to Nov. 27 1989 and are receiving benefits under the plan.

NEW YORK (DEC. 5) PR NEWSWIRE - AT&T (NYSE: T) today announced that it is commencing tomorrow a cash tender offer for all of the outstanding common shares of NCR Corporation at a price of $90 per share. AT&T said it has notified NCR Chairman Charles E. Exley of its offer via letter.

NCR has approximately 68 million shares on a fully diluted basis, giving the transaction a total value of approximately $6.1 billion. The $90 price represents a premium of 88 percent over the price of NCR shares on November 7, 1990, the day before a transaction was first rumored in the press.

"Although at this time we have not been able to reach agreement, we are still hopeful that a friendly merger will be arranged between our two very compatible computer businesses," said Robert E. Allen, AT&T chairman.

"This combination is of clear strategic benefit to both companies and offers a premium price to NCR shareholders. We continue to have great respect for NCR's management team and want them to manage a combined computer enterprise which we are confident will become a world leader in networked computing.

"However, now that NCR's board has rejected our $90 per share offer, we believe AT&T should make it possible for NCR shareholders to decide for themselves whether to accept our offer," he said.

The tender offer and withdrawal rights will expire at 12:00 midnight, New York City time, on January 4, 1991, unless extended. The offer is subject to financing and various other conditions. AT&T believes it will be able to obtain the necessary financing.

"We are entering an era in which the survival of stand-alone computer companies will be sorely challenged, particularly from abroad," Allen said. "This merger will produce a strong American company with excellent prospects for succeeding in the global marketplace."

The Dealer Manager for the tender offer is Morgan Stanley & Co. Incorporated. The Information Agent is Morrow & Co., Inc.

PHOENIX, AZ (DEC. 5) PR NEWSWIRE - Smitty's has become the first major supermarket in Arizona to introduce "Shopper's Express," a unique home delivery service allowing customers to order groceries over the telephone or by fax.

"Smitty's Shoppers Express makes same-day or next-day delivery the ultimate in grocery shopping convenience," stated Steve Weiskittel, executive vice president of Smitty's Super Valu Inc.

"For today's consumer, time is money. At Smitty's, we are always looking for ways to save both. Shopper's Express will be of great value to our customers in this busy, time-pressured world."

Smitty's Shoppers Express program includes all grocery items excluding alcohol all items from Smitty's specialty shops, and selected general merchandise.

All items will be available for delivery Monday through Friday at the same in-store price. Delivery customers pay a fee of $9.95 for same-day or next-day delivery or $11.95 if payment is made with a credit card.

To assist customers in placing their grocery order, a free Shoppers Express catalog will be available at all Smitty's stores. Customers can order from the selected catalog items and also, choose from thousands of other items available at Smitty's.

Customers can place orders anytime, 24 hours a day, seven days a week, by calling a toll-free number - 1-800-284-SHOP. Once the order is placed through the toll-free number, it is sent to the Smitty's store nearest the customer's home for processing.

"Shoppers Express phone center uses state-of-the-art technology which enables customers to place their orders fast and efficiently, yet with a personal touch," Weiskittel stated.

Shoppers Express, a Bethesda, Md.-based company, will work exclusively with Smitty's to provide this innovative and convenient home delivery service in the Phoenix Metropolitan area.

#90339p0470 12/05/1990 ~PR Newswire
DAYTON, OH (DEC. 5) PR NEWSWIRE - NCR Corporation (NYSE: NCR) announced today that its board of directors approved an amendment to NCR's Shareholder Rights Plan and adopted a resolution opting out of Maryland's Control Share Acquisition Statute.

The amendment to NCR's Rights Plan provides, among other things, that the rights will become exercisable after a person or group acquires 15 percent or more of the company's common stock, lowering the previous 20 percent level.

In addition, the amendment adds an automatic "flip-in" feature. If a person or group acquires 15 percent or more of NCR's common stock each right would entitle the holder, other than the 15 percent stockholder, to purchase preferred shares having a market value equal to twice the rights' exercise price, which is presently $175 per share.

The company also amended its By-laws to provide that the Maryland Control Share Acquisition Statute will not apply to an acquisition of shares of its common stock.

The Maryland Control Share Acquisition Statute removes voting rights from shares of voting stock acquired by a shareholder if the acquisition results in the shareholder having voting power in excess of certain specified levels. The Statute provides that voting rights may be restored to the shares if approved by a vote of the shareholders.

ANKENY, IA (DEC. 5) PR NEWSWIRE - Casey's General Stores Inc. (NASDAQ: CASY) announced today that it has been named as a defendant in a lawsuit filed on Dec. 4, 1990, by five Iowa retail petroleum dealers, on behalf of an alleged class of such dealers.

The complaint, filed in the United States District Court for the Southern District of Iowa, alleges that by selling gasoline at "very low prices" Casey's violated federal antitrust laws and state unfair discrimination laws and interfered with prospective business advantages.

The complaint seeks as relief a permanent injunction enjoining such practices, unspecified monetary damages (to be trebled as provided by law) and attorney's fees.

Donald F. Lamberti, chairman and chief executive officer of Casey's, said that the lawsuit has been referred to the company's legal counsel. "Our goal always has been to sell gasoline at competitive prices," said Lamberti. "We think it is important for our customers in smaller towns to enjoy the benefits of our efficient operations."

The company does not believe it has engaged in any illegal conduct and intends to contest the matter vigorously.

Casey's operates 774 convenience stores in an eight-state Midwest market area, with headquarters in Ankeny. Of the 774 stores, 571 are corporate-owned and 203 stores are franchise outlets. There are 293 Casey's stores in Iowa.

DALLAS (DEC. 5) PR NEWSWIRE - Just in time for Christmas shopping, Southwest Airlines has put its already low Fun Fares on sale.

Fun Fares will be discounted up to 48 percent, with 21-day advance purchase Fun Fares starting as low as $20 one way.

A few examples of the $20 Fun Fares are: from Chicago Midway to Detroit (City or Metro), St. Louis, or Kansas City; Houston to Dallas, Austin, or San Antonio; Austin to Dallas; San Antonio to Dallas; Oakland to Burbank or Reno; Ontario to Las Vegas or Oakland; San Diego to San Francisco or Las Vegas; Phoenix to Albuquerque, El Paso, Las Vegas, Los Angeles, Ontario (Calif.), or San Diego.

Examples of other 21-day advance purchase Fun Fares are: Reno to Las Vegas, $29; Houston to New Orleans, $29; Dallas to Albuquerque, $45; Austin to Phoenix, $55; San Antonio to Las Vegas, $65; Reno to San Antonio, $75; Chicago Midway to Houston, $79; and Houston to Los Angeles, $95.

Fares can be reserved and purchased immediately and are good for travel from Jan. 3 through Feb. 28, 1991.

Southwest offers both 21-day advance purchase Fun Fares, which are the lowest, and 3-day advance purchase Fun Fares for slightly higher. Fun Fares are priced for both peak (6:00 a.m. - 6:59 p.m., Monday through Friday) and off peak (7:00 p.m. - 5:59 a.m., Monday through Friday and all day Saturday and Sunday) travel periods. Fun Fare tickets must be purchased within 24 hours of making reservations and are nonrefundable. Other restrictions apply.

"These lower Fun Fares are being offered in conjunction with Southwest's 20th anniversary celebration -- we want to thank our Customers for their loyalty

which is responsible for our success," said Valentine. "It is our financial strength and lower costs which permit Southwest Airlines to offer the lowest fares in the industry. Other programs we are offering for our 20 years of service include a sale on our already low Senior Fares and our $20 Take Along Fares, both of which have special appeal to price-conscious Customers."

For reservations or information, call Southwest Airlines' local reservations number.

#90339p0489 12/05/1990 ~PR Newswire

ATLANTA (DEC. 5) PR NEWSWIRE - Hayes Microcomputer Products Inc. today announced that a trial date has been set for Jan. 4, 1991, in United States District Court, Northern District of California, San Francisco.

Hayes is pursuing patent infringement actions against Ven-tel Inc., Prometheus Products Inc., Omnitel Inc., and Everex Systems Inc.

Hayes seeks an injunction against further manufacture of modems that infringe the Heatherington U.S. Patent No. 4,549,302 as well as damages for past infringement, attorneys' fees, prejudgment interest, and treble damages for willful infringement.

The Heatherington '302 patent, issued on Oct. 22, 1985, applies to modems that require receipt of an escape sequence bounded by a guard time to escape to the command mode and covers all modems that can truthfully make the claim to be Hayes-compatible. An escape sequence allows the modem to change or "escape" from the on-line mode of operation (receiving/transmitting data) to the command mode (interpreting the Hayes Standard "AT" Command Set).

In recent events concerning this San Francisco case, presiding Judge Samuel A. Conti has granted Hayes motions for summary judgment requesting dismissal of all antitrust claims against Hayes. In addition, the Federal Circuit Court of Appeals denied the infringers' request to appeal Judge Conti's refusal to declare the patent invalid on summary judgment.

A second action involves claims for patent infringement by Hayes against Multitech Inc., in the United States District Court, District of Minnesota, 4th Division, Minneapolis. The date for a trial in this action has not yet been set.

Hayes is pursuing corresponding patents globally. On May 31, 1989, Hayes was granted a corresponding patent by the European Patent Office (EPO) which resulted in four national patents: France (No. E0067395), West Germany (No. P3279750.8-08), Italy (No. 21810BE/89), and the United Kingdom (No. GB0067395).

Hayes also holds Canadian Patent No. 1,186,080, issued on April 23, 1985, that covers the same invention.

Licensing under these patents is available on a non-exclusive basis with royalties typical of licenses in the high tech industry. Fifteen modem manufacturers have entered into license agreements with Hayes under the Heatherington '302 patent. Companies may obtain further information about licensing the patent by contacting Hayes Business Development at Hayes World Headquarters (P.O. 105203, Atlanta, GA 30348).

Best known as the leader in microcomputer modems, Hayes develops, supplies and supports computer communications equipment and software for personal computer and computer communications networks. The company distributes its products through an international network of authorized distributors, dealers and original equipment manufacturers.

NEW YORK (DEC. 5) PR NEWSWIRE - Pan American World Airways announced today that it had obtained a further short term waiver from United Technologies of certain payments due from the proceeds that Pan Am received from the recent transfer of its Internal German Service to Lufthansa. Pan Am also said that it had been unable to reach agreement with Airbus Industrie on the extension of a waiver previously granted the company on terms acceptable to Pan Am. As a result, Airbus and other creditors and lessors have remedies available to them which, if exercised, would result in acceleration of amounts due under various agreements, the termination of leases and the foreclosure on collateral.

Pan Am said it is continuing to hold discussions with these and other creditors on the long-term deferral of obligations.

#90339p0504 12/05/1990 ~PR Newswire

CINCINNATI, (DEC. 5) PR NEWSWIRE - Eagle-Picher Industries Inc. (NYSE: EPI) announced today that it has signed a memorandum of understanding of proposed settlement with two of the four counsel appointed by Federal Judge Jack B. Weinstein to represent present and future asbestos personal injury claimants, on a settlement of all asbestos-related personal injury claims against Eagle-Picher. Discussions with the other two class representatives are continuing. This agreement has been submitted to the court as part of the

report by plaintiffs' counsel on the progress of the settlement negotiations. The agreement is conditioned on there being a final certification of a mandatory nationwide class consisting of all present and future asbestos personal injury claimants, upon approval of the settlement by the court and by the shareholders of Eagle-Picher, and on the execution of a definitive agreement. A court hearing on the proposed class certification is scheduled to begin on Dec. 7, 1990.

Should the class action be certified and the other conditions satisfied, the effective date of the proposed settlement would be Nov. 30, 1993; if any appeals were then pending, the effective date would be on the termination of all appeals. Prior to the effective date, the company would make full payment under its presently existing settlement commitments, at a total estimated cost to the company of approximately $45 million; a majority of these payments are presently scheduled to be made over the next 18 months.

Beginning on the effective date, the company's annual cash flow (pre-tax income plus depreciation and amortization) would be allocated in the following manner:

1) Fixed payments would be made to a trust for the benefit of claimants that is independent of the company. The first year's payment would be $30 million (plus interest from Dec. 1, 1991), with $20 million per year scheduled in years 2 through 10, and $25 million per year in years 11 through 20.

2) The company would next retain an amount equal to 6.75 percent of net sales each year designed to provide for capital expenditures, working capital needs, and other corporate requirements.

3) Cash flow, if any, above the payments required in 1 and 2 would then be shared equally between the company and the trust for the first ten years, and would be divided 57.5 percent for the company and 42.5 percent for the trust for the next ten years.

Eagle-Picher would issue to the trust preferred shares which would be non-dividend paying but would be convertible at the end of the fifth year on a fully diluted basis into 25 percent of the company's common shares if the company has made the aggregate payments for those years called for in paragraph 1, and 50 percent if the company has failed to make those payments. Additionally, certain provisions of the agreement would secure the trust's position relative to certain non-asbestos liabilities. First, the company cannot encumber any assets except for newly acquired assets which are utilized to secure financing at the time of their acquisition, and secondly, the trust would receive a first lien on unencumbered assets in the event these non-asbestos liabilities exceed specified threshold levels in the future. Also, the trust would have the right to propose one person to be nominated for election to the company's board of directors.

The company indicated that even with a timely certification of the class, liquidity will continue to be a serious concern for the next several months. Accordingly, the company will proceed with its previously announced plan to sell assets as well as to seek accommodations from its lenders during this critical period.

LOS ANGELES (DEC. 5) PR NEWSWIRE - Hollywood Park Enterprises Inc. (NASDAQ: HTRFZ) announced today that its board of directors met this afternoon and considered the proposal by Marjorie Everett and a committee of Hollywood Park Operating Co. to join them in seeking a buyer for both corporations or all of their assets.

"Hollywood Park Realty is not for sale," said Warren Williamson, its chairman and chief executive officer, in summing up the board's decision and in firmly rejecting the proposal from Everett and the committee of Hollywood Park Operating Co. Williamson went on to say that it was the board's belief that, due to the uncertainty and lack of confidence in real estate as an investment alternative, any attempt to sell realty or all of its assets at this time would be ill-conceived, ill-timed and ultimately injurious to it shareholders.

MOSCOW (DEC. 5) TASS - GREAT CHANGES IN THE WORLD BEAR THE STAMP OF YOUTH PARTICIPATION, READS A MESSAGE BY PRESIDENT MIKHAIL GORBACHEV TO PARTICIPANTS IN THE 13TH ASSEMBLY OF THE WORLD DEMOCRATIC YOUTH FEDERATION IN ATHENS.

THE SOVIET PRESIDENT BELIEVES YOUTH WILL BEAR INCREASING RESPONSIBILITY FOR THE DEVELOPMENT OF EVENTS, AS THE INTERNATIONAL COMMUNITY MOVES AWAY FROM CUSTOMS, WAYS OF THINKING AND ACTION, TYPICAL OF THE EPOCH OF CONFRONTATION AND MILITARISM.

THERE WILL BE NO FEWER PROBLEMS - HUNDREDS OF MILLIONS OF PEOPLE WILL CONTINUE TO EXIST IN HARD LIVING CONDITIONS, THE SECURITY AND DIGNITY OF NATIONS AND PEOPLES WILL BE CHALLENGED, HUMAN RIGHTS MUST BE ENSURED, NATURE AND THE PLANET'S RESOURCES MUST BE PROTECTED, AND NEW, PROBABLY UNEXPECTED, BUT NO LESS IMPORTANT TASKS WILL APPEAR. THEY SHOULD ALL BE RESOLVED IN ACCORDANCE WITH GENERAL HUMAN VALUES, THE MESSAGE READS.

"I WISH RENEWAL TO YOUR FEDERATION, AND I AM SURE THAT THE ATHENS ASSEMBLY WILL DEAL WITH THIS TASK. SUCH A RENEWAL WOULD HELP THE FEDERATION ACTIVELY GIVE RELIABLE INTERNATIONAL HELP TO YOUNG PEOPLE," THE MESSAGE READS.

HELSINKI (DEC. 5) TASS - SOVIET HIJACKER NIKOLAI SELIVANOV WHO COMMANDEERED AN AEROFLOT FLIGHT EN ROUTE FROM NOVGOROD TO PETROZAVODSK ON OCTOBER 5 WAS EXTRADITED TO SOVIET AUTHORITIES TODAY.

AT NOON, A SPECIAL POLICE CAR BROUGHT SELIVANOV TO THE VALIMA CHECK POINT ON THE FINNISH-SOVIET BORDER AND HE WAS HANDED OVER TO SOVIET OFFICIALS.

FINLAND ACTED IN ACCORDANCE WITH AN AGREEMENT ON JOINT MEASURES TO AVERT HIJACKS, SIGNED BY FINLAND AND THE SOVIET UNION IN 1974.

THE FINNISH INTERIOR MINISTRY REFUSED TO GRANT POLITICAL ASYLUM TO SELIVANOV, SAYING THERE WAS NO EVIDENCE THAT HE WAS PERSECUTED FOR CONVICTIONS IN THE SOVIET UNION.

THE COUNTRY'S SUPREME COURT, AFTER CONSIDERING SELIVANOV'S CASE, SAID THE SOVIET REQUEST FOR EXTRADITION SHOULD BE HONOURED.

ON NOVEMBER 30, THE FINNISH JUSTICE MINISTRY TOOK THE FINAL DECISION TO EXTRADITE THE HIJACKER. IT SAID IT ACTED IN LINE WITH THE EUROPEAN CONVENTION TO PROTECT HUMAN RIGHTS AND BASIC FREEDOMS.

"ALTHOUGH OUR COUNTRY SIGNED THE GENEVA CONVENTION ON REFUGEES, THE FINNISH GOVERNMENT BELIEVES THAT THE DOCUMENT DOES NOT COVER HIJACKERS," FINNISH INTERIOR MINISTER JAERMO RANTANEN TOLD TASS.

A PERSON WHO HAS COMMITTED SUCH A SERIOUS CRIME WILL NOT GET ASYLUM IN FINLAND. THIS IS THE POSITION OF THE FINNISH GOVERNMENT AND IT CONCERNS ALL HIJACKERS NO MATTER WHAT COUNTRY THEY COME FROM, HE SAID.

MASERU (DEC. 5) TASS - AFRICAN NATIONAL CONGRESS (ANC) OF SOUTH AFRICA GENERAL SECRETARY ALFRED NZO RECEIVED A SOVIET DELEGATION AT THE ANC HEADQUARTERS IN JOHANNESBURG ON TUESDAY. THE DELEGATION IS VISITING SOUTH AFRICA TO DISCUSS COOPERATION WITH SOUTH AFRICA IN CLEANING UP THE AFTERMATH OF THE CHERNOBYL DISASTER.

SOUTH AFRICAN COMMUNIST PARTY GENERAL SECRETARY JOE SLOVO AND OTHER ANC LEADERS TOOK PART IN THE TALK.

ANC OFFICIALS POSITIVELY RECEIVED THE IDEA OF HAVING SOUTH AFRICAN EMPLOYERS' ASSIST THOSE WHO SUFFERED AS A RESULT OF THE CHERNOBYL ACCIDENT.

"OUR PEOPLES ARE BROUGHT TOGETHER BY THE TIME-TESTED BONDS OF SOLIDARITY," NZO SAID. HE STRESSED THAT ANC SHARED THE CONCERN OF THE SOVIET GOVERNMENT AND PEOPLE OVER THE SITUATION IN THE AREA OF CHERNOBYL AND WOULD BE SATISFIED IF SOUTH AFRICA'S AID PROVED TO BE EFFECTIVE.

AT THE SAME TIME, NZO SAID THAT THE TIME HAD NOT COME TO LIFT SANCTIONS AGAINST SOUTH AFRICA. HE INFORMED THE DELEGATION ABOUT CURRENT PROCESSES IN THE COUNTRY. HE SAID ANC ASSESSED THEM POSITIVELY, BUT THOUGHT THAT MANY PROBLEMS COULD STILL APPEAR.

THE TWO COUNTRIES SIGNED A GENERAL PROTOCOL ON COOPERATION BETWEEN THE USSR AND SOUTH AFRICA IN CLEANING UP THE AFTERMATH OF THE CHERNOBYL DISASTER IN PRETORIA ON TUESDAY. SOUTH AFRICAN MINISTER OF TRADE, INDUSTRY AND TOURISM KENT DURR SIGNED THE PROTOCOL FOR THE SOUTH AFRICAN SIDE AND ECOPROM CONSORTIUM GENERAL DIRECTOR ANDREI CHERNUKHIN - FOR THE SOVIET SIDE.

"THIS IS A DOCUMENT OF INTENT, IN WHICH THE FORMS OF SOUTH AFRICA'S INVOLVEMENT IN THE WORK CARRIED OUT IN THE CHERNOBYL ZONE ARE SPECIFIED FROM PRINCIPLED POSITIONS," CHERNUKHIN TOLD TASS BY TELEPHONE FROM JOHANNESBURG.

"THREE MAIN AREAS OF COOPERATION WERE OUTLINED. FIRST, THE SIDES WILL BEGIN WORK TO DEVELOP COMPREHENSIVE EQUIPMENT TO CLEAN-UP LAND IN RADIATION-CONTAMINATED AREAS.

"SECOND, SOUTH AFRICA EXPRESSED READINESS TO HELP BUILD ONE SETTLEMENT IN THE UKRAINE, ONE IN BYELORUSSIA, AND ONE IN RUSSIA FOR 10,000 RESIDENTS EACH, BY ERECTING SOME 2,000 HOUSES.

"THIRD, SOUTH AFRICA WILL SUPPLY FOOD TO RESIDENTS OF THESE SETTLEMENTS IN THE FUTURE. LONG-TERM INTEREST-FREE CREDIT WILL BE EXTENDED TO THE SOVIET UNION TO IMPLEMENT THIS PROJECT.

KIEV (DEC. 5) TASS - THIRTY-NINE PATIENTS TREATED IN A UKRAINIAN HOSPITAL AFTER TAKING PART IN THE CHERNOBYL CLEAN-UP EFFORT WENT ON A HUNGER STRIKE TODAY, DEMANDING FINANCIAL COMPENSATION FOR PRICE RISES ON FOODSTUFFS, INCLUDING SOME PRODUCTS WHICH ARE PART OF THE TREATMENT.

THE FASTERS ALSO DEMAND THAT THEIR HOSPITAL IN THE CITY OF LUGANSK BE COMPLETELY RESERVED FOR LOOKING AFTER CHERNOBYL VICTIMS AND SOLDIERS CRIPPLED IN AFGHANISTAN AND THAT THE STAFF BE AWARDED 25-PERCENT PAY RISES, AS LONG PROMISED BY THE HEALTH MINISTRY.

THE STRIKING PATIENTS ALSO WANT AUTHORITIES TO GIVE AN ACCOUNT OF HOW CHERNOBYL RELIEF HAS BEEN SPENT.

THEY SAID THAT DURING A TV CHRITY SHOW EARLIER THIS YEAR, VIEWERS IN THE LUGANSK REGION DONATED SOME THREE MILLION ROUBLES TO THE CHERNOBYL FUND. BUT NOT A KOPECK HAS RETURNED TO THE REGION WHERE 16,000 REGISTERED PARTICIPANTS IN THE CHERNOBYL CLEAN-UP OPERATION LIVE.

THE STRIKERS EXPLAINED THEIR MOTIVES IN CABLES TO THE FEDERAL AND UKRAINIAN GOVERNMENTS AND TO DEFENCE MINISTER DMITRY YAZOV.

THEY SAID THEY WILL NOT TAKE ANY FOOD UNTIL HIGH-LEVEL OFFICIALS COME TO LUGANSK TO TALK TO THEM.

MOSCOW (DEC. 5) TASS - FIVE MEMBERS OF THE INTERNATIONAL CREW ON WEDNESDAY CONTINUED WORK ON BOARD THE MIR SPACE STATION.

THE MAIN EXPEDITION, GENNADY MANAKOV AND GENNADY STREKALOV, WERE JOINED ON TUESDAY BY VIKTOR AFANASYEV, MUSA MANAROV AND JAPANESE JOURNALIST TOYEHIRO AKIYAMA AFTER THE SOYUZ TM-11 SPACE SHIP MATED THE MIR STATION.

TWELVE PEOPLE ARE CURRENTLY IN SPACE, TAKING INTO ACCOUNT THE FLIGHT OF THE U.S. COLOMBIA SPACE SHUTTLE. THERE ARE RUMOURS AT THE MISSION CONTROL CENTRE THAT U.S. ASTRONAUTS ARE PLANNING TO ESTABLISH CONTACTS WITH THE SOVIET-JAPANESE CREW.

ON THURSDAY, THE SOVIET-JAPANESE CREW WILL HOLD A NEWS CONFERENCE FOR SOVIET AND FOREIGN CORRESPONDENTS.

MANAKOV AND STREKALOV TODAY ACQUAINTED AFANASYEV AND MANAROV WITH THE WORK OF THE STATION. THE LATTER TWO WILL REPLACE THE CURRENT MAIN CREW. MANAKOV AND STREKALOV ARE MAKING PHYSICAL EXERCISES WITH THE HELP OF THE CHIBIS VACUUM COSTUME, GETTING READY TO RETURN TO THE EARTH.

SOON AFTER HIS ARRIVAL TO THE STATION, AKIYAMA BEGAN TO PREPARE TELEVISION EQUIPMENT, WEIGHING LESS THAN 170 KILOGRAMS, FOR WORK. DURING THE FLIGHT, HE WILL CONDUCT A SERIES OF TELEVISION PROGRAMMES. HE IS PLANNING TO TAKE PHOTOGRAPHS OF TOKYO, MOSCOW, NEW YORK AND PARIS TO STUDY THE ECOLOGICAL SITUATION THERE. HE WILL ALSO TAKE PICTURES OF JAPAN. A VIDEO FILM IS BEING MADE ABOUT THE JAPANESE COSMONAUT'S STAY ON BOARD THE MIR SPACE STATION.

TODAY, THE JAPANESE COSMONAUT BEGAN MEDICAL AND BIOLOGICAL EXPERIMENTS TO STUDY THE REACTION OF LIVE ORGANISMS TO WEIGHTLESSNESS. HE HAS ALSO LAUNCHED THE "FROG" EXPERIMENT WITH SIX FROGS BROUGHT FROM JAPAN. THE FROGS HAVE SPECIAL VACUUM SUCKERS ALLOWING THEM TO MOVE. SCIENTISTS WANT TO KNOW HOW THEY WORK IN WEIGHTLESSNESS.

MOSCOW (DEC. 5) TASS - HUNDREDS OF MUSCOVITES GOT FOOD PARCELS FROM GERMANY TODAY, AS REPRESENTATIVES OF THE GERMAN RED CROSS SOCIETY CROSSED THE CITY TO GIVE PRESENTS TO INVALIDS, THE OLD AND THE LONELY.

THE CONVOY OF TRUCKS, PART OF THE "HEART FOR RUSSIA" CHARITY EFFORT, ARRIVED IN MOSCOW ON TUESDAY, BRINGING A TOTAL OF 4,973 PARCELS WITH NEARLY 50 TONS OF FOOD, WORTH 250,000 MARKS. EACH PARCEL BORE THE NAME OF THE SENDER. ACTIVISTS FROM THE MOSCOW RED CROSS SOCIETY HELPED DISTRIBUTE THE GIFTS TO THE NEEDY.

ROZA BRUM, WHO LIVES IN THE CAPITAL'S TIMIRYAZEV DISTRICT, GOT A PRESENT FROM NICHOLAS GROSS FROM MECKENHEIM. THE 76-YEAR-OLD BLIND WOMAN SILENTLY HUGGED

CONVOY LEADER KLAUS PETER ENKE, WHO BROUGHT HER A BOX WITH FRUIT, COFFEE, BUTTER, CHEESE, AND SALAMI. "THIS HELP COMES FROM THE HEART," ENKE SAID EMOTIONALLY.

HE THEN WENT ON TO VISIT SEVERAL OTHER HOMES. YELENA KOTLYARSKAYA, 60, DISABLED SINCE CHILDHOOD, GRATEFULLY READ THE NAME OF WOERNER FOSS FROM HAMELN WRITTEN ON HER PARCEL. ALEXANDER NAKHALOV, 73, THANKED HOELGA SCHOLZIEGER FROM FRANKFURT FOR KINDNESS AND ATTENTION.

THE DISTRIBUTION WAS WELL-ORGANIZED. MOSCOW WAS DIVIDED INTO TEN AREAS. LISTS OF THE LONELY, INVALIDS, AND THE OLD WERE COMPILED IN ADVANCE - A TOTAL OF 5,000 PEOPLE. THE DISTRIBUTION IS MONITORED BY DEPUTIES AND PUBLIC REPRESENTATIVES. IT WILL BE COMPLETED BY SATURDAY.

MUSCOVITES FEEL SPECIAL SYMPATHY TOWARDS THOSE WHO BROUGHT THE CONVOY TO THE CITY. SIXTEEN MEN AND WOMEN AND ARE WORKING TIRELESSLY ALL DAY LONG. SOVIET PEOPLE HELPED THE CONVOY THROUGHOUT THE ENTIRE JOURNEY, ENKE TOLD TASS. "THE POLICE HELPED US IN EVERY POSSIBLE MANNER, THERE WAS NO RED TAPE OR OTHER DIFFICULTIES," HE SAID.

THIS IS THE FIRST ACTION OF THE UNIFIED GERMAN RED CROSS, HE SAID. THE CHARITY EFFORT CONTINUES - GERMANS HAVE ALREADY RAISED 15,000 PARCELS FOR THE SOVIET UNION, HE SAID.

MOSCOW (DEC. 5) TASS - A EUROPARLIAMENT DELEGATION, INCLUDING MEMBERS OF THE GROUP TO DEVELOP CONTACTS WITH THE SOVIET UNION, TODAY MET REPRESENTATIVES OF A NUMBER OF SOVIET PARLIAMENT'S COMMITTEES AND COMMISSIONS.

THEY DISCUSSED VARIOUS ASPECTS OF LIFE IN THE SOVIET UNION AND WAYS TO HELP IT IN THE CURRENT HARD PERIOD.

MAGDALENE HOFF, HEADING THE DELEGATION, NOTED THAT THE CONTINENT AND THE WORLD ARE SERIOUSLY INTERESTED IN MAKING THE SOVIET UNION A WORTHY PARTNER IN THE ALL-EUROPEAN HOME, NO MATTER HOW SOVIET PERESTROIKA DEVELOPS. SHE SAID THE READINESS OF A NUMBER OF STATES AND PRIVATE FIRMS TO RENDER ECONOMIC ASSISTANCE TO THE SOVIET UNION PROVED THIS.

FEDOR BURLATSKY, HUMANITARIAN, SCIENTIFIC AND CULTURAL TIES SUBCOMMITTEE CHAIRMAN OF THE SOVIET PARLIAMENT'S COMMITTEE FOR INTERNATIONAL AFFAIRS, DWELLED ON THE PREPARATION OF A NEW UNION TREATY AND THE SOVIET PRESIDENT'S PROPOSALS OF STRUCTURAL CHANGES IN THE STATE POWER SYSTEM, CLOSELY CONNECTED WITH THE TREATY.

DELEGATION MEMBERS WERE PARTICULARLY INTERESTED IF ANY SOVEREIGN REPUBLICS MIGHT OBTAIN NUCLEAR WEAPONS AND WHAT THEIR ARMY WILL BE LIKE, AFTER A UNION TREATY IS SIGNED. THEY WERE TOLD THAT THE SEGMENTATION OF NUCLEAR WEAPONS AMONG REPUBLICS IS OUT OF THE QUESTION. AS FOR THE ARMY, DEBATES ARE UNDERWAY, AND NOT ONLY IN PARLIAMENTS.

SUWANEE, GA (DEC. 5) UPI - The Atlanta Falcons signed rookie quarterback Todd Hammel to their practice squad Wednesday and used their last activation move to place rookie running back Mike Pringle on their roster.

Previously starting quarterback Chris Miller, who was lost for the season when he broke his collarbone late in the third quarter of last Sunday's loss at Tampa Bay, was placed on injured reserve to make room for Pringle.

Hammel, Tampa Bay's 10th round draft pick, threw for 5,364 yards and 48 touchdowns last season as a senior at Stephen F. Austin. He had tryouts earlier this year with both Atlanta and Dallas.

Pringle, the Falcons' sixth-round draft pick from Cal State Fullerton, had been on injured reserve since Sept. 3 because of a rib injury, but had been practicing with the club. Last year, he had the second-best all-purpose season in NCAA history with 2,690 yards. He led the Falcons in kickoff returns in preseason with a 24.1 average.

(DEC. 5) UPI - Secretary of State Baker is saying what he'll tell Iraqi President Saddam Hussein when he meets with him in Baghdad later this month. But Baker says he won't ''negotiate'' or ''walk back'' on U-N resolutions demanding Saddam withdraw his troops from Kuwait.

A New York judge today set bail at 300-thousand dollars for the accused assassin of militant Israeli Rabbi Meir Kahane, who was gunned down last month at a Manhattan hotel. 35-year- old El Sayyid Nosair is being held on Rikers Island.

A Rhode Island securities dealer was sentenced today in Providence to 46 months in prison for running a phony investment scheme. Edward Dockray's scheme bilked more than 100 people in six states out of more than one-Million dollars.

The Georgia Supreme Court today upheld a state law prohibiting the Ku Klux Klan from wearing masks with their robes. In a 6-1 ruling, the court said the 1951 law does NOT infringe on the Klan's First Amendment right to free speech.

Health care workers report a deadly epidemic has emerged of teen- agers sniffing butane, propane and other substances to get high. The Children's Hospital Medical Center in Cincinatti says the practice has claimed the lives of at least 20 younsters in the Cincinatti area alone.

Researchers say doctors who have their own X-ray and ultrasound equipment conduct four times more imaging tests on patients and charge more than physicians who refer the work to radiologists. The researchers could give NO

reason for the differences between the two groups.

#90339u0064 12/05/1990 ~United Press International

ELK GROVE VILLAGE, Ill. (DEC. 5) UPI - United Airlines said Wednesday it carried 4,522,000 paying passengers last month, 4.3 percent higher than the 4,335,000 who flew the UAL Corp. subsidiary during November 1989.

However, the airline's load factor was down 3.6 points - from 65 percent to 61.4 percent.

The UAL Corp. subsidiary also reported November revenue passenger miles were 5.881 billion, up 8.2 percent from the 5.435 billion logged last November. Available seat miles, however, were 7.059 billion, up 14. 5 percent from last November's 8.367 billion as the carrier continues its aggressive expansion.

For the first 11 months of this year, United recorded 69.78 billion revenue passenger miles, up 9 percent; 104.855 billion available seat miles, up 9.7 percent; and a load factor of 66.5 percent, down 0.5 points.

Load factors for the month were down 4.5 points on North American routes and down 1.4 points on Pacific routes. For the 11 months, United's Pacific service showed a gain of 2.4 points in load factor over the first 11 months of 1989 while North American routes showed an 11- month loss of 1.6 points.

All figures are for scheduled services only.

United Chairman Stephen Wolf said the November results set the stage for continued expansion.

''Preparations are well under way,'' Wolf said, ''for United's additional international expansion led by the inauguration of of Chicago-Tokyo non-stop service Jan. 8, 1981, and routes linking five U. S. cities with London's Heathrow Airport, as well as service between Washington, D.C., Dulles International Airport and Paris, as soon as regulatory approvals are secured.''

United won the newly authorized Tokyo route in a bidding competition with American Airlines. The route will link its major hubs at Chicago O'Hare and Tokyo Narita, providing a network of service between North America and the Far East.

United bought the European routes from financially ailing Pan Am Corp.

#90339u0067 12/05/1990 ~United Press International

NEW YORK (DEC. 5) UPI - The nation's largest school system should provide

free condoms to high school students to help stem a spreading AIDS epidemic, New York City Schools Chancellor Joseph Fernandez told the Board of Education Wednesday.

In his formal presentation of the controversial plan, Fernandez said the free distribution of condoms should not need parental consent.

''Students actively having sex don't tell their parents,'' Fernandez said. ''Requiring consent or counseling takes the heart out of the plan. ''

Any of the city's 261,000 high school students, no matter how young, would be eligible to get the contraceptives.

The Board of Education was expected to vote on the matter in January and if the proposal is approved, condom distribution could start by spring.

Three of the seven members of the Board of Education expressed support, two opposition, and two said they had not made up their minds. A similar proposal, this one aimed at stemming teenager pregnancies, was voted down in 1986.

Catholic Church leaders have roundly condemned the condom distribution plan and vowed to fight it all the way.

Fernandez stressed that the passing out of free condoms was only one component in a broad campaign to fight aids.

He said New York City is leading the nation in adolescent AIDS cases.

''This entire city is at risk,'' he said. ''We have an opportunity to do something about it.''

Before the meeting started, Mayor David Dinkins said it was important for Fernandez and the board to emphasize that the intent of the condom distribution program was ''not to promote promiscuity'' but to urge ''ity'' but to urge

Fernandez introduced Dr. Karen Hein, of the Division of Adolesence Medicine at Albert Einstein School of Medicine at Montefiore Hospital in the Bronx, who told the board that of the AIDS cases reported among 13 to 21-year-olds in the country, 20 percent of them were in New York City.

She said AIDS case between 13 and 19 years olds increased 51 percent between February 1988 and February 1989.

''It shouldn't be business as usual ... it's time to put yourself out in front because this city is out in front of this epidemic,'' Fernandez said.

Under the plan, students at each high school, not only just the 17 with health

clinics, would be able to get free condoms from male and female staff volunteers at a variety of sites and at specified times in the school day.

#90339u0084 12/05/1990 ~United Press International

BOSTON (DEC. 5) UPI - Doctors who have their own X-ray and ultrasound devices conduct far more imaging tests on patients and charge more for them than physicians who refer the work to radiologists, researchers said Wednesday.

Analysis of 65,517 private health insurance claims filed for care provided by 6,419 doctors found those with their own equipment conducted four times more procedures for four common conditions than those who referred the work to others, said Dr. Bruce Hillman of the University Medical Center in Tucson, Ariz.

Hillman and colleagues also found the combination of using the equipment more and charging more for each test meant the bills from doctors with X-ray and ultrasound equipment in their own offices were substantially higher than was the case with other physicians.

Charges for patients of so-called ''self-referring'' doctors who took care of the imaging procedures themselves were an average of 4.4 to 7.5 times higher than for those whose tests were done by radiologists, Hillman and colleagues reported in The New England Journal of Medicine.

The researchers used data provided by MEDSTAT Systems, Inc., a firm in Ann Arbor, Mich., that compiles information for controlling medical costs. A statement issued by the company said for the four conditions included in the study, annual imaging costs for working Americans totals $290 million.

Hillman and co-researchers said it was not possible for them to determine whether the practices of doctors who did their own procedures or those who had radiologists do them were ''the more appropriate care.'' Nor could they tell why doctors with their own equipment conducted more tests.

''These physicians may perform imaging more frequently because they have financial incentives to do so, because imaging is more convenient when performed in a physician's office, or because physicians who perform imaging more often are more likely to acquire imaging equipment, '' the study said.

Nevertheless, the researchers said the differences between the two groups of doctors in their use of imaging equipment ''are so large that some concern over the role of financial incentives must be invoked.''

They noted that patients ''cannot be said to have a meaningful choice when their physicians advise them to undergo imaging.'' Thus, the ability to ''self-refer patients for imaging must surely complicate physicians' decisions

and perhaps jeopardize their obligation to place their patients' interests above their own,'' they said.

The conditions and procedures involved in the study were chest X-rays for upper respiratory problems, ultrasound for pregnant women, spinal X- rays for lower back pain and ultrasound or X-rays for men with urinary problems.

To conduct imaging work for all the conditions except urinary difficulties, the doctors who did their own procedures charged ''significantly more'' than radiologists, the study found.

For respiratory and urinary problems, 38 percent of doctors conducted their own imaging and 62 percent referred the work to radiologists. For pregnant women, 48 percent of doctors conducted ultrasound procedures in their offices and 52 percent sent patients elsewhere.

To treat patients with lower back pain, 49 percent of doctors studied did their own work and 51 percent sent patients to others for imaging tests.

WASHINGTON (DEC. 5) UPI - Two veteran House committee chairmen - Reps. Glenn Anderson, D-Calif., and Frank Annunzio, D-Ill. - were ousted from their posts Wednesday by fellow Democrats unhappy with their performance.

All other committee chairmen were retained, including Rep. Henry Gonzalez, D-Texas, chairman of the House Banking Committee, who survived a challenge in his bid to continue as chairman.

The votes came as House Democrats completed organizational business in preparation for the 102nd Congress, which convenes in January.

Anderson, 77, was ousted from his post as chairman of the House Committee on Public Works and Transportation on a 152-100 vote. Annunzio, 75, lost the chairmanship of the House Administration Committee on a 127-125 vote.

The Democrats voted 163-89 to keep Gonzalez as chairman of the banking panel.

The Democrats arranged to meet later in the day to pick new chairmen for the public works and administration committees.

The votes marked the first time since 1985 that a House chairman was removed from his post. In that year, Rep. Mel Price, D-Ill., was ousted as chairman of the House Armed Services Committee in a coup engineered by Rep. Les Aspin, D-Wis., who became chairman.

The challenges to the three chairmen also marked the most significant

rebellion since 1974, when the reform-minded post-Watergate class of freshmen House members voted to depose several veteran chairmen.

The rejection of Annunzio was a bitter blow for the veteran lawmaker who had just survived a hard-fought re-election campaign. Republicans made Annunzio one of their top priority targets in the November election, but he managed to rally support and win re-election. Annunzio was first elected to Congress in 1964.

Fellow Democrats, however, complained about how Anderson and Annunzio ran their committees. ''People were talking about effectiveness in both these cases,'' said one Democrat after the votes that ousted the two.

The administration committee deals with with in-house congressinal matters and is not widely known outside of Washington, but the Public Works and Transportation Committee has wide-ranging responsibilities.

The move against Annunzio developed only in recent days, but Anderson had been in trouble with members of his own committee who felt he was not a strong advocate for transportation and related programs. Seventeen Democrats on the panel signed a letter opposing his re-election as chairman.

#90339u0112 12/05/1990 ~United Press International

CHICAGO (DEC. 5) UPI - In the blockbuster deal of baseball's winter meetings the Toronto Blue Jays traded shortstop Tony Fernandez and first baseman Fred McGriff to the San Diego Padres Wednesday for second baseman Roberto Alomar and outfielder Joe Carter.

Fernandez is one of the best defensive shortstops in the majors and a solid hitter. Over the last three seasons, McGriff has become one of baseball's premier power hitters.

Carter returns to the American League after one season with the Padres. San Diego obtained Carter from the Cleveland in the big trade at last year's winter meetings.

''Obviously the teams in our division are taking giant strides,'' Padres General Manager Joe McIlvane said.

He was referring to the San Francisco Giants, who have signed Willie McGee, Bud Black and Dave Righetti, and the Los Angeles Dodgers, who added Darryl Strawberry last month and Kevin Gross during the winter meetings.

Ironically, the Padres pulled off the deal without ''Trader'' Jack McKeon, who was ousted this year.

McGriff, who hit .300 in 1990 with 35 homers, will start at first base, replacing Jack Clark, who is expected to be granted second-look free agency in a week.

''The free agency business is up to him (Clark),'' said McIlvane, adding if Clark were to re-sign, he could play outfield.

Fernandez, a switch-hitter, batted .276 in 1990 and stole 26 bases. He will team up the middle with second baseman Bip Roberts.

''Getting Tony Fernandez stabilizes us up the middle,'' McIlvane said.

The Blue Jays will put Carter in right field and hope John Olerud, who hit .265 as a rookie, can improve by playing every day at first base. Carter batted .232, with 24 home runs and 115 RBI.

''I think this gives us a chance to get Olerud in there,'' Manager Cito Gaston said.

Alomar, a switch-hitter who batted .287, will start at second with Manny Lee at short.

''This is kind of like trading two sons for me,'' Gaston said. ''I'm going to miss them.''

The Blue Jays have revamped their outfield at the winter meetings. They traded right fielder Junior Felix to California for center fielder Devon White. Earlier Wednesday, they signed free agent Pat Tabler.

Tabler, Rance Mulliniks and Glenallen Hill are candidates for left field. George Bell, the star left fielder, is a free agent. He has asked the Blue Jays for $16 million over four years, a request that likely will not be met. But even if he should re-sign, the Blue Jays would use him as a designated hitter.

#90339u0139 12/05/1990 ~United Press International

PUNTA DEL ESTE, Uruquay (DEC. 5) UPI - President Bush indicated there would be no negotiated settlement to the Persian Gulf crisis that shortchanges U.N. resolutions demanding the unconditional withdrawl of Iraqi troops from Kuwait.

Bush, on the second day of a six-day swing through Latin America, told reporters Tuesday he is ''not in a negotiating mood'' and hopes Iraqi President Saddam Hussein ''gets the message'' about last week's U. N. resolution authorizing the use of force to liberate Kuwait if Iraqi troops are not out by Jan. 15.

In all, the U.N. Security Council has passed 12 resolutions that condemn the invasion, demand the withdrawl of troops and impose a range of global economic sanctions against Iraq.

Scheduled to visit Argentina on Wednesday, two days after the government there quashed a revolt by dissident military officers, Bush appeared to steer U.S.

gulf policy back on the hard-line course that has been the foundation for the international coalition aligned against Iraq.

In a surprising move last Friday - the day after the resolution authorizing force was adopted - Bush offered to send Secretary of State James Baker to Baghdad for talks with Saddam and invited Iraqi Foreign Minister Tariq Aziz in Washington. The invitation to Iraq was accepted and a meeting with Aziz is expected early next week.

Iraqi officials have said they see Bush's overture as a chance for a negotiated settlement linking resolution of the gulf crisis to the Israeli-Palestinian conflict.

But the White House has insisted the talks are strictly a last-chance effort to avoid war by making sure Saddam understands U.S. determination to end Iraq's occupation of Kuwait and restore the legitimate government of the oil-rich emirate.

Bush recently ordered 200,000 additional American troops to the gulf to bolster the U.S.-led multinational force assembled in the region against Iraq.

Bush said that when he meets with Aziz, ''I want to make clear to him the best thing is to go through with the U.N. resolutions.''

Bush dodged questions about reports that the five permanent members of the U.N. Security Council - the United States, Soviet Union, China, Britain and France - had agreed after approving the force resolution not to attack Iraq in exchange for its withdrawal from Kuwait.

In another report, Sky Television News in London said that Saddam is willing to withdraw from Kuwait provided he is allowed to keep an oil field captured by his troops during the invasion.

''I am convinced that Saddam Hussein has not gotten the message,'' Bush told reporters. ''I don't think Saddam Hussein understands'' the impact of the U.N. resolutions. ''I hope he gets the message.''

Bush said that he agrees with Defense Secretary Dick Cheney's statements during Senate hearings on U.S. gulf policy that sanctions alone would not be enough to prompt an Iraqi withdrawl.

And Bush said, ''I don't agree with them,'' when asked about the testimony of two former chairmen of the Joint Chiefs of Staff - Adm. William Crowe and Gen. David Jones - that the United States should give as much as a year or more for the economic sanctions imposed by the U.N. to work.

''You know,'' he added, ''I've not been the one who's convinced that sanctions alone will do the trick.''

During his stop in Montevideo, Uruguay, Bush acknowledged the stiff economic consequences suffered by the Third World because of the gulf crisis and vowed the political and military standoff ''is not going to go on forever.''

''The economic burdens on these small countries and on the U.S. are heavy,'' said Bush at a news conference during which he referred to rising oil prices triggered by unrest in the Middle East.

During his one-day visit to Uruguay - the first by an American president in 27 years - Bush also pressed for ''successful completition'' of the current round of world trade talks in Brussels, Belgium, which are said to be on the verge of collapse because of divisions over agriculture subsidies.

He also urged support of his proposal for an economic trading zone in the Americas.

''The ultimate aim is free trade for all the Americas,'' Bush said.

OTTAWA (DEC. 5) UPI - The Canadian Broadcasting Corporation, in its most radical cost-cutting venture ever, Wednesday announced plans to axe 1100 jobs and drastically reduce 11 stations, some in major centers, to avoid a huge deficit next year.

CBC President Gerard Veilleux told reporters in Ottawa the layoffs and reductions would avert a $90 million deficit on the network's $1.2 billion budget. The CBC, which has 12,000 employees nationwide and overseas, is financed by Canadian taxpayers. Although it operates independently of the federal government, it has been severely criticized for its government bias.

Veilleux blamed the cuts on the government's restraint program that has cut back contributions to the network, the economic recession and a forecast loss of $25 million in advertising.

The cuts will affect the 1991-92 fiscal year. Unless advertising revenues increase, however, Veilleux warned additional cuts would be necessary in 1992-93 to avoid a forecast deficit of $41 million. Veilleux said he was "deeply distressed" by the cuts, which represent a significant reduction in programming and stations.

The network will close local television stations in Labrador, Quebec and Toronto, although listeners in those areas will be able to tune into national CBC television. Eight other local television stations, among them the major cities of Calgary, Alberta and Saskatoon, Saskatchewan will be reduced.

The CBC will stop funding Radio Canada International, its international short wave service. The federal government, probably through the External Affairs Ministry, said it would seek other ways of operating the service.

Other services scrapped by the network include its 24-hour coverage of Canadian Parliament as well as local television programming. Veilleux said, however, that the CBC would remain a "balanced, national public broadcasting service" offering mainly Canadian programming.

Asked if the CBC could save more money by reducing U.S.-produced programs, Veilleux said the network only runs 4.5 hours of foreign programming a week, most of it from the United States.

"With God's help, we will reduce that in the future," he said, adding that the network makes money on its American programs. "That's how we get the advertising revenues we have," he said.

Veilleux said most of the layoffs would take effect next Apr. 1 because the network's unionized employees were entitled to 16 weeks' notice. He said

surplus land and buildings would be offered for sale.

(DEC. 5) UPI - Iraq says it will free all Soviet hostages. The Iraqi news agency INA says Baghdad will allow the 33-hundred Soviets to leave the country beginning Wednesday. But it says Iraq will hold the Kremlin liable for the repercussions of Soviet workers breaking their contracts. Moscow says it still won't relax its opposition to the Iraqi invasion of Kuwait.

In London, a satellite T-V network says Iraqi President Saddam Hussein is ready to pull out of Kuwait to avoid war if it can keep a Kuwaiti oil field. The network says Iraq will make that offer to Secretary of State Baker when Baker visits Baghdad later this month.

President Bush leaves Uruguay for Argentina Wednesday... on the third stop of his five-nation swing through South America. Bush told reporters that he doesn't believe Saddam Hussein ''has gotten the message.'' He said he also agrees with Defense Secretary Cheney who said he did not think sanctions alone will work against Iraq.

Investigators continue the painstaking task of piecing together information from two Northwest Airlines planes that collided on the runway in Detroit... killing eight people. Radio transcripts reveal the pilot of a D-C-9 jet apparently got lost in the fog and guided his aircraft into the path of a Boeing 727 on a takeoff roll.

Panama's former police chief, Eduardo Herrera, escaped from a high- security prison Tuesday. Authorities say a helicopter landed on the island jail and swept Herrera off to a police station on the outskirts of Panama City. Herrara delivered a manifesto to a local newspaper proclaiming his innocence in an alleged coup attempt last October.

LA PAZ, Bolivia (DEC. 5) UPI - Guerrillas fatally shot kidnapped businessman Jorge Lonsdale, president of a Coca Cola bottling company in Bolivia, when police forces broke into the rebel hidout Wednesday, authorities said.

Police killed three of the kidnappers in a 40-minute shootout with what police said were members of the extreme left-wing Nestor Paz Zamora Commission.

Interior Minister Guillermo Capobianco told a news conference the executive was fatally shot in the head.

Capobianco said police found out Tuesday night that Lonsdale was being held in a three-story building in the residential neighborhood of Sopocachi. He said police attacked Wednesday just after 6 a.m.

The minister said police initially intended only to establish contact with kidnappers and rescue Lonsdale alive but the kidnappers ''responded with gunfire,'' touching off the gunfight.

He said part of the rebel organization ''is arrested and the other part dead in combat.''

The group is the armed faction of the revamped National Liberation Army founded in 1967 by Argentine-Cuban guerrilla Ernesto ''Che'' Guevara.

The kidnapers said in a statement to the press Tuesday they had cut their ransom demand to $1 million from $8 million. The group also sent a photo of Lonsdale with his arms in the air to a newspaper.

The Lonsdale family had decided to pay the ransom and were waiting for contact with the kidnappers when the shootout occured, the minister said.

Lonsdale was the chief executive officer of the Vascal company, which bottles Coca Cola in La Paz.

Police identified the dead rebels as Miguel Northuester, 29, a German-Italian and believed the head of the group, and Bolivians Luis Caballero and Augusto Zalles.

Wounded was police Lt. Edwin Belmonte, who is in critical condition, and guard Javier Ramirez.

Security officers arrested three other people police said were involved in the shootout, including Peruvian Eulogio Guaman, who authorities claim is a member of the Peruvian guerrilla organization Tupac Amaru Revolutionary Movement, and brothers Ines Paula and Sebastian Acasigua.

The Nestor Paz Zamora Commission took responsibility for an attack Oct. 10 on the barracks of U.S. Embassy guards when one Bolivian guard was killed.

#90339u0200 12/05/1990 ~United Press International

(DEC. 5) UPI - Federal investigators plan to listen to flight recorders Wednesday from two Northwest Airlines jetliners involved in a deadly crash on a foggy Detroit runway. National Transportation Safety Board investigator John Lauber says the cockpit voice recorder and the flight data recorder from each plane were recovered and flown to Washington for analysis. But radio transmissions already made public indicate the pilot of the D-C-9 was lost in the fog when it was struck by a Boeing 727 on a takeoff roll. Eight people

died in Monday's fiery collision.

President Bush heads to Argentina Wednesday, two days after the government quashed a revolt by dissident military officers. Bush has been pressing for free trade in earlier stops in Brazil and Uruguay, but the issue has been mostly overshadowed by the Persian Gulf crisis. He indicated Tuesday there will be NO negotiated settlement to the standoff that shortchanges U-N resolutions demanding the unconditional withdrawl of Iraq from Kuwait.

New York police are investigating a possible revenge hit list for the assassination last month of Israeli militant Rabbi Meir Kahane. Authorities have warned eight prominent Palestinian rights supporters, including Nation of Islam leader Louis Farrakhan, that they may be attacked by radical Zionists. Police say the eight are on a list of names sent to a local t-v reporter by someone claiming to be a member of Kahane's militant Kach Party. The letter warned Kahane's death would be avenged and included the cryptic message, ''Things go boom in the night.''

In Dallas, lawyers for both sides have rested their case in the thrift fraud trial of former Vernon Savings and Loan owner Don Dixon. Dixon faces a 38-count indictment charging him with using thrift funds to make illegal political contributions, pay for female entertainment and to support a lavish lifestyle. Vernon collapsed in 1987 with a one- point-three BILLION-dollar loss to taxpayers. Dixon Tuesday denied he asked his executives to submit false company expense accounts for reimbursement of campaign contributions.

Another acquittal in New York's Bensonhurst racial slaying. A Brooklyn jury Tuesday found two young men innocent of murder and manslaughter charges in the 1989 killing of a black teen-ager by a baseball bat-wielding mob of white youths. The panel deliberated just two hours before returning the innocent verdict for Joseph Serrano and co-defendant James Patino. Both were also cleared of rioting and menacing. But the jury found Serrano guilty of fourth-degree possession of a weapon- a baseball bat.

NEW YORK (DEC. 5) UPI - Average yields for money-market mutual funds were unchanged or lower in the latest reporting week, as were deposit and lending rates at savings and loan institutions, reporting organizations said.

The Donoghue Organization, of Holliston, Mass., said average seven- day simple yields were 7.27 percent, unchanged. But it said 30-day simple yields were off at 7.31 percent compared with 7.34 percent last week.

The average maturity of fund portfolios rose to 52 days from 50 days.

The Bank Rate Monitor in North Palm Beach, Fla., gave average rates as

follows: money-market deposit accounts, 5.82 percent, down from 5.83 percent; Super-Now accounts, 4.95 percent, unchanged; six-month certificates of deposit 7.31 percent, down from 7.33 percent; 1-year CDs, 7.37 percent, off from 7.39 percent; 2 1/2-year CDs, 7.46 percent, down from 7.50 percent; and five-year CDs, 7.70 percent, down from 7.72 percent.

The average rate for a one-year, adjustable-rate mortgage was 8.04 percent, up from 8.03 percent the previous week.

The average rate on a 15-year, fixed-rate mortgage fell in the latest week to 9.42 percent from 9.48 percent. The average rate for a 30-year, fixed-rate mortgage eased to 9.75 percent from 9.79 percent.

The average rate for a four-year automobile loan was at 12.25 percent, unchanged from the previous week.

#90339u0217 12/05/1990 ~United Press International

(DEC. 5) UPI - President Bush is scheduled to visit Argentina Wednesday, on the third day of his South American trip. In Uruguay Tuesday, Bush told reporters he is ''NOT in a negotiating mood'' in the Persian Gulf crisis.

Arab efforts to resolve the gulf crisis are continuing. The foreign ministers of Egypt, Saudi Arabia and Syria met in Cairo Tuesday, while King Hussein of Jordan flew to Baghdad for a meeting with Iraqi President Saddam Hussein.

Bulgaria's Grand National Assembly voted late Tuesday night to order the interior ministry to turn over all its files on members of parliament to a special parliamentary committee within one week.

Police in New York say a handcuffed woman was rescued and two men... one with a pipe bomb wired to his body... were arrested when two officers decided to frisk the men after pulling their car over in Queens.

A 70-member team from the National Transportation Safety Board spent Tuesday trying to piece together what happened when two jets collided on a runway at Detroit's airport Monday. It appears that the pilot of one of the jets was lost.

#90339u0232 12/05/1990 ~United Press International

(DEC. 5) UPI - The loss of two forwards to the NBA left No. 4 Syracuse with some big holes this season, but the Orangmen learned Tuesday night Dave Johnson can help fill those gaps.

Johnson scored 24 points and pulled down 17 rebounds to lead the Orangemen to an 86-79 victory over North Carolina State as part of the ACC-Big East Challenge.

The victory by Syracuse, 5-0, gave the Big East a 3-1 lead in its eight-game series. Earlier Tuesday night, Seton Hall topped Clemson 78- 62 in the first

of two Challenge games at the Carrier Dome.

Johnson, a 6-foot-6 junior, watched as Derrick Coleman and Stephen Thompson led the Orangemen last season. Like star teammate Billy Owens, Johnson believes it's now his turn.

''Guys coming in here (Syracuse) have to realize they have to wait until their time comes,'' Johnson said. ''You have to pay your dues. My time has come. They did a good job of trying to key on (Owens), and it just left some openings for us.''

Johnson's timing could not have been better against the Wolfpack, 3- 1, as he scored 14 points and grabbed 13 rebounds in the second half.

''Giving Dave the green light to do what he wants gets him more comfortable '' said Owens, who added 21 points and 12 rebounds.

Rodney Monroe, who led the Wolfpack with 25 points, scored five straight points to give N.C. State a 70-68 lead with 7:09 left.

Michael Edwards then hit a three-pointer, Owens added a layup, Johnson sank two free throws and Conrad McRae scored off a rebound to give Syracuse a 77-70 lead with 4:56 remaining.

Thw Wolfpack never got closer than four points the rest of the way and saw their hopes of upseting the Orangemen die when Chris Corchiani missed from three-point range with the clock running down.

Freshman guard Adrian Autry added 16 points for Syracuse, while McRae had 12 points and eight rebounds.

Chris Corchiani scored 19 points, Tom Gugliotta had 15 points and 14 rebounds, and Bryant Feggins added 12 points and 14 rebounds for N.C. State.

Terry Dehere scored 25 points to lead Seton Hall, 3-1, to victory in the first game over Clemson, 4-1.

-- AROUND THE NCAA --

In other games Tuesday night involving ranked teams, co-No. 7 Indiana beat Vanderbilt 84-73, co-No. 13 Oklahoma topped No. 24 Texas 96-88, No. 15 Alabama fell to Wichita State 74-71 in overtime, No. 21 New Mexico State clipped Texas-El Paso 77-70 and No. 22 Kansas ripped Southern Methodist 80-60.

At Nashville, Tenn., Calbert Cheaney scored 30 points and Indiana used an early 16-0 spurt to beat Vanderbilt. The Commodores broke on top early before the Hoosiers reeled off 16 straight points to take an 18-8 lead.

At Austin, Texas, Jeff Webster scored 35 points and Terrence Mullins added 15 to pace Oklahoma. Joey Wright, Benford Williams, and Locksley Collie each had 17 points for the Longhorns. Texas gaurd Teyon McCoy hit 5 three-pointers to account for all of his 15 points.

At Wichita, Kan., Phil Mendelson hit two free throws with six seconds left in overtime to lift Wichita State over Alabama. The Crimson Tide had sent the game into overtime 68-68 on a three-point goal by Melvin Cheatum with four seconds left in regulation.

At El Paso, Texas, Tracey Ware scored 21 points and New Mexico State's pressure defense forced 16 turnovers to beat Texas-El Paso. New Mexico State swept its annual two-game series with the rival Miners for the first time since 1975.

At Lawrence, Kan., Mark Randall scored 30 points one week following surgery on his right leg to lead Kansas past Southern Methodist. Randall, who had surgery Nov. 27 to relieve pressure in his leg, hit 11 of 13 shots from the floor and 8 of 9 free throws.

#90339u0235 12/05/1990 ~United Press International

NEW YORK (DEC. 5) UPI - The stock market rallied Wednesday in heavy trading as optimism that the Persian Gulf crisis would be solved diplomatically fueled a sharp rise late in the session.

The Dow Jones industrial average, which rose 14.11 Tuesday, surged 30.70 to close at 2610.40, finishing above the 2600 level for the first time since Sept. 12.

Among broader market gauges, the New York Stock Exchange composite index rose 1.92 to 180.11 and Standard & Poor's 500-stock index jumped 3.57 to 329.92. The price of an average share added 33 cents.

Advances pounded declines 1,065-490 among the 2,005 NYSE issues traded. Big Board volume totaled 205,820,000 shares compared with the 185,820,000 traded Tuesday.

Stocks drifted with slight gains through early afternoon, when the State Department announced that Iraq had accepted President Bush's offer to hold talks on the Mideast crisis.

That news sent stocks rallying into the close and oil prices tumbled. January crude oil futures closed $3.37 lower at $27.29 a barrel.

''I think the drop in oil prices along with the State Department confirmation that the Iraqis are willing to talk sent the market higher, '' said Michael Metz, analyst at Oppenheimer & Co.

''About what remains to be seen, but they're in a loquacious mood nevertheless '' Metz said.

Financial issues kept the market in the plus column for the early part of the session, rallying for the second day in a row after a decision by the Fed to reduce some bank reserve requirements on non- personal time deposits and net Eurocurrency liabilities.

Both requirements, now at 3 percent, will be lowered to zero, ''over the coming weeks,'' the Fed said Tuesday. The move was the first change in reserve requirements since 1983.

Some analysts said the move would essentially amount to an easing of credit conditions because banks would be able to free some of their reserves for other lending. But Metz said he expected the cut in reserve requirements to manifest itself most strongly in bank earnings reports and the prices of bank stocks.

''The move will put dollars in banks' pockets and help their earnings,'' he said. ''There won't be an enormous flow down to the bottom line and it won't have the effect of making banks loosen their credit standards but it will bolster their capital positions.

''It'll really benefit the banking group, which had been badly battered. So it looks like the psychology here is one of restrained optimism,'' Metz said.

On the trading floor, AT&T was the most active issue, off 1/4 to 30 1/8. Reports after the close said NCR had rejected its $90-a-share bid but would talk with AT&T if it boosted the bid to $125 a share. NCR surged 3 1/8 to 86 5/8.

Financial and banking issues dominated the actives list. Federal National Mortgage Association followed, rallying 2 5/8 to 34 1/4. Citicorp was third, up 1 3/8 to 15 3/4. Other banks rallying in heavy trading included First Bank System, up 1 to 14 3/4; First Interstate Bancorp, up 3 1/2 to 25 3/4; BankAmerica, up 1 5/8 to 26 1/8 and Chase Manhattan, up 1 1/4 to 12 3/4.

Among the other blue chips, IBM rose 1/8 to 114 3/4, General Electric rallied 2 to 57 and American Express gained 1 3/4 to 22 3/4.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 252,680,520 shares, compared with the 227,059,070 traded in the previous session.

Prices rose sharply in moderate trading on the American Stock Exchange.

The Amex Market Value index gained 2.77 to close at 305.41. Advances led declines 353-226 among the 834 issues traded. The price of an average share rose 9 cents. Composite volume totaled 16,116,750 shares vs. 15,638,150 traded Tuesday.

Continental Airlines Holdings led the Amex issues, unchanged at 1 3/4. The airline Monday filed for Chapter 11 bankruptcy protection for the second time in seven years because of a surge in fuel prices.

The National Association of Securities Dealers composite index rose 6.76 to close at 370.87.

CRYSTAL CITY, VA (DEC. 5) UPI - In an important victory for anti-smoking forces, a government advisory board endorsed key sections of a draft report linking ''second-hand'' cigarette smoke and cancer in non- smokers.

The Enviromental Protection Agency's Scientific Advisory Board, which evaluates the scientific validity of EPA studies, gave its informal support to a preliminary EPA report that estimated 3,800 non-smoking Americans die each year from lung cancer caused by exposure to smoke from other people's cigarettes.

The decision to endorse the report was made by a 16-member subcommittee of the advisory board known as the Indoor Air Quality and Total Human Exposure Committee, which is composed of experts on the health effects of toxic air pullutants.

Dr. Morton Lippmann, chairman of the subcommittee, said that while the draft EPA report had large data gaps and did not include all relevant studies on the issue, the panel was convinced that it presented a relatively strong case that ''enviromental tobacco smoke'' does cause cancer in non-smokers.

''We are persuaded that the evidence exists, subject to further review of it - for considering that ETS does cause lung cancer in non- smokers. That has to be a tentative judgment until we see how you develop the case for it further '' Lippmann told EPA staff officials who prepared the draft risk assessment.

''The case was not - many people felt - fully developed in the document that we did review,'' said Lippman, an inhalation toxicologist at New York University. But he added, ''In consideration of the material presented - as well as the material discussed and reviewed that was not presented - we feel you should be able to make that case.''

Lippmann also said the board largely endorsed findings of the report that mothers who smoke around their children increase the youngsters' vulnerability to respiratory disease later in life.

Lippmann urged EPA officials to revise the report to include other data and health studies that he said would further bolster their case for suggesting ETS causes lung cancer in non-smokers and childhood health effects.

The American Lung Association, American Cancer Society and Amherican Heart Association issued a statement Wednesday saying they were ''extremely pleased'' with the committee's support for the risk assessment.

The announcement came after a two-day public hearing during which tobacco industry and anti-smoking groups each presented batteries of scientists with opposing views on the subject.

Anti-smoking advocates hailed the study for providing the first specific ''body count'' attributable to passive smoking. But they said the estimate of 3,800 lung cancer deaths represented only a fraction of the total death toll caused by second-hand smoke, pointing to studies that suggest is responsible

for 50,000 deaths a year from heart disease and all cancers.

The Tobacco Institute, which represents the industry, criticized the study as ''speculation without an adequate scientific foundation.''

#90339u0264 12/05/1990 ~United Press International

ANCHORAGE, Alaska (DEC. 5) UPI - Thanks to Iraq's invasion of Kuwait, oil-rich Alaska may reap a $1 billion windfall in surplus revenues and even more if war breaks out, state officials said Wednesday.

''We expect a windfall,'' said Gov. Walter Hickel, who is already plotting major development projects for the money.

Alaska's surplus earnings may climb as high as $2 billion, according to state budget officials and revenue reports.

So, while Americans pay higher prices for gasoline and ponder the possibility of U.S. troops going to war in the Persian Gulf, Alaska seems well on its way to striking a bonanza.

Alaska, which is the nation's biggest oil producing state and supplies one-fourth of all domestic output, is as dependent on oil earnings as Americans are dependent on oil.

With 85 percent of all state revenues derived from oil, higher oil prices and increased production have filled the treasury and topped it off with the growing surplus.

Alaska oil producers have increased their output since the Iraqi invasion and production has risen to 2 million barrels daily, its highest level in two years.

Just how rich Alaska gets depends on Iraqi President Saddam Hussein's actions and President Bush's reactions.

Because Alaska is so dependent on oil, state petroleum economists regularly issue revenue forecasts so budget-makers know how much there will be to spend.

Until now, the state oil economists have based their predictions on three scenarios for the price of oil - low, middle and high. However, the latest state revenue forecast rejects this system in favor of ''peace, limited war, extended war'' scenarios.

The forecast gives no more weight to the peace scenario than it does to the two war scenarios. ''We're not trying to make any kind of prediction on the outcome of war,'' state petroleum economist Chuck Logsdon said.

According to the report, Saudi Arabian oil, which is the basis for world oil prices, will cost $23 a barrel next year if there is peace, $29 a barrel if there is a limited war, and more than $35 a barrel if major military action disrupts regional oil production in the Middle East.

Logsdon rejects predictions by some that war would shoot oil prices to as high as $100 per barrel.

Still, the state surplus could reach $2.8 billion if war breaks out, the report said.

Alaska stands to earn at least $600,000 above its current $2.5 billion spending plan under the peace scenario, but budget director Alison Elgee said current revenues and oil prices point to a $1.5 billion surplus for fiscal year 1991.

Hickel, sworn in as governor Monday, said he expected to have the extra $1 billion in the treasury.

No matter what happens in the Persian Gulf, according to state revenue summaries and forecasts, Alaska will profit.

The state earns money from oil through production taxes, royalties on oil owned by the state, corporate income taxes on oil companies and other oil taxes.

Under the ''peace'' scenario, Alaska oil economists envision a negotiated settlement next year in which Iraq withdraws from Kuwait, both countries resume oil exports and negotiate ownership of disputed lands. The scenario also envisions ''minor'' new oil consumption taxes in the United States and increased production by the Organization of Petroleum Exporting Countries to meet demand.

The limited war scenario assumes swift military action to push Iraq out of Kuwait and restore lost production. World oil consumption and production would rise slightly and the United States would levy a ''modest'' consumption tax.

(DEC. 5) UPI - Around the world... Around the clock... U-P-I brings the latest news.

President Bush says he doesn't think economic sanctions alone will be enough to force Iraq to withdraw its troops from Kuwait. Bush told a news conference in the Uruguayan capital that he doesn't think Saddam Hussein ''has gotten the message'' of the U-N resolutions demanding he withdraw from Kuwait.

Meanwhile, a flurry of diplomatic activity continues in efforts to settle the crisis before the U-N's January 15th deadline for the withdrawl of Iraqi troops. The foreign ministers of Egypt, Saudi Arabia and Syria met in Cairo yesterday, reportedly in a bid to create a rift between Saddam and his few Arab allies to isolate him further.

In another development, the London-based Sky Television News satellite network reports that Saddam is offering to withdraw his troops from Kuwait in return for a guarantee that he won't be attacked. And he reportedly wants to be allowed to keep an oil field captured during the invasion.

Federal investigators today will listen to flight data from the two Northwest Airlines jetliners that collided at Detroit's airport for further clues to the cause of the crash. Radio transcripts from the deadly runway crash indicate that one pilot was lost in fog. Eight people died in Monday's collision and 21 others were injured.

A jury in New York resumes deliberating for a sixth day today in the trial of two teen-agers accused in the rape and attempted murder of a Central Park jogger. Kevin Richardson and Kharey Wise are accused of being part of a gang of up to 30 youths that rampaged through the moonlit park, randomly beating and robbing joggers on April 19th, 1989.

In Dallas, closing arguments begin today in the thrift fraud trial of former Vernon Savings and Loan owner Don Dixon. The 51-year-old Dixon is accused of using thrift funds to make illegal political contributions, pay for female entertainment and to support a lavish lifestyle. Vernon collapsed, costing taxpayers one-point-three-BILLION dollars.

The Navy has taken disciplinary action against several admirals for NOT adequately warning senior Pentagon officials of cost overruns in the A-12

Avenger aircraft program. The Navy ordered the retirement of one admiral, censured and transferred another... and disciplined a third.

#90339u0288 12/05/1990 ~United Press International

(DEC. 5) UPI - Crude oil plummeted more than $3 a barrel Wednesday to its lowest price in three months as the market sold on what it saw as improving chances of a peaceful settlement of the Persian Gulf crisis.

The American benchmark West Texas Intermediate crude for January delivery tumbled $3.37 to $27.29 a barrel in one of the biggest daily declines in the history of the New York Mercantile Exchange.

This was the lowest WTI closing price since the $26.77 a barrel settlement of Aug. 30, the exchange said.

The market was under selling pressure for most of the day from an unconfirmed late Tuesday report by Sky Television News that Iraq would be willing to withdraw from Kuwait, occupied since its Aug. 2 invasion, if Kuwait would cede a portion of the disputed Rumaila oil field.

''That (Iraqi) story out last night pretty much shook everybody up,'' said Tom Bentz, director of trading at United Energy Inc. in New York. The report, however, was denied by Iraqi President Saddam Hussein.

The downward move gained momentum in the afternoon when the State Department announced that Saddam had formally accepted a proposal by President Bush to hold top-level talks to end the Persian Gulf crisis without armed conflict, said Kirk Kinnear of the Phibro Division of Salomon Brothers, Greenwich, Conn.

''There was a meltdown after Iraq's acceptance of the invitation to meet with (Secretary of State James) Baker and Saddam said 'everything is on the table ''' the trader said.

''The market broke down technically and everything started snowballing,'' he said, with the market taking out one support level after another. ''We're still losing the 'war premium' and I don't know where the bottom is,'' Kinnear said.

''That's what got us rolling,'' agreed Ed Kevelson of Dean Witter Reynolds' International Energy Desk in New York.

''After the news (of the Iraqi acceptance) hit the screen around 2:00 p.m. EST the price of crude dropped another $1.50,'' said Andrew Shasha, a broker with Star Petroleum Supply in Englewood, N.J.

Bentz said the market has a feeling ''there's some kind of peace negotiations

out there despite Baker's tough talk.''

Tom Blakeslee of the Pegasus Econometrics Group in Hoboken, N.J. said, ''We believe something will break here ... The United States could be outflanked by an Arab solution to the crisis.''

Saddam said Tuesday that he preferred the crisis be settled within the Arab world.

After meeting in Baghdad with Jordan's King Hussein, Palestine Liberation Organization chairman Yasser Arafat, he said in a joint communique that ''an Arab-Arab dialogue is a necessity'' in resolving the crisis, the Iraqi news agency INA reported.

In his testimony before the Senate Foreign Relations Committee, Baker said he had no plans to negotiate with Saddam over the U.N. resolutions setting Jan. 15 as a deadline for his withdrawal from Kuwait and imposing an embargo on Iraqi and Kuwaiti exports.

On the Merc, home heating oil for January delivery plunged 5.76 cents from Tuesday to 81.14 cents a gallon while January unleaded gasoline contracts plummeted 7.08 cents to 68.84 cents a gallon.

On the European spot market, where crude barrels are bought and sold for cash, Britain's widely traded North Sea Brent lost $3.15 to $28.95 a barrel.

United Arab Emirates' Dubai light - the key OPEC crude from the Middle East shipped mainly to the Far East - gave up $3.10 to $23.25 a barrel.

#90339u0314 12/05/1990 ~United Press International
SAN FRANCISCO (DEC. 5) UPI - A Soviet lawmaker and anti-nuclear leader began a tour of the United States Wednesday to urge Americans to demand an end of nuclear testing in the Nevada desert in a campaign similar to efforts to stop such tests in the Soviet Union.

In 1989, Olzhas Suleimenov, a member of the Soviet Congress of Peoples' Deputies, led a grassroots effort in his native Kazakhstan to block testing at the Semipalatinsk site in the U.S.S.R.

He said the Soviets had planned 18 tests at Semipalatinsk that year but were prevented from conducting 11 tests because of massive pressure from the Kazakhstan region and later a legislative ban.

Suleimenov is founder of the Nevada-Semipalatinsk anti-nuclear movement in the Soviet Union.

He told reporters through a translator Wednesday the Soviet and American nuclear weapons testing facilities are ''like Siamese twins - they are joined inseparably.''

''If one is healthy, the other will try to remain healthy. If one is ill, the other too will become ill. We have decided to be the first one to get ill,'' Suleimenov said of his effort to stop Soviet testing at Semipalatinsk.

He said he would take his U.S. tour to promote a comprehensive ban on nuclear weapons testing by addressing nuclear weapons scientists and engineers at the Lawrence Livermore Laboratory in Northern California Thursday.

Lawrence Livermore is one of America's prime weapons research sites. The other is Los Alamos, N.M.

Suleimenov said, ''The creative egotism of (nuclear) scientists is one of the main driving forces behind the nuclear race. They must rein in their creative egos.''

Suleimenov, in urging Americans to pressure for a test ban, said Iraq has indicated it will abide by a nuclear weapons research ban if world powers agree.

He said a comprehensive test ban will be the focus of an international conference in New York in January. The 118 signers of the 1963 Limited Test Ban Treaty, which ended above-ground testing, will debate the further ban.

Suleimenov said the majority of nations, including the Soviet Union, favor the comprehensive test ban. He accused the Bush administration of opposition to efforts to negotiate such a ban.

Suleimenov said in recent discussions with Soviet President Gorbachev, the Soviet leader indicated, ''If we ourselves have not halted production of nuclear weapons, what moral right do we have to ban others?''

''The Cold War is not finally over yet because nuclear tests continue,'' he

said.

#90339u0328 12/05/1990 ~United Press International
SAN FRANCISCO (DEC. 5) UPI - New evidence bolsters the view that dinosaurs and many other life forms suddenly disappeared 65 million years ago after a huge comet or asteroid struck Earth, a leading scientist says.

The report, presented Tuesday at the annual meeting of the American Geophysical Union, was sure to rekindle debate on the controversial topic of how the ancient animals abruptly vanished.

More than 2,000 papers have been written on the topic since Nobel laureate Luis Alvarez and his son, Walter, first proposed their ''extraterrestial'' theory of dinosaur extinction in 1980.

In an overview of the latest findings, Walter Alvarez, a geology professor at the University of California at Berkeley, said research along an ancient sea floor in southern Spain showed a species of single- celled marine plankton, called foramnifera, suddenly became extinct at the end of the Cretaceous period of history.

Similarly, he said, University of Washington scientists have found many species of mollusks died out precisely at the end of the Cretaceous period - about 65 million years ago.

And, new studies of dinosaur fossils in Montana has shown an extinction pattern ''consistent with a catastrophic extinction,'' rather than a gradual decline, Alvarez said.

Studies have shown as many as 75 percent of all life forms on Earth perished at that time, he said.

However, University of Colorado researchers recently reported the discovery of

two sets of dinosaur fossils in Wyoming that they say are at odds the sudden extinction theory. Robert Bakker and his colleagues said the dinosaurs appear to have lived 1 million years after their species were thought to have died out.

''Every major extinction of dinosaurs occurred in a series of pulses, '' said Bakker, who argues the mass-catastrophe theory of dinosaur extinction ''is simply not true.''

But Alvarez told the 3,000 scientists attending the geology meeting that there is evidence that at least two large extraterrestrial objects struck what is now North America about the time the many life forms died 65 million years ago.

One crater, discovered in Iowa, dates to the end of the Cretaceous era. Crystals dating to the same period have been found a similar crater, 100 kilometers in diameter, on Mexico's Yucatan Peninsula.

Other scientists believe they have found evidence of a giant asteroid or comet striking Earth at two sites in the Caribbean Sea.

Scientists have calculated that an object with a diameter of 6 miles, falling at 12 miles per second, would have the impact of a 70 million megaton bomb.

Alvarez cited a recent University of Chicago study that indicates the impact of such a comet-like object would trigger winds up to 300 miles an hours, tidal waves that run for hours, increased global darkness withcold temporatures for months, and acid and toxic chemical rain for years to decades.

''At first, our critics challenged the impact theory by asking how a comet impact could wipe out as many species as the geological record shows,'' Alvarez said. ''Now they are asking how any species could survive.''

LONDON (DEC. 5) UPI - The dollar opened lower against the major European currencies Wednesday, pushed back by the German mark, which was robust on interest rate talk, dealers said. Gold was lower.

''There's a feeling in the market that the Germans are just about ready to tighten the screw on interest rates,'' said Wayne Andrews, a currency analyst at Barclays de Zoete Wedd.

An unconfirmed television report that Iraq was ready to pull out of Kuwait, which sent the dollar into a spin in Asia overnight, was largely being ignored by European traders, Andrews said.

In Frankfurt, the dollar opened lower at 1.5005 German marks against 1.5043 at Tuesday's close.

In Zurich, the dollar also opened lower at 1.2785 Swiss francs, from 1.2815 on Tuesday.

The pound opened stronger against the dollar, at $1.9325 from $1.9245 at the close on Tuesday.

The dollar opened lower in Paris, Brussels and Milan, at 5.0700 French francs from 5.0870, 30.99 Belgian francs from 31.05 and 1,126.50 Italian lire from 1,130.50.

Earlier, the dollar plunged against the Japanese yen in active trading Wednesday on a British news report that Iraq may withdraw from Kuwait.

The dollar closed at 133.42 yen, 0.93 yen lower than Tuesday's close of 134.35 yen, the Bank of Japan said.

Dollar selling slowed later in the session as both British and U.S. authorities cast doubt on the report, dealers said.

Elsewhere in Asia, the dollar closed lower in Singapore, at 1.7185 Singapore dollars against 1.7225 at Tuesday's close.

The dollar closed higher in Hong Kong, at 7.8045 Hong Kong dollars, from 7.8015.

Hong Kong gold closed higher at $376.95 an ounce against $376.65. In Zurich, gold opened lower at $376.5 an ounce from $377, and in London it opened lower at $377 from $377.75.

Silver in Zurich opened unchanged at $4.15 an ounce, and in London silver opened lower at $4.17 an ounce from $4.18.

BELGRADE (DEC. 5) UPI - The Croatian government Wednesday demanded the dismissal of federal Defense Minister Veljko Kadijevic, saying he ''shamelessly'' exceeded his power by warning that the army would act to avert a breakup of the Yugoslav federation.

The nationalist administration of Croatian President Franjo Tudjman said it sent a formal request to the federal government to convene the national Parliament to take up the issue of replacing Kadijevic, a four- star general.

There was no immediate reaction from the federal government of Prime Minister Ante Markovic, who has been pursuing a program of economic and political reforms intended to transform the country into a Western-style democracy after 45 years of communist rule.

Kadijevic said in an interview Sunday that the Yugoslav military, the nation's last bastion of orthodox communism, favored maintaining Yugoslavia's socialist foundation and would not tolerate the dissolution of the six-republic federation founded in 1918.

He also sharply criticized nationalist parties, which won power over communists in Slovenia, Croatia, and Bosnia-Hercegovina, and said the army would ''use force'' to disarm independent republic defense units and other

armed groups.

The Tudjman government, in an official statement issued in the Croatian capital of Zagreb, 250 miles northwest of Belgrade, accused Kadijevic of exceeding his authority under the Yugoslav Constitution.

''Gen. Kadijevic shamelessly overstepped the competence of the federal minister and usurped the competences of the (collective) presidency of Yugoslavia as the supreme commander of the Yugoslav People's Army,'' said the statement.

''In his statements, he places the Yugoslav People's Army as the supreme arbiter of the constitutional crisis in Yugoslavia, threatens the use of force and passes judgement on democratic processes on the country,'' it said.

The Croatian and Slovenian administrations have adopted legislation giving them peacetime control of military contingents on their territories as part of their campaigns for greater autonomy from the central government.

While Croatia has not implemented its law, Slovenia in September assumed command of its military reserve force and moved its staff to a new location just hours before the army occupied its headquarters building.

The Slovenian government has refused to hand over its reserve armories to the army and negotiations to defuse the confrontation have been stalemated.

The administrations in Slovenia and Croatia are threatening to secede unless Yugoslavia is converted from a loose federation of six republics to a confederation of independent nations.

Both governments fear domination of the federation by majority Serbs following the demise in January of the national communist organization.

WASHINGTON (DEC. 5) UPI - Women may be more prone to depression than men because of a greater likelihood to suffer sexual and physical abuse, unhappy marriages and poverty, the American Psychological Association reported Wednesday.

Women are twice as likely as men to develop depression. At least 7 million women in the United States have been diagnosed as suffering from depression, but as many as half of all cases may never be diagnosed.

The 95-page ''Women and Depression'' report was prepared by the 20- member Task Force on Women and Depression, which was formed by the American Psychological Association in 1987 because, the report says, ''depression was

and is one of the most serious mental health problems of the 80s and 90s.''

The report calls for improvements in the diagnosis and treatment of the devastating mental illness and more research, especially into particular groups such as minorities, lesbians, professional women and older women.

''Hopefully, our efforts will be succcessful and help reduce women's pain and suffering from depression,'' wrote Ellen McGrath, an adjunct associate professor at New York University who chaired the task force.

The task force found women appear to be at increased risk for depression ''due to a number of social, economic, biological and emotional factors.'' For example:

-The ''rate of sexual and physical abuse of females is much higher than previously suspected and is a major factor in women's depression.'' As many as half of all women may be victims of abuse by age 21, the task force said.

-While marriage tends to reduce a man's risk of depression, in ''unhappy marriages,'' women are far more likely than men to be depressed. Mothers of young children are especially vulnerable to depression and the ''more children in the house, the more depression is reported.''

-Poverty is a ''pathway to depression'' for women, with 75 percent of the U.S. population living in poverty being women and children.

-Depression in women ''is related to certain cognitive and personality styles '' such as avoidance, passivity, dependence, pessimism, negative cognitive styles and ''focusing too much on depressed feelings.''

''Current theory, research on risk factors, treatment research, and treatment techniques with depressed women yield a mixed picture of painful realities and practical hope,'' the report said.

''Painful realities include the finding that depression can be persistent,'' it said, noting that more than half of women with depression report still having symptoms nine years later.

However, the illness, characterized by a debilitating sense of hopelessness and sadness, can be successfully treated in 80 percent to 90 percent of cases with drugs and personal therapy. But the disease is often misdiagnosed or undiagnosed, and drug misuse ''is a very real danger for women,'' the report said.

#90339u0359 12/05/1990 ~United Press International

WASHINGTON (DEC. 5) UPI - America's schoolchildren will eat healthier lunches

if schools lock up the candy and soda machines and put more fruits and vegetables - and fewer fatty foods - on the cafeteria menu, a panel of experts said.

The unofficial Citizens Commission on School Nutrition also urged a sharp increase in funding for the school lunch program, which feeds about 24 million children a day.

In addition, the commission called for efforts over several years to limit the fat content in those foods to a level accounting for no more than 30 percent of the calories in a school lunch.

Many health authorities, as well as the new edition of the government's Dietary Guidelines for Americans, recommend a 30 percent ceiling on fat. A recent federal study indicated fat accounts for 37 percent of the calories consumed by children.

Congress appropriated $3.38 billion for the school lunch program this fiscal year. The program provides free or reduced-cost meals to low- income children.

The commission, sponsored by the Center for Science in the Public Interest, unveiled its recommendations Wednesday. Unlike calls for reform from other consumer groups, it came with support from the school lunch industry.

''We are delighted to lend our support to and endorse the ... publication'' of the recommendations, said Vivian Pilant, a leader in the American School Food Service Association. ''It is important to note this report establishes flexible goals and recommendations for the national school lunch program.''

As an example, the recommendations called for reaching, over the next two to four years, a 35-percent limit on calories from fat, averaged over a month. Schools would aim for a 30-percent limit by the end of this decade.

The report suggested the government could help by adopting rules that set nutritional standards for lunches, allowing only low-fat milk to be sold and helping to train cafeteria workers and students about healthful foods.

One of the four major suggestions by the panel was for a ban on the sale of candy, soda, fried chips, sodas and other relatively non- nutritious foods on school property during school hours. Some schools use the sales as a way to raise money for special projects.

The experts said a switch to higher-fiber and lower-fat meals should be accompanied by explanations to students about what is best to eat.

''Simply providing nutritious items will not get some children to actually eat the foods,'' the report said. ''In practice, implementing nutrition-oriented changes often means changing foods gradually.''

There have been repeated suggestions over the past few years for the government to do more to get the fat and salt out of school lunches.

One organization, Public Voice for Food and Health Policy, wants to see immediate adoption of a 30 percent limit on calories from fat. It is exploring the possibility of legislation to mandate the ceiling.

Phil Shanholtzer, a spokesman for the Food and Nutrition Service, which oversees the school lunch program, said the agency, in line with the new Dietary Guidelines, is trying to reduce the amount of fat in school lunches.

The government has revised some of its regulations to reduce the fat content in foods it donates to schools and it has offered recipe cards to schools to help improve the nutritional content of meals.

#90339u0360 12/05/1990 ~United Press International

EMMAUS, Pa. (DEC. 5) UPI - Decades of technical innovations and regulations designed to make the nation's highways safer have resulted in widespread support for stricter auto safety and drunken driving measures, a survey said Tuesday.

But many Americans remain confused about the role and value of auto safety devices, according to the nationwide survey conducted by Louis Harris and Associates, Inc. for General Motors and Prevention magazine, published by Rodale Press in Emmaus.

The survey found overwhelming support - 81 percent - for state laws requiring the use of seat belts. But only a slight majority of those questioned - 51 percent - believe air bags offer better protection in a crash than solely seat belts.

The survey, which has a margin of error of plus or minus 3 percent, was conducted in November and December 1989 and was based on interviews with 1,250 randomly selected adults.

It found 72 percent of adults in states without seat belt laws would support governmental policies mandating seat belt usage. In states that already have such laws, 83 percent said they were supported the laws.

But Americans are not so keen on the use of air bags. Eighteen percent, or nearly one in five adults surveyed, believe air bags can cause serious injury when they inflate; 35 percent said they can trap people in their cars when inflated, and 38 percent considered accidental inflation of the bag a serious problem.

Only about 30 percent said they would pay an additional $500 for a car equipped with an air bag.

On the issue of drunken driving, one in five Americans admitted they have driven after drinking. Almost four times as many college-educated, affluent professionals are likely to drive after drinking than those without high school diplomas, the survey said. And those with household incomes of more than $50,000 are twice as likely to get behind the wheel after drinking than those with incomes below $15,000.

Twenty-eight percent of men admit they have driven after drinking, compared to just 14 percent of women.

Among those who admit to driving after drinking, four out of five support license and license plate suspension for drunk driving offenses.

#90339u0431 12/05/1990 ~United Press International

MIAMI (DEC. 5) UPI - A former Panamanian military leader thought to be the right hand man in Gen. Manuel Noriega's drug dealings signed a plea agreement Wednesday that calls for him to testify against the deposed strongman in exchange for a 3-year prison term.

Lt. Col. Luis del Cid and defense attorney San Burstyn agreed to the terms of the plea Tuesday and it was signed around 4:30 p.m. Wednesday. It was to be presented to U.S. District Judge William Hoeveler at a hearing Thursday morning.

''The government is going to recommend a 3-year sentence after he cooperates, which would mean he would have to serve two years,'' Burstyn said. ''We are very happy about that since he has already served one year. That means he may end up serving less time than he would have if he had waited for the trial to begin.''

The case originally was scheduled for trial in March but then was delayed until Jan. 29 and lawyers say it probably will have to be delayed again.

Prosecutors believe del Cid was a close associate of Noriega's and know he was closely allied with the Medellin cartel. They expect him to shed considerable light on Noriega's dealings with the cartel.

Frank Rubino, Noriega's lead defense attorney, said del Cid's testimony would favor the general, if he tells the truth.

In a 1988 indictment returned by a federal grand jury in Miami, del Cid, 47, is accused of acting as a liaison and courier between Noriega and drug traffickers. It says he helped move cocaine from Colombia to Panama with the

knowledge it was headed for the United States.

If convicted under that indictment, he would have faced a maximum penalty of 70 years in prison and $550,000 in fines on racketeering, trafficking and conspiracy charges.

Like Noriega, del Cid surrendered during the U.S. military invasion of Panama last December.

Burstyn and the government have been involved in plea negotiations for the past several months. A key impasse had been whether del Cid would be deported to Panama to face possible criminal charges there.

Burstyn said that obstacle was eliminated when the government agreed to opppose any deportation attempts.

''We're very happy about this. We spent eight months negotiating and finally we were able to obtain the concessions we wanted from the U.S. government,'' he said. ''It was a seller's market and we got what we were looking for.''

He earlier had described del Cid as a heroic man who saved lives by discouraging guerrilla warfare in western Panama after the U.S. invasion and ordering his troops to surrender Christmas Day.

But in January, the government released a photograph that showed del Cid with Noriega, Cuban President Fidel Castro and others at a meeting in Havana in the summer of 1984.

Assistant U.S. Attorney Myles Malman said the meeting was called to settle a dispute over the seizure that year of a cocaine laboratory in Panama that was owned by the notorious Medellin cocaine cartel of Colombia. Castro reportedly mediated the dispute.

If the plea is accepted by Hoeveler, del Cid will be the second Noriega co-defendant to plea out before trial.

Pilot Eduardo Pardo was sentenced to 30 months in prison after pleading guilty in February to flying more than $800,000 in drug profits from Fort Lauderdale to Panama.

Noriega is charged under the same indictment as del Cid and 14 others with providing a drug-trafficking and money laundering sanctuary for South American drug smugglers.

The government contends the general took $4.6 million in bribes to ensure the Medellin cartel's cocaine would be transshipped safely through Panama. If convicted, he faces a maximum penalty of 145 years in prison and $1.1 million in fines.

#90339u0433 12/05/1990 ~United Press International
ARLINGTON, Va. (DEC. 5) UPI - In an important victory for anti-smoking forces, a government advisory board Wednesday endorsed key sections of a draft EPA report linking ''second-hand'' cigarette smoke and cancer in non-smokers.

The Environmental Protection Agency's Scientific Advisory Board, which evaluates the scientific validity of EPA studies, gave its informal support to a preliminary EPA risk assessment that estimated 3, 800 non-smoking Americans die each year from lung cancer caused by exposure to smoke from other people's cigarettes.

The decision to endorse the report was made by a 16-member subcommittee of the advisory board known as the Indoor Air Quality and Total Human Exposure Committee, which is composed of experts on the health effects of toxic air pollutants.

The committee's action increases the likelihood that the EPA ultimately will classify ''environmental tobacco smoke'' as a human carcinogen.

That finding would not necessarily trigger regulatory action by the government but it would give anti-smoking groups a potent legal weapon in their crusade against cigarettes.

The committee's position emerged after a two-day public hearing during which tobacco industry and anti-smoking groups each presented batteries of scientists with opposing views on the scientific validity of EPA risk assessment.

While the committee is not expected to issue its formal statement on the EPA study until next spring at the earliest, the panel's chairman left little doubt as to which direction it was heading.

Panel Chairman Morton Lippmann said that while the draft EPA report had large data gaps and did not include all relevant studies on the issue, the panel was convinced that it presented a relatively strong case that enviromental tobacco smoke does cause cancer in non-smokers.

''We are persuaded that the evidence exists - subject to further review of it - for considering that ETS does cause lung cancer in non- smokers. That has to be a tentative judgment until we see how you develop the case for it further '' Lippmann told EPA staff officials who prepared the draft risk assessment.

''The case was not - many people felt - fully developed in the document that we did review,'' said Lippmann, an inhalation toxicologist at New York University. But he added, ''In consideration of the material presented - as

well as the material discussed and reviewed that was not presented - we feel you should be able to make that case.''

Lippmann also said the board largely endorsed findings of the report that mothers who smoke around their children increase the youngsters' vulnerability to respiratory disease later in life.

Lippmann urged EPA officials to revise the report to include other data and health studies that he said would further bolster their case for suggesting ETS causes lung cancer in non-smokers and damages the health of children.

The American Lung Association, American Cancer Society and American Heart Association issued a statement saying they were ''extremely pleased'' with the committee's support for the risk assessment.

''The committee action is a big win for the health of the American people,'' said Fran Du Melle, spokeswoman for the American Lung Association.

Officials with the Tobacco Institute expressed surprise and dismay at Lippmann's summary remarks at the conclusion of the committee's deliberations. They said his comments did not reflect strong misgivings about the EPA report among some committee members.

Brennan Dawson, a spokeswoman for the institute, said she could not explain why that dissent was not expressed at the committee's concluding press conference. ''I try not to speculate on other people's motives,'' she said.

The EPA risk assessment was based on 24 studies done by different research teams in eight countries.

The key studies compare lung cancer rates among women who live with husbands who smoke to those of women who have nonsmoker spouses. Eighteen studies found wives of smokers had higher cancer rates than women living with nonsmokers.

Among other charges, the Tobacco Institute maintained the studies did not account for other factors that might cause lung cancer, such as occupation and lifestyle.

#90339u0434 12/05/1990 ~United Press International

LOS ANGELES (DEC. 5) UPI - The judge in a trial over Elizabeth Taylor's perfume ''Passion'' ruled Wednesday that the criminal record of the actress's ex-boyfriend, who claims he developed the floral fragrance, can be presented as evidence.

In agreeing with Taylor's lawyers on the issue, Superior Court Judge Coleman Swart denied a motion by lawyers for Henry Wynberg who asserted that their

client's misdemeanor conviction stemming from charges involving sex with high school girls is irrelevant.

The trial, which began with jury selection Wednesday, centers on a lawsuit the violet-eyed movie star filed against Wynberg in 1986 seeking to invalidate a contract with him to develop a line of cosmetics under Taylor's name.

Taylor contends Wynberg did nothing to fulfill his obligations under the contract, and that she has long wanted out of their deal because of his conviction.

Wynberg, in a countersuit, alleges Taylor's weight fluctuations, which he referred to as her ''Virginia farm-wife days,'' and battles with addictions to prescription drugs marred her image and made it impossible for him to obtain a contract with a cosmetics firm.

Wynberg, 56, a former used car dealer and native of Holland, filed a second suit in 1989 alleging the actress breached her contract with him and stole the formula for the perfume he developed.

Taylor, 57, launched her perfume in 1987 with Chesebrough-Ponds Inc. A blend of gardenia, jasmine, rose and other scents, the $165-an-ounce perfume was an instant hit.

In promoting the perfume, the actress appeared in television ads wearing a purple satin plunge neck gown and quoting Shakespeare: ''Bee to the blossom, moth to the flame, each to his passion.''

Wynberg is seeking 72 percent of the profits from Passion, which his lawyer, Quentin Kopp, said amounts to $10 million as of the first quarter of 1990.

A horde of reporters and photographers crammed the hallway at the downtown civil courthouse for the trial's opening Wednesday, vying to capture a glimpse of the actress, who arrived wearing a brilliant purple suede suit and a four-strand necklace of large pearls. She was flanked by several bodyguards.

Jury selection was expected to take two or three days and the judge said he hoped to complete the trial by New Year's Day.

Taylor's lawyer, Neil Papiano, posed a number of questions to the prospective jurors, including whether they they had any experience with ''Passion.'' Two women said they wear it.

In the pretrial motions, Kopp had sought to exclude evidence that Wynberg - according to court documents filed by Taylor's lawyers - pleaded no contest in 1977 to misdemeanor counts of statutory rape, providing drugs to underage high school girls in return for sex, and taking pornographic photos of the girls.

Confusing the issue, court documents filed by Wynberg's lawyers indicated the misdemeanors involved bribery, grand theft and improper behavior with an underaged girl.

In any case, Kopp argued the convictions are inflamatory and would direct the jury's attention away from the real issues.

But the judge sided with Taylor's lawyer who stated in court documents that the evidence was ''crucial'' to show why Taylor believed her contract with Wynberg should no longer be held valid.

Kopp, in court documents, vowed to delve into Taylor's moral character since Taylor and her lawyers had ''opened up the can of worms'' by bringing up Wynberg's convictions.

Judge Swart also sided with Taylor's lawyers in agreeing to divide the trial into three phases: the first focusing on whether the contract was valid, the second on whether Taylor breached the contract, and the third on whether Taylor stole Wynberg's perfume formula for Passion.

#90339u0438 12/05/1990 ~United Press International
(DEC. 5) UPI - The State Department says Iraq has formally accepted a proposal by President Bush to hold top-level talks in a bid to resolve the Persian Gulf crisis peacefully. In testimony before the Senate Foreign Relations Committee today, Secretary of State Baker refused to say what he'll tell Saddam Hussein when he meets with the Iraqi leader. But he made it clear he will NOT negotiate.

President Bush gave Argentine President Carlos Menem his support in his recent showdown with military rebels. In return, Menem backed Bush for his ''NO concessions'' stance against Iraq. Bush gave a speech today to a joint session of Argentina's congress. But his appearance was slightly disrupted by a brawl between two congressmen. Quipped Bush- ''DON'T worry. I feel at home here.''

The investigation continues into the cause of Monday's fiery collision of two Northwest Airlines planes at Detroit's Metro airport. Federal investigators said today there's NO doubt the pilot of a D-C-9 somehow became disoriented and ended up on the runway where a Boeing 727 was preparing to take off. The 727 tore into the side of the D-C-9, ripping off an engine and touching off a fatal fire. Eight people died and 21 were injured, all on the D-C-9.

In another development, a survivor of the fiery crash today filed the first lawsuit against Northwest Airlines. Milio Rinna, a United Steelworkers District 29 health and safety official, suffered burns and injuries to his hands, head and knee. Rinna was one of the last persons to leave the burning D-C-9. He was helping other passengers until the flames drove him out of the

rear exit. Then he jumped to the ground, where he helped extinguish the flames engulfing another passenger and took the impact of a flight attendant who jumped from a wing of the fiery plane.

Frustrated astronauts aboard the shuttle Columbia are making a bit of progress in their star-gazing mission, but they continue to lose time wrestling with a balky automatic telescope pointing system. The crew is manually operating a shuttle observatory while trying to fix the problem once and for all. The astronauts successfully gathered data on only 21 targets ranging from the remnants of exploded stars to energetic galaxies in a 28-hour period. The pre-launch flight plan called for some 75 observations during the same period.

An important victory today for anti-smoking forces. A government advisory board endorsed key sections of a draft report linking ''second- hand'' cigarette smoke and cancer in non-smokers. The Enviromental Protection Agency's Scientific Advisory Board gave its informal support to a preliminary E-P-A report. The draft report estimates that 38- hundred non-smoking Americans die each year from lung cancer caused by exposure to smoke from other people's cigarettes.

#90339u0445 12/05/1990 ~United Press International

WARSAW, POLAND (DEC. 5) UPI - Defense Secretary Dick Cheney said Wednesday that talks with the Polish leadership reaffirms his view that the United States ''cannot wait indefinitely'' for Iraq to voluntarily withdraw from Kuwait and release foreign hostages.

Cheney met with outgoing Prime Minister Tadeusz Mazowiecki, Defense Minister Piotr Kolodziejczyk and other government and parliamentary leaders on Tuesday, and scheduled meetings Wednesday with President Wojciech Jaruzelski and in Gdansk with Solidarity founder Lech Walesa. He planned to fly to Brussels later in the day for a NATO meeting.

''My visit and the conversations I had with Polish officials yesterday reaffirm in my mind the notion that we cannot wait indefinitely for Saddam Hussein to come into compliance with the U.N. resolutions,'' Cheney said.

The resolutions call for Iraq's immediate withdrawal from Kuwait, which it invaded last August, and the release of all foreign hostages. On Nov. 29 the U.N. Security Council's foreign ministers approved a resolution authorizing possible military force to oust Iraq from Kuwait if it does not withdraw by Jan. 15.

Asked how long the United States would wait for international economic sanctions to work, the defense secretary said, ''I would not want to put a deadline on it. That question is basically one the president (Bush) will decide.''

But Cheney noted that Iraqi Foreign Minister Tariq Aziz has been invited to Washington next week for talks with Bush, and there are plans for Secretary of State James Baker to go to Baghdad to establish ''a clear channel of communication'' between the United States and Iraq on the matter.

He said the focus during the next few weeks will be on the U.N. resolutions, but at the same time the additional buildup of U.S. troops in the Gulf is necessary to press the matter.

Told that Poland already had lost $2 billion because of the economic boycott of Iraq, he acknowledged that Poland was a ''staunch supporter'' of the sanctions, as was Czechoslovakia.

''The solution to the problem, I think, is to try to resolve the crisis as quickly as possible,'' he said.

#90339u0467 12/05/1990 ~United Press International

DETROIT (DEC. 5) UPI - A survivor of the fiery crash between two Northwest Airlines planes on a foggy runway at Detroit Metropolitan Airport filed the first lawsuit Wednesday in the accident that killed eight passengers and injured dozens.

Milio Rinna, a United Steelworkers Union health and safety official, and one of the last persons to leave a DC-9 that had been struck by a 727 on Monday, helped other passengers until the flames drove him out of the rear exit.

Then he jumped to the ground, where he helped extinguish the flames engulfing another passenger and took the impact of a flight attendant who jumped from a wing of the burning plane, his lawyer said.

Rinna was bound for a union meeting in Pittsburgh on Northwest flight 1482 when it was hit by another Northwest plane taking off on the same runway. He suffered burns, as well as injuries to his hands, head and knee.

The lawsuit was filed in Wayne County Circuit Court in Detroit.

''Mr. Rinna is one of the heroes of this tragedy,'' said attorney William L. Martens. ''He showed genuine courage in the face of a terrifying situation.

''Because he represents thousands of workers facing health and safety hazards, he recognizes that the legal system is a key element in getting to the truth and helping people who are hurt by the negligence of others.''

#90339u0472 12/05/1990 ~United Press International
(DEC. 5) UPI - Reports from London say that Iraqi President Saddam Hussein will propose a deal to Secretary of State Baker when they meet later this month. Saddam reportedly will offer to withdraw his troops from Kuwait if he can keep a Kuwaiti oilfield.

In Uruquay yesterday, President Bush indicated that there will be NO negotiated settlement in the Persian Gulf crisis if it does NOT stick to U-N resolutions demanding the UNconditional withdrawl of Iraqi troops from Kuwait.

One of the first tasks of officials investigating Monday's deadly collision between two Northwest Airlines jets at Detroit Metropolitan Airport was to recover the planes' recording devices. At least eight people died in the accident.

The Panamanian government has expelled two Cuban diplomats and gave them five days to leave the country. The Panamanian government said the diplomats were expelled because a man holed up in the Cuban embassy plotted recently with Manuel Noriega to destabilize the government.

Police in Hyattsville, Maryland, say the younger brother of the late University of Maryland basketball star Len Bias was shot and killed last night after an argument at a jewelry store. James Bias died of two gunshot wounds in the lower back.

#90339u0495 12/05/1990 ~United Press International
WASHINGTON (DEC. 5) UPI - A bank regulator singled out Sens. Dennis DeConcini and Alan Cranston Wednesday for improper actions to benefit accused S&L kingpin Charles Keating Jr., but faulted all of the Keating Five senators for protecting a Keating thrift labeled ''the worst institution in America.''

Meanwhile, the Senate ethics committee, with the backing of the Justice Department, voted to seek limited immunity for James Grogan, a former close Keating associate, to compel his testimony before the panel. Sen. Howell Heflin, D-Ala., the committee's chairman, said the panel ''has not and will not ''pursue such immunity for Keating to avoid compromising current criminal proceedings against him.

William Black, general counsel of the western regional office of the Office of Thrift Supervision and a former official of the Federal Home Loan Bank Board, said ''political pressure'' by the five senators was ''critical'' in influencing the bank board to go easy on Keating's Lincoln Savings and Loan of Irvine, Calif., for nearly two years before the thrift failed in April 1989.

Black's testimony came during the 12th day of hearings before the ethics committee, which is seeking to determine whether Sens. Cranston, D-Calif.,

DeConcini, D-Ariz., John Glenn, D-Ohio, John McCain, R-Ariz., and Donald Riegle, D-Mich., exerted improper pressure on bank regulators on behalf of Keating.

Keating, who has been indicted on state securities and fraud charges charges in California and is the target of an ongoing federal grand jury probe, contributed $1.3 million to the senators' political campaings and causes.

Black was one of four bank regulators who met with all of the Keating Five senators on April 9, 1987, one week after four of the senators had met with bank board chairman Edwin Gray. Black testified that Keating orchestrated the meetings to shake up regulators examining the operations of Lincoln.

''I felt (the meeting) was intimidating and I felt that Charles Keating had clearly set up the meeting to be intimidating,'' Black told the committee.

''This (Lincoln) was an institution that was probably the worst institution in America and instead of trying to help bring it under control, five U.S. senators were pushing us in the opposite direction,'' Black added.

He said the senators ''were coming after us'' and that the regulators were ''under attack'' until telling the lawmakers that criminal charges against Lincoln and Keating were being sought. Black said the regulators were wary of telling the senators about the Justice Department involvement because ''it would be too big a danger'' the lawmakers would tip off Keating.

Black, whose elaborate notes from the April 9 meeting have been important to the investigation of the Keating Five, singled out DeConcini and Cranston.

Black faulted DeConcini for offering a deal on Keating's behalf during the April 9 meeting under which the regulators would grant Lincoln a shield from a federal regulation limiting risky direct investments by thrifts - a regulation Keating had fought in vain for years - in exchange for Lincoln making more home loans.

Examiners, who less than a month later would recommend that Lincoln be seized by the government for unsafe and unsound practices, had already uncovered ''a massive violation'' of the direct investment rule by Lincoln and said DeConcini's offer would have directed the regulators ''not to take any further action and to allow that violation to continue for some unspecified time period.''

Black also said when DeConcini made the offer he used the word ''we'' - implying consent of the others present - and that ''no senator who was present said, 'No, no, you're speaking for yourself.'''

Black also criticized Cranston for actions taken by a Cranston aide 13 months later. Black said the aide's intervention to to bank board decisions ''that

allowed Lincoln to significantly expand its junk bonds, its direct investments and this led to greatly increased loss for the insurance fund (Federal Savings and Loan Insurance Corp.) and now the taxpayers.''

AVON, Mass. (DEC. 5) UPI - Child World Inc.'s stock fell to another 52-week low Wednesday as investors responded to the company's acknowledged danger of bankruptcy and the risk of a profit-killing Christmas season price war.

Child World, a distant No. 2 among toy chains behind Toys R Us Inc., said on Tuesday it would stop paying its old bills for six weeks so it could pay cash for new supplies of toys.

In what could have ominous results for profits at other retailers with big toy departments such as K mart Corp. and Wal-Mart Stores Inc., Child World said it intended to continue to advertise and discount aggressively.

The company's stock fell to $3.125 a share in over-the-counter trading Wednesday, down 12.5 cents a share from the day before's close, which also had been a new low for the year.

The company may be forced to seek Chapter 11 bankruptcy protection from its creditors, acknowledged Jeffrey Cole, chairman of CNC Holding Inc., which owns 82 percent of the chain.

However, Cole said the decision to stop paying its bills was part of an effort he believed could avert such a filing.

The company said it would impose a moratorium on paying bills dating from Tuesday or earlier but would pay cash for any shipments of new inventory.

The plight of the 182-store Child World chain is just the latest indication of the hostile climate faced by many retailers as consumers tighten belts in the face of growing recession fears.

Cole said sales at Child World stores were off in November from a year earlier and he blamed a trend in the industry.

CINCINNATI (DEC. 5) UPI - Eagle-Picher Industries Inc. said Wednesday that it has submitted to a federal judge an agreement on settling all asbestos-related personal-injury claims reached with two attorneys representing claimants in class-action litigation against the company.

But the company warned that ''liquidity will continue to be a serious concern for the next several months.''

Eagle-Picher said it signed a memorandum of understanding covering a proposed settlement with the two attorneys, appointed by U.S. District Court Judge Jack B. Weinstein in New York, to represent present and future asbestos personal-injury claimants.

Discussions with the other two attorneys appointed in the class action are continuing, the company said.

The settlement, which would cover all asbestos-related personal injury claims against Eagle-Picher, has been submitted to the court as part of a report prepared by the company's attorneys on the state of negotiations on a settlement.

According to Eagle-Picher, the agreement is contingent on a final certification of a mandatory nationwide class consisting of all present and future asbestos personal-injury claimants, pending approval of the settlement by the court and by the company's shareholders, and on the execution of a definitive agreement.

A court hearing on the proposed class certification is scheduled to begin Friday.

If the class action is certified and other conditions are satisfied, the effective date of the proposed settlement would be Nov. 30, 1993. If any appeals were then pending, the effective date would be on the termination of all appeals.

Prior to the effective date, the company would make full payment under its presently existing settlement commitments, at a total estimated cost to the company of approximately $45 million. A majority of these payments are presently scheduled to be made over the next 18 months.

Beginning on the effective date, the company's annual cash flow would be allocated so that fixed payments would be made to a trust for the benefit of claimants independent of the company.

CORVALLIS, Ore. (DEC. 5) UPI - Jerry Pettibone, the head coach at Northern Illinois the last six years, Wednesday was named football coach at Oregon State.

Athletic Director Dutch Baughman appointed Pettibone to take over the Oregon State program, which was 1-10 this year and has not produced a winning season since 1970.

Pettibone, 51, will replace Dave Kragthorpe, who resigned last month after compiling a 17-48-2 record in six seasons as the Beavers' head coach.

Pettibone has compiled a 33-32-1 record during six seasons at Northern Illinois, including a 9-2 mark in 1989. Before taking over the program at Northern Illinois, he was an assistant coach at Oklahoma, Nebraska, Texas A&M and Southern Methodist.

''Jerry has tremendous credentials,'' Baughman said. ''He is an outstanding coach. I've been extremely impressed with his coaching ability, his leadership and his motivation.''

In 1984, when he was at Texas A&M, Pettibone was named as the country's best football recruiter by Sports Illustrated magazine.

#90339u0563 12/05/1990 ~United Press International

NEW YORK (DEC. 5) UPI - Five young Marine reservists who said they filed for conscientious objector status, then went AWOL when their unit was activated for duty in the Persian Gulf, announced Wednesday they were surrendering.

''They submitted themselves to military control,'' said their lawyer, Steve Somerstein, of the Vietnam Veterans Against the War. ''They were not placed in custody and remained at liberty although on active duty.

''Their unit has been sent to Camp Lejeune, N.C., and they have been temporarily assigned to what they call the Inspector-Instructor staff here,'' Somerstein said.

He said the five were to report to Fort Schuyler, in the Bronx, at 7:30 a.m. each day and then return to their homes in the evenings while their situation

was being reviewed by the military.

The four, members of the 2nd Battalion, 25th Marines, 4th Division, said their lawyers were promised by the military their status would be ''negotiated.''

The fifth reservist, who Somerstein said wanted to ''remain annonymous at the present time,'' also planned to turn himself in to the Bronx base.

Maung ''Sam'' Lwin, 21, of the New School for Social Research and an orphan who left Rangoon, Burma, 12-years ago, served as spokesman at a news conference at Riverside Church.

''By standing firm to our beliefs ... we are fighting for peace and social justice,'' Lwin said, denying accusations of being unpatriotic to the United States or ''cowardly.''

Lwin also explained that when he joined the reserves he had not given much thought to war.

''Two years down the line, after boot camp, seeing war movies, reading books ... killing doesn't make sense,'' Lwin said.

Students, some with neon pink, green and yellow hair, held orange, black and white banners, with green handprints that read, ''Hands off Sam,'' attended the announcement in the South Hall of the church.

#90339u0587 12/05/1990 ~United Press International

BRUSSELS, Belgium (DEC. 5) UPI - World trade talks involving 107 nations were ''very near the end of the road'' Wednesday over an impasse on agriculture subsidies, U.S. Trade Representative Carla Hills said.

Hills' statement was her most pessimistic since the final week of talks began Monday under the General Agreement on Tariffs and Trade.

Four years of GATT talks were threatened with collapse over a dispute between the United States and the 12-nation European Community over the EC's huge farm supports.

''We're very near the end of the road, I'm afraid,'' a grim-faced Hills said as she left the main conference site at lunchtime with Agriculture Secretary Clayton Yeutter.

The EC, despite pressure from U.S. officials and other farm exporting nations, has been unwilling to increase its offer to cut agriculture subsidies by 30 percent.

The United States seeks cuts of 75 percent, including a 90 percent reduction in market-distorting export subsidies.

''We're rapidly nearing the time where even if the Community made a move, there's little time to put it all together into a final package,'' Yeutter said.

The talks are due to end Friday.

Further top-level negotiations are ''meaningless unless the European Community has something to say,'' Yeutter said.

GATT negotiations over services, investment and other key areas have been stalled pending resolution of the agriculture stalemate. A special meeting of EC trade and agriculture ministers was called for Wednesday night, but officials predicted no startling new concessions.

''The Community position is one of globality, not to isolate any one area'' such as agriculture, an EC spokesman said.

U.S. officials say agriculture is necessarily the key to GATT success because otherwise developing countries will not agree to new trade rules in other areas.

Asked if she expected any movement from the special EC meeting, Hills answered coldly, ''I am not an expert on their best means of deliberation.''

British Trade Minister Peter Lilley said he hoped that a meeting in Paris on Wednesday between French President Francois Mitterrand and German Chancellor Helmut Kohl might give EC negotiators more ''elbow room'' at the GATT talks.

France and Germany, which have powerful farm lobbies, have resisted deeper EC subsidy cuts. Britain and the Netherlands have urged more flexibility.

GATT, established in 1947, now covers only merchandise trade.

The current round of GATT talks, known as the Uruguay Round, seeks to expand GATT rules to other areas. The round began at a Uruguayan resort in 1986.

Traveling on Tuesday in Uruguay, President Bush said the nations represented in Brussels ''must use this meeting to find the political will to limit or reduce distortions to free trade.''

EC Agriculture Commissioner Ray MacSharry circulated documents Tuesday saying a 30 percent cut in EC internal supports would in fact create ''significant reduction in export refunds by 1995,'' including a 40 percent reduction for wheat subsidies as EC and world prices converged.

He said EC and U.S. spending on export assistance for wheat were comparable in recent years and insisted that the EC also is providing adequate market access. For 1987-1989, he said, butter imports into the EC made up 4.4 percent of domestic use, compared to 0.2 percent for butter imports into the United States.

The new EC analysis failed to win converts.

''It seems rather late in the day for methodology,'' said Australian Trade Minister Neal Blewett, who called for ''explicit'' EC commitments rather than mathematical ''mumbo-jumbo.''

Even if the EC math on farm supports is correct, Yeutter said, it only reflects the amount of money spent on export refunds, not the effect on world markets created by EC farm surpluses.

''The problem we have with EC export subsidies, and everyone else has, is with the quantity of product put on the world market,'' Yeutter said.

#90339u0588 12/05/1990 ~United Press International

(DEC. 5) UPI - Radio transcripts from the deadly runway crash of two Northwest Airlines jets in Detroit Monday indicate that one pilot was lost in fog. A transcript of the radio communication between the tower and the D-C-9 showed that air traffic controllers in the tower could not see the jet, and the pilot was UNsure of his location. A jet taking off struck the D- C-9, killing at least eight people.

Astronomers aboard the space shuttle Columbia made up lost time today, swinging their telescopes from one target to another after coaxing a troublesome instrument-aiming system into operation. The research schedule is running more than a full day behind schedule because of problems activating the shuttle observatory. Columbia's crew spent this morning gathering data about a variety of astronomical objects.

The Navy has taken action against three admirals for NOT adequately warning senior Pentagon officials of cost overruns in the A-12 Avenger aircraft program. One admiral was retired, another was censured and transfered, and a third was disciplined. The nearly five-BILLION dollar development program is now forecast to cost around six BILLION dollars.

Bulgaria's Grand National Assembly voted late last night to order the interior ministry to turn over all its files on members of parliament to a special parliamentary committee within one week. Opposition sources said this week as many as one-fourth of Bulgaria's members of parliament, including leading dissidents under the former Communist regime, could have been secret police informers or agents.

Jurors in the Central Park jogger trial struggled to reach a verdict in their fifth day of deliberation yesterday. They requested that the judge help them to set aside what they called ''emotion and prejudice.'' The jury adjourned late last night in the longest day of deliberations so far. Deliberations are scheduled to resume this morning .

Police in New York say they freed a woman who had been kidnapped and robbed when they pulled over a car, frisked one of two suspects, and found that he had a pipe bomb wired to his body. Police say the woman was kidnapped last night as she was about to get into her car in Queens. Police say the man with the pipe bomb also had a hand grenade in his pocket.

#90339u0592 12/05/1990 ~United Press International

WASHINGTON (DEC. 5) UPI - Modern thieves can steal more with a computer than with a gun, and America's ''luck'' in avoiding a major computer disaster way soon run out unless security is tightened, an expert panel warned Wednesday.

A National Research Council committee concluded the United States has grown to rely on computers for everything from banking to health care without ensuring that such information is secure from accident or deliberate attack.

Furthermore, failures of computer system security, safety and reliablity appear to be increasing in number and severity, the panel said.

Among the examples cited were: the much-publicized 1988 incident in which a reproducing computer program, called a worm, snarled as many as 6,000 computer systems; a nearly successful attempt to use thousands of phony automatic teller machine cards with identification numbers pirated from a computer; and a bid to defraud the Pennsylvania Lottery of $15.2 million by using a data base of unclaimed ticket numbers to produce a fake winning ticket.

Poor quality control also can make computer systems untrustworthy, the panel said. It cited an error in computer software controlling a radiation therapy machine that resulted in at least three patient deaths, and the scrambling of patient records at one hospital by a rogue program, or virus, that was accidentally introduced into its computer system.

''To date, we have been remarkably lucky ... As far as we can tell, there has been no successful systematic attempt to subvert any of our critical computing systems. Unfortunately, there is reason to believe that our luck will soon run out,'' the 16-member panel said.

''The modern thief can steal more with a computer than with a gun. Tomorrow's terrorist may be able to do more damage with a keyboard than with a bomb.''

Finding that no existing public or private organization is ''positioned adequately to address the nation's needs'' in computer security, the experts called for creation of an Information Security Foundation funded by member subscriptions and fees for security evaluation and other services.

Neither of the two agencies traditionally assigned with overseeing technology - the National Institute of Standards and Technology and the National Security Agency - appears prepared to tackle such a task, the panel said in its 303-page report entitled ''Computers at Risk.''

In addition, ''the market does not work well enough to raise the security of computer systems at a rate fast enough to match the apparent growth in threats to systems,'' said the panel, headed by David Clark of Massachusetts Institute of Technology in Cambridge.

The experts noted that European nations have made unified strides towards computer security, and cautioned that if the United States failed to take similar action it will be increasingly difficult to sell American hardware and software on the global market.

The study was requested by the Defense Advanced Research Projects Agency. The National Research Council is the research arm of the National Academy of Sciences, which was chartered by Congress to examine questions of science and technology.

#90339u0593 12/05/1990 ~United Press International

CONCORD, NH (DEC. 5) UPI - Lame-duck U.S. Sen. Gordon Humphrey, R-N.H., resigned from the Senate Tuesday so that he could take his seat in the state Senate in time to vote in leadership elections.

Humphrey did not seek re-election after two terms, saying 12 years is all any member of Congress should serve. Instead, he sought and won a seat in the 24-member New Hampshire state Senate.

The state Constitution forbids anyone from holding both offices simultaneously.

In a written statement, Humphrey said he had sent letters of resignation to Gov. Judd Gregg and Vice President Dan Quayle, who is also president of the U.S. Senate.

''This is not how I wanted things to end, but under the circumstances I have no choice,'' Humphrey said.

Humphrey had said he would leave the U.S. Senate before the end of his term if his vote was needed to elect Sen. Edward Dupont, a conservative, as president of the state Senate. Dupont was locked in a battle with Senate Democrats and

liberal Republicans for the leadership post. Even with Humphrey's vote he remained one vote shy of the 13 needed for the presidency.

A spokesman for Gregg said U.S. Sen.-elect Bob Smith will be appointed to succeed Humphrey. Smith, a three-term Republican congressman from the state's 1st District, was to have taken the seat in January.

Gregg press secretary Brian Grip said Smith's congressional seat will remain vacant until it is assumed by U.S. Rep. Bill Zeliff. A special election is required to fill a congressional vacancy.

Humphrey is a maverick conservative who was best known in the Senate for his opposition to abortion and support for anti-Soviet guerrillas in Afghanistan.

#90339u0610 12/05/1990 ~United Press International

DETROIT (DEC. 5) UPI - Four men wearing ski masks robbed an armored truck at gunpoint on the city's west side, escaping with more than $500,000 in white canvas bags.

Police said the holdup occurred Tuesday morning as the truck made a money delivery to a branch of the National Bank of Detroit. No suspects were in custody.

FBI spokesman John Anthony said the holdup was ''an obviously professional job.''

The robbery took place after the truck, operated by Guardian Security of Highland Park, pulled in front of the bank to make a routine cash delivery from NBD's main office in downtown Detroit.

As the guard began to unload sacks of money from the truck, a blue van pulled up behind him and two others vans stopped in front of the truck, preventing it from moving.

A man wearing a ski mask and carrying a machine pistol jumped from the rear van and pushed the guard to the ground. A second man got out of the rear van and transferred the sacks to three vans.

After the money bags were transferred, the four holdup men sped away in the three vans, which were recovered 2 1/2 hours later. They had been reported as stolen.

The 26-year-old male guard was treated at a medical clinic for a bruised knee suffered when one of the holdup men forced him to the ground. The 25-year female truck driver was not injured.

Guardian is offering a $25,000 reward for arrests and recovery of the money.

#90339u0636 12/05/1990 ~United Press International

WARSAW, POLAND (DEC. 5) UPI - Defense Secretary Dick Cheney refused Wednesday to confirm reports that the United States has offered F-16 fighter aircraft to Poland in what would be the first such arms deal with a Warsaw Pact country.

Cheney, who stopped for a day in Poland en route to a NATO meeting in Brussels said the purpose of his visit, the first by a U.S. defense secretary to Poland, was to forge closer ties after the breakup fo the Warsaw Pact.

''I did not discuss specific hardware,'' Cheney before heading for Gdansk for a meeting with Solidarity founder and presidential candidate Lech Walesa.

As to weapons sales to Poland in general, he added, ''I certainly wouldn't write it off. It may well make sense at some time in the future.''

The independent daily newspaper Gazeta Wyborcza Wednesday quoted Defense Minister Piotr Koledziejczyk as saying the United States has offered to sell the F-16s to Poland in the first such deal with a member of the Warsaw Pact.

''Kolodziejczyk ... said Poland wanted to buy a dozen fighter- bombers, but no final decision had been made whether to purchase Soviet or American aircraft '' Gazeta said, adding that he expected a special U.S. delegation to arrive soon.

''He said he would prefer a U.S. F-16 to a (Soviet) MiG-29 if the market price was comparable, and added Poland would also be interested in purchasing other arms,'' the newspaper said.

Poland is looking at the F-16s or the French Mirage 2000 fighters because of the high prices asked by the Soviet Union for its military equipment and the cool reception accorded a Polish negotiating team in Moscow recently.

Soviet negotiators requested payment in U.S. dollars, initially offering the MiG-29s at $24 million apiece and later lowering the price to $18 million.

Cheney, in Europe for a NATO meeting in Brussels, flew from Warsaw to Gdansk for a meeting with Walesa, who urged the United States to create a new ''Marshall Plan'' for Poland similar to its European recovery operation after World War II.

''Something like the Marshall Plan should be started,'' he said, adding that Poland's bold economic stabilization plan is in jeopardy and needs more help from the West.

Walesa noted that with the onset of winter, Poland expects thousands of Soviet citizens to be driven over the border by the worsening food crisis there, and part of Poland's defense budget must be used to help them.

During his Warsaw briefing, Cheney said the Brussels meeting will focus on NATO strategy in terms of the new political realities in Europe. ''We think the foundation of European security arrangements should continue to be NATO,'' he said. ''How things develop beyond that, it's difficult to predict.''

He said not only Poland but other Warsaw Pact countries have expressed the view that it is necessary to retain NATO.

Cheney said the current goal of European nations is peace and stability. ''We want to contribute to that as much as we can, keeping in mind of course that the lead must be taken by the European nations themselves,'' he said.

#90339u0683 12/05/1990 ~United Press International

N'DJAMENA, CHAD (DEC. 5) UPI - A Libyan delegation has been in Chad since Tuesday to meet with the new government of Idriss Deby, the Libyan Embassy in N'Djamena confirmed Wednesday.

The embassy, which refused to disclose the purpose of the visit, said only that the Libyans arrived shortly after Tripoli on Monday evacuated some 450 of its prisoners captured by the ousted government of Hissen Habre.

The new Chadian government also would not comment on the purpose of the delegation's visit or say whether it would meet with Deby himself.

Deby proclaimed himself president of the poor West African nation Tuesday night, three days after triumphantly entering the capital of N'Djamena and just three weeks after crossing into eastern Chad from neighboring Sudan.

A close adviser to the new president, Papi Barzar, said that ''Chad would continue to have close and good relations with its neighbors'' and that he believed Libya will ''respect Chad's territorial integrity.''

Confirmation that a Libyan delegation was in the Chadian capital was seen by Western diplomats as further proof that the new government is doing everything

it can to establish good relations with its troublesome northern neighbor.

The Libyan prisoners released by Deby were captured during a war between the two countries for control of the mineral-rich Aouzou Strip in northern Chad. In 1983 and again in 1986 France sent troops to Chad to halt a Libyan invasion of its southern neighbor. Chad was once a colony of France.

Although French Defense Minister Jean-Pierre Chevenement said Tuesday that 40 percent of the equipment used by Deby's forces to overthrow the Habre regime came from Tripoli, Western diplomats in N'Djamena believe the new leader is a strong nationalist who is likely to stand up to Libyan leader Col. Moammar Gadhafi.

Washington has refused to recognize the new government on grounds it is backed by Tripoli.

Meanwhile, three mutilated corpses believed to be those of Libyans captured by the Habre government were found Wednesday, witnesses said. One doctor said the three had been murdered and thrown into the Logone River on the west side of the Chadian capital just before the Habre government was overthrown Saturday.

The doctor said he believed the three bodies were those of Libyans because their skin was lighter than that of Chadians, but he added that their racial features were difficult to determine because the faces had been badly mutilated.

Each victim's hands and feet had been bound tightly, and all apparently had died of knife wounds, according to the doctor who works at N'Djamena's Central Hospital where the bopdies were being kept.

Anti-foreign feelings flared in southern Chad after Habre's overthrow, diplomatic sources confirmed Wednesday, when former members of Habre's presidential security guard attacked the homes of foreign oil company employees Monday in the town of Sarh.

French military helicopters were sent to the town and foreign nationals were evacuated to neighboring Cameroon from where they were flown to the Netherlands, the diplomats said.

The town of Sahr, 310 miles south of the capital, was the scene of a massacre in 1986 by Habre forces against the intellectual elite of the area, most from Deby's Zaghawa Tribe.

Radio Cameroon reported Tuesday night that Habre has moved from the northern Cameroon town of Maroua to the capital Yaounde. Most of the ministers who left with the ex-president are still in Maroua and it appears unlikely they will be able to return to Chad in the near future.

CHICAGO (DEC. 5) UPI - The Cleveland Indians late Tuesday dealt outfielder Cory Snyder and minor league infielder Lindsay Foster to the Chicago White Sox for pitchers Eric King and Shawn Hillegas.

Snyder, 28, batted .233 last season with the Indians, hitting 14 home runs and driving in 55 runs. White Sox Manager Jeff Torborg said Snyder is a devoted student of Chicago hitting coach Walt Hriniak.

''Cory went up to Walt's hitting school last winter, and it paid off, '' Torborg said. ''He hit a home run against us off (Greg) Hibbard.''

Snyder, a No. 1 pick by the Indians in 1984, was benched the final 26 games.

''I never wanted to leave Cleveland,'' Snyder said. ''But that last month was really hard on me. It became evident that I wasn't in their plans for next season so I've been preparing myself for this. Still, it's kind of a shock.

''But it's time for a new start. I know a lot of guys on the White Sox and I worked with Walt Hriniak last winter. Every year it seemed like more of my friends like Brett Butler and Joe Carter were getting traded from Cleveland. So I guess it was my turn this time.''

King was 12-4 with a 3.28 ERA, starting 25 games. In his second full season with the White Sox, the 26-year-old missed a portion of the season because of recurring shoulder stiffness.

''We've checkd out Eric King's shoulder and back extensively,'' said John Hart director of baseball operations for the Indians. ''His shoulder is structurally sound. He's bothered by a nerve problem from an automobile accident. But he's fine.''

The Indians traded Bud Black to Toronto late in the season and John Farrell will miss most of next season recovering from an arm problem, so the Indians needed starting pitching.

''When Black was traded and Farrell went down, we knew we had to get a starter '' Hart said. ''We determined that Cory could bring us that starter.''

Hillegas spent most of the 1990 season at Class AAA Vancouver, appearing in seven games in relief with the White Sox in September. He compiled a 1.74 ERA and 5-3 record in 36 appearances in the minors.

Foster, 23, split time between Class A affiliate Kinston and Class AA Canton-Akron, hitting .280 and .244, respectively.

#90339u0724 12/05/1990 ~United Press International

JERUSALEM (DEC. 5) UPI - Results of a poll released Wednesday showed two out of three Israelis favor barring Palestinians from working in Israel, and 42 percent of those surveyed said their views toward Arabs had become more negative since the Palestinian uprising began nearly three years ago.

The survey, conducted by the Israeli-based Smith Research Center between Nov. 19 and Nov. 29, also showed that 45 percent of those Israelis interviewed said they had no change in attitude since the uprising began Dec. 9, 1987. Another 6 percent said their feelings toward Arabs had become more positive.

The research center interviewed 1,200 Israelis across the country, including West Bank settlers. The results of the poll were released Wednesday in advance of their publication in The Jerusalem Report, a weekly magazine published in Jerusalem.

Israelis surveyed were asked how they felt about the entry of Arab workers from the West Bank and Gaza Strip into Israel. A spate of stabbings of Israelis by Arabs has sparked a campaign by the ultra right-wing Kach Movement to replace Arab workers with Jewish laborers.

Of those responding to the survey, 38 percent said they would bar the Palestinians from entering Israel, 28 percent said they would gradually reduce the number and 27 percent said they would allow entrance ''except for hostile elements.''

Two percent said they would allow the Palestinians free entry while 5 percent registered no or other opinions.

The survey also asked the Israelis to choose among five possibilities as the ''best solution today to solve the Palestinian problem.'' Of those who selected one of the five, 25 percent said they favored the creation of a Palestinian state, 21 percent favored the transfer of some or all of the Arabs and 20 percent favored the return of the Gaza Strip only.

Nine percent said they would preserve the present situation and 6 percent favored the annexation of all or part of the West Bank. The results also showed that 19 percent said they had no opinion.

#90339u0725 12/05/1990 ~United Press International

TOKYO (DEC. 5) UPI - Dai-Ichi Kangyo Bank, the world's largest commercial bank, Wednesday was reported planning to raise its short-term prime lending rate as it announced a set of measures to reform the short-term money market in line with the financial market liberalization.

The central bank will raise its short-term prime rate 0.25 percentage points to a 10-year-high of 8.25 percent, major Japanese dailies reported Tuesday.

The reports followed an announcement by the Bank of Japan that it will reform the short-term money market and ease restrictions on fund transactions between commercial banks in line with the liberalization of Japan's financial markets.

The central bank has been guiding short-term interest rates upward since September following its discount rate hike Aug. 30.

Dai-Ichi Kangyo Bank refused to confirm the news reports.

''No decision has been made yet,'' a spokesman for the bank said. He declined further comment.

The short-term prime rate is an interest rate charged by commercial banks on loans of up to one year to the most creditworthy corporations.

The new rate will be the highest since March 1980, when the rate stood at 8.5 percent.

It will mark the first time the short-term interest rate will rise above the long-term rate, which now stands at 8.1 percent in the wake of two consecutive reductions in October and November this year.

Taizo Hashida, chairman of the Federation of Bankers Associations, told a news conference Tuesday that raising the short-term lending rate should be considered because of the uptrend in short-term interest rates.

''The (short-term interest) increase should be understandable, considering the current level of short-term interest rates,'' Hashida, who also is president of Fuji Bank.

Analysts said short-term prime rates have now begun to move independently from the Bank of Japan's official discount rate.

Previously, the rate revision was linked to movements of the official discount rate - the interest rate charged by the central bank on loans to commercial institutions.

The Bank of Japan raised the key interest rate by 0.75 percentage points to 6.0 percent last Aug. 30 in the fifth rate hike since early 1989 to check growing inflationary pressures amid rising commodity prices and the tight labor market caused by sustained economic expansion.

The analysts said the short-term rate hike was triggered by rising short-term interest rates on the money market amid uncertaines over the Gulf crisis. It

also is aimed at bringing lending rates in line with soaring fund-raising costs, spurred by strong demand for funds toward the year-end, they said.

The analysts said the reported short-term prime rate hike will deal a heavy blow to medium- and small-sized enterprises planning to raise operational funds.

The Bank of Japan has been guiding short-term interest rates on the money market upward since September following the previous discount rate hike. The central bank said contracted interest rates on loans and discounts rose an average 0.266 percentage points in October to 7.427 percent, the sharpest monthly rise since February last year.

The bank said contracted rates on short-term loans grew 0.293 percentage points to 7.687 percent while those on long-term loans jumped 0.0259 percentage points to 7.317 percent.

In a related development, the central bank said Tuesday it will institute a set of measures aimed at reforming the shot-term money market in line with the liberalization of the nation's financial markets.

The bank said the measures, which will be implemented starting next year, include a step designed to expand the scope of discount bills subject to the central bank's market rate operations. The move would involve adding bills with maturities of 1 to 3 months and allowing direct fund transactions between commercial banks.

The central bank now permits direct fund transactions only through short-term money brokers because od concern such deals would lead to overheated deposit-taking competition between banks.

The bank said the new measures will help improve its operational tools and the functioning of short-term interbank markets in preparation for developing the short-term government bill market.

#90339u0726 12/05/1990 ~United Press International

LANDOVER, MD (DEC. 5) UPI - Malik Sealy scored 28 points, 18 in a second-half barrage, propelling No. 18 St. John's to a 73-72 overtime victory over No. 20 Georgia Tech in the first of two games Wednesday in the ACC- Big East Challenge.

Redman Jason Buchanan hit the first of two free throws with 3.7 seconds left in the extra period and the score tied, 72-72, to clinch the triumph.

The win by St. John's, 4-0, gave the Big East a 4-1 edge in the competition between the two East Coast conferences. No. 5 Duke of the Atlantic Coast

Conference met No. 6 Georgetown in the nightcap at the Capital Centre.

Matt Geiger and Malcolm Mackey led the Yellow Jackets, 2-2, with 16 points each. Jon Barry, son of NBA legend Rick Barry, scored 15 and Anderson had 14.

Robert Werdann backed Sealy with 15 points, and Buchanan finished with 14.

Trailing by 11, Tech put on a late rally, inspired by Anderson. Sealy sank one of two free throws with 6.5 seconds left, giving the Redmen a 60-58 lead.

Tech called a timeout at 2.9 seconds to set up for the last shot. Anderson drove the baseline and missed, but Geiger moved in for the rebound and roll the ball over the front lip of the rim with a buzzer basket that sent the game into overtime.

Sealy sank eight of 10 field goal attempts in the second half. The 6- foot-8 junior scored St. John's first 10 points, turning a 36-30 haltime lead for Tech into a 40-40 tie.

Werdann's bucket at 14:10 gave the Redmen a 42-41 lead. Sealy hit two more field goals to extend St. John's lead to 46-41. The Redmen stretched their lead to 54-43 with 8:22 left in the second half. Tech had only 7 points in the first 13 minutes of the half.

Sealy hit his first eight shots of the half. But his first miss seemed to ignite the Yellow Jackets. Anderson, who was shooting two of 15 from the floor at one point, hit a 3-pointer and a 2-pointer to trim the Redmen lead to 58-55 with 2:15 to go.

Georgia Tech led at half, 36-30, behind the shooting of Barry, who sank five of eight field goal attempts and including both of his 3-point ties for 12 points.

With time running out, Anderson's miss came out to Barry near the 3- point line above the key. Barry took one step in and one-handed a shot that hit the rim, soared high above the top of the backboard and fell in cleanly as the buzzer sounded.

The Challenge wraps up Thursday at Chapel Hill, N.C. Wake Forest of the ACC meets Villanova of the Big East in the opener and North Carolina of the ACC takes on Connecticut of the Big East in the nightcap.

BEIJING (DEC. 5) UPI - China could sharply improve its relations with the United States through a ''general amnesty'' of Tiananmen Spring dissidents facing trial for counterrevolution or sedition, Rep. Robert Torricelli, D-N.J. said Wednesday.

But Torricelli, a member of the House Foreign Affairs Committee, said two days of meetings with communist officials left him highly doubtful that the political trials would be scuttled.

Torricelli also said Beijing had squandered a chance to lay claim leadership in the world community last week when it abstained from voting on a U.N. Security Council plan authorizing international military force to drive Iraqi troops from Kuwait.

''I think that China missed an important and dramatic opportunity to cast itself in the leadership of a new world order,'' Torricelli said. ''It has cast itself as a spectator instead of a leader.''

Torricelli chided China's leadership for holding to a view that Washington ''should be grateful'' that it did not veto the U.N. use-of- force resolution, which would have killed the plan.

He said he told the Chinese officials he met that the United States and Congress maintain great goodwill toward China and that relatively simple gestures could be used to improve relations.

He said a key gesture would be a ''general amnesty'' and freeing of dissidents facing trial for participating in the spring 1989 pro- democracy protests that were crushed by Chinese troops June 4.

''Any softening of the Chinese position would make an enormous difference in our bilateral concerns,'' he said.

If the dissidents were freed, Congress would promptly reconsider the punitive political sanctions imposed on China because of the crackdown, he said, as well as China's most-favored-nation trading status and ''the general tone of relations.''

A group of dissidents alleged to be core instigators of the 1989 demonstrations face trial in coming weeks on some of China's most serious political charges, including sedition, which can carry the death penalty.

''The fact that additional trials are planned and others are to be prosecuted gives very little reason to be hopeful,'' he added.

Torricelli faulted China's leaders for believing that the world's attention had been diverted by the Gulf crisis. ''That is a tragic mistake if that is their judgment,'' he said.

The congressman said every Chinese official he met, including Assistant Foreign Minister Liu Huaqiu, fretted openly about the social instability that has accompanied the erosion of communism in the Soviet Union and Eastern Europe, leaving them blind to the need for major ''national reconcilation'' in China.

''What they are doing (with political trials) does not serve stability at all '' Torricelli said. ''It only creates tensions in society and assures that someday there will be a day of reckoning.''

Torricelli also took several swipes at President Bush, saying the White House had badly botched a visit last week by Chinese Foreign Minister Qian Qichen,

which Beijing interpreted as a major relaxation of the anti-Chinese sanctions.

Torricelli said Bush, who headed Washington's Beijing mission in the 1970s, should reconsider his view of himself as ''his own best adviser'' on Chinese affairs.

''It is fair to conclude that the president may need a new adviser,'' he said, saying Bush's visit with Qian left him looking ''silly.''

#90339u0785 12/05/1990 ~United Press International

BUENOS AIRES (DEC. 5) UPI - President Bush arrived in Argentina Wednesday following a military rebellion that temporarily threatened to disrupt both the trip and the stability of America's newest Latin American ally.

Bush's host, 60-year-old President Carlos Menem, at midnight Tuesday lifted a state of siege that had been imposed Monday during an 18-hour military rebellion that left at least 13 persons dead.

There was little sign of the crisis in Buenos Aires Wednesday as Bush arrived by helicopter from neighboring Uruguay, welcomed by an honor guard of the Patricios Regiment, clothed in blue 19th century uniforms.

A fleet of six military helicopters escorted the president's chopper, which was marked with an American flag.

A handful of blue-uniformed policemen were posted around the Casa Rosada, Argentina's downtown presidential palace.

Blue and white banners on the plaza in front of the palace said ''Welcome Bush'' in both Spanish and English, and small American and Argentine flags were posted on walls of the driveway to the palace.

Bush Tuesday shrugged off the Argentine revolt as ''military vs. military controversy,'' but Menem, who has been in office only 17 months, labeled the revolt an ''attempted coup d'etat'' aimed at destroying the nation's 7-year-old democracy.

Police reported that two branches of the Chase Manhattan bank, one in the northern neighborhood of Belgrano and the other in the adjacent neighborhood of Caballito, were damaged by bombs.

In another incident, pranksters changed the signs of Buenos Aires street named ''Estados Unidos'' - Spanish for United States - to ''America Latina'' (Latin America). The protesters are believed to be dissident members of the ruling Peronist Party.

Menem, Bush's newest ally in Latin America, has warmly endorsed Bush's plan for a Latin American free trade zone and took the initiative in re-establishing diplomatic relations earlier this year with Britain, which severed ties with Argentina during the 1982 Falkland Island War over a territorial dispute.

During his stop in Montevideo, Uruguay, Bush urged support of his proposal for an economic trading zone in the Americas.

''The ultimate aim is free trade for all the Americas,'' Bush said.

Bush also pressed for ''successful completion'' of the current round of world trade talks in Brussels, Belgium, which are said to be on the verge of collapse because of divisions over agriculture subsidies.

And Bush acknowledged the stiff economic consequences suffered by the Third World because of the Persian Gulf crisis and vowed the political and military standoff ''is not going to go on forever.''

''The economic burdens on these small countries and on the U.S. are heavy,'' said Bush at a Montevideo news conference during which he referred to rising oil prices triggered by unrest in the Middle East.

Menem is the only Latin American president to have dispatched warships to help enforce the U.N. sanctions against Iraq, and he did this despite majority opposition in Argentina's Congress.

Bush told reporters in Uruguay Tuesday he is ''not in a negotiating mood'' and hopes Iraqi President Saddam Hussein ''gets the message'' about last week's U.N. resolution authorizing the use of force to liberate Kuwait if Iraqi troops are not out by Jan. 15.

In all, the U.N. Security Council has passed 12 resolutions that condemn the invasion, demand the withdrawl of troops and impose a range of global economic sanctions against Iraq.

In a surprising move last Friday - the day after the resolution authorizing force was adopted - Bush offered to send Secretary of State James Baker to Baghdad for talks with Saddam and invited Iraqi Foreign Minister Tariq Aziz in Washington. The invitation to Iraq was accepted and a meeting with Aziz is expected early next week.

The White House has insisted the talks are strictly a last-chance effort to avoid war by making sure Saddam understands U.S. determination to end Iraq's occupation of Kuwait and restore the legitimate government of the oil-rich emirate.

Bush said that when he meets with Aziz, ''I want to make clear to him the best thing is to go through with the U.N. resolutions.''

''I am convinced that Saddam Hussein has not gotten the message,'' Bush told reporters. ''I don't think Saddam Hussein understands'' the impact of the U.N. resolutions. ''I hope he gets the message.''

#90339u0790 12/05/1990 ~United Press International

CHICAGO (DEC. 5) UPI - San Francisco and Minnesota completed a three-player deal early Wednesday, with right-handed pitcher Steve Bedrosian going to the Twins for right-hander Johnny Ard and a player to be named later.

Bedrosian became expendable following the Giants' free agent signing Tuesday of left-handed reliever Dave Righetti.

Bedrosian, who will turn 33 Thursday, was 9-9 with 17 saves and a 4. 20 ERA in 68 appearances for the Giants in 1990. In nine major league seasons with Atlanta, Philadelphia and San Francisco, Bedrosian is 65-70 with a 3.22 ERA and 178 saves. He won the National League Cy Young award in 1987 after posting a career high 40 saves with Philadelphia.

Ard, 23, was 12-9 with a 3.79 ERA and four complete games for the Twins' Class AA Orlando team. In 1989, he was chosen by Baseball America as the No. 8 prospect in the California League after going 13-7.

#90339u0792 12/05/1990 ~United Press International

MANILA (DEC. 5) UPI - The Philippine government Wednesday pressed its demand for sovereign control of U.S. bases in the island nation by asserting the right to try Americans accused of crimes, according to officials representing both nations.

A broad range of issues discussed at technical level talks since last week was taken up in the third round of negotiations by panels headed by Philippine Foreign Secretary Raul Manglapus and special U.S. negotiator Richard Armitage.

The subjects at Wednesday's session included criminal jurisdiction, taxation, customs, entry and departure, quarantine, banking and currency, postal services and commercial concerns, government spokesman Rafael Alunan said.

Alunan stressed that among other disagreements, there was discord over the issue of the Philippines asserting the right to try American servicemen accused of crimes.

''The absence of criminal jurisdiction will result in the dilution of our sovereignty as a nation,'' said Alunan, referring to an emotional issue dominating the anti-bases rhetoric.

''The Philippines has disagreed with the U.S. position of retaining and in some cases improving upon the existing arrangements,'' Alunan said. ''The Philippines is breaking new ground in order to move away from a colonial past.''

U.S. spokesmen Stanley Schrager countered, ''As we suggested, we're talking about American sovereignty as well and our responsibility to American citizens no matter where they are around the world.

''Sometimes this can create a conflict, but I don't think it necessarily has to. I think the acceptable agreements with the many, many countries around the world will suggest that this is not an insurmountable problem,'' Schrager said.

The Philippines has six U.S. military installations manned by about 40,000 troops, Defense Department employees and dependents under a 1947 treaty expiring Sept. 16, 1991. The facilities include Clark Air Base and the Subic Bay Naval Complex, the largest and oldest U.S. military base on foreign soil.

Washington gives Manila $481 million in aid each year in exchange for U.S. use of the facilities.

Armitage has indicated that Washington wants a 10- to 12-year extension of the leases and the retention of a limited presence after that period.

The Philippines has said it will take ''sovereign control'' of Clark and four smaller facilities at the expiration of the pact, while allowing the United States operational control of some facilities. It said it would agree to a 5- to 7-year extension of the Subic Bay lease.

The current talks were expected to conclude either Thursday or Friday. Both sides hope an agreement would be worked out by January.

#90339u0795 12/05/1990 ~United Press International

WASHINGTON (DEC. 5) UPI - Factory orders rose 2.8 percent in October, the largest increase in eight months, the Commerce Department reported Wednesday.

The increase, which was greater than many economists expected, was the largest since a 4 percent gain in March, the government said.

New orders for manufactured goods increased $6.8 billion in October to $250.7 billion. Durable goods orders gained 3.9 percent, with most of the increase in transportation equipment.

Orders for non-durable goods rose 1.6 percent with most of the gain coming from petroleum refining.

Shipments of manufactured goods increased 1.7 percent - or $4.2 billion - in October to $247.5 billion. Shipments for durable goods rose 1.8 percent, with transportation equipment shipments accounting for most of the gain.

Non-durable goods shipments rose 1.6 percent, mostly from increased petroleum refining.

Unfilled orders were up 0.6 percent, or $3.2 billion, to $522.5 billion. Excluding aircraft and parts orders, there was a 0.5 percent decline in October.

Manufacturers' inventories increased by 0.1 percent, or $300 million, to $377.3 billion. Although small, the increase marked the fourth consecutive increase, the government said.

The ratio of inventories to shipments was 1.52, down from 1.55 in September.

New orders for durable goods increased by 3.9 percent, or $4.8 billion, to $129.8 billion, revised upward from the previously reported 3.6 percent gain.

Much of this gain came from a 14.8 percent, or $4.9 billion, rise in orders from the aircraft and motor vehicle industries.

Orders for fabricated metals posted the greatest decline, slipping 6. 8 percent, or $1 billion.

Increases in orders for non-durable goods were widespread in October, with gains posted in the petroleum refining, chemical, tobacco and food industries.

Durable goods shipments rose 1.8 percent, or $2.2 billion, to $126.6 billion, mostly from increased shipments of motor vehicles and parts. Non-durable goods shipments rose by $5 billion during the month.

Inventories at manufacturers of durable goods, those items intended to lsat three or more years, slipped 0.1 percent to $246.7 billion, while inventories for makers of non-durable goods increased 0.4 percent to $500 million.

CHICAGO (DEC. 5) UPI - The Cincinnati Reds early Wednesday agreed to terms with free agent second baseman Bill Doran, who signed a $6.6 million, 3- year contract.

The decision will probably end the Reds' bid for free agent pitcher Zane Smith who is being wooed by the Chicago Cubs and White Sox and the Pittsburgh Pirates.

Doran's contract runs through the 1993 season with a 1-year option for 1994. If the infielder plays at least 140 games in '93, the contract will automatically be extended.

Doran, 32, played the final month of the '90 season with Cincinnati following his acquisition from Houston on Aug. 31 for catcher Terry McGriff and pitchers Butch Henry and Keith Kaiser.

The switch-hitting Doran batted .373 in 17 games for the Reds, finishing the season with a career high .300 average. He was National League Player of the Week for Sept. 10-16 when he hit .588 with a .941 slugging percentage and .667 on-base percentage. However, he was unable to participate in post-season play because of back surgery Oct. 3 for an infected disc.

A native of Cincinnati, Doran hit .288 with Houston before the trade. He had a combined seven home runs and 37 RBI in 1990 with 58 stolen bases.

WASHINGTON (DEC. 5) UPI - Factory orders rose 2.8 percent in October, the Commerce Department reported Wednesday.

The increase, which was greater than many economists expected, was the largest since a 4 percent gain in March, the government said.

New orders for manufactured goods increased $6.8 billion in October to $250.7 billion. Durable goods ordres gained 3.9 percent, with most of the increase in transportation equipment.

Orders for non-durable goods rose 1.6 percent with most of the gain coming from petroleum refining.

Shipments of manufactured goods increased 1.7 percent - or $4.2 billion - in October to $247.5 billion. Shipments for durable goods rose 1.8 percent, with transportation equipment shipments accounting for most of the gain.

Non-durable goods shipments rose 1.6 percent, mostly from increased petroleum refining.

Unfilled orders were up 0.6 percent - or $3.2 billion - to $522.5 billion. Excluding aircraft and parts orders, there was a 0.5 percent decline in October.

Manufacturers' inventories increased by 0.1 percent - or $300 million - to $377.3 billion. Although small, the rise marked the fourth consecutive increase, the government said.

The ratio of inventories to shipments was 1.52, down from 1.55 in September.

New orders for durable goods increased 3.9 percent - or $4.8 billion - to $129.8 billion, revised upward from the previously reported 3.6 percent gain.

Much of this gain came from a 14.8 percent - or $4.9 billion - rise in orders from the aircraft and motor vehicle industries.

Orders for fabricated metals posted the greatest decline, slipping 6. 8 percent, or $1 billion.

Increases in orders for non-durable goods were widespread in October, with gains posted in the petroleum refining, chemical, tobacco and food industries.

Durable goods shipments rose 1.8 percent - or $2.2 billion - to $126. 6 billion, mostly from increased shipments of motor vehicles and parts. Non-durable goods shipments rose by $5 billion during the month.

Inventories at manufacturers of durable goods - those items intended to lsat three or more years - slipped 0.1 percent to $246.7 billion, while inventories for makers of non-durable goods increased 0.4 percent to $500 million.

(DEC. 6) UPI - SPORTS TRANSACTIONS

BASEBALL

Atlanta - Signed free-agent first baseman Sid Bream to 3-year contract.

Chicago (NL) - Obtained minor league third baseman Mike Grace from Montreal to complete an earlier trade.

Cincinnati - Signed free-agent second baseman Bill Doran to 3-year contract, plus 1-year option for 1994.

Detroit - Signed free-agent infielder Tony Bernazard to 1-year contract; waived pitcher Mike Schwabe for the purpose of giving him his unconditional release.

Milwaukee - Signed free-agent outfielder Franklin Stubbs to 3-year contract.

New York (NL) - Signed free-agent outfielder Vince Coleman to 4-year contract.

San Francisco - Traded pitcher Steve Bedrosian to Minnesota for pitcher Johnny Ard and a player to be named.

Toronto - Traded shortstop Tony Fernandez and first baseman Fred McGriff to San Diego for second baseman Roberto Alomar and outfielder Joe Carter; signed free-agent utilityman Pat Tabler to 2-year contract and minor-league pitcher Ravelo Manzanillo to Triple A contract.

BASKETBALL

Boston - Released guard Jim Paxson and Charles Smith.

LA Clippers - Waived forward Cedric Ball; activated forward Ken Norman from injured list.

Miami - Activated guard Keith Askins; waived guard Milt Wagner.

Phoenix - Placed center Andrew Lang on injured list; activated forward Tim Perry from injured list.

COLLEGE

Abilene Christian - Named Ronnie Peacock football coach.

Bowling Green - Named Gary Blackney football coach.

Oregon State - Named Jerry Pettibone football coach.

FOOTBALL

Barcelona (World League) - Announced Josep Figueras acquired ownership rights; team nickname will be Dragons.

Buffalo - Waived defensive back Rick Carey; signed defensive back Clifford Hicks.

Phoenix - Placed linebacker Eldonta Osborne on injured list; activated wide receiver Amod Field from practice roster.

Seattle - Placed linebacker Rufus Porter on injured reserve; signed linebackers Dave Ahrens, Rod Stephens and Donald Miller.

HOCKEY

Hartford - Recalled forward Mark Greig from Springfield (AHL); reassigned defenseman Marc Bergevin and forward Michel Picard to Springfield.

#90339u0806 12/05/1990 ~United Press International

CHICAGO (DEC. 5) UPI - The Toronto Blue Jays early Wednesday signed free agent infielder-outfielder Pat Tabler to a two-year contract. Terms were not disclosed, but Tabler made $725,000 last season, split between Kansas City and the New York Mets.

Tabler, 32, a right-handed hitter, started the 1990 season with Kansas City, where he hit .272 in 75 games with one home run and 19 RBI. He was dealt to the Mets on Aug. 30 for minor league pitcher Archie Corbin, and hit .279 for New York with one homer and 10 RBI.

It is Toronto's second free agent signing in as many days. Late Tuesday, the Blue Jays inked free agent utility infielder Rance Mulliniks to a $3 million, 2-year contract.

ROMULUS, MI (DEC. 5) UPI - Fire broke out on the wing of a Northwest Airlines jet with 69 people aboard at Detroit Metropolitan Airport early Wednesday but it was quickly extinguished and there were no injuries.

The emergency shortly after 6 a.m. caused some tense moments at the airport, where two Northwest planes collided on a foggy runway two days earlier, killing eight people.

Northwest Flight 852 from Seattle had safely landed and was at the gate preparing to take off for Newark, N.J., as Flight 582 when someone in ramp control and a Northwest agent saw smoke coming from one of the 727 jetliner's wings.

The ground agent grabbed an extinguisher and put the fire out within seconds, a Northwest spokeswoman said. Firefighting crews also sprayed the aircraft with foam.

All 69 people aboard were safely evacuated, some through the normal exit route and others from a stairway on the runway. Flight 582 was canceled and all but 15 of the passengers were were put on other flights to New York's LaGuardia Airport.

The Northwest spokesman said the fire was caused by residual fuel in the aircraft's auxiliary power unit. When the pilot started the plane, the fuel ignited, sending smoke and flames from the power unit's wing ducts.

#90339u0814 12/05/1990 ~United Press International
LOS ANGELES (DEC. 6) UPI - Coast Federal Bank, one of the growing number of troubled California thrifts, disclosed Wednesday that it does not expect to be able to meet some of the new federal capital requirements that will become effective at the end of the year.

Coast, which has lost $47 million in the first nine months of this year, also said that it has been forced to enter a supervisory agreement with federal regulators.

That pact bars the 120-branch thrift from paying dividends, repurchasing stock or redeeming any subordinated debt without approval from regulators.

Coast said it would not be able to meet risk-adjusted capital requirement of 7.2 percent. It also said it is unlikely that it can meet the pending higher leverage capital rule expected to become effective next year.

Coast said that part of its problems stem from not receiving any acceptable offers for its eight branches in the Central Valley area of California. It said the branches will not be sold.

Coast also said it continues to evaluate offers for its 19 offices in the San Diego area, but added that those bids were below original expectations.

#90339u0820 12/05/1990 ~United Press International
OTTAWA (DEC. 5) UPI - A year ago Thursday, a gunman who blamed women for his failures shot 14 women to death at an engineering school in a tragedy that touched off months of bitter debate over his motives and led to increased sexism on Canadian campuses.

Only the Ecole Polytechnique, where 25-year-old Marc Lepine killed himself after his rampage, has been silent about the tragedy, its unwillingness to speak publicly reinforced by a new security system of closed-circuit monitors and controlled access cards.

''Let's forget about this guy. This guy was completely crazy. By talking about him ... you are just encouraging more crazy people to act like him,'' the school's director, Andre Bazergui, told reporters recently.

The engineering school will be closed Thursday, prefering to honor its dead with a morning mass at the huge Notre Dame Cathedral. Church bells in Montreal will begin ringing at 5:30 p.m., the hour the massacre began.

In Ottawa, Parliament will observe a minute of silence, while dozens of universities will hold candlelight vigils to remember the dead women.

In the United States, women's groups also have planned vigils in front of the Canadian Consulate in San Francisco and the Canadian Embassy in Washington.

At many events in Canada, extra police officers will be assigned as a precaution. Guy Lachaine, chief of security at the University of Ottawa, said female officers Thursday will monitor special workshops on violence. ''We don't anticipate any problems, but you never know,'' he said.

The anniversary of the massacre has heightened debate over whether Lepine was simply a madman or a reflection of society's resentment toward women. Michael Mandel, a professor at the Toronto-based Osgood Hall law school, said the backlash against feminists at universities has become more pronounced with the worsening economy.

''There is a feeling that feminism is to blame for unfulfillment and a declining standard of living,'' Mandel said, adding that women have become the ''new scapegoats'' as they compete increasingly with men for enrollment in limited programs such as law, medicine and engineering.

The most noticeable impact of the massacre came from professional engineers who set up scholarships and cracked down on blatant sexism at several universities. At the University of Alberta, the Dean of Engineering last winter filed formal complaints against his own students who chanted ''shoot the bitch'' during the faculty's annual skit night shortly after the massacre.

But Rachel Black, a student at the University of Windsor in southern Ontario, said little has changed for women students. Several recent assaults against female students - four of them involved men trying to force women into their cars - prompted the university to establish a program in which volunteers escort women home after dark.

''I've started to take more precautions,'' Black said. ''I don't walk home alone, I take a cab.''

But Black said special programs aimed at protecting women are just ''Band-Aid solutions'' and the ''larger social element'' must be addressed.

The grief of those who witnessed the violence a year ago is still apparent and in some cases has led to profound changes. Danielle Leblanc, a sociology teacher at the engineering school, told the Montreal Gazette that she escaped the building when a security guard warned students someone was on a rampage in the school. Leblanc sought refuge in a stairwell, then fled down three flights of stairs to a parking lot. Inside, several of her students lay dead.

Leblanc said her awareness of discrimination has increased since the massacre.

''Maybe it's just part of my evolution,'' she said, ''but this year, for the first time, I understand it's not easy being a woman.''

But Leblanc is angry that students at the Ecole Polytechnique have refused to speak about the violence. ''Poly is a cold and closed place,'' she said.

#90339u0835 12/05/1990 ~United Press International

NEW YORK (DEC. 5) UPI - Latest metal market prices as quoted Wednesday by the American Metal Market, authoritative metals publication:

Aluminum, New York Merchants, 99.7 percent pure ingots 70.00-72.00 c- lb.

Antimony, domestic, refined in alloy, $2.00 lb.

Copper, electrolytic wirebars, delivered U.S. (Warrenton Refining Co.) 116.63-120.00 c-lb.

Lead, common, U.S. primary producers 37.00-45.00 c-lb.; U.S. non- primary (secondary) producers 40.00-45.00 c-lb.

Magnesium, 99.8 percent, ingot 163.00 c-lb.

Manganese, 99.9 percent, boxed regular 91.00-95.00 c-lb.

Mercury, $192.00-$210.00 76-lb. flask.

Nickel, briquettes delivered to customers, merchant, N.Y., $4.50-4.75 per pound.

Palladium, N.Y. Am. Met. Mkt. dealer $94.00-$96.50 per troy ounce.

Platinum, soft, 99.5 fine, producer - $426.00-$431.00; dealer-approx. , $428.00-$450.00 per troy ounce.

Steel, No. 1 heavy melt scrap - Pittsburgh $105.00-$109.00 per gross ton (consumer buying price); Am. Met. Mkt. composite scrap price $105.67 per ton.

Tin, N.Y. Am. Met. Mkt. ex-dock - 277.75 c lb.

Titanium, aircraft quality, 8 1/8 inch round rotating billet, f.o.b. shipping point $7.80-9.59 lbs., domestic sponge 99.3 percent, domestic and imported duty-paid $5.00-5.50 lb.

Tungsten powder (H-Red), 99.9 percent minimum pure $10.00 per lb.

Zinc, prime western, U.S. 80.00 c-lb.

#90339u0837 12/05/1990 ~United Press International
WASHINGTON (DEC. 5) UPI - There is no guarantee that economic sanctions will force Saddam Hussein to get out of Kuwait or cause enough domestic unrest to topple his dictatorship, CIA Director William Webster told a House panel Wednesday.

And Webster told the House Armed Services Committee that without any conflict, Iraqi ground troops can nearly maintain their current levels of readiness for as long as nine months, and the air forces can keep up current levels of readiness for three to six months.

While Webster testified on the House side of Capitol Hill, Secretary State James Baker outlined the administration policy before the Senate Foreign Relations Committee, emphasizing he would go to Baghdad not to negotiate with Saddam, but to insist that Iraq unconditionally get out of Kuwait.

The testimony came amid growing calls, chiefly from Democrats, to go slow and see if economic sanctions can do the job without resorting to war. And members of Congress have been insisting that the question of using force be put before Congress.

Webster painted a picture of an Iraqi civilian economy increasingly constricted by the highly effective sanctions, but said the military side of the economy could hold out longer.

''Saddam apparently believes that he can outlast international resolve to maintain sanctions. We see no indication that Saddam is concerned, at this point, that domestic discontent is growing to levels that may threaten his regime or that problems from the sanctions are causing him to rethink his policy on Kuwait.

''The Iraqi people have experienced considerable deprivation in the past. Given the brutal nature of the Iraqi security services, the population is not likely to oppose Saddam openly,'' said Webster.

''Our judgment has been and continues to be that there is no assurance or guarantee that economic hardships will compel Saddam to change his policies or lead to internal unrest that would threaten his regime.''

In terms of specifics, Webster said a number of light industries in Iraq been sharply curtailed or have closed entirely, including the country's only tire-manufacturing plant.

But refining and power production operations continue. Iraq has been largely cut off from foreign exchange, he said, and it will probably exhaust its

reserves by next spring.

Food stocks, he said, are adequate for the next several months but black market prices are shooting up. He noted that for the second time civilian rations have been cut and rations for military personnel and their families has been raised.

But he said that by spring most Iraqis will face major changes in their diets and unless there is humanitarian food aid items like sugar and edible oils will be in short supply. He also said Iraq does not have the capability to become self-sufficient in food by next year.

By spring, he said, it is likely that only energy-related and some military industries will still be fully operating, and ''this will almost certainly be the case by next summer.''

''Although sanctions are hurting Iraq's civilian economy, they are affecting the Iraqi military only at the margins. Iraq's fairly static defensive posture will reduce wear and tear on military equipment and, as a result, extend the life of its inventory of spare parts and maintenance items,'' Webster said.

''Under non-combat conditions, Iraqi ground and air forces can probably maintain near-current levels of readiness for as long as nine months,'' he said.

But the most sophisticated aircraft, he said, should stay in peak condition for three to six months, largely because of their greater complexity and Iraq's reliance on foreign equipment and technicians.

#90339u0845 12/05/1990 ~United Press International

(DEC. 5) UPI - Iraq has accepted talks with the Bush administration as a chance to end the Persian Gulf crisis without a bullet being fired. The State Department says Iraq agreed to a proposal for meetings between its foreign minister and President Bush in Washington sometime after December 15. Iraq also agreed to talks between Secretary of State Baker and Iraqi President Saddam Hussein in Baghdad sometime before January 15th, the deadline the U-N has set for Iraqi forces to leave Kuwait or face war.

In testimony before the Senate Foreign Relations Committee today, Baker refused to disclose what he'll say to Saddam. But Baker made it clear that he won't negotiate or- quote- ''walk back from the U-N Security Council resolutions.'' Baker said that NO one is making a decision to go to war now and that the administration will use the next six weeks- quote- ''to exhaust all diplomatic opportunities.''

President Bush today picked up Argentina's backing of his tough stand toward

Saddam Hussein. In turn, Argentine President Carlos Menem won Bush's support for his show of force against a military rebellion two days before Bush's arrival. Bush took a break from his rigid five-nation Latin American tour to play tennis with Menem and the two leaders sat together later during an evening rodeo at the Palermo Rural Stadium.

A Soviet lawmaker and anti-nuclear leader, on a tour of the United States, is urging Americans to demand an end to nuclear testing in the Nevada desert. Olzhas Suleimenov told reporters today in San Francisco that the Cold War is not finally over yet because nuclear tests continue. Suleimenov says the majority of nations, including the Soviet Union, favor the comprehensive test ban. He accused the Bush administration of opposing efforts to negotiate such a ban.

A report by the American Psychological Association says women are twice as likely as men to get depressed. The report says a lot of it has to do with sexual and physical abuse, unhappy marriages and poverty. And it says that contrary to popular belief, biological factors such as premenstrual syndrome, menopause and post-partum depression play a relatively small role in depression in women.

Experts are saying that school children would eat healthier lunches if schools lock up the candy and soda machines. The unofficial Citizens' Commission on School Nutrition said the government should set nutrition standards for school meals. The panel also recommended steps to reduce the amount of fat in school lunches over the next several years. One panel member noted that lifetime eating patterns are established in childhood.

#90339u0846 12/05/1990 ~United Press International

WASHINGTON (DEC. 5) UPI - Industrial productivity increased a revised 0.2 percent in the third quarter, the Labor Department reported Wednesday. The figure was revised downward from a previously estimated increase of 1.6 percent for the quarter, the government said.

The department's Bureau of Labor Statistics said that in the overall business sector, productivity rose a revised 0.4 percent, while gaining 0.2 percent in the non-farm business sector, 5.1 percent in manufacturing, 7.4 percent in durable goods manufacturing and 1.6 percent in non-durable goods manufacturing.

Productivity rose more slowly in the business and non-farm business sectors during the quarter. In manufacturing, unit labor costs fell, reflecting, in part, faster productivity growth in the third quarter than in the previous period, the government said.

Among non-financial corporations, productivity declined at an annual rate of one percent in the third quarter and output declined 0.8 percent. Despite the

reduced output, the hours worked at non-financial corporations increased by 0.2 percent.

Business productivity increased at an 0.4 percent annual rate in the third quarter, while output rose slightly at 0.1 percent and hours worked fell 0.4 percent. The decline in hours worked marked the first decline since the recession of 1982, the government said.

Hourly compenstation increased at a 4.5 percent annual rate during the quarter compared with a 5.4 percent increase in the second quarter. Real hourly compensation, which accounts for inflation, fell 1.8 percent in the quarter after increasing 1.6 percent in the second quarter.

Productivity in the non-farm business sector rose 0.2 percent in the third quarter while output was unchanged and hours worked fell 0.2 percent, the first decline since 1986. Hourly compensation in the non-farm business sector rose 4.6 percent during the quarter while real hourly compensation fell 1.8 percent.

Manufacturing productivity increased by an annual rate of 5.1 percent during the quarter, the largest increase since 1987. Hourly compensation increased by 3.8 percent but fell 2.4 percent due to inflation.

In the non-financial sector, productivity declined one percent from the previous quarter, output slipped 0.8 percent and hours worked increased 0.2 percent. Compensation in this field increased 4.3 percent on an hourly basis but when factored to consider inflation, compensation fell two percent.

(DEC. 5) UPI - Correction: fixing typo 6th item xxx when they stopped the car.

A former associate of deposed Panamanian dictator Manuel Noriega staged a takeover of the nation's police headquarter today just hours after his daring helicopter escape from an island prison. He was reported to have as many as 100 rebel officers with him. U-S troops surrounded the police headquarters at the request of the Panamanian government.

The incident at police headquarters came as Panamanian workers prepared for a general strike today to protest government economic policies. Yesterday, thousands of anti-government protesters marched in the streets of Panama City in support of the workers.

The Iraqi news agency says President Saddam Hussein and his few Arab allies have issued a statement saying that he would prefer the gulf crisis to be settled within the Arab world. Saddam said in the joint communique that ''an Arab-Arab dialogue is a necessity.''

Also today, the Iraqi news said Soviet hostages held by Iraq began to return home. An UNdisclosed number of Soviet military advisors and consultants reportedly began leaving Iraq on flights to Amman, Jordan. Saddam said yesterday that the estimated 33-hundred Soviets would be allowed to return home, but Moscow countered that the move would not lessen its opposition to the Iraqi occupation of Kuwait.

U-S Trade Representative Carla Hills says in Brussels that world trade talks involving 107 nations are- in her words- ''very near the end of the road'' over an impasse on agriculture subsidies. Four years of so-called GATT talks are threatened with collapse because of a dispute between the United States and the 12-nation European Community over the E-C's huge farm supports.

Three of the eight people killed when two jets collided on a foggy runway at Detroit Metropolitan Airport Monday were executives at International Paper Company's corporate offices in Memphis. Three other company officials survived the crash. All but seven of the 24 people treated for injuries in the crash were released from Detroit-area hospitals by yesterday afternoon.

There was another emergency at Detroit Metropolitan Airport this morning. Passengers aboard Northwest Airlines Flight 582 ... bound for Newark, New Jersey ... were evacuated when the pilot spotted smoke coming from an auxiliary power unit on the 727's wing. Witnesses say it appears the power unit caught fire. The passengers were evacuated with NO injuries.

The Boston Herald reports that Teamsters President William McCarthy may face a federal contempt citation for appointing an associate with alleged underworld connections as vice president of the nation's largest union. The official, Jack Yager, reportedly was removed from office last week on orders from an independent administrator who oversees operations of the union under a federal consent decree.

Two gunmen, one with a bomb wired to his body, kidnapped a woman in Queens, New York, last night in an attempt to force her to withdraw money from a bank. However, police rescued the woman after a tense standoff with her captors. Police discovered the man with the bomb strapped to him and a hand grenade in his pocket when they stopped the car. The kidnapped woman was in the trunk of the car.

The head of the the Consumer Product Safety Commission is warning parents to be on the lookout for UNsafe toys. Jacqueline Jones-Smith says her office received reports of 33 deaths from UNsafe toys between January 1989 and September. She said parents who suspect that they may have purchased an UNsafe toy should contact either their state consumer products office or the federal Consumer Product Safety Commission in Bethesda, Maryland.

#90339u0890 12/05/1990 ~United Press International

HOUSTON (DEC. 5) UPI - Thieves used computers to obtain millions of dollars in free telephone service through the Johnson Space Center in what one expert described as the biggest such theft in the nation, a newspaper reported Wednesday.

The Houston Chronicle said hundreds of people used the illegal system during a period of at least two years at a estimated cost of up to $12 million.

NASA could not determine precise figures for the loss, said space center spokesman Steve Nesbitt. The $12 million figure was based on costs of similar break-ins nationwide, said law enforcement agents specializing in computer

crime.

''It's the biggest one I've ever heard of and certainly the longest- running one I've ever heard of,'' said detective Jim Black, computer crime unit coordinator of the Los Angeles Police Department and an authority on telecommunications theft.

Telephone service was stolen by using a long-distance credit card number and by direct use of NASA's phone lines, Nesbitt said. The credit card fraud was discovered by AT&T when use of the card's number exceeded typical patterns.

There was no indication of who was responsible for the thefts.

Heavy losses were sustained through four lines in the space center's regular phone system.

''That was shut down. It's been deactivated,'' Nesbitt said of the compromised points of access.

The NASA theft is the second such penetration of a government agency in recent weeks, the newspaper reported. On Nov. 17, it was reported that hackers and others had stolen phone service worth millions through the Houston offices of the Drug Enforcement Administration.

Hackers try to gain unauthorized access to computer systems and refer to unauthorized use of telephone service as ''phone phreaking.''

Assisted by computers, ''phreakers'' find PBX numbers through trial and error by calling all available numbers in a prefix, then share the numbers.

Private branch exchange is the name given to the telephone switching systems commonly used by medium and large companies. NASA's system was one form of PBX.

In both government break-ins, the intruders gained access to the Federal Telephone System, a dedicated phone service similar to a WATS line. There is no per-call billing on the FTS, a fact that allows abuse to go undetected for so long, computer underground sources told the newspaper.

''That was a number that was set up for our off-site offices to be able to reach the government long-distance service,'' Nesbitt said. ''People in the off-site offices would call in, they would have an FTS dial tone, and off they would go. That number was recently disconnected, '' he said.

Black and Gail Thackeray, an assistant attorney general for the state of Arizona and an expert in telecommunications theft, said such penetrations typically cost from $100,000 per month at a small company to $500,000 per month at a large firm.

If NASA's phones were compromised for 24 months, the agency could have lost service worth up to $12 million, they suggested.

''PBX's are the hacker's choice for phone fraud because of the shielding capability,'' Thackeray said. ''Somebody trying to back trace the loss comes up against the corporation instead of the hacker's home phone ... We all pay for this.''

#90339u0943 12/05/1990 ~United Press International

WATERLOO, Iowa (DEC. 5) UPI - A Waterloo-based investment group, the Iowa Acquisition Group, said Wednesday it has written Pan American World Airways expressing interest in buying the financially troubled airline.

Samuel Nordarse, a retired University of Northern Iowa professor, said the group has first targeted New York-based Pan Am, but has also expressed interest in Eastern Airlines, of Miami, now under Chapter 11 bankruptcy protection and being run by a court-appointed trustee.

He said if the group cannot acquire either company, it will take a look at other carriers suffering from financial difficulties, such as Continental Airlines, which filed for Chapter 11 protection earlier this week.

Nodarse said the group wants to buy financially troubled companies and move them to Iowa. He said the idea is not as far-fetched as it sounds, and is attracting attention throughout the state.

''We have a lot of interest, more than I expected,'' he said.

Nodarse and another partner, Pan Am Capt. Neil Sapp of Miami, met with 175 government and business leaders Tuesday to explain the proposed acquisition of Pan Am and other companies. Nordarse said he was surprised at the interest because many of the participants had to travel several hours through a driving snow storm to attend the meeting.

Nodarse said the partners in Iowa Acquisition will be attempting to sell 300,000 or more $5,000 denomination bonds to finance the acquisition. Money from the sale would be invested with Iowa banks, with the interest used to pay off loans from investment bankers. Buyers of the bonds would each be given 1,000 shares of stock in the group, but no dividends would be paid until the bonds mature in nine years.

Nordarse, who escaped from Cuba in a small boat 27 years ago, said he believes he can sell the bonds. He said he has been contacted by several out-of-state investors, but is hoping that the majority of the bonds will be sold to Iowans.

''I have been in Iowa many years,'' he said. ''Sometimes, I think Iowans are a

little apathetic, but once you explain things to them, to my surprise I find they aren't. You can't get any better backers than Iowans.''

Sapp said he believes there is a ''high probability of success'' for the Pan American offer. He said he also believes that moving the international carrier's headquarters to Iowa would benefit the company.

''The rest of the country looks at you in Iowa with envy because of your geographical center, lifestyle and high literacy rate,'' Sapp said.

Nordarse said there has been no lack of interest from Iowa communities interested in becoming involved in the plan.

''We're talking to Cedar Rapids, Des Moines, Waterloo,'' he said. ''Mason City called us. They want to be a part of it.''

Nordarse said while the company has indicated its intentions to Pan American, a detailed buyout offer has yet to be drafted.

''We would like to make an offer in January,'' he said.

#90339u0948 12/05/1990 ~United Press International

WASHINGTON (DEC. 5) UPI - The Federal Reserve, in its periodic snapshot of the U.S. economy, Wednesday said business conditions display an overall ''weaker pattern'' with declines in consumer confidence, retail sales and business loan demands.

The survey, which was conducted by each of the 12 Fed districts, found economic activity declining in many of the regions after being sluggish in recent months.

''Several districts report a decline in consumer confidence and business confidence and many refer to expectations of continued diminution in economic activity,'' the Fed said in its ''Beige Book.''

Retail sales, after being adjusted for inflation, fell below year-ago levels in almost all of the 12 Fed districts and manufacturing conditions and construction have weakened in most of the regions.

The Fed noted that soft domestic demand has been offset in part by strong export orders. Another bright spot was found in agriculture, which has been boosted by strong crop yields and high livestock prices.

Several districts also reported declines in business loan demands and some tightening of credit standards.

Retail sales have weakened throughout the United States. The Fed survey found the dollar volume of retail sales to be lower in most of the districts in October than a year ago in most of the 12 districts.

''At best, only slight icreases are reported in the rest of the districts,'' the Fed said.

Poor consumer confidence levels were attributed to retail sales declines in Chicago, Atlanta and St. Louis. Most of the districts reported that retailers were pessimistic about slaes prospects for the vital Christmas season.

The Cleveland, Chicago and St. Louis districts noted ''particular weakness'' in the automobile industry. But again, weak domestic demand for manufactured goods was partially offset by strong export orders.

Richmond and Atlanta reported stong export shipments. Most districts also said their manufacturing inventories appear to be under control.

''Manufacturers have expressed concern about business prospects for the coming months,'' the Fed said.

In Boston, for example, a majority of manufacturers forecast a national recession lasting two to four quarters. The region's economy has been wallowing in recession this year.

In other regions, manufacturers were mixed in their outlook for the economy. In San Francisco, the word was ''continued deterioration'' but in Philadelphia manufacturers expect ''modest increases'' in orders and shipments.

Most of the districts continued to report sluggishness in construction activity, with weakness in residential building. Several districts cited ''a glut'' of houses for resale, the Fed said. Housing sales were down in Atlanta, St. Louis and Minneapolis.

Commercial construction was ''generally weak,'' with New York and San Francisco suffering an abundant supply of office and commercial space. But Chicago and Minneapolis reported brighter prospects for commercial building.

None of the Fed's districts reported significant wage pressures and reports of price increases were mixed. Several districts expect price discounting by retailers this Christmas season to attract reluctant shoppers.

In the financial sector, several districts reported weaker demand for consumer and business loans and almost all districts noted some tightening of loan standards.

''Reports of banks' willingness to lend are mixed, with New York reporting that banks are somewhat less willing to lend but with St. Louis reporting no

change,'' the Fed said.

The most positive aspect of the report came from agriculture, which appeared strong across the country.

The ''Beige Book'' is prepared by Federal Reserve staff members and forward to the Fed's Open Market Committee, which sets monetary policy. The committee is scheduled to meet Dec. 17-18.

(DEC. 5) UPI - U-S troops surround the headquarters of the Panamanian police at the request of the Panamanian government. The move follows seizure of the building by rebel police officers led by a former police chief. The U-S troops have managed to confine the incident to the immediate vicinity of police headquarters and the rest of Panama City appears calm. President Guillermo Endara says most of Panama's 12- thousand-member police force remains loyal to his U-S backed government.

President Bush is in Argentina on the third stop of a six-day Latin American trip. Thousands of police are on duty throughout Buenos Aires two days after the Argentine government put down a rebellion by dissident military units. Bush arrived by helicopter from neighboring Uruguay where he told reporters

yesterday he was NOT ''in a negotiating mood'' when it comes to settling the Persian Gulf crisis. Bush says he still backs U-N resolutions calling for the UNconditional withdrawal of Iraqi forces from occupied Kuwait.

Iraq has begun releasing some of the estimated three-thousand Soviet nationals it once said could NOT leave until they finished work they were hired to do. Moscow is major supporter of U-N resolutions against Iraq and it says freedom for its hostage citizens will NOT change the Soviet position. The release comes as Iraq prepares for high-level, face-to-face talks with the United States on the Kuwait crisis. Saddam Hussein says he still wants an Arab solution to the crisis.

A group calling itself the Citizens Commission on School Nutrition is urging schools to lock up the candy and chips and put more fruit and vegetables in the cafeteria. The panel also says there needs to be a sharp increase in funding for the school lunch program, which feeds about 24-Million children a day. The Washington-based group says a recent federal study shows that fat accounts for 37 percent of calories consumed by children and that the fat level in school lunches needs to be reduced.

A new poll says most of the Americans questioned favor state laws requiring seat belts, but that there is less general agreement on the value of using collision air bags. The survey was conducted by Louis Harris and Associates, Incorporated for General Motors and Prevention magazine. It found that 81 percent support seat belt laws, but only about half believe air bags offer additional protection in a crash. One in five of those surveyed admitted they have driven after drinking.

#90339u1004 12/05/1990 ~United Press International

NEW YORK (DEC. 5) UPI - The Federal Mediation and Conciliation Service stepped up its efforts Wednesday to bring about a settlement of the 42-day-old Daily News strike after two days of negotiations between management and the powerful drivers' union.

Bernard E. DeLury, director of the FMCS, met informally in Manhattan with Newspaper and Mail Deliverers Union President Mike Alvino and other union leaders to ''get a sense of the situation,'' according to the service's district director, Kenneth Kowalski.

''He has been involved through messages and memos and now has been able to meet and talk with union leaders,'' Kowalski said. ''We expect to have more meetings with the drivers in the future and with other striking unions as well.''

Mediator Jack Sweeney sat in Monday and Tuesday on the first direct talks between the drivers and News management since the bitter strike began Oct. 25.

The union's 743 members who worked for the News, making up the second-largest News union after the Newspaper Guild, were the first to walk off their jobs.

Sources at the Newspaper Guild said the drivers and management agreed on a list of 14 items that must be settled, but the contents of the list were not disclosed.

Alvino skipped a meeting Tuesday with Cardinal John O'Connor and leaders of six other striking union to attend a negotiating session with News Labor Relations Director Ed Gold and attorney Robert Ballow. Later he told union leaders at a briefing at Guild strike headquarters that the strike would last ''until all unions have contracts.''

''We're with you,'' Alvino said. ''This is one strike.''

Alvino repeated previous statements that his union was willing to give the News ''relief'' if he was shown areas in which personnel cuts could be made. The News has demanded that the unions give up what it called featherbedding and overstaffing practices which it said cost the 71-year old morning tabloid newspaper millions of dollars every year.

O'Connor came out of his meeting with union leaders critical of the News for hiring permanent replacement workers for the strikers so it could continue publication. He said that as a neutral party, he would write city business and political leaders uring them to join him in an effort to end the strike.

The cardinal said he would testify next week before a hearing chaired by Sen. Howard Metzenbaum, D-Ohio, on proposed federal legislation to outlaw the use of permanent replacement workers.

In another development, city transit police joined forces with the Metropolitan Transportation Authority in its legal battle to oust Daily News hawkers from the city's subway network and from the facilities of the Long Island Railroad and Metro North commuter rail system, all of which are owned and operated by the MTA.

Federal Judge Miriam Cedarbaum granted the Police Benevolent Association a motion allowing it to become a party to the News' suit against the MTA, which is being sued by the paper for its attempt to ban hawkers from subway and commuter railroad platforms.

Cedarbaum said she will issue a final ruling on Friday on whether the hawkers may remain in the stations.

Meanwhile, strikers fanned out through the city's subways Wednesday morning with leaflets asking riders not to buy the News.

Adding pressure to the subway sale battle, the News distributed a new afternoon edition Tuesday, making it the only major city daily to boast an afternoon edition.

News spokesman John Sloan said the paper was being sold in subway and railroad stations and would, ''provide New Yorkers with late breaking news, sports and business.''

About 2,500 members of the Guild and eight unions represented by the Allied Printing Trades Council walked off their jobs at the News Oct. 25 after 10 months of fruitless contract negotiations. Since then there have been sporadic talks between union negotiators and managment with federal mediators in attendance.

Before the strike, The News, founded in 1919, was the largest- circulation local newspaper in New York. It is owned by the Tribune Co., the Chicago-based publishing, broadcasting and entertainment conglomerate.

There have so far been more than 200 incidents of violence connected with the strike, with each side accusing the other of resorting to and encouraging violent tactics. The strike has greatly slashed the News' readership and advertising revenues, with most of its approximately 615 pre-strike advertisers pulling out.

#90339u1007 12/05/1990 ~United Press International

LONDON (DEC. 5) UPI - A nuclear meltdown is possible in British submarines because of cracks in coolant circuits in nearly half the nuclear-powered fleet the environmental group Greenpeace said Wednesday.

A report commissioned by Greenpeace from a firm of independent engineers, Large and Associates, said if reactors are suddenly shut down the cracks could split without warning, allowing coolant to escape.

Greenpeace said such an event could result in the meltdown of the nuclear core possible loss of the submarine and crew and environmental contamination.

''These nuclear submarines are highly dangerous and should not be going anywhere,'' said Greenpeace spokeswoman Janet Convery.

''It is irresponsible of the Ministry of Defense to allow these vessels to go to sea when there is a risk of a core meltdown,'' she said.

A Ministry of Defense spokesman declined to comment on the report but said the ministry would not allow nuclear submarines to operate unless they were safe.

Greenpeace vessels Monday unsuccessfully tried to stop HMS Revenge, a Polaris

submarine said to be affected by cracks, from putting to sea.

The group claims Revenge was made ready in a hurry to replace HMS Resolution, which is believed to have been on patrol for some 3 weeks longer than the normal 12-week period because other Polaris submarines suffer from the defects.

Britain has eight Polaris missile submarines, four of which Greenpeace says are affected by cracks.

The Ministry of Defense admitted in February that HMS Warspite, a hunter-killer submarine, was defective. Warspite has been scrapped along with two other hunter-killer submarines, despite a $348 million refit.

Large's report claims four more similar submarines have cracks in their coolant circuits and are to be decommissioned, leaving a fleet of just six.

Greenpeace's campaign against nuclear proliferation was handed a setback earlier this week when British courts ordered the environmental organization not to interfere with British nuclear fuel industry boats carrying nuclear wastes at sea.

The court also ordered Greenpeace to pay damages to British Nuclear Fuels Co. for trying to prevent the firm's boats from dumping nuclear waste at sea.

#90339u1021 12/05/1990 ~United Press International

WASHINGTON (DEC. 5) UPI - A genetic discovery in electric ray fish may shed new light on cystic fibrosis in humans and help the search for drugs against the common, inherited fatal disease, researchers reported Wednesday.

German scientists said they have identified and duplicated a gene that codes for production of a protein that regulates the flow of salt in and out of cells of electric rays.

That finding could have important implications for cystic fibrosis patients because defective salt regulation is a central feature of the disorder, in which thick mucus clogs the lungs and leads to life- threatening infections. About one in 2,000 white babies are stricken by cystic fibrosis, and most patients die before age 40.

Last year, researchers pinpointed the genetic flaw that causes about 70 percent of cystic fibrosis cases. But contrary to expectations, the affected gene did not code for production of a salt gateway, called a chloride channel. Instead, researchers suspect the gene codes for a channel for another type of molecule, which in turn regulates chloride traffic through another, undiscovered channel.

Chloride - which is a component of salt - helps regulate cells' water balance, and upsetting that balance may be what causes the mucus of cystic fibrosis patients to thicken.

In a study published in the journal Nature, Thomas Jentsch and colleagues from Hamburg University said they were able to find the gene for chloride channels in so-called torpedo rays with almost no knowledge of what type of gene or protein for which they were searching. The protein does not resemble any other channel yet discovered in cell membranes.

Torpedo rays, which are bottom-dwelling, slow-moving fish that look somewhat like stingrays, use their electric organs to produce shocks of about 100 volts to stun their prey. The rays were chosen for the study because their ability to generate relatively large electric currents hinges on extremely high concentrations of cells rich in chloride channels.

Scientists should be able to use the information garnered from the eels to find similar chloride channels in humans, said Robert Beall, medical director of the Cystic Fibrosis Foundation.

''Researchers have a 'fishing pole' to literally go and fish out the chloride channel in humans,'' Beall said.

In addition, Beall said incorporating both the defective cystic fibrosis protein and the chloride channel into tiny bubbles called liposomes may offer a new way to rapidly screen for drugs against cystic fibrosis. If a drug counteracts the harmful impact of the defective protein, the chloride channel should work properly.

Currently, there is no treatment to prevent or directly attack cystic fibrosis. But some patients live into their 20s or 30s with the help of infection-fighting drugs and enzyme supplements to improve their impaired digestion.

#90339u1049 12/05/1990 ~United Press International

EASTERN SAUDI ARABIA (DEC. 5) UPI - Operation Desert Shield is into its fourth month, and soldiers deployed in the Saudi desert say they've gotten used to about everything - except the lack of cold beer.

Alcohol, forbidden by the Koran, Islam's holy book, is permitted in some Arab nation, but not in conservatively Saudi Arabia, so the closest thing to a stein of beer in the homeland of the prophet Mohammed is non- alcoholic brew.

''I drink 'near beer' because I like to drink beer and its the closest thing I got to home since they won't give us the real stuff over here,'' said Sgt. Dan Moody of Glenville, Ga. ''It's a long way from real beer, it doesn't have the alcohol in it and it tastes a lot different, but it gets by.''

Moody said some of the men in his unit drop by a truckstop grocery along a desert highway in eastern Saudi Arabia whenever possible and bring home a six-pack of ''near beer.''

Staff Sgt. Frank Hall of Orlando, Fla., said there are some advantages to the brew-without-a-kick. ''We get nearly drunk this way, get a near hangover, the only thing we get out of it really is the beer burp after we're finished,'' he said.

''Hey it's a state of mind, it gives us something to go for because you can't have alcohol here in the kingdom ... so it's a way to escape,'' Hall said.

There are several brands available for the ''near beer'' drinker, ranging from those made in the Philippines to those coming from countries like Germany and Switzerland, where beer drinking - and lots of it - is a way of life.

Among the ''near beer'' imports available at a Safeway grocery store in one eastern Saudi city are Moussy from Switzerland, Barbican from England, San Miguel from the Philippines, Prostel from Germany and Swan from Australia.

Moussy offers a dark beer for those that prefer a stout brew, and a low-calorie beer for those who can pinch more than an inch around the belly.

American GIs miss their Budweiser, Miller, Michelob, Busch or Coors. But the soldiers have only been in the kingdom four months and many of the immigrants who perform the service-oriented tasks in Saudi Arabia go as much as a decade without their favorite drink.

Carlos Averin, a coffee shop clerk from Manila, said he has been in the kingdom for nine years without alcohol. Back in the Philippines he would be throwing back a few San Miguels and plans to do the same when his work contract in the kingdom expires in two months.

''We will be having a good time with the San Miguel beer and we might be having a good party,'' he said.

If Averin live nine years without an alcoholic beer, and desert-weary soldiers said they too will be able to endure.

''You can make it, I mean it's not a do-or-die type situation,'' Hall said, noting that the ''near beer'' is psychological stress reducer, kind of the next best thing to being home.

Sitting in the front seat of a military truck with the door open and the sun beating down across the desert, Hall said even though the ''near beer'' was a comfort, ''I guess a good ice cold beer would be really good today.''

#90339u1061 12/05/1990 ~United Press International

PLEASANTVILLE, NY (DEC. 5) UPI - First it was Pepsi, then Big Macs. Now Reader's Digest is headed to Moscow in a Russian-language version, the magazine reported Wednesday.

George Grune, Reader's Digest chairman and chief executive officer, said publishing in the Soviet Union would begin in August next year with the magazine sold primarily at newstands.

Articles will be translated from the U.S. edition of the magazine, he said.

Grune said Reader's Digest had been assured complete editorial freedom by Soviet officials.

''Because of that commitment, as well as the pledge there would be no censorship of any articles we intend to publish, we are going ahead with our plans for a Russian-language edition,'' he said.

The company has contracted with three separate Soviet firms to produce and distribute the Russian edition, he said. The first issues will have an initial circulation of 50,000, and rise to a maximum of 100,000 until a two-year test period is over.

''The company will use this time to determine the feasibility of doing business in the Soviet Union and measure the level of interest in its magazine '' he said.

Each issue will average 160 pages and carry advertising from companies around the world, he said.

The addition of the Russian edition will mean Reader's Digest is published in 16 languages and 40 editions.

-30- 1551

#90339u1066 12/05/1990 ~United Press International

WASHINGTON (DEC. 5) UPI - On the late October Saturday that the Senate approved the historic budget agreement, Sen. Warren Rudman, R-N.H., a blunt-spoken veteran, sent political chills through the chamber.

Congress, Rudman said, will have to ''get serious'' in the next two years about means-testing entitlement programs, starting with Social Security and Medicare, or ''we will be back in the same mess three years from now.''

Through means-testing, used in many federal programs, federal assistance is provided in relation to a person's finances - more for the poor and less for the well-off.

The five-year budget package, pushed to passage in the last days of the 101st

Congress at great political cost, is designed to cut the deficit by close to $500 billion.

But few believe that will be enough even if the economy improves and as the ''peace dividend'' becomes a mirage in the rising costs of Operation Desert Shield in the Persian Gulf.

That means Congress, beginning with the session that opens Jan. 3, will have to start scratching for still more money, picking over the ''untouchable'' items that littered the floor of the negotiating sessions.

One of those areas, according to Rudman, has to be the entitlements programs, the biggest and fastest-growing part of the budget.

The federal budget this year breaks down to 24 percent for the military, 17 percent for non-defense discretionary spending, 14 percent for interest - and 49 percent for a wide range of entitlement programs. Rudman said that these programs, unless checked, could reach 70 percent of the budget in 1996.

But going after senior citizens, even under the most laudable circumstances, is a political torment for members of Congress.

The most recent example was the about-face on the catastrophic health insurance program for the elderly. Passed with great fanfare in 1988, the program was killed a year later after a deluge of protest over a large increase in premiums that affected only the wealthiest.

Budget negotiators tinkered with both Social Security and Medicare in the budget agreement, raising the maximum income subject to the Social Security tax to $53,400, increasing the monthly Medicare premium from $28.60 this year to $46.10 in 1996 and increasing the deductible from $75 to $100.

But these changes were across the board, affecting equally the wealthiest of retirees and those struggling to spread what little they have to cover food, housing - and health care.

There already is one means-test for Social Security recipients. As much as half of Social Security benefits are taxable for a couple making over $32,000 (a single person getting $25,000) in unearned income. The benefits of those who make less are not taxed.

The budget negotiators considered, but discarded as politically too hot, an increase in taxes on benefits, a reduction in the cost-of-living increases, as well as several other options.

Rudman, however, wants more of the Social Security taxes subject to tax and wants to begin means-testing Medicare, the health insurance program for the elderly.

''There is nothing that makes sense about a Medicare program that treats all seniors alike,'' Rudman said. ''Those with upper incomes should pay for more of their own health care. Those with low amounts of income should pay very little.

''I cannot understand why there is such sensitivity to that kind of an approach,'' he said. ''I happen to believe that the American people would agree that a carefully means-tested program in Social Security and Medicare and other programs will be fair and in the interest of the American people.''

Rudman, who is drafting legislation, said he will introduce it next year, adding if some means-testing can be implemented, ''We need not be back here again two years from now facing budget crisis.''

#90339u1068 12/05/1990 ~United Press International

ATLANTA (DEC. 5) UPI - Running back John Settle, though not prominent on the playing field this year, is being recognized for his efforts elsewhere.

Settle is the Atlanta Falcons nominee for the Travelers NFL Man of the Year award for his contributions to the community.

Although Settle - the former Pro Bowler who became the first free agent to rush for 1,000 yards since the league merger in 1970 - has only carried the ball five times this year, he has been active in several charitable causes in the Atlanta area.

Settle supports the sudden infant death syndrome organization, lectures youth on the dangers of drug abuse and works with Georgia TEAM (Techniques for Effective Alcohol Management. The running back appeared in a video for youngsters about the dangers of drug abuse, and he often speaks for the Drug Enforcement Agency.

Settle also is involved with Dunbar Elementary School, the Falcons' ''adopted'' school.

''We believe it is important to honor these men whose athletic and civic accomplishments have such a positive effect on America's youth,'' said Edward H. Budd, Travelers Chairman and Chief Executive Officer.

For the honor, a check for $1,000 is being sent in Settle's name to the Sudden Infant Death Syndrome of Atlanta Foundation.

At year's end, the Travelers will select the NFL Man of the Year from among the 28 entrants. That player will receive the famed gladiator trophy, and $25,000 will be donated to the charity of his choice.

#90339u1099 12/05/1990 ~United Press International

ROMULUS, MI (DEC. 5) UPI - ''You're on 21 Center? Exit that runway immediately, sir!''

Those frantic words concluded a chaotic exchange between the control tower at Detroit Metropolitan Airport and the pilot of a Northwest Airlines DC-9 that strayed onto the wrong runway during heavy fog Monday afternoon.

Eight people were killed and 24 injured when a larger jet clipped the DC-9's wing, igniting a fire that spread like a fireball through the cabin. The victims included three International Paper Co. executives and a veteran Northwest Airlines flight attendant.

At a news briefing Wednesday, Frank Lauber, head of the National Transportation Safety Board team investigating the accident, said there was no doubt the pilot of Flight 1482 somehow became disoriented and ended up on the runway where Northwest flight 299 was preparing to take off.

The Boeing 727-200 tore into the side of the DC-9, ripped off an engine and touched off the fire the fatal fire.

''In regard to that taxi, and in regard to where they were, they did report that in the last few moments just before the accident ... that they were aware at that point that they were on the runway ... and saw the 727 proceeding toward them, and from then on events proceeded very rapidly,'' Lauber said.

When they learned the DC-9's position, surprised controllers warned pilot William Lovelace to get off the runway immediately, according to a transcript of the tapes.

But by that time, Lovelace, on his first unsupervised flight since ending a five-year medical leave, told investigators he could see the 727-200 as it thundered toward him.

The tape indicates that Lovelace, 52, and his first officer, James Schiffern, 43, were confused about where they were as they groped along the 8,500-foot runway.

The tower asked the crew to ''verify position.''

''We're not sure,'' one of the crewmen radioed back. ''It's so foggy out here. We're completely stuck here.''

After a pause, the DC-9 radioed again: ''Looks like we're on 21 Center here. That would be dangerous - the take-off runway.''

Tower: ''You say you are on Runway 21 Center?''

DC-9: ''Believe we are. We're not sure.''

Tower: ''You're on Runway 21 Center? Exit that runway immediately, sir!''

Arriving at the crash site Tuesday, the 70-member NTSB team began piecing together information from the fire-gutted DC-9 and less severely damaged Boeing 727, then hauled both aircraft into a hangar.

The cockpit voice recorder and flight data recorder from each airplane were recovered from the scene of Monday's crash and flown to Washington, D.C., for analysis.

Northwest Chairman Alfred Checchi, in his first comment since the crash, Tuesday called a meeting with injured victims a ''very draining'' experience. He said he visited airline employees Tuesday, and seven of the eight people still hospitalized ''to assure them of our assistance today and long into the future.''

''As tragic as this accident is, many lives were saved by the immediate actions of the crew members aboard the aircraft,'' he said.

WASHINGTON (DEC. 5) UPI - Secretary of State James Baker, who is expected to meet with Iraq's Saddam Hussein, told Congress Wednesday his mission to Baghdad will not be to negotiate but to tell Saddam to comply with the 12 U.N. resolutions or ''risk disaster for Iraq.''

''I must go to Baghdad ... with the full support of the Congress and the American people behind the message of the international community,'' Baker told the Senate Foreign Affairs Committee.

''Let me be clear,'' Baker said. ''This meeting will not be the beginning of a negotiation over the terms of the U.N. resolutions. Those terms are clear, a complete, immediate and unconditional withdrawal from Kuwait, the restoration of the legitimate Kuwaiti government and the release of all foreign nationals.

''Nor is this the beginning of negotiations on subjects which are unrelated to Iraq's brutal occupation of Kuwait,'' Baker said. ''I will not be negotiating the Palestinian question or the civil war in Lebanon. Saddam Hussein did not invade Kuwait to help the Palestinians; he did it for his own self-aggrandizement.''

Baker told the panel his mission to Baghdad ''will be an attempt to explain to

Saddam the choice he faces: Comply with the objectives of the (U.N.) Security Council or risk disaster for Iraq.''

Baker said President Bush has directed himself, Secretary of Defense Dick Cheney and Colin Powell, chairman of the Joint Chiefs of Staff, ''to work with the other members of the international coalition to refinforce the multinational force in the gulf and to coordinate its efforts. Our aim is to ensure that if force must be used, it will be used suddenly, massively and decisively.''

Last Friday, Bush offered to send Baker to Baghdad for talks with Saddam and said he would be willing to see Iraq's foreign minister in Washington. Bush's widely hailed invitation was accepted and the Iraqi official was expected to visit Washington as early as next week.

At a news conference in Buenos Aires, Bush told reporters he viewed the upcoming talks with Iraqi officials as ''confined by, mandated by the Security Council resolutions, period. That means no concessions on territory.'' He said that he does not ''view these talks as having anything to do about concessions that stop short of the U.N. resolutions.''

CIA Director William Webster told the House Armed Services Committee Wednesday that there is no guarantee that economic sanctions will force Saddam to get out of Kuwait or cause enough domestic unrest to topple his dictatorship.

''Our judgment has been and continues to be that there is no assurance or guarantee that economic hardships will compel Saddam to change his policies or lead to internal unrest that would threaten his regime,'' Webster said.

Baker's testimony follows appearances before the Senate Armed Services Committee by Cheney and Powell. Cheney said that sanctions alone will not be enough to prompt an Iraqi withdrawal from Kuwait. Bush, traveling in Latin America, said he agreed with his Pentagon chief.

''I've not been the one who's convinced that sanctions alone will do the trick '' Bush said Tuesday.

On Tuesday, House Democrats strongly endorsed Bush's handling of the Persian Gulf crisis, but they also demanded that Bush seek a declaration from Congress before going to war, unless he needs to protect U.S. lives.

On a vote of 177-37, House Democrats meeting in a caucus as a prelude to the 102nd Congress convening in January, declared that they ''support the actions taken by President Bush to defend Saudi Arabia,'' his demand that Saddam leave Kuwait, and that they back Bush's diplomatic moves.

But the measure added, ''No initiation of offensive military action shall be taken by U.S. forces in the Persian Gulf without the affirmative approval of

Congress as required (by the Constitution) except to protect American lives from imminent endangerment.''

The vote came as congressional committees continued hearings on gulf policy.

Chairman Les Aspin, D-Wis., of the House Armed Services Committee, at the opening of three weeks of hearings by his panel, declared, ''The country is united on ends but divided on means. ... There is disagreement on how we ought to deal with this crisis. Action that isn't backed by consensus will mean disaster. Whatever we do, the country, the Congress and the president must do it standing on common ground.''

LONDON (DEC. 5) UPI - Stock prices closed slightly higher in listless trading Wednesday on the London International Stock Exchange, constrained by sell programs with attention focusing on a government privatization.

Stocks also gained in Frankfurt. Trading was described as moderate.

London's blue-chip Financial Times 100-stock index, which fell 16.4 points Tuesday, gained 6.3 points to 2,152.6. The narrower top 30 industrial average added 8.0 points to 1,689.6.

Volume amounted to around 520 million shares compared with 473 million shares traded during the same period Tuesday.

Analysts said stocks, which opened slightly lower, firmed amid some program trades and overseas buying.

Market watchers blamed much of the wariness on a $193 million sell program by securities house Smith New Court, and a series of ''bed and breakfast'' deals, under which investors temporarily unloaded stocks to securities houses.

Meanwhile, the financial district focused heavily on the privatization of the electricity companies. Trading is expected to begin at a premium on Tuesday, Dec. 11.

On the corporate news front, among the most widely traded stocks, Bass, the brewery group, surged 50 cents to $19.41 after reporting its latest pretax profits climbed 15 percent to $1 billion.

Advertising and marketing giant Saatchi and Saatchi eased 4 cents to 66 cents on worse-than-expected results and worries that there might be a cash call on the horizon.

Reuters PLC slipped 21 cents to $11.36. The news and information agency said

Tuesday in a meeting with analysts in New York it would be ''reasonably satisfied'' with growth in 1991.

On the Frankfurt Stock Exchange, the closely watched German Stock Index, which fell 16.24 points Tuesday, rebounded 24.62 points to 1,470. 96.

Analysts said the unconfirmed report on British television that Iraq would agree to withdrawing from Kuwait except for a critical oil field was the dominant psychological factor pushing prices higher.

(DEC. 5) UPI - Secretary of State Baker says his mission to Baghdad will NOT be to negotiate with Iraq... but to tell President Saddam to comply with the 12 U-N resolutions or ''risk disaster for Iraq.'' Baker told the Senate Foreign Affiars Committee today that his upcoming meeting in Baghdad also is NOT the beginning of bargaining over issues NOT related to the occupation of Kuwait. Baker says that includes the Palestinian question and civil war in Lebanon.

Former Texas Governor John Connally and Coastal Corporation Chairman Oscar Wyatt are in Iraq to seek freedom for American hostages. Wyatt is a millionaire Houston oilman who has been one of Baghdad's best oil customers, though Coastal has NO employees held by Iraq. Wyatt and Connally took a planeload of medical supplies they hoped to use in negotiations with Iraq.
